

Handbook of Laboratory Animal Science

Second Edition

Volume I

Essential
Principles
and
Practices

Edited by
Jann Hau and Gerald L. Van Hoosier, Jr.

CRC PRESS

CHAPTER 1

The Contribution of Laboratory Animals to Medical Progress — Past, Present, and Future

Franziska B. Grieder and John D. Strandberg

CONTENTS

Introduction	1
Past Role of Laboratory Animals	1
Overview	1
Examples from the Past	2
Specific Examples from the Past - Nonhuman Primates	3
Specific Examples from the Past - Nontraditional Species	4
Public Concerns	4
Present Role of Laboratory Animals	4
Contributions to Nobel Prizes	4
Rodent Embryonic Stem Cells and the Advances of Molecular Biology	5
Genetically Altered Mice	6
Murine Genome Map Completed	7
Nontraditional Species – Zebrafish, Xenopus, Drosophila	7
Future Directions for Laboratory Animals in Biomedical Research	8
Genetically Engineering Technologies (see also “Genetically Altered Mice”)	8
Targeted Transgenic and Knockout Technologies	8
Stock Centers	8
Nontraditional Species and Approaches	9
Support of Biomedical Research Directed Towards Laboratory Animals, Funding Opportunities	9
Summary – Implications for Laboratory Animal Medicine (Training, Research, Career Development)	10
References	10

CHAPTER 2

Animal Research Ethics

Anna S. Olsson, Paul Robinson, Kathleen Pritchett, and Peter Sandøe

CONTENTS

Introduction	13
Human Benefits of Animal Experimentation	14
The Costs to Animals	15
The Ethical Dilemma	17
Claim 1: The Need for Animal Research	18
Claim 3: The Animal's Experience of Pain	19
Claim 4: The Moral Status of Animals	20
Is Ethical Theory Necessary?	21
Contractarianism	22
Utilitarianism	23
Rights View	25
Two Concerns about Things Other than Suffering	26
Society and the Ethical Dilemma	27
Ethics Committees	28
Conclusion	29
Acknowledgments	29
References	29

An Overview of Global Legislation, Regulation, and Policies on the Use of Animals for Scientific Research, Testing, or Education

Kathryn Bayne and Paul deGreeve

CHAPTER 6

Laboratory Animal Science and Service Organizations

Patri Vergara and Gilles Demers

CONTENTS

Introduction	79
International Organizations	80
International Council for Laboratory Animal Science (ICLAS)	80
Laboratory-Animal Science Associations	81
Laboratory Animal Science Organizations by Regions of the World	81
Europe	81
Federation of European Laboratory Animal Science Associations:	
FELASA	81
FELASA Constituent Associations	82
Association Française des Sciences et Techniques de l'Animal de	
Laboratoire: AFSTAL (French Association of Laboratory Animal	
Sciences and Techniques)	82
Associazione Italiana per Scienze degli Animale da Laboratorio: AISAL	
(Italian Association for Laboratory Animal Sciences)	82
Baltic Laboratory Animal Science Association: Balt-LASA	83
Belgian Council for Laboratory Animal Science: BCLAS	83
Czech Laboratory Animal Science Association: CLASA	83
Gesellschaft für Versuchstierkunde: GV-SOLAS (German Society	
for Laboratory Animal Science)	84
Hellenic Society of Biomedical and Laboratory Animal Science:	
HSBLAS	84
Laboratory Animal Science Association: LASA	85
Nederlandse Vereniging voor Proefdierkunde: NVP (Dutch Association	
for Laboratory Animal Science)	85
Scandinavian Society for Laboratory Animal Science: Scand-LAS.....	86
Sociedad Española para las Ciencias del Animal de Laboratorio: SECAL	
(Spanish Society for Laboratory Animal Science)	86
Schweizerische Gesellschaft für Versuchstierkunde: SGV	
(Swiss Laboratory Animal Science Association)	87

Other European Associations Not Affiliated With FELASA	87
Croatian Society for Laboratory Animal Science: CSLAS	87
Finland Laboratory Animal Science: FinLAS	87
Hungarian Laboratory Animal Scientists' Society: HLS	88
Sociedad Española de Experimentación Animal: SEEA (Spanish Society of Animal Experimentation)	88
Americas	88
North America	88
American Association for Laboratory Animal Science: AALAS ..	88
Canadian Association for Laboratory Animal Science - Association canadienne pour la science des animaux de laboratoire: CALAS/ACSAL	89
Central America and Mexico	90
Asociación Centroamericana del Caribe y Mexicana de la Ciencia de Animales de Laboratorio: ACCMAL (Central American, Caribbean and Mexican Association of Laboratory Animal Science)	90
South America	91
Federation of South American Societies and Associations of Laboratory Animal Science Specialists: FESSACAL	91
Asociación Argentina de Especialistas en Animales de Laboratorio: AADEAL Argentinean Association of Researchers Who Use Laboratory Animals	91
Asociación Uruguaya de Ciencias del Animal de Laboratorio: AUCAL (Uruguayan Association for Laboratory Animal Science)	92
Asociación de Veterinarios Especialistas en Animales de Laboratorio: AVECAL (Chilean Association of Veterinary Specialists in Laboratory Animal Science)	92
Colégio Brasileiro de Experimentação Animal: COBEA (Brazilian Laboratory Animal Science Association)	92
Sociedad Venezolana de Ciencias del Animal de Laboratorio: SOVECAL (Venezuelan Society for Laboratory Animal Science)	92
Asia	92
Bangladesh Society for Laboratory Animal Science: BSLAS	92
Chinese Association for Laboratory Animal Science: CALAS	93
Chinese Society for Laboratory/Animal Sciences: CSLAS	93
Japanese Association for Laboratory Animal Science: JALAS	93
Korean Association for Laboratory Animal Science: KALAS	93
Laboratory Animal Science Association of India: LASAI	94
Malaysian Association for Laboratory Animal Science: MALAS	94
Philippine Association for Laboratory Animal Science: PALAS	94
Australia and New Zealand	94
Australian and New Zealand Society for Laboratory Animal Science: ANZLAS	94
Africa	95
Kenyan Laboratory Animal Technician Association: KLATA	95
South African Association for Laboratory Animal Science: SAALAS ...	95
Professional Organizations	96
American College of Laboratory Animal Medicine: ACLAM	96

American Society of Laboratory Animal Practitioners: ASLAP	96
Canadian Association for Laboratory Animal Medicine: CALAM - L'Association canadienne pour la médecine des animaux de laboratoire: ACMAL	97
European College of Laboratory Animal Medicine: ECLAM	97
European Society of Laboratory Animal Veterinarians: ESLAV	98
Institute of Animal Technology: IAT	98
Japanese Association for Laboratory Animal Medicine: JALAM	99
Japanese College of Laboratory Animal Medicine: JCLAM	99
Animal Care and Welfare Organizations	100
Association for Assessment and Accreditation of Laboratory Animal Care International (AAALAC International)	100

Institute of Laboratory Animal Research: ILAR	103
Laboratory Animal Management Association: LAMA	104
Laboratory Animal Welfare Training Exchange: LAWTE	104
Acknowledgments	105

CHAPTER 7

Laboratory Animal Allergy

Richard M. Preece and Anne Renström

CONTENTS

Introduction	108
Epidemiology and Pathogenesis	108
Prevalence: How Many People Have LAA?	108
Incidence: The Risk of Getting LAA	109
Exposure-Response Relationship	109
Animal Allergens	110
Pathogenesis	110
Clinical Manifestations	111
Symptoms	111
Diagnosis	111
Prognosis	112
Case Management	113
Control Strategy	113
Engineering Controls	115
Separation	115
General Ventilation	115
Task Ventilation	116
Automation	116
Cage Systems	116
Procedural Controls	116
Reduction of the Number of Exposed Persons	116
Animals, Stock Density, and Bedding	117
Housekeeping	117
Movements Within the Facility	119
Work Permits and Visitors	119
Environmental Monitoring	120
Personal Controls	120
Personal Hygiene	120
Protective Clothing	121
Respiratory Protective Equipment	121
Training and Education	121

Pre-Placement Assessment: Assessing Risk	121
Health Surveillance	122
Integrated Health, Safety, and Welfare	123

Laboratory Animal Facilities and Equipment for Conventional, Barrier, and Containment Housing Systems

Jack R. Hessler and Urban Höglund

CONTENTS

Introduction	128
Facilities	129
General Considerations	129
Location	129
Arrangement	130
Circulation	130
Function Areas	130
Support Areas	130
Animal Housing Areas	136
Architectural Features	142
Interior Surfaces	142
Vermin Control	148
Noise Control	148
Engineering Features	149
Heating, Ventilation, and Air Conditioning (HVAC)	149
Power and Lighting	154
Plumbing and Drainage	155
Special Plumbing Considerations	155
Miscellaneous Features	156
Equipment	157
Cage Sanitation and Sterilization	157
Batch Washers	157
Continuous Belt Washers	158
Robotic Cage Washing	160
Sterilization Equipment	160
Animal Watering	161
Caging	162
Rodents	162
Rabbits	164

Dogs	165
Cats	165
Nonhuman Primates	165
Pigs, Sheep, and Goats	166
Equipment and Caging for Biological Control (Barrier and Containment)	166
Microisolation Caging System (Microisolation Cages and Cage Change Cabinets).....	166
Isolators.....	167
Autoclaves	167
Biological Safety Cabinets	167
Conclusion.....	169

INTRODUCTION

There are ethical and legal obligations to treat animals in a humane manner and to ensure high standards with respect to their husbandry and care, resulting in maximizing their well-being under the constraints of their use in science. The use of animals by humans is always associated with responsibility for the
