QUANTITATIVE ANALYSIS FOR MANAGEMENT
SEVENTH EDITION
BARRY RENDER
RALPH M. STAIR, JR.
www.prenhall.com/render

Preface xix

CHAPTER 1 Introduction to Quantitative Analysis 1

1.1 Introduction 2

1.2 What Is Quantitative Analysis? 2

1.3 The Quantitative Analysis Approach 2

Defining the Problem 3
Developing a Model 3
Acquiring Input Data 4
Developing a Solution 5
Testing the Solution 5
Analyzing the Results and Sensitivity Analysis 5
Implementing the Results 6
The QA Approach and Modeling in the Real World 7

1.4 How To Develop A Quantitative Analysis Model 7

The Advantages of Mathematical Modeling 8
Mathematical Models Categorized by Risk 9

1.5 The Role of Computers and Spreadsheet Models in the Quantitative Analysis Approach 9

1.6 Possible Problems in the QA Approach 12

Defining the Problem 13
Developing a Model 13
Acquiring Input Data 14
Developing a Solution 14
Testing the Solution 15
Analyzing the Results 15

1.7 Implementation—Not Just the Final Step 16

Lack of Commitment and Resistance to Change 16
Lack of Commitment by Quantitative Analysts 16
Summary 17 Glossary 17 Key Equations 17 Self-Test 18 Discussion Questions 19 Bibliography 19

SUPPLEMENT 1 Game Theory 21

S1.1 Introduction 22

S1.2 Language of Games 22

S1.3 Pure Strategy Games 24

S1.4 Minimax Criterion 25

S1.5 Mixed Strategy Games 25

S1.6 Dominance 29

Summary 31 Glossary 31 Solved Problems 31 Self-Test 33 Discussion Questions and Problems 34 Data Set Problem 36 Bibliography 37

Appendix S1.1 Game Theory with QM for Windows 37

CHAPTER 2 Probability Concepts and Applications 39

2.1 Introduction 40

2.2 Fundamental Concepts 41

Types of Probability 42

2.3 Mutually Exclusive and Collectively Exhaustive Events 43

Adding Mutually Exclusive Events 44
Law of Addition for Events That Are Not Mutually Exclusive 45

2.4 *Statistically Independent Events 45*

2.5 *Statistically Dependent Events 47*

2.6 *Revising Probabilities with Bayes' Theorem 48*

General Form of Bayes' Theorem 50

2.7 *Further Probability Revisions 51*

2.8 *Random Variables 52*

2.9 *Probability Distributions 54*

Probability Distribution of a Discrete Random Variable 54
Expected Value of a Discrete Probability Distribution 55
Variance of a Discrete Probability Distribution 56
Probability Distribution of a Continuous Random Variable 57

2.10 *The Normal Distribution 58*

Area Under the Normal Curve 58
Using the Standard Normal Table 60
Haynes Construction Company Example 63

2.11 *The Exponential Distribution 66*

2.12 *The Poisson Distribution 66*

Summary 67 Glossary 68 Key Equations 69 Solved Problems 70 Self-Test 73 Discussion Questions and Problems 74 Case Study: Century Chemical Company 79 Bibliography 80

Appendix 2.1 Derivation of Bayes' Theorem 80

CHAPTER 3 Fundamentals of Decision Theory Models 81

3.1 *Introduction 82*

3.2 *The Six Steps in Decision Theory 82*

3.3 *Types of Decision-Making Environments 84*

3.4 *Decision Making Under Risk 85*

Expected Monetary Value 85
Expected Value of Perfect Information 87
Opportunity Loss 88
Sensitivity Analysis 89

3.5 *Decision Making Under Uncertainty 90*

Maximax 90
Maximin 91
Equally Likely (Laplace) 91
Criterion of Realism (Hurwicz Criterion) 92
Minimax 93
Using Excel QM to Solve Decision Theory Problems 93

3.6 *Marginal Analysis with a Large Number of Alternatives and States of Nature 95*

Marginal Analysis with Discrete Distributions 95
Marginal Analysis with the Normal Distribution 98

Summary 100 Glossary 100 Key Equations 101 Solved Problems 101 Self-Test 104 Discussion Questions and Problems 105 Data Set Problem 111 Case Study: Starting Right Corporation 112 Case Study: Ski Right 113 Bibliography 114

Appendix 3.1 Decision Theory with QM for Windows 114

CHAPTER 4 Decision Trees and Utility Theory 117

4.1 *Introduction 118*

4.2 *Decision Trees 118*

A More Complex Decision for Thompson Lumber 119
Expected Value of Sample Information 123
Using TreePlan to Solve the Thompson Lumber Problem 124

4.3 *How Probability Values Are Estimated by Bayesian Analysis 125*

Calculating Revised Probabilities 126
Potential Problem in Using Survey Results 128

4.4 *Utility Theory 129*

Measuring Utility and Constructing a Utility Curve 129
Utility as a Decision-Making Criterion 132

4.5 *Sensitivity Analysis 134*

Summary 135 Glossary 135 Key Equations 136 Solved Problems 136 Self-Test 141 Discussion Questions and Problems 142 Data Set Problem 149 Case Study: Blake Electronics 150 Internet Case Studies 152 Bibliography 152

Appendix 4.1 Decision Trees with QM for Windows 152

Appendix 4.2 Using TreePlan to Solve Decision Tree Problems 153

CHAPTER 5 Forecasting 155

5.1 Introduction 156

5.2 Types of Forecasts 156

Time-Series Models 157
Causal Models 157
Qualitative Models 157

5.3 Scatter Diagrams 158

5.4 Time-Series Forecasting Models 159

Decomposition of a Time Series 159
Moving Averages 161
Exponential Smoothing 163
Trend Projections 169
Seasonal Variations 173

5.5 Causal Forecasting Methods 176

Using Regression Analysis to Forecast 176
Standard Error of the Estimate 178
Correlation Coefficients for Regression Lines 180
Multiple Regression Analysis 181

5.6 Monitoring and Controlling Forecasts 182

Adaptive Smoothing 184

5.7 Using the Computer to Forecast 184

Summary 185 Glossary 185 Key Equations 186 Solved Problems 187 Self-Test 190 Discussion Questions and Problems 191 Data Set Problem 197 Case Study: North–South Airline 198 Case Study: Akron Zoological Park 199 Internet Case Studies 200 Bibliography 200

Appendix 5.1 Forecasting with QM for Windows 200

CHAPTER 6 Inventory Control Models 203

6.1 Introduction 204

6.2 Importance of Inventory Control 205

Decoupling Function 205
Storing Resources 205
Irregular Supply and Demand 205
Quantity Discounts 206
Avoiding Stockouts and Shortages 206

6.3 Inventory Decisions 207

6.4 Economic Order Quantity (EOQ): Determining How Much to Order 208

Inventory Costs 209
Finding the Economic Order Quantity 210
Sumco Pump Company Example 211
Purchase Cost of Inventory Items 212

6.5 Reorder Point: Determining When to Order 214

6.6 EOQ Without the Instantaneous Receipt Assumption 215

Determining the Annual Carrying Cost 216
Finding the Annual Setup Cost or the Annual Ordering Cost 216
Determining the Optimal Order Quantity and Production Quantity 217
Brown Manufacturing 217

6.7 Quantity Discount Models 220

6.8 Use of Safety Stock 223

Reorder Point with Known Stockout Costs 225
Safety Stock with Unknown Stockout Costs 228

6.9 ABC Analysis 231

6.10 Sensitivity Analysis 232

Summary 233 Glossary 234 Key Equations 234 Solved Problems 235 Self-Test 238 Discussion Questions and Problems 239 Data Set Problems 246 Case Study: Sturdivant Sound Systems 247 Case Study: Martin–Pullin Bicycle Corporation 248 Case Study: Professional Video Management 248 Internet Case Studies 250 Bibliography 250

Appendix 6.1 Inventory Control with QM for Windows 250

CHAPTER 7 Linear Programming Models: Graphical and Computer Methods 253

7.1 Introduction 254

7.2 Requirements of a Linear Programming Problem 254

Basic Assumptions of LP 255

7.3 Formulating Linear Programming Problems 256

Flair Furniture Company 256

7.4 Graphical Solution to a Linear Programming Problem 257

Graphical Representation of Constraints 257
Isoprofit Line Solution Method 263
Corner Point Solution Method 266

7.5 Solving Flair Furniture's LP Problem Using QM for Windows and Excel 267

Using QM for Windows 267
Using Excel's Solver Command to Solve LP Problems 268

7.6 Solving Minimization Problems 269

Holiday Meal Turkey Ranch 271

7.7 Summary of the Graphical Solution Methods 275

7.8 Four Special Cases in Linear Programming 277

Infeasibility 277
Unboundedness 278
Redundancy 278
Alternate Optimal Solutions 279

7.9 Sensitivity Analysis 280

High Note Sound Company 281
Using QM for Windows for Sensitivity Analysis 284
Using Excel for Sensitivity Analysis 284
Summary 287 Glossary 287 Solved Problems 288 Self-Test 292 Discussion Questions and Problems 293 Case Study: Mexicana Wire Works 301 Internet Case Studies 302 Bibliography 303

CHAPTER 8 Linear Programming Modeling Applications: With Computer Analyses in Excel and QM for Windows 305

8.1 Introduction 306

8.2 Marketing Applications 306

Media Selection 306
Marketing Research 307

8.3 Manufacturing Applications 310

Production Mix 310
Production Scheduling 312

8.4 Employee Scheduling Applications 316

Assignment Problems 316
Labor Planning 318

8.5 Financial Applications 320

Portfolio Selection 320

8.6 Transportation Applications 321

Shipping Problem 321
Truck Loading Problem 324

8.7 Ingredient Blending Applications 326

Diet Problems 326
Ingredient Mix and Blending Problems 327
Summary 329 Self-Test 330 Problems 331 Case Study: Red Brand Canners 340 Case Study: Chase Manhattan Bank 342 Bibliography 343

CHAPTER 9 Linear Programming: The Simplex Method 345

9.1 Introduction 346

9.2 How to Set Up the Initial Simplex Solution 346

Converting the Constraints to Equations 347
Finding an Initial Solution Algebraically 348
The First Simplex Tableau 348

9.3 Simplex Solution Procedures 352

9.4 The Second Simplex Tableau 352

Interpreting the Second Tableau 355

9.5 *Developing the Third Tableau 357*
9.6 *Review of Procedures for Solving LP Maximization Problems 360*
9.7 *Surplus and Artificial Variables 360*
Surplus Variables 361
Artificial Variables 361
Surplus and Artificial Variables in the Objective Function 362
9.8 *Solving Minimization Problems 362*
Graphical Analysis 363
Converting the Constraints and Objective Function 364
Rules of the Simplex Method for Minimization Problems 365
First Simplex Tableau for the Muddy River Chemical Corporation Problem 365
Developing a Second Tableau 367
Developing a Third Tableau 368
Fourth Tableau for the Muddy River Chemical Corporation Problem 370
9.9 *Review of Procedures for Solving LP Minimization Problems 371*
9.10 *Special Cases 372*
Infeasibility 372
Unbounded Solutions 372
Degeneracy 373
More Than One Optimal Solution 374
9.11 *Sensitivity Analysis with the Simplex Tableau 375*
High Note Sound Company Revisited 375
Changes in the Objective Function Coefficients 376
Changes in Resources or Right-Hand-Side Values 378
Sensitivity Analysis by Computer 380
9.12 *The Dual 381*
Dual Formulation Procedures 382
Solving the Dual of the High Note Sound Company Problem 382
9.13 *Karmarkar's Algorithm 384*
Summary 384 Glossary 385 Key Equation 386 Solved Problems 386 Self-Test 391 Discussion Questions and Problems 392 Data Set Problem 403 Case Study: Coastal States Chemicals and Fertilizers 404 Bibliography 405

CHAPTER 10 Transportation and Assignment Models 407

10.1 *Introduction 408*
Transportation Model 408
Assignment Model 408
Special-Purpose Algorithms 408
10.2 *Setting Up a Transportation Problem 409*
10.3 *Developing an Initial Solution: Northwest Corner Rule 411*
10.4 *Stepping-Stone Method: Finding a Least-Cost Solution 413*
Testing the Solution for Possible Improvement 414
Obtaining an Improved Solution 416
10.5 *MODI Method 421*
How to Use the MODI Approach 421
Solving the Executive Furniture Corporation Problem with MODI 422
10.6 *Vogel's Approximation Method: Another Way to Find an Initial Solution 424*
10.7 *Unbalanced Transportation Problems 427*
Demand Less Than Supply 427
Demand Greater Than Supply 428
10.8 *Degeneracy in Transportation Problems 430*
Degeneracy in an Initial Solution 430
Degeneracy during Later Solution Stages 431
10.9 *More Than One Optimal Solution 432*
10.10 *Facility Location Analysis 432*
Locating a New Factory for Hardgrave Machine Company 433
10.11 *Approach of the Assignment Model 436*
The Hungarian Method (Flood's Technique) 437
Making the Final Assignment 441

10.12 Dummy Rows and Dummy Columns 442

10.13 Maximization Assignment Problems 442

Glossary 446 Key Equations 446 Solved Problems 447 Self-Test 452 Discussion Questions and Problems 453 Data Set Problems 464 Case Study: Andrew-Carter, Inc. 465 Case Study: Custom Vans, Inc. 466 Case Study: Old Oregon Wood Store 468 Internet Case Studies 469 Bibliography 469

Appendix 10.1 Using QM For Windows 469

CHAPTER 11 Integer Programming, Goal Programming, Nonlinear Programming, and Branch and Bound Models 473

11.1 Introduction 474

11.2 Integer Programming 474

Harrison Electric Company Example of Integer Programming 474
Cutting Plane Method 476
Using Software to Solve the Harrison Integer Programming Problem 478
Types of Integer Programming Problems 478
Mixed-Integer Programming Problem Example 480
Zero-One Integer Programming Problem Example 482

11.3 Branch and Bound Method 483

Assignment Problem Example 484
Solving an Integer Programming Problem with Branch and Bound 488
Harrison Electric Company Revisited 488

11.4 Goal Programming 491

Example of Goal Programming: Harrison Electric Company Revisited 492
Extension to Equally Important Multiple Goals 493
Ranking Goals 494
Solving Goal Programming Problems Graphically 495
Modified Simplex Method for Goal Programming 498

11.5 Nonlinear Programming 501

Nonlinear Objective Function and Linear Constraints 502
Both Nonlinear Objective Function and Nonlinear Constraints 502
Linear Objective Function with Nonlinear Constraints 504
Computational Produres for Nonlinear Programming 506

Summary 506 Glossary 506 Solved Problems 507 Self-Test 509 Discussion Questions and Problems 510 Data Set Problem 514 Case Study: Schank Marketing Research 515 Case Study: Oakton River Bridge 516 Case Study: Puyallup Mall 516 Bibliography 518

SUPPLEMENT 11 Analytic Hierarchy Process 519

S11.1 Introduction 520

S11.2 Multifactor Evaluation Process 520

S11.3 Analytic Hierarchy Process 521

Judy Grim's Computer Decision 522
Using Pairwise Comparisons 523
Evaluations for Hardware 525
Determining the Consistency Ratio 525
Evaluations for the Other Factors 527
Determining Factor Weights 528
Overall Ranking 528
Using the Computer to Solve AHP Problems 529

S11.4 Comparison of MFEP and AHP 529

Summary 530 Glossary 531 Key Equations 531 Solved Problems 531 Self-Test 533 Discussion Questions and Problems 534 Bibliography 536

CHAPTER 12 Network Models 537

12.1 Introduction 538

12.2 Minimal-Spanning Tree Technique 538

12.3 Maximal-Flow Technique 542

12.4 Shortest-Route Technique 545

Summary 549 Glossary 549 Solved Problems 549 Self-Test 553

Discussion Questions and Problems 554 Data Set Problem 560 Case Study: Ranch Development Project 561 Case Study: Binder's Beverage 563 Bibliography 564

Appendix 12.1 Network Models with QM for Windows 564

CHAPTER 13 Project Management 567

13.1 Introduction 568

Framework of PERT and CPM 568

13.2 PERT 569

General Foundry Example of PERT 569
Drawing the PERT Network 571
Activity Times 572
How to Find the Critical Path 573
Probability of Project Completion 578
What PERT Was Able to Provide 581
Dummy Activities in PERT 581
Sensitivity Analysis and Project Management 581

13.3 PERT/Cost 583

Planning and Scheduling Project Costs: Budgeting Process 584
Monitoring and Controlling Project Costs 586

13.4 Critical Path Method 589

Project Crashing with CPM 589
Project Crashing with Linear Programming 591

Summary 593 Glossary 594 Key Equations 595 Solved Problems 595 Self-Test 598 Discussion Questions and Problems 599 Data Set Problem 607 Case Study: Haygood Brothers Construction Company 608 Case Study: Family Planning Research Center of Nigeria 610 Internet Case Studies 611 Bibliography 611

Appendix 13.1 Project Management with QM for Windows 612

CHAPTER 14 Waiting Lines and Queuing Theory Models 615

14.1 Introduction 616

14.2 Waiting Line Costs 616

14.3 Characteristics of a Queuing System 618

Arrival Characteristics 618
Waiting Line Characteristics 620
Service Facility Characteristics 620

14.4 Single-Channel Queuing Model with Poisson Arrivals and Exponential Service Times 623

Assumptions of the Model 624
Queuing Equations 624
Arnold's Muffler Shop Case 625

14.5 Multiple-Channel Queuing Model with Poisson Arrivals and Exponential Service Times 629

Equations for the Multichannel Queuing Model 629
Arnold's Muffler Shop Revisited 630

14.6 Constant Service Time Model 633

Equations for the Constant Service Time Model 633
Garcia-Golding Recycling, Inc. 634

14.7 Finite Population Model 634

Equations for the Finite Population Model 636
Department of Commerce Example 636

14.8 More Complex Queuing Models and the Use of Simulation 638

Summary 638 Glossary 639 Key Equations 640 Solved Problems 642 Self-Test 645 Discussion Questions and Problems 646 Case Study: New England Castings 651 Case Study: Winter Park Hotel 652 Internet Case Studies 652 Bibliography 653

Appendix 14.1 Using QM for Windows 653

CHAPTER 15 Simulation Modeling 655

15.1 Introduction 656

15.2 Advantages and Disadvantages of Simulation 657

15.3 Monte Carlo Simulation 658

Using QM for Windows for Simulation 663
Simulation with Excel Spreadsheets 664

15.4 Simulation and Inventory Analysis 664

Simkin's Hardware Store 666
Analyzing Simkin's Inventory Costs 670

15.5 Simulation of a Queuing Problem 671

Port of New Orleans 671
Using Excel to Simulate the Port of New Orleans Queuing Problem 673

15.6 Simulation Model for a Maintenance Policy 675

Three Hills Power Company 675
Cost Analysis of the Simulation 678
Building an Excel Simulation Model for Three Hills Power Company 679

15.7 Two Other Types of Simulation Models 679

Operational Gaming 681
Systems Simulation 681

15.8 Role of Computers in Simulation 682

Crystal Ball 683
Summary 683 Glossary 683 Solved Problems 684 Self-Test 687 Discussion Questions and Problems 688 Case Study: Alabama Airlines 697 Case Study: Abjar Transport Company 698 Internet Case Study 699 Bibliography 698

Appendix 15.1 Using the Crystal Ball *Excel Add-In 699*

Installing and Starting *Crystal Ball* 699
Textbook Profitability Analysis Model 699
Steps in Using *Crystal Ball* 701

CHAPTER 16

Markov Analysis 705

16.1 Introduction 706

16.2 States and State Probabilities: Grocery Store Example 706

16.3 Matrix of Transition Probabilities 708

Transition Probabilities for the Three Grocery Stores 708

16.4 Predicting Future Market Shares 709

16.5 Markov Analysis of Machine Operations 710

16.6 Equilibrium Conditions 711

16.7 Absorbing States and the Fundamental Matrix: Accounts Receivable Application 714

Summary 719 Glossary 719 Key Equations 719 Solved Problems 720 Self-Test 724 Discussion Questions and Problems 725 Data Set Problems 728 Case Study: Rentall Trucks 730 Internet Case Studies 731 Bibliography 731

Appendix 16.1 Markov Analysis with QM for Windows 732

APPENDICES

APPENDIX A Areas Under the Standard Normal Curve 736

APPENDIX B Unit Normal Loss Integral 738

APPENDIX C Values of $e^{-\lambda}$ for Use in the Poisson Distribution 740

APPENDIX D Using QM for Windows 741

APPENDIX E Using Excel QM 744

APPENDIX F Solutions to Selected Problems 745

APPENDIX G Solutions to Self-Tests 748

Index 753

CD-ROM MODULES

Module I Statistical Quality Control M1-1

M1.1 Introduction M1-2

M1.2 Defining Quality and TQM M1-2

M1.3 Statistical Process Control M1-3

Variability in the Process M1-3

M1.4 Control Charts for Variables M1-5

The Central Limit Theorem M1-5
Setting $\overline{X}$-Chart Limits M1-6
Setting Range Chart Limits M1-8

M1.5 Control Charts for Attributes M1-9

p-Charts M1-10
c-Charts M1-11
Summary M1-13 Glossary M1-14 Key Equations M1-14 Solved Problems M1-15 Self-Test M-17 Discussion Questions and Problems M1-18 Case Study: Bayfield Mud Company M1-21 Case Study: Morristown Daily Tribune M1-23 Bibliography M1-24

Appendix M1.1 Using QM for Windows for SPC M1-25

Module 2 Dynamic Programming M2-1

M2.1 Introduction M2-2

M2.2 Shortest-Route Problem Solved by Dynamic Programming M2-2

M2.3 Dynamic Programming Terminology M2-5

M2.4 Dynamic Programming Notation M2-7

M2.5 Knapsack Problem M2-9

Types of Knapsack Problems M2-9
Roller's Air Transport Service Problem M2-10
Summary M2-16 Glossary M2-16 Key Equations M2-17 Solved Problem M2-17 Self-Test M2-20 Discussion Questions and Problems M2-21 Case Study: United Trucking M2-24 Internet Case Study M2-24 Bibliography M2-24

Module 3 Decision Theory and the Normal Distribution M3-1

M3.1 Introduction M3-2

M3.2 Break-Even Analysis and the Normal Distribution M3-2

Barclay Brothers New Product Decision M3-2
Probability Distribution of Demand M3-3
Using EMV to Make a Decision M3-5

M3.3 EVPI and the Normal Distribution M3-6

Opportunity Loss Function M3-6
Expected Opportunity Loss M3-7
Summary M3-8 Glossary M3-8 Key Equations M3-8 Solved Problems M3-9 Self-Test M3-10 Discussion Questions and Problems M3-11 Bibliography M3-12

Appendix M3.1 Derivation of the Break-Even Point M3-13

Module 4 Material Requirements Planning and Just-in-Time Inventory M4-1

M4.1 Introduction M4-2

M4.2 Dependent Demand: The Case for Material Requirements Planning M4-2

Material Structure Tree M4-2
Gross and Net Material Requirements Plan M4-3
Two or More End Products M4-6

M4.3 Just-in-Time Inventory Control M4-8

Summary M4-10 Glossary M4-10 Solved Problems M4-10 Self-Test M4-13 Discussion Questions and Problems M4-14 Internet Case Study M4-14 Bibliography M4-15

Module 5 Mathematical Tools: Determinants and Matrices M5-1

M5.1 Introduction M5-2

M5.2 Determinants M5-2

M5.3 Matrices M5-4

Matrix Addition and Subtraction M5-5
Matrix Multiplication M5-5
Matrix Transpose M5-8
Matrix of Cofactors and Adjoint M5-9
Finding the Inverse of a Matrix M5-9
Summary M5-11 Glossary M5-11 Self-Test M5-12 Problems M5-13 Bibliography M5-14

Module 6 The Binomial Distribution M6-1

M6.1 Introduction M6-2

M6.2 Solving Problems with the Binomial Formula M6-2

M6.3 Solving Problems with Binomial Tables M6-4

Discussion Questions and Problems M6-6
Case Study: WTVX M6-6
