

Pharmaceutical Ethics

A close-up photograph of a white plastic pill bottle tilted on its side, pouring a thick, white, milky liquid into a silver metal spoon. The spoon is held horizontally, and the liquid is captured mid-pour, creating a smooth, continuous stream. In the background, the face of a person is visible but heavily blurred, showing only the general shape of the head and features. The lighting is soft, highlighting the texture of the liquid and the metallic sheen of the spoon.
