

PRECAST CONCRETE STRUCTURES

KIM S. ELLIOTT

THE SCOTTISH OFFICE

contents

<i>Preface</i>	vii	4.3 Structural design of individual units	72
1 What is precast concrete?	1	4.4 Design of composite floors	90
1.1 Why is precast different?	1	4.5 Composite plank floor	104
1.2 Precast concrete structures	5	5 Precast concrete beams	109
1.3 Why choose a precast structure?	9	5.1 General introduction	109
2 Materials used in precast structures	15	5.2 Non-composite reinforced concrete beams	113
2.1 Concrete	15	5.3 Composite reinforced beams	123
2.2 Steel reinforcement	19	5.4 Non-composite prestressed beams	131
2.3 Structural steel and bolts	21	5.5 Composite prestressed beam design	144
2.4 Non-cementitious materials	22	5.6 Propping	150
3 Precast frame analysis	23	5.7 Horizontal interface shear	151
3.1 Types of precast concrete structures	23	6 Columns and shear walls	153
3.2 Simplified frame analysis	27	6.1 Precast concrete columns	153
3.3 Substructuring methods	34	6.2 Column design	156
3.4 Connection design	41	6.3 Precast concrete shear walls	180
3.5 Stabilizing methods	45	6.4 Distribution of horizontal loading	183
4 Precast concrete floors	59	6.5 Infill shear walls	187
4.1 Precast concrete flooring options	59	6.6 Cantilever walls	196
4.2 Flooring arrangements	69	7 Horizontal floor diaphragms	203
		7.1 Introduction to floor diaphragms	203

7.2 Shear transfer mechanism	213	9 Beam and column connections	287
7.3 Edge profile and tie steel details	215	9.1 Types of beam and column connections	287
7.4 Design of floor diaphragm	216	9.2 Beam-to-column connections	291
7.5 Shear stiffness	222	9.3 Beam end shear design	320
7.6 Diaphragm action in composite floors with structural toppings	224	9.4 Column foundation connections	334
8 Joints and connections	229	10 Ties in precast concrete structures	351
8.1 Definitions	229	10.1 Ties in precast concrete structures	351
8.2 Basic mechanisms	230	10.2 Design for robustness and avoidance of progressive collapse	353
8.3 Compression joints	232	10.3 The fully tied solution	357
8.4 Shear joints	248	10.4 Tie forces	360
8.5 Tension joints	257	Index	369
8.6 Pinned-jointed connections	263		
8.7 Moment resisting connections	268
