Hall

Contents

<i>Preface</i>	viii
<i>Acknowledgements</i>	xi
1 How do Humans Impact Aquatic Systems?	1
1.1 Introduction	1
1.2 Definitions	2
1.3 What do aquatic systems provide?	3
1.4 The need for understanding	4
1.5 Key ecological concepts	7
1.6 Biological diversity	16
1.7 Ecological functioning	17
1.8 Summary	20
2 Human Use of Water	23
2.1 Introduction	23
2.2 The river basin as an ecological unit	26
2.3 Effect of dams and barrages	28
2.4 Effect of channelisation	34
2.5 Effect of extraction	38
2.6 Effects of boat transport	42
2.7 Translocation	43
2.8 Sustainability	54
2.9 Summary	54
3 Biological Basis for Harvesting Living Organisms	59
3.1 Introduction	59
3.2 Production	59

3.3	Energy transfer	65
3.4	Population growth	66
3.5	Maximum sustainable yield	69
3.6	Fisheries models	71
3.7	Problems with applying theory	75
3.8	Unsustainable harvesting	77
3.9	Summary	79
4	Harvesting for Economic Gain	81
4.1	Introduction	81
4.2	Fish and shellfish fisheries	82
4.3	Impacts of fisheries on ecosystems	93
4.4	Collecting intertidal shellfish	96
4.5	Other living organisms	100
4.6	Biodiversity	104
4.7	Sustainability	107
4.8	Summary	114
5	Aquaculture and Ranching	115
5.1	Introduction	115
5.2	The biological basis for aquaculture	120
5.3	Aquaculture of fish	122
5.4	Aquaculture of invertebrates	126
5.5	Aquaculture of plants and algae	129
5.6	Polyculture	130
5.7	Ranching	131
5.8	Interactions between aquaculture and the environment	137
5.9	Summary	139
6	Waste Disposal in the Aquatic Environment	143
6.1	Introduction	143
6.2	Biodegradable wastes	148
6.3	Accumulating toxic wastes	154
6.4	Inert solids	161
6.5	Heat	164
6.6	Acidification	166
6.7	Cleaning up pollution	167
6.8	Summary	178
7	Extracting Mineral Resources from the Aquatic Environment	179
7.1	Introduction	179
7.2	Sand and gravel dredging	180
7.3	Peat extraction	185
7.4	Manganese nodules	188
7.5	Oil exploration and production	189

7.6	Salt extraction	191
7.7	Summary	192
8	Exploiting the General Aquatic Environment for Recreation	193
8.1	Introduction	193
8.2	Impact of disturbance	194
8.3	Recreational harvesting	204
8.4	Conservation, ecotourism and habitat creation	213
8.5	Summary	215
9	The Role of Ecological Science in Managing the Exploitation of Aquatic Systems	219
9.1	Introduction	219
9.2	Monitoring the environment	220
9.3	Assessing recovery	229
9.4	The place of science in environmental management	231
9.5	Looking to the future – sustainability and biodiversity issues	236
9.6	Concluding thoughts	237
9.7	Summary	238
	<i>References</i>	239
	<i>Glossary</i>	258
	<i>Organism Index</i>	265
	<i>Subject Index</i>	270
