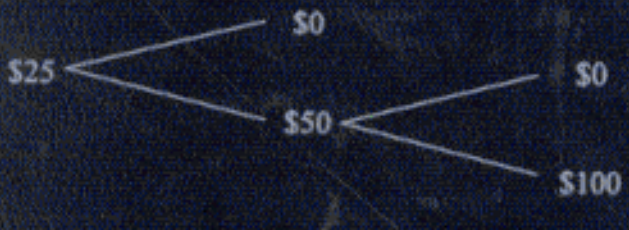
Probability and Finance

It's Only a Game!

Glenn Shafer
Vladimir Vovk



WILEY SERIES IN
PROBABILITY AND STATISTICS

Contents

Preface *ix*

1 Probability and Finance as a Game *1*
1.1 A Game with the World *4*
1.2 The Protocol for a Probability Game *9*
1.3 The Fundamental Interpretative Hypothesis *14*
1.4 The Many Interpretations of Probability *19*
1.5 Game-Theoretic Probability in Finance *22*

Part I Probability without Measure *27*

2 The Historical Context *29*
2.1 Probability before Kolmogorov *30*
2.2 Kolmogorov's Measure-Theoretic Framework *39*
2.3 Realized Randomness *46*
2.4 What is a Martingale? *51*
2.5 The Impossibility of a Gambling System *55*
2.6 Neosubjectivism *59*
2.7 Conclusion *60*

3	*The Bounded Strong Law of Large Numbers*		61
	3.1	*The Fair-Coin Game*	63
	3.2	*Forecasting a Bounded Variable*	65
	3.3	*Who Sets the Prices?*	70
	3.4	*Asymmetric Bounded Forecasting Games*	72
	3.5	*Appendix: The Computation of Strategies*	73
4	*Kolmogorov's Strong Law of Large Numbers*		75
	4.1	*Two Statements of Kolmogorov's Strong Law*	77
	4.2	*Skeptic's Strategy*	81
	4.3	*Reality's Strategy*	87
	4.4	*The Unbounded Upper Forecasting Protocol*	89
	4.5	*A Martingale Strong Law*	90
	4.6	*Appendix: Martin's Theorem*	94
5	*The Law of the Iterated Logarithm*		99
	5.1	*Unbounded Forecasting Protocols*	101
	5.2	*The Validity of the Iterated-Logarithm Bound*	104
	5.3	*The Sharpness of the Iterated-Logarithm Bound*	108
	5.4	*A Martingale Law of the Iterated Logarithm*	118
	5.5	*Appendix: Historical Comments*	118
	5.6	*Appendix: Kolmogorov's Finitary Interpretation*	120
6	*The Weak Laws*		121
	6.1	*Bernoulli's Theorem*	124
	6.2	*De Moivre's Theorem*	126
	6.3	*A One-Sided Central Limit Theorem*	133
	6.4	*Appendix: The Gaussian Distribution*	143
	6.5	*Appendix: Stochastic Parabolic Potential Theory*	144
7	*Lindeberg's Theorem*		147
	7.1	*Lindeberg Protocols*	148
	7.2	*Statement and Proof of the Theorem*	153
	7.3	*Examples of the Theorem*	158
	7.4	*Appendix: The Classical Central Limit Theorem*	164

8 The Generality of Probability Games 167
8.1 Deriving the Measure-Theoretic Limit Theorems 168
8.2 Coin Tossing 177
8.3 Game-Theoretic Price and Probability 182
8.4 Open Scientific Protocols 189
8.5 Appendix: Ville's Theorem 194
8.6 Appendix: A Brief Biography of Jean Ville 197

Part II Finance without Probability 199

9 Game-Theoretic Probability in Finance 201
9.1 The Behavior of Stock-Market Prices 203
9.2 The Stochastic Black-Scholes Formula 215
9.3 A Purely Game-Theoretic Black-Scholes Formula 221
9.4 Informational Efficiency 226
9.5 Appendix: Tweaking the Black-Scholes Model 229
9.6 Appendix: On the Stochastic Theory 231

10 Games for Pricing Options in Discrete Time 237
10.1 Bachelier's Central Limit Theorem 239
10.2 Bachelier Pricing in Discrete Time 243
10.3 Black-Scholes Pricing in Discrete Time 249
10.4 Hedging Error in Discrete Time 252
10.5 Black-Scholes with Relative Variations for S 259
10.6 Hedging Error with Relative Variations for S 262

11 Games for Pricing Options in Continuous Time 271
11.1 The Variation Spectrum 273
11.2 Bachelier Pricing in Continuous Time 275
11.3 Black-Scholes Pricing in Continuous Time 279
11.4 The Game-Theoretic Source of the $\sqrt{dt}$ Effect 281
11.5 Appendix: Elements of Nonstandard Analysis 283
11.6 Appendix: On the Diffusion Model 287

12 The Generality of Game-Theoretic Pricing 293
12.1 The Black-Scholes Formula with Interest 294
12.2 Better Instruments for Black-Scholes 298
12.3 Games for Price Processes with Jumps 303
12.4 Appendix: The Stable and Infinitely Divisible Laws 311

13 Games for American Options 317
13.1 Market Protocols 318
13.2 Comparing Financial Instruments 323
13.3 Weak and Strong Prices 328
13.4 Pricing an American Option 329

14 Games for Diffusion Processes 335
14.1 Game-Theoretic Diffusion Processes 337
14.2 Itô's Lemma 340
14.3 Game-Theoretic Black-Scholes Diffusion 344
14.4 Appendix: The Nonstandard Interpretation 346
14.5 Appendix: Related Stochastic Theory 347

15 The Game-Theoretic Efficient-Market Hypothesis 351
15.1 A Strong Law for a Securities Market 352
15.2 The Iterated Logarithm for a Securities Market 363
15.3 Weak Laws for a Securities Market 364
15.4 Risk vs. Return 367
15.5 Other Forms of the Efficient-Market Hypothesis 371
