<i>Contributors</i>	xxiii
1 Introduction to NDE <i>Peter J. Shull</i>	1
1.1 WHAT IS NONDESTRUCTIVE EVALUATION?	1
1.2 NDE: WHAT'S IN A NAME?	2
1.3 HOW IS NDE APPLIED?	3
1.4 UNDERSTANDING THE NDE CHOICES	7
1.5 HOW MUCH DO WE INSPECT?	8
1.5.1 Statistics	8
	xlij

1.5.2	Consequences of Part Failure (Non-Safety-Critical Parts)	9
1.5.3	Larger Systems or Safety-Critical Parts	11
1.5.4	Retirement for Cause	11
1.5.5	Risk-Informed Inspection	11
1.6	RELIABILITY OF NDE	13
	REFERENCES	15
2	Liquid Penetrant <i>Frank A. Iddings and Peter J. Shull</i>	17
2.1	INTRODUCTION	17
2.1.1	Basic Technique	18
2.1.2	History	19
2.1.3	PT's Potential	20
2.1.4	Advantages/Disadvantages	21
2.2	FUNDAMENTALS	21
2.2.1	Fluid Flow	21
2.2.2	Illumination and Detection: The Eye's Response to Visible Spectrum Illumination	28
2.3	TECHNIQUES	31
2.3.1	Basic Method	31
2.3.2	Cleaning	32
2.3.3	Types of Penetrants	37
2.3.4	Temperature	39
2.3.5	Dwell Time	39
2.3.6	Removing Excess Penetrant	40
2.3.7	Types of Developers	45
2.3.8	Examination and Interpretation	47
2.3.9	Illumination	48
2.3.10	Final Cleaning	49
2.3.11	Specifications and Standards	49
2.4	APPLICATIONS	51
2.4.1	Fabrication Industries	51
2.4.2	Aerospace Industries	52
2.4.3	Petrochemical Plants	53
2.4.4	Automotive and Marine Manufacture and Maintenance	55
2.4.5	Electrical Power Industry	55
2.4.6	Other Applications	56
2.5	SUMMARY	57
	PROBLEMS	58

GLOSSARY	59
VARIABLES	60
REFERENCES	60
3 Ultrasound <i>Peter J. Shull and Bernard R. Tittmann</i>	63
3.1 INTRODUCTION	63
3.1.1 What Ultrasonic Waves Are, and How They Propagate	64
3.1.2 Technique Overview	65
3.1.3 History	66
3.1.4 Applications	68
3.1.5 Advantages and Disadvantages	69
3.2 THEORY	69
3.2.1 Introduction to Wave Propagation	70
3.2.2 Wave Motion and the Wave Equation	74
3.2.3 Specific Acoustic Impedance and Pressure	89
3.2.4 Reflection and Refraction at an Interface	92
3.2.5 Attenuation	107
3.2.6 Guided Waves	114
3.3 TRANSDUCERS FOR GENERATION AND DETECTION OF ULTRASONIC WAVES	120
3.3.1 Piezoelectric Transducers	120
3.3.2 Electromagnetic Acoustic Transducers (EMATs)	129
3.3.3 Laser (Optical) Generation and Detection of Ultrasound	133
3.3.4 Transducer Characteristics	138
3.4 INSPECTION PRINCIPLES	147
3.4.1 Measurements	147
3.4.2 Wave Generation	149
3.4.3 Transducer Configurations	153
3.4.4 Excitation Pulsers	156
3.4.5 Receiving the Signal	158
3.5 APPLICATIONS	161
3.5.1 Roll-by Inspection of Railroad Wheels	161
3.5.2 Ultrasonic Testing of Elevator Shafts and Axles	167
3.6 ADVANCED TOPICS (OPTIONAL)	170
3.6.1 Interference	170
3.6.2 Group Velocity and Phase Velocity	171
3.6.3 Method of Potentials	173
3.6.4 Derivation of Snell's Law: Slowness Curves	178

PROBLEMS		180	
GLOSSARY		185
