

# EXPERIMENTS IN GENERAL CHEMISTRY

Principles and Modern Applications

Thomas G. Greco • Lyman H. Rickard • Gerald S. Weiss

Petrucci • Harwood • Herring

Eighth Edition

# Contents

	page
<b>Preface</b>	
<b>Laboratory Safety Rules</b>	1
<b>Introduction</b>	7
<i>Evaluation of Experimental Data</i>	7
<i>The Use of the Laboratory Balance</i>	10
<i>The Laboratory Notebook</i>	10
<i>The Prelaboratory Report</i>	11
<i>The Laboratory Report</i>	12
<i>Sample Laboratory Experiment Report</i>	13
<b>1. Measurements and Density</b>	17
<b>2. Formula and Composition of a Hydrate</b>	25
<b>3. Physical Changes and Chemical Reactions</b>	31
<b>4. Types of Chemical Reactions</b>	41
<b>5. The Stoichiometry of a Reaction</b>	51
<b>6. Identification of Common Chemicals</b>	57
<b>7. Titration of Acids and Bases</b>	65
<b>8. Gravimetric and Volumetric Analysis</b>	71
<b>9. The Gas Laws</b>	79
<b>10. Evaluation of the Gas Law Constant</b>	89
<b>11. Thermochemistry: The Heat of Reaction</b>	95
<b>12. Spectrophotometric Analysis of Commercial Aspirin</b>	107
<b>13. Molecular Models and Covalent Bonding</b>	119
<b>14. LeChatelier's Principle in Iron Thiocyanate Equilibrium</b>	127
<b>15. A Kinetic Study of an Iodine Clock Reaction</b>	133
<b>16. Determination of an Equilibrium Constant</b>	141
<b>17. Determination of Iron in Vitamins</b>	149
<b>18. Weak Acids and Bases and Their Salts</b>	157
<b>19. Determination of the Ionization Constant of a Weak Acid</b>	169
<b>20. Investigation of Buffer Systems</b>	179

viii      **Contents**

<b>21.</b>	<b>Determination of Acid-Neutralizing Power of Commercial Antacids</b>	187
<b>22.</b>	<b>Determination of a Solubility Product Constant</b>	193
<b>23.</b>	<b>Oxidation-Reduction Titration</b>	203
<b>24.</b>	<b>Electrolysis: Faraday's Law and Determination of Avogadro's Number</b>	209
<b>25.</b>	<b>An Investigation of Voltaic Cells – The Nernst Equation</b>	217
<b>26.</b>	<b>Determination of Water Hardness</b>	227
<b>27.</b>	<b>The Sölvay Process: Preparation of <math>\text{NaHCO}_3</math> and <math>\text{Na}_2\text{CO}_3</math></b>	235
<b>28.</b>	<b>A Penny's Worth of Chemistry</b>	241
<b>29.</b>	<b>Polymer Synthesis</b>	251
<b>30.</b>	<b>Preparation of <math>[\text{Co}(\text{NH}_3)_5\text{ONO}]\text{Cl}_2</math> – Linkage Isomerism</b>	257
<b>31.</b>	<b>Free Radical Bromination of Organic Compounds</b>	263
<b>32.</b>	<b>Paper Chromatography: Separation of Amino Acids</b>	269
<b>Introduction to Qualitative Analysis (Experiments 33 - 38)</b>		281
	<i>The Basis for the Organization of the Analytical Scheme</i>	281
	<i>Unknown Analysis</i>	282
	<i>Laboratory Techniques for Qualitative Analysis</i>	283
	<i>Flowcharts</i>	286
	<i>Report Forms</i>	286
<b>33.</b>	<b>Group I: The Soluble Group</b>	291
<b>34.</b>	<b>Group II: The Chloride Group</b>	295
<b>35.</b>	<b>Group III: The Hydrogen Sulfide Group</b>	299
<b>36.</b>	<b>Group IV: The Ammonium Sulfide Group</b>	309
<b>37.</b>	<b>Group V: The Carbonate Group</b>	319
<b>38.</b>	<b>Analysis of Common Anions and Their Salts</b>	325
<b>Appendix</b>		
	<i>I. The International System of Units (SI)</i>	333
	<i>II. Fundamental Constants and Conversions</i>	334
	<i>III. Common Conversion Factors</i>	334
	<i>Qualitative Analysis Report Forms</i>	335
