

The background of the cover is a grid of small, circular, multi-colored spots (red, blue, green, yellow) on a black background, representing a microarray. A large white circle on the left side contains a zoomed-in view of a cluster of these spots, with several lines radiating from the center to the edge of the circle. The title 'MICROARRAY ANALYSIS' is overlaid on the grid. 'MICROARRAY' is in white with a red outline, and 'ANALYSIS' is in green with a black outline.

MICROARRAY ANALYSIS

M A R K S C H E N A

Contents

Preface, ix

1. Introduction to Microarray Analysis, 01
 2. Introduction to Chemistry, 27
 3. Basics of Biochemistry, 55
 4. Genes and Genomes, 77
 5. Microarray Surfaces, 95
 6. Targets and Probes, 121
 7. Microarray Manufacturing, 159
 8. Microarray Detection, 197
 9. Microarray Informatics, 255
 10. Methodological Architecture, 327
 11. Cleanroom Technology, 347
 12. Gene Expression Profiling, 367
 13. Genetic Screening and Diagnostics, 387
 14. Novel Microarray Technologies, 405
 15. Commercial Opportunities A to Z, 417
 16. Future Trends: Chips in the Clinics, 443
- Appendix A. Prefixes, 453
- Appendix B. Unit Abbreviations, 455
- Appendix C. Technical Abbreviations, 457
- Appendix D. Conversions, 461

Appendix E. Nucleic Acid Molecular Weight Calculations, 463

Appendix F. Microarray Spot Area Calculations, 465

Appendix G. Microarray Fluor Density Calculations, 467

Appendix H. Microarray Target Density Calculations, 469

Appendix I. Microarray Web Sites, 471

References, 473

Glossary, 571

Answers, 603
