Introduction	ix
Conventions and Features in This Book x • Using the ADO.NET Step by Step CD-ROM x	
PART 1	Getting Started with ADO.NET 1
Chapter 1	Getting Started with ADO.NET 3
On the Fundamental Interconnectedness of All Things 4 • The ADO.NET Object Model 4 • Binding Data to a Simple Windows Form 7	
PART 2	Data Providers 21
Chapter 2	Creating Connections 23
Understanding Connections 23 • Creating Connections 24 • Using Connection Properties 31 • Connection Methods 38 • Handling Connection Events 41	
Chapter 3	Data Commands and the DataReader 45
Understanding Data Commands and DataReaders 45 • Creating Data Commands 46 • Command Properties 49 • Command Methods 59	
Chapter 4	The DataAdapter 71
Understanding the DataAdapter 71 • Creating DataAdapters 72 • DataAdapter Properties 79 • DataAdapter Methods 86 • Handling DataAdapter Events 97	
Chapter 5	Transaction Processing in ADO.NET 109
Understanding Transactions 109 • Creating Transactions 110 • Using Transactions 119	

PART 3	Manipulating Data	129
Chapter 6	The DataSet	131
	Understanding DataSets 132 • Creating DataSets 133 • DataSet Properties 139 • DataSet Methods 153	
Chapter 7	The DataTable	161
	Understanding DataTables 161 • Creating DataTables 162 • DataTable Properties 170 • DataTable Methods 190 • DataTable Events 197	
Chapter 8	The DataView	199
	Understanding DataViews 199 • Creating DataViews 201 • DataView Properties 206 • DataView Methods 215	
PART 4	Using the ADO.NET Objects	219
Chapter 9	Editing and Updating Data.....	221
	Understanding Editing and Updating Data 221 • DataRow States and Versions 223 • Editing Data in a DataSet 226 • Updating Data Sources 236 • Accepting and Rejecting DataSet Changes 245	
Chapter 10	ADO.NET Data-Binding in Windows Forms	257
	Understanding Data-Binding in Windows Forms 258 • Binding Controls to an ADO.NET Data Source 260 • Using the BindingContext Object 273 • Using the CurrencyManager Object 274	
Chapter 11	Using ADO.NET in Windows Forms	289
	Formatting Data 289 • Displaying Data in Windows Controls 299 • Validating Data in Windows Forms 325	
Chapter 12	Data-Binding in Web Forms	343
	Understanding Data-Binding in Web Forms 343 • Binding Controls to an ADO.NET Data Source 346 • Maintaining ADO.NET Object State 357 • Updating a Data Source from a Web Form 362	

Chapter 13	Using ADO.NET in Web Forms	367
	Using Template-Based Web Controls 367 • Moving Through Data 390	
PART 5	ADO.NET and XML	407
Chapter 14	Using the XML Designer	409
	Understanding the XML Schemas 409 • Creating XML Schema and Typed DataSets 411 • Working with DataTables in the XML Designer 419 • Working with Elements 430 • Working with Types 433 • Working with Attributes 441	
Chapter 15	Reading and Writing XML	445
	Understanding ADO.NET and XML 445 • Using the DataSet XML Methods 446 • Controlling How the XML Is Written 472 • The XmlDataDocument Object 479	
Chapter 16	Using ADO in the .NET Framework	483
	Understanding COM Interoperability 483 • Using ADO in the .NET Framework 485 • Using ADOX in the .NET Framework 497
