About This Book	xiii
Intended Audience	xiii
Prerequisites	xiii
About the CD-ROM	xiv
About the DVD	xiv
Features of This Book	xv
Getting Started	xx
The Microsoft Certified Professional Program	xxii
Technical Support	xxvii
 Chapter 1 Introduction to the .NET Framework	1
About This Chapter	1
Before You Begin	1
Lesson 1: The .NET Framework and the Common Language Runtime	2
Overview of the .NET Framework	2
Languages and the .NET Framework	2
The Structure of a .NET Application	3
Compilation and Execution of a .NET Application	4
Lesson Summary	5
Lesson 2: The .NET Base Class Library	6
Reference Types and Value Types	8
Using .NET Framework Types in Your Application	9
The Imports and using Statements	12
Referencing External Libraries	13
Lesson Summary	14
Lesson 3: Using Classes and Structures	15
Members	15
Creating Classes	16
Creating Structures	16
Adding Members	16
Nested Types	17
Instantiating User-Defined Types	18
Classes vs. Structures	19
Lesson Summary	19

Lesson 4: Using Methods	20
Adding Methods	20
Calling Methods	21
Method Variables	21
Parameters	22
Constructors and Destructors	25
Lesson Summary	27
Lesson 5: Scope and Access Levels	28
Member Access Modifiers	28
Type Access Modifiers	30
Access Modifiers for Nested Types	31
Shared (static) Members	31
Lesson Summary	33
Lesson 6: Garbage Collection	34
Circular References	35
Lesson Summary	36
Lab 1: Classes and Garbage Collection	37
Before You Begin	37
Exercise 1.1: Making the Demo Class	37
Exercise 1.2: Demonstrating Garbage Collection	38
Review	40
 Chapter 2 Creating the User Interface	 41
About This Chapter	41
Before You Begin	41
Lesson 1: User Interface Design Principles	42
Forms, Controls, and Menus	42
Composition	43
Lesson Summary	46
Lesson 2: Using Forms	47
Adding Forms to Your Project	47
Visual Inheritance	48
Setting the Startup Form	50
Setting the Startup Location	51
Changing the Appearance of Your Form	52
BackColor, ForeColor, and Text Properties	53
Font, Cursor, and BackgroundImage	53
Opacity	53
Using Form Methods	54
Show and ShowDialog	55

Activate	55
Hide	56
Close	56
Using Form Events	56
Form Lifetime Events	58
Lesson Summary	60
Lesson 3: Using Controls and Components	62
Working with Controls	62
Setting the Control Tab Order	64
Controls That Can Contain Other Controls	65
Docking and Anchoring Controls	66
Using the Controls Collection	69
Adding Controls to the Toolbox	70
Creating Event Handlers for Controls	71
Using Extender Provider Components	72
Lesson Summary	74
Lesson 4: Using Menus	75
Creating Menus at Design Time	75
Using the MainMenu Component	76
Separating Menu Items	77
Menu Access and Shortcut Keys	78
Using Menu Item Events	79
Creating Context Menus	79
Modifying Menus at Run Time	80
Enabling and Disabling Menu Commands	80
Displaying Check Marks on Menu Items	80
Displaying Radio Buttons on Menu Items	80
Making Menu Items Invisible	81
Cloning Menus	81
Merging Menus at Run Time	82
Adding Menu Items at Run Time	82
Lesson Summary	83
Lesson 5: Validating User Input	84
Field-Level Validation	84
Using Events in Field-Level Validation	86
Handling the Focus	88
Form-Level Validation	90
Providing User Feedback	92
Lesson Summary	94

Lab 2: The Virtual Doughnut Factory	96
Before You Begin	96
Exercise 2.1: Creating the User Interface	96
Exercise 2.2: Adding a Menu	100
Exercise 2.3: Creating Validation Handlers	101
Review	104
 Chapter 3 Types and Members	 105
About This Chapter	105
Before You Begin	105
Lesson 1: Using Data Types	106
The .NET Data Types	106
Converting Types	109
Using Data Type Functionality	112
Lesson Summary	115
Lesson 2: Constants, Enums, Arrays, and Collections	116
Constants and Enumerations	116
Arrays	120
Collections	124
Enumerating the Members of an Array or Collection	127
Lesson Summary	129
Lesson 3: Implementing Properties	130
Implementing Properties	130
Read-Only and Write-Only Properties	133
Parameterized Properties	134
Default Properties and Indexers	135
Collection Properties	136
Lesson Summary	139
Lesson 4: Implementing Delegates and Events	140
Delegates	140
Declaring and Raising Events	142
Implementing Event Handlers	143
Event Handlers That Handle Multiple Events	145
Events with Multiple Handlers	146
Removing Handlers at Run Time	146
Lesson Summary	147
Lab 3: Adding Components and Implementing Members	148
Before You Begin	148
Exercise 3.1: Creating the DoughnutMachine Component	148

Exercise 3.2: Adding the DoughnutMachine to the User Interface	155
Review	160
Chapter 4 Object-Oriented Programming and Polymorphism	161
About This Chapter	161
Before You Begin	161
Lesson 1: Introduction to Object-Oriented Programming	162
Objects, Members, and Abstraction	162
Encapsulation	164
Polymorphism	164
Lesson Summary	165
Lesson 2: Overloading Members	167
Creating Overloading Methods	168
Overloading Operators with Visual C#	169
Lesson Summary	171
Lesson 3: Interface Polymorphism	172
Defining Interfaces	172
Polymorphism with Interfaces	174
Implementing Interfaces	175
Lesson Summary	178
Lesson 4: Inheritance Polymorphism	180
Inheritance	180
Inherited Members	182
Abstract Classes and Members	189
Lesson Summary	192
Lab 4: Using Inherited Classes	193
Before You Begin	193
Exercise 4.1: Creating a Strongly Typed Collection Class by Extending CollectionBase	193
Exercise 4.2: Implementing Additional Doughnut Types	196
Exercise 4.3: Implementing the RemoveStale Method	199
Review	204
Chapter 5 Testing and Debugging Your Application	205
About This Chapter	205
Before You Begin	205
Lesson 1: Using the Debugging Tools	206
Types of Errors	206
Break Mode	208

Setting Breakpoints	211
Using the Debugging Windows	213
Lesson Summary	216
Lesson 2: Using the Debug and Trace Classes	218
How Tracing Works	218
Writing Trace and Debug Output	219
The Listeners Collection	221
Using Trace Switches	223
Configuring Trace Switches	226
Lesson Summary	228
Lesson 3: Creating a Unit Test Plan	229
The Unit Test Plan	229
Lesson Summary	233
Lesson 4: Handling and Throwing Exceptions	234
How Exceptions Are Handled	234
Creating an Exception Handler	235
Throwing Exceptions	239
Lesson Summary	243
Lab 5: Debugging an Application	244
Before You Begin	244
Exercise 5.1: Identifying Syntax Errors	244
Review	248
 Chapter 6 Data Access Using ADO.NET	 249
About This Chapter	249
Before You Begin	249
Lesson 1: Overview of ADO.NET	250
Disconnected Database Access	250
ADO.NET Data Architecture	251
Lesson Summary	254
Lesson 2: Accessing Data	255
Connecting to a Database	255
Using Data Commands	258
Using DataReaders	264
Creating and Configuring DataAdapters	271
Retrieving Data Using DataAdapters	273
Lesson Summary	278
Lesson 3: Using DataSet Objects and Updating Data	280
Creating and Filling DataSet Objects Without a DataAdapter	280
DataRelation Objects	285

Constraints	286
Editing and Updating Data	289
Lesson Summary	296
Lesson 4: Binding, Viewing, and Filtering Data	297
Data Binding	297
Filtering and Sorting Data	305
Lesson Summary	310
Lesson 5: Using XML in ADO.NET	311
Retrieving XML from a SQL Server 2000 Database	311
Using XML with DataSets	312
Using the XmlDataDocument Class	314
Lesson Summary	318
Lab 6: Connecting with a Database	319
Before You Begin	319
Exercise 6.1: Adding Data Access and Using the DataReader	319
Exercise 6.2: Retrieving and Updating Data Using DataAdapter Objects and a DataSet	321
Exercise 6.3: Creating a Typed DataSet Using the XML Designer	323
Exercise 6.4: Using the Data Form Wizard	325
Review	328
 Chapter 7 Creating Controls Using the .NET Framework	329
About This Chapter	329
Before You Begin	329
Lesson 1: Using GDI+	330
The System.Drawing Namespaces	330
The Graphics Object	331
Colors, Brushes, and Pens	335
Rendering Simple Shapes	338
Rendering Text	339
Rendering Complex Shapes	340
Lesson Summary	343
Lesson 2: Authoring Controls	344
Overview of Control Authoring	344
Creating an Inherited Control	347
Creating a User Control	349
Creating a Custom Control	352
Lesson Summary	354

Lesson 3: Common Tasks Using Controls	355
Adding Your Control to the Toolbox	355
Providing a Toolbox Bitmap for Your Control	355
Debugging Your Control	357
Managing Control Licensing	358
Hosting Your Control in Internet Explorer	360
Lesson Summary	361
Lab 7: Creating a Custom Control	362
Before You Begin	362
Exercise 7.1: Creating the Control	362
Exercise 7.2: Testing Your Control	367
Review	369
 Chapter 8 Advanced .NET Framework Topics	 371
About This Chapter	371
Before You Begin	371
Lesson 1: Implementing Print Functionality	372
The PrintDocument Component	372
Printing Content	375
Using PrintPreviewControl	381
Configuring Printing	382
Lesson Summary	385
Lesson 2: Accessing and Invoking Components	386
Accessing .NET and COM Type Libraries	386
Instantiating ActiveX Controls	388
Accessing a Web Service	388
Accessing the Windows API	392
Lesson Summary	394
Lesson 3: Implementing Accessibility	395
Accessibility Design	395
Accessibility and the Certified for Windows Program	396
Accessibility Properties of Windows Forms Controls	397
Lesson Summary	398
Lesson 4: Implementing Help in Your Application	399
The Help Class	399
The HelpProvider Component	400
Lesson Summary	401

Lesson 5: Globalization and Localization	402
Globalization and Localization	402
Culture-Specific Formatting	407
Lesson Summary	412
Lab 8: Creating a Localized Form with Print Support	413
Before You Begin	413
Exercise 8.1: Creating the Form	413
Exercise 8.2: Localizing the Form	416
Exercise 8.3: Adding Print Support	419
Review	422
 Chapter 9 Assemblies, Configuration, and Security	 423
About This Chapter	423
Before You Begin	423
Lesson 1: Assemblies and Resources	424
Assemblies	424
Resources and Resource Assemblies	427
Shared Assemblies	433
Lesson Summary	436
Lesson 2: Configuring and Optimizing Your Application	437
Creating the Configuration File	437
Configuring Your Application Using Dynamic Properties	439
Optimizing Your Application's Performance	443
Lesson Summary	445
Lesson 3: Securing Your Application	446
Permissions	447
Configuring Role-Based Authorization	447
Configuring Code Access Security	452
Using Exception Handling with Imperative Security	459
Lesson Summary	459
Lab 9: Configuring and Securing an Application	461
Before You Begin	461
Exercise 9.1: Adding the Configuration File	461
Exercise 9.2: Securing Your Application	463
Review	466

Chapter 10 Deploying Your Application	467
About This Chapter	467
Before You Begin	467
Lesson 1: Planning the Deployment of Your Project	468
XCOPY Deployment	468
Creating Setup Projects	469
Configuring Build Properties of Your Setup Project	473
Building, Distributing, and Deploying a Setup Project	477
Lesson Summary	480
Lesson 2: Configuring Your Setup Project	481
Setting the Setup Project Properties	481
The Installation Editors	483
Installing a Native Assembly Image	495
Verifying Installed Assembly Security Policies	496
Lesson Summary	497
Lab 10: Creating an Installer Application	498
Before You Begin	498
Exercise 10.1: Creating the Setup Project	498
Exercise 10.2: Configuring Your Application	499
Exercise 10.3: Installing Your Application	499
Review	501
 Appendix A Questions and Answers	 503
 Glossary	 515
 Index	 523
