

A MOLECULAR CLONING MANUAL

DNA Microarrays

EDITED BY

David Bowtell and Joseph Sambrook

Contents

The *DNA Microarrays* Companion Web Site, xi

Preface, xiii

Foreword, xv

Contributors, xxi

Section

1

Generation of Probes for Spotted Microarrays, 1

S. Chandrasekharappa, A. Holloway, V. Iyer, D. Monte, M. Murphy, N.J. Nowak

INTRODUCTION, 2

PROTOCOLS

1. Replication and Storage of cDNA Clone Sets, 5
 - Additional Protocol: Accessing Frozen Stocks, 11
2. PCR Amplification of Probes from Bacterial Clone Sets, 12
 - Alternative Protocol: Preparation of Plasmid DNA as a Template for Amplification, 19
3. Purification of PCR Products, 20
 - Alternative Protocol: Purification of Amplified Products Using Ethanol Precipitation, 22
4. Visualization and Assessment of PCR Products, 23
 - Additional Protocol: Quantitation Using PicoGreen, 27
5. Resuspending Array-ready DNA for Printing and Storing, 28
6. Isolation and Amplification of Array Material from Yeast, 30

INFORMATION PANELS

Clone Sets, 35

Controls Used in Spotted Microarrays, 42

Prevention and Detection of Bacteriophage T1 in Genomic and cDNA Libraries, 45

Spotting of Long Oligonucleotides: An Alternative to cDNA Arrays for Expression Analysis, 49

Yeast Probes, 51

Section
2**Printing Spotted Glass Microarrays, 61***G. Childs, J. DeRisi, T. Harris, A. Holloway, B.-H. Hou, A. Massimi, M. Murphy, S. Somerville*

INTRODUCTION, 61

PROTOCOLS

1. Preparing Poly-L-Lysine Slides for Microarrays, 68
2. Printing on Glass Slides, 71
3. Checking the Quality of the Printed Slides, 79
 - Alternative Protocol: Hybridization with Labeled Primers, 83
4. Care and Cleaning of Quill Pens, 85

INFORMATION PANELS

Arrayers and Pins Used for Contact Printing of Microarrays, 88

Substrates for Printing, 97

Section
3**Expression Analysis of RNA, 101***M. Bittner, R. Butow, J. DeRisi, M. Diehn, J. Eberwine, C.B. Epstein, R. Glynne, S. Grimmond, T. Ideker, J.E. Kacharmina, S. Katsabanis, J. Khan, J. Lee, C.L. Liu, P. Marciano, F.M. Marincola, T. McIntosh, D. Monte, J.R. Pollack, V. Rhodius, S. Somerville, E. Tom, E. Wang, J.S. Wei, D. Willhite, S. Ybarra*

INTRODUCTION, 102

PART 1: ISOLATING RNA, 104

INTRODUCTION, 104

PROTOCOLS

1. Purification of Total RNA from Mammalian Cells and Tissues, 110
 - Alternative Protocol: RNA Extraction from OCT-embedded Pathology Samples, 117
2. Isolation of Total RNA from Tissues Using the FastPrep Instrument, 118
3. Isolation of Total RNA from Plant Tissue Using TRIzol, 120
4. Pine Tree Method for Isolation of Plant RNA, 124
5. Isolation of Poly(A)⁺ RNA Using FastTrack, 127
6. Isolation of Membrane-bound Polysomal RNA, 132
7. Isolation of Poly(A)⁺ RNA by Batch Chromatography, 139
8. Isolation of RNA by Ultracentrifugation through CsCl Solution, 142
9. Purification of Total RNA from Yeast, 145
 - Alternative Protocol: Purification of RNA Using Phase Lock Gels, 148
10. Purification of RNA from *E. coli*, 149
11. Isolation and Amplification of RNA from Single Cells and Small Amounts of Tissues, 153
 - Alternative Protocol: In Situ Transcription of RNA in Tissue Sections, 165
 - Additional Protocol: Acridine Orange Staining of Sections, 167
12. RNA Common Reference Sets, 168

PART 2: LABELING AND HYBRIDIZATION, 173

INTRODUCTION, 173

PROTOCOLS

13. Fluorescent Labeling of First-strand cDNA Using Reverse Transcriptase, 178

- Alternative Protocol: Purification and Concentration of Fluorescently Labeled cDNA (Microcon YM-30), 186
- 14. Indirect Fluorescent Labeling of DNA with Amino-Allyl Dyes, 187
- 15. Amplification of mRNA Preparations to Generate Targets for Screening DNA Microarrays, 194
 - Additional Protocol: Labeling aRNA, 203
- 16. Amplification of Small Quantities of mRNA for Expression Analysis, 204
- 17. Labeling Second-strand DNA Using the Klenow Fragment of *E. coli* DNA Polymerase, 214
 - Alternative Protocol: Labeling Genomic DNA Using the Klenow Fragment of *E. coli* DNA Polymerase, 217
- 18. Labeling of Amplified RNA with Biotinylated Nucleotides for Hybridization to Oligonucleotide Arrays, 218
 - Additional Protocol: Fragmentation of Biotinylated cRNA, 222
- 19. Recovery of Unincorporated Cy Dyes: Repurification by HPLC, 223
- 20. Hybridization and Posthybridization Washing, 228
 - Additional Protocol: Microarray Slide Stacking, 237

TROUBLESHOOTING GUIDE, 240

INFORMATION PANELS

- Alexa Dyes, 257
- Bacterial Microarrays, 259
- Extraction of Proteins and DNA with Phenol, 261
- Formamide, 263
- Guanidinium-based Extraction of RNA, 265
- Homogenization of Animal Cells and Tissues, 266
- Inhibiting RNases, 268
- Mammalian, Plant, and Bacterial RNAs, 270
- Measuring the Efficiency of Dye Labeling of DNA, 273
- Moloney Leukemia Virus Reverse Transcriptase, 274
- Oligo(dT)-Cellulose, 275
- Quantification of RNA, 276
- Special Considerations for Working with RNA, 277
- Storage and Recovery of RNA, 279

Section 4

Membrane-based Spotted cDNA Arrays, 289

K.G. Becker, W.H. Wood III, C. Cheadle

INTRODUCTION, 289

PART 1: PREPARATION AND HYBRIDIZATION OF MEMBRANE ARRAY, 292 PROTOCOLS

1. Printing Membrane Arrays, 293
2. RNA Preparation and Labeling, 297
3. Hybridization of Target to Membrane Arrays, 300
 - Additional Protocol: Target Stripping and Reuse of Membranes, 303

PART 2: DATA ANALYSIS AND INTERPRETATION, 305

Section
5**Tissue Microdissection, 307**

B. Becker, M. Bernsen, C.J.M. Best, T. Björnsen, D. Brocksch, R. Burgemeister, C. Bush, R.F. Chuaqui, A. Clement-Sengewald, M.R. Emmert-Buck, G. Friedemann, J.W. Gillespie, W. Heckl, G. Lahr, I.M. Leiva, P. Lindahl, A. Mayer, S. Nilsson, K. Schütze, S.J. Sheidl, M. Stich, W. Stolz, M. Takemoto, S. Thalhammer, M.C.R.F. van Dijk, T. Vogt

INTRODUCTION, 308

PART 1: MANUAL DISSECTION AND LASER CAPTURE MICRODISSECTION, 314

INTRODUCTION, 314

PROTOCOLS

1. Manual Microdissection, 316
 - Alternative Protocol: Microdissection of Frozen Tissue Samples, 319
2. Laser Capture Microdissection, 320
3. Immuno-LCM, 325
4. Processing of Microdissected Tissue for Expression Analysis, 327

PART 2: LASER PRESSURE CATAPULTING, 331

INTRODUCTION, 331

PROTOCOLS

5. Preparation of Slides for Tissue Sectioning for LPC, 338
6. Preparation of Paraffin-embedded Tissue Sections for LMPC, 340
7. Preparation of Sections of Fresh-Frozen Tissue for LMPC, 342
8. LPC of Tissues Fixed in Zincfix for mRNA Profiling, 344
9. Protection of Tissue Samples with a Liquid Coverslip, 347
10. Isolation of Viable Cells after Laser Microdissection and Catapulting, 349

Section
6**Using Microarrays for Genomic Analysis, 357**

D. Albertson, S. Dec, J.-B. Fan, J.N. Hirschhorn, X. Huang, V. Iyer, Y.-M. Lim, K. Lindblad-Toh, R. Lucito, H. Matsuzaki, N. Patil, D. Pinkel, J.R. Pollack, T. Ryder, R. Seagraves, P. Sklar, A. Snijders, M. Wigler

INTRODUCTION, 358

PART 1: MICROARRAY-BASED DETECTION OF DNA COPY NUMBER, 359

INTRODUCTION, 259

PROTOCOLS

1. Comparative Genomic Hybridization Using cDNA Microarrays, 363
2. Preparation of BAC DNA for CGH by Ligation-mediated PCR, 370
3. CGH Using BAC Genomic Microarrays, 380
4. Microarray-based Representational Analysis of DNA Copy Number: Preparation of Target DNA, 386
5. Microarray-based Representational Analysis of DNA Copy Number: Preparation of Slides and Hybridization, 394

PART 2: MUTATION DETECTION AND SNP GENOTYPING, 400

INTRODUCTION, 400

PROTOCOLS

6. SNP Genotyping Using SBE-Tag Arrays, 403

- Alternative Protocol: Multiplex Amplification Reactions for SBE, 418
- 7. SNP Genotyping by SBE Using Affymetrix Tag Arrays, 421
- 8. Sequence Variant Detection Using High-density Microarrays, 429
- 9. Loss of Heterozygosity Analysis Using SNP Arrays, 439

**PART 3: MICROARRAY-BASED DETECTION OF DNA-PROTEIN INTERACTIONS:
CHROMATIN IMMUNOPRECIPITATION ON MICROARRAYS, 453**

INTRODUCTION, 453

PROTOCOLS

10. Mapping DNA-Protein Interactions on the Yeast Genome Using Arrays, 455
11. Mapping DNA-Protein Interactions on the Yeast Genome: DNA Amplification and Labeling, 460

PART 4: SNP SEQUENCES: MAPPING DATA

- Table 6-7 Multiplex Primer Pools: SNP Mapping Data, 465
- Table 6-8 Map Locations for SNPs on the HuSNP Chip, 493

Section
7

An Introduction to Microarray Bioinformatics, 509

C.A. Ball, Y. Chen, S. Panavally, G. Sherlock, T. Speed, P.T. Spellman, Y.H. Yang

INTRODUCTION, 509

PART 1: DESIGN OF MICROARRAY EXPRESSION EXPERIMENTS, 513

PART 2: IMAGE ANALYSIS, 526

PART 3: NORMALIZATION, 536

PART 4: REPRESENTING AND EVALUATING SLIDE DATA, 544

PART 5: LIMS, DATABASES, AND DATA MANAGEMENT, 552

PART 6: CLUSTER ANALYSIS AND DISPLAY, 569

PART 7: MULTIDIMENSIONAL SCALING AND SELF-ORGANIZING MAP, 582

INFORMATION PANELS

Gene Annotation, 590

Sharing Microarray Data among Investigators, 594

Section
8

Tissue Microarrays, 603

K. Brand, G. Hostetter, O.-P. Kallioniemi, J. Kononen, G. Sauter, M. Trivett

INTRODUCTION, 603

PROTOCOLS

1. Construction of Tissue Microarrays, 608
 - Additional Protocol: Manual Construction of Tissue Arrays, 613
2. In Situ Hybridization Using Tissue Arrays, 616
3. Immunohistochemistry on Tissue Arrays, 632
 - Alternative Protocol: Antigen Unmasking and Trypsin Digestion, 643

Appendices

Appendix 1: Generation of Full-length Libraries, 647

P. Carninci

Appendix 2: Reagents, Buffers, and Media, 661

Appendix 3: Cautions, 683

Appendix 4: Suppliers, 691

Index, 693
