| Chapter 2 | Software: Its Nature and Qualities  | 15 |
|-----------|---|----|
|           | 2.1 Classification of Software Qualities                                      | 16 |
|           | 2.1.1 External Versus Internal Qualities                                      | 16 |
|           | 2.1.2 Product and Process Qualities   | 16 |
|           | 2.2 Representative Qualities  | 17 |
|           | 2.2.1 Correctness, Reliability, and Robustness                                | 17 |
|           | 2.2.2 Performance   | 20 |
|           | 2.2.3 Usability   | 22 |
|           | 2.2.4 Verifiability   | 23 |
|           | 2.2.5 Maintainability   | 23 |
|           | 2.2.6 Reusability   | 26 |
|           | 2.2.7 Portability   | 28 |
|           | 2.2.8 Understandability   | 28 |
|           | 2.2.9 Interoperability  | 29 |
|           | 2.2.10 Productivity   | 30 |
|           | 2.2.11 Timeliness   | 30 |
|           | 2.2.12 Visibility   | 32 |
|           | 2.3 Quality Requirements in Different Application Areas                       | 33 |
|           | 2.3.1 Information Systems   | 33 |
|           | 2.3.2 Real-Time Systems   | 34 |
|           | 2.3.3 Distributed Systems   | 36 |
|           | 2.3.4 Embedded Systems  | 36 |
|           | 2.4 Measurement of Quality  | 37 |
|           | 2.5 Concluding Remarks  | 38 |
|           | Further Exercises   | 38 |
|           | Hints and Sketchy Solutions   | 39 |
|           | Bibliographic Notes   | 39 |
| Chapter 3 | Software Engineering Principles.  | 41 |
|           | 3.1 Rigor and Formality   | 42 |
|           | 3.2 Separation of Concerns  | 44 |
|           | 3.3 Modularity  | 47 |
|           | 3.4 Abstraction   | 49 |
|           | 3.5 Anticipation of Change  | 50 |
|           | 3.6 Generality  | 52 |
|           | 3.7 Incrementality  | 53 |
| •         | 3.8 Two Case Studies Illustrating Software Engineering Principles             | 54 |
|           | 3.8.1 Application of Software Engineering Principles to Compiler Construction | 54 |
|           | 3.8.2 A Case Study in System Engineering                                      | 59 |
|           | 3.9 Concluding Remarks  | 64 |
|           | Further Exercises   | 65 |

|           |           | Contents  | vii |
|-----------|-----------|---|-----|
|           |           | Hints and Sketchy Solutions                                     | 65  |
|           |           | Bibliographic Notes   | 66  |
| Chapter 4 | Design a  | and Software Architecture                                       | 67  |
|           | 4.1       | The Software Design Activity and its Objectives                 | 70  |
|           | 4.1.1     | Design for Change   | 72  |
|           | 4.1.2     | Product Families  | 76  |
|           | 4.2       | Modularization Techniques                                       | 78  |
|           | 4.2.1     | The Module Structure and its Representation                     | 79  |
|           | 4.2.2     | Interface, Implementation, and Information Hiding               | 86  |
|           | 4.2.3     | Design Notations  | 93  |
|           | 4.2.4     | Categories of Modules   | 100 |
|           | 4.2.5     | 1 1   | 108 |
|           | 4.2.6     | Stepwise Refinement   | 111 |
|           | 4.2.7     | ,   | 117 |
|           | 4.3       | Handling Anomalies  | 118 |
|           | 4.4       | A Case Study in Design  | 121 |
|           | 4.5       | Concurrent Software   | 124 |
|           |           | Shared Data   | 124 |
|           |           | Real-Time Software  | 132 |
|           | 4.5.3     | Distributed Software  | 134 |
|           | 4.6       | Object-Oriented Design  | 139 |
|           |           | Generalization and Specialization                               | 140 |
|           |           | Associations  | 143 |
|           | 4.6.3     | Aggregation   | 145 |
|           | 4.6.4     | <b>S</b>  | 146 |
|           | 4.7       | Architecture and Components                                     | 146 |
|           | 4.7.1     |   | 147 |
|           |           | Software Components   | 149 |
|           |           | Architecture as Framework for Component Integration             | 152 |
|           | 4.7.4     | •   | 153 |
|           | 4.8       | Concluding Remarks  | 154 |
|           |           | Further Exercises   | 156 |
|           |           | Hints and Sketchy Solutions                                     | 158 |
|           |           | Bibliographic Notes   | 159 |
| Chapter 5 | Specifica | ation   | 161 |
| •         | 5.1       | The Uses of Specifications                                      | 162 |
|           | 5.2       | Specification Qualities   | 165 |
|           | 5.3       | Classification of Specification Styles                          | 167 |
|           | 5.4       | Verification of Specifications                                  | 170 |
|           | 5.5       | Operational Specifications                                      | 171 |
|           | 5.5.1     | Data Flow Diagrams: Specifying Functions of Information Systems | 171 |

## viii Contents

|           | 5.5.2 UML Diagrams for Specifying Behaviors  | 177        |
|-----------|--|------------|
|           | 5.5.3 Finite State Machines: Describing Control Flow   | 179        |
|           | 5.5.4 Petri Nets: Specifying Asynchronous Systems  | 185        |
|           | 5.6 Descriptive Specifications   | 210        |
|           | 5.6.1 Entity-Relationship Diagrams   | 210        |
|           | 5.6.2 Logic Specifications   | 213        |
|           | 5.6.3 Algebraic Specifications   | 229        |
|           | 5.7 Building and Using Specifications in Practice  | 236        |
|           | 5.7.1 Requirements for Specification Notations   | 236        |
|           | 5.7.2 Building Modular Specifications  | 240        |
|           | 5.7.3 Specifications for the End User  | 257        |
|           | Concluding Remarks   | 258        |
|           | Further Exercises  | 259        |
|           | Hints and Sketchy Solutions  | 262        |
|           | Bibliographic Notes  | 266        |
| Chapter 6 | Verification   | 269        |
| Citapia o |  |            |
|           | 6.1 Goals and Requirements of Verification   | 270        |
|           | 6.1.1 Everything Must Be Verified  | 271        |
|           | 6.1.2 The Results of Verification May Not Be Binary  | 271        |
|           | 6.1.3 Verification May Be Objective or Subjective  | 272        |
|           | 6.1.4 Even Implicit Qualities Must Be Verified   | 273        |
|           | 6.2 Approaches to Verification   | 274        |
|           | 6.3 Testing  | 274        |
|           | 6.3.1 Goals for Testing  | 275        |
|           | 6.3.2 Theoretical Foundations of Testing   | 277        |
|           | 6.3.3 Empirical Testing Principles   | 280        |
|           | 6.3.4 Testing in the Small   | 282        |
|           | 6.3.5 Testing in the Large   | 302        |
|           | 6.3.6 Separate Concerns in the Testing Activity 6.3.7 Testing Concurrent and Real-Time Systems | 312        |
