

MOORE PERSAUD

The Developing Human

Clinically Oriented Embryology

7th Edition

SAUNDERS

Contents

1	Introduction to the Developing Human	1
	Developmental Periods	2
	Significance of Embryology	8
	Historical Gleanings	9
	Descriptive Terms in Embryology	12
	Clinically Oriented Problems	14
2	The Beginning of Human Development: First Week	15
	Gametogenesis	16
	Uterus, Uterine Tubes, and Ovaries	22
	Female Reproductive Cycles	25
	Transportation of Gametes	29
	Maturation of Sperms	31
	Viability of Gametes	31
	Fertilization	31
	Cleavage of Zygote	36
	Formation of Blastocyst	37
	Summary of First Week	39
	Clinically Oriented Problems	41
3	Formation of Bilaminar Embryonic Disc: Second Week	43
	Completion of Implantation and Continuation of Embryonic Development	44
	Development of Chorionic Sac	47

Implantation Sites of Blastocyst	47
Summary of Implantation	51
Summary of Second Week	52
Clinically Oriented Problems	53
4 Formation of Germ Layers and Early Tissue and Organ Differentiation: Third Week	59
Gastrulation: Formation of Germ Layers	60
Neurulation: Formation of Neural Tube	67
Development of Somites	69
Development of Intraembryonic Coelom	70
Early Development of Cardiovascular System	70
Further Development of Chorionic Villi	71
Summary of Third Week	72
Clinically Oriented Problems	75
5 Organogenetic Period: Fourth to Eighth Weeks	77
Phases of Embryonic Development	78
Folding of the Embryo	78
Germ Layer Derivatives	80
Control of Embryonic Development	80
Highlights of Fourth to Eighth Weeks	84
Estimation of Embryonic Age	94
Summary of Fourth to Eighth Weeks	95
Clinically Oriented Problems	98
6 The Fetal Period: Ninth Week to Birth	101
Estimation of Fetal Age	103
Highlights of Fetal Period	104
Expected Date of Delivery	109
Factors Influencing Fetal Growth	110
Procedures for Assessing Fetal Status	113
Summary of Fetal Period	116
Clinically Oriented Problems	116
7 Placenta and Fetal Membranes	119
Placenta	120
Parturition (Childbirth)	131
Amnion and Amniotic Fluid	138
Yolk Sac	143
Allantois	143
Multiple Pregnancies	144
Summary of Placenta and Fetal Membranes	150
Clinically Oriented Problems	153
8 Human Birth Defects	197
Classification of Birth Defects	158
Teratology – Study of Abnormal Development	158

Anomalies Caused by Genetic Factors	159
Anomalies Caused by Environmental Factors	173
Anomalies Caused by Multifactorial Inheritance	184
Summary of Human Birth Defects	184
Clinically Oriented Problems	185

9 Body Cavities, Mesenteries, and Diaphragm 187

The Embryonic Body Cavity	188
Development of the Diaphragm	192
Congenital Diaphragmatic Hernia	195
Summary of Development of Body Cavities	197
Clinically Oriented Problems	199

10 The Pharyngeal Apparatus 201

Pharyngeal Arches	202
Pharyngeal Pouches	209
Pharyngeal Grooves	212
Pharyngeal Membranes	212
Development of Thyroid Gland	215
Development of Tongue	218
Development of Salivary Glands	222
Development of Face	222
Development of Nasal Cavities	226
Development of Palate	228
Summary of Pharyngeal Apparatus	238
Clinically Oriented Problems	239

11 The Respiratory System 241

Development of Larynx	242
Development of Trachea	242
Development of Bronchi and Lungs	245
Summary of Respiratory System	252
Clinically Oriented Problems	252

12 The Digestive System 255

Foregut	256
Development of Spleen	266
Midgut	266
Hindgut	275
Summary of Digestive System	282
Clinically Oriented Problems	284

13 The Urogenital System 287

Development of Urinary System	288
Development of Suprarenal Glands	303
Development of Genital System	304
Development of Inguinal Canals	322
Summary of Urogenital System	325
Clinically Oriented Problems	326

14	The Cardiovascular System	329
	Early Development of Heart and Vessels	330
	Final Prenatal Development of Heart	336
	Anomalies of Heart and Great Vessels	347
	Aortic Arch Derivatives	357
	Aortic Arch Anomalies	360
	Fetal and Neonatal Circulation	364
	Development of Lymphatic System	371
	Summary of Cardiovascular System	377
	Clinically Oriented Problems	379
15	The Skeletal System	381
	Development of Bone and Cartilage	382
	Development of Joints	385
	Development of Axial Skeleton	386
	Development of Appendicular Skeleton	395
	Summary of Skeletal System	398
	Clinically Oriented Problems	398
16	The Muscular System	401
	Development of Skeletal Muscle	402
	Development of Smooth Muscle	404
	Development of Cardiac Muscle	404
	Summary of Muscular System	406
	Clinically Oriented Problems	406
17	The Limbs	409
	Early Stages of Limb Development	410
	Final Stages of Limb Development	410
	Cutaneous Innervation of Limbs	412
	Blood Supply to Limbs	412
	Anomalies of Limbs	414
	Summary of Limb Development	421
	Clinically Oriented Problems	423
18	The Nervous System	427
	Origin of Nervous System	428
	Development of Spinal Cord	428
	Congenital Anomalies of Spinal Cord	435
	Development of Brain	439
	Congenital Anomalies of Brain	451
	Development of Peripheral Nervous System	456
	Development of Autonomic Nervous System	461
	Summary of Nervous System	461
	Clinically Oriented Problems	462
19	The Eye and Ear	465
	Development of Eye and Related Structures	466
	Development of Ear	476

Summary of Development of Eye	482
Summary of Development of Ear	482
Clinically Oriented Problems	482

20 The Integumentary System	485
Development of Skin	486
Development of Hair	488
Development of Nails	491
Development of Mammary Glands	492
Development of Teeth	494
Summary of Integumentary System	500
Clinically Oriented Problems	500

Discussion of Clinically Oriented Problems	503
