Contents

UNIT 1 ORGANIZATION OF THE HUMAN BODY

Chapter 1 An Introduction to the Human Body 1

Anatomy and Physiology Defined 2

Levels of Body Organization 3

Characteristics of the Living Human Organism 7

Basic Life Processes 7 Homeostasis 7 Body Fluids 8

Control of Homeostasis 8

Feedback Systems 8

Negative Feedback Systems • Positive Feedback Systems

Homeostatic Imbalances 10

Aging and Homeostasis 11

Anatomical Terminology 12

Body Positions 12 Regional Names 12 Directional Terms 12

Planes and Sections 12 Body Cavities 12

Dorsal Body Cavity • Ventral Body Cavity • Thoracic and Abdominal Cavity Membranes

Abdominopelvic Regions and Quadrants 19

Medical Imaging 20

Clinical Applications

Palpation, Auscultation, and Percussion 6

Autopsy 7 Diagnosis of Disease 11

Study Outline 22 Self-Quiz Questions 24

Critical Thinking Questions 25 Answers to Figure Questions 25

Chapter 2 The Chemical Level of Organization 26

How Matter is Organized 27

Chemical Elements 27 Structure of Atoms 27

Atomic Number and Mass Number 28 Atomic Mass 30

Ions, Molecules, Free Radicals, and Compounds 30

Chemical Bonds 31

Ionic Bonds 31 Covalent Bonds 32 Hydrogen Bonds 33

Chemical Reactions 34

Forms of Energy and Chemical Reactions 35

Energy Transfer in Chemical Reactions 35

Activation Energy • Catalysts Types of Chemical Reactions 36

Synthesis Reactions—Anabolism •

Decomposition Reactions—Catabolism •

Exchange Reactions • Reversible Reactions

Inorganic Compounds and Solutions 37

Water 38

Water as a Solvent • Water in Chemical Reactions • High Heat

Capacity of Water • Water as a Lubricant

Solutions, Colloids, and Suspensions 39

Inorganic Acids, Bases, and Salts 40

Acid-Base Balance: The Concept of pH 40

Maintaining pH: Buffer Systems 40

Organic Compounds 42

Carbon and Its Functional Groups 42 Carbohydrates 43

Monosaccharides and Disaccharides: The Simple Sugars •

Polysaccharides

Lipids 44

Triglycerides • Phospholipids • Steroids • Other Lipids

Proteins 48

Amino Acids and Polypeptides • Levels of Structural Organization in Proteins • Enzymes

Nucleic Acids: Deoxyribonucleic Acid (DNA) and Ribonucleic Acid (RNA) 52

Adenosine Triphosphate 54

Clinical Applications

Harmful and Beneficial Effects of Radiation 29

Free Radicals and Their Effects on Health 30

Saturated Fats, Cholesterol, and Atherosclerosis 47

Galactosemia 52 DNA Fingerprinting 54

Study Outline 55 Self-Quiz Questions 57

Critical Thinking Questions 58 Answers to Figure Questions 58

Chapter 3 The Cellular Level of Organization 59

Parts of a Cell 60

The Plasma Membrane 61

The Lipid Bilayer 61 Arrangement of Membrane Proteins 62

Functions of Membrane Proteins 62 Membrane Fluidity 62

Membrane Permeability 63

Gradients Across the Plasma Membrane 64

Transport Across the Plasma Membrane 64

Principles of Diffusion 65 Osmosis 66

Diffusion Through the Lipid Bilayer 68

Diffusion Through Membrane Channels 68

Facilitated Diffusion 68 Active Transport 69

Primary Active Transport • Secondary Active Transport

Transport in Vesicles 71

Endocytosis • Exocytosis • Transcytosis

Cytoplasm 75

Cytosol 75 Organelles 75

The Cytoskeleton • Centrosome • Cilia and Flagella •

Ribosomes • Endoplasmic Reticulum • Golgi Complex

• Lysosomes • Peroxisomes • Proteasomes • Mitochondria

Nucleus 82

Protein Synthesis 85

Transcription 87 Translation 88

Cell Division 90

The Cell Cycle in Somatic Cells 90

Interphase • Mitotic Phase

Control of Cell Destiny 93

Cellular Diversity 94 Aging and Cells 95

Clinical Applications

Medical Uses of Isotonic, Hypertonic, and Hypotonic Solutions 67

Digitalis Increases Ca²⁺ in Heart Muscle Cells 71

Viruses and Receptor-mediated Endocytosis 72

Tay-Sachs Disease 81 Proteasomes and Disease 82

Genomics 84 Antisense Therapy 88 Recombinant DNA 90

Tumor-suppressor Genes 94

Progeria and Werner Syndrome 95

Disorders: Homeostatic Imbalances 95 Medical Terminology 97

Study Outline 97 Self-Quiz Questions 99

Critical Thinking Questions 101 Answers to Figure Questions 101

Chapter 4 The Tissue Level of Organization 103

Types of Tissues and Their Origins 104

Cell Junctions 104

Tight Junctions 105 Adherens Junctions 105

Desmosomes 106 Hemidesmosomes 106

Gap Junctions 106

Epithelial Tissue 106

Covering and Lining Epithelium 107

Simple Epithelium • Stratified Epithelium •

Pseudostratified Columnar Epithelium

Glandular Epithelium 115

Structural Classification of Exocrine Glands • Functional Classification of Exocrine Glands

Connective Tissue 117

General Features of Connective Tissue 117 Connective Tissue

Cells 117 Connective Tissue Matrix 118

Ground Substance • Fibers

Classification of Connective Tissues 119

Types of Mature Connective Tissue 120

Loose Connective Tissue • Dense Connective Tissue • Cartilage • Bone Tissue • Blood Tissue • Lymph

Membranes 129

Epithelial Membranes 129

Mucous Membranes • Serous Membranes

Synovial Membranes 129

Muscle Tissue 130

Nervous Tissue 132

Tissue Repair: Restoring Homeostasis 132

Aging and Tissues 133

Clinical Applications

Biopsy 104 Papanicolaou Test 108 Marfan Syndrome 119

Liposuction 120 Tissue Engineering 128 Adhesions 133

Disorders: Homeostatic Imbalances 134 Medical Terminology 134

Study Outline 134 Self-Quiz Questions 136

Critical Thinking Questions 138 Answers to Figure Questions 138

Chapter 5 The Integumentary System 139

Structure of the Skin 140

Epidermis 140

Stratum Basale • Stratum Spinosum • Stratum Granulosum • Stratum Lucidum • Stratum Corneum

Keratinization and Growth of the Epidermis 143

Dermis 144

The Structural Basis of Skin Color 145

Types of Skin 145

Accessory Structures of the Skin 146

Hair 146

Anatomy of a Hair • Hair Growth • Types of Hairs • Hair Color • Functions of Hair

Skin Glands 148

Sebaceous Glands • Sudoriferous Glands • Ceruminous Glands

Nails 150

Functions of the Skin 151

Thermoregulation 151 Protection 151

Cutaneous Sensations 151 Excretion and Absorption 151

Synthesis of Vitamin D 151

Maintaining Homeostasis: Skin Wound Healing 152

Epidermal Wound Healing 152 Deep Wound Healing 152

Development of the Integumentary System 153

Aging and the Integumentary System 154

Clinical Applications

Skin Grafts 142 Psoriasis 143

Photodamage and Photosensitivity Reactions 144

Skin Color Clues 145 Hair Removal 146

Hair and Hormones 148 Acne 149 Impacted Cerumen 150

Transdermal Drug Administration 151

FOCUS ON HOMEOSTASIS:

THE INTEGUMENTARY SYSTEM 155

Disorders: Homeostatic Imbalances 154 Medical Terminology 157

Study Outline 158 Self-Quiz Questions 159

Critical Thinking Questions 160 Answers to Figure Questions 160

UNIT 2 PRINCIPLES OF SUPPORT AND MOVEMENT

Chapter 6 The Skeletal System: Bone Tissue 161

Functions of the Bone and Skeletal System 162

Structure of Bone 162

Histology of Bone Tissue 164

Compact Bone Tissue 165 Spongy Bone Tissue 166

Blood and Nerve Supply of Bone 167

Bone Formation 168

Intramembranous Ossification 168

Endochondral Ossification 170

Bone Growth 170

Growth in Length 170 Growth in Thickness 172

Factors Affecting Bone Growth 174

Bones and Homeostasis 174

Bone Remodeling 174 Fracture and Repair of Bone 175

Bone's Role in Calcium Homeostasis 177

Exercise and Bone Tissue 178

Development of the Skeletal System 178

Aging and Bone Tissue 180

Clinical Applications

Bone Scan 167 Hormonal Abnormalities that Affect Height 174

Treatments for Fractures 177

Disorders: Homeostatic Imbalances 180 **Medical Terminology 181**

Study Outline 181 Self-Quiz Questions 182

Critical Thinking Questions 184 Answers to Figure Questions 184

Chapter 7 The Skeletal System: The Axial Skeleton 185

Divisions of the Skeletal System 186

Types of Bones 188

Bone Surface Markings 188

Skull 189

General Features 189 Cranial Bones 189

*Frontal Bone • Parietal Bones • Temporal Bones • Occipital...
Bone • Sphenoid Bone • Ethmoid Bone*

Facial Bones 196

*Nasal Bones • Maxillae • Zygomatic Bones • Lacrimal Bones
• Palatine Bones • Inferior Nasal Conchae • Vomer •
Mandible • Nasal Septum*

Orbits 199 Foramina 199

Unique Features of the Skull 200

Sutures • Paranasal Sinuses • Fontanelles

Hyoid Bone 202

Vertebral Column 203

Normal Curves of the Vertebral Column 204

Intervertebral Discs 204 Parts of a Typical Vertebra 204

Body • Vertebral Arch • Processes

Regions of the Vertebral Column 205

Cervical Region • Thoracic Region • Lumbar Region • Sacrum • Coccyx

Thorax 211

Sternum 211 Ribs 211

 **Clinical Applications**

Black Eyes 191 Cleft Palate and Cleft Lip 196

Temporomandibular Joint Syndrome 198

Deviated Nasal Septum 199 Sinusitis 200

Caudal Anesthesia 211 Rib Fractures 212

Disorders: Homeostatic Imbalances 214

Medical Terminology 214

Study Outline 214 Self-Quiz Questions 215

Critical Thinking Questions 217 Answers to Figure Questions 217

Chapter 8 The Skeletal System: The Appendicular Skeleton 218

Pectoral (Shoulder) Girdle 219

Clavicle 219 Scapula 220

Upper Limb 222

Humerus 222 Ulna and Radius 223

Carpals, Metacarpals, and Phalanges 226

Pelvic (Hip) Girdle 227

Ilium 227 Ischium 229

Pubis 229 True and False Pelves 229

Comparison of Female and Male Pelves 230

Comparison of Pectoral and Pelvic Girdles 232

Lower Limb 232

Femur 232 Patella 233 Tibia and Fibula 234

Tarsals, Metatarsals, and Phalanges 237 Arches of the Foot 238

 **Clinical Applications**

Fractured Clavicle 220 Patellofemoral Stress Syndrome 233

Flatfoot and Clawfoot 238

FOCUS ON HOMEOSTASIS: THE SKELETAL SYSTEM 239

Disorders: Homeostatic Imbalances 240

Medical Terminology 240

Study Outline 240 Self-Quiz Questions 241

Critical Thinking Questions 242 Answers to Figure Questions 242

Chapter 9 Joints 243

Joint Classifications 244

Fibrous Joints 244

Sutures 244 Syndesmoses 244 Gomphoses 245

Cartilaginous Joints 245

Synchondroses 245 Symphyses 245

Synovial Joints 246

Structure of Synovial Joints 246

*Articular Capsule • Synovial Fluid • Accessory Ligaments and
Articular Discs*

Nerve and Blood Supply 247 Bursae and Tendon Sheaths 247

Types of Synovial Joints 248

*Planar Joints • Hinge Joints • Pivot Joints • Condylloid Joints
• Saddle Joints • Ball-and-Socket Joints*

Types of Movements at Synovial Joints 251

Gliding 251 Angular Movements 251

*Flexion, Extension, Lateral Flexion, and Hyperextension • Abduction,
Adduction, and Circumduction*

Rotation 254 Special Movements 254

Selected Joints of the Body 256

Factors Affecting Contact and Range of Motion at

Synovial Joints 266

Aging and Joints 266

 **Clinical Applications**

Torn Cartilage and Arthroscopy 247 Sprain and Strain 247

Bursitis 248 Joint Dislocation 256

Disorders: Homeostatic Imbalances 267

Medical Terminology 268

Study Outline 268 Self-Quiz Questions 270

Critical Thinking Questions 271 Answers to Figure Questions 272

Chapter 10 Muscle Tissue 273

Overview of Muscle Tissue 274

Types of Muscle Tissue 274 Functions of Muscle Tissue 274

Properties of Muscle Tissue 274

Skeletal Muscle Tissue 275

Connective Tissue Components 275

Nerve and Blood Supply 277

Microscopic Anatomy of a Skeletal Muscle Fiber 277

*Sarcolemma, T Tubules, and Sarcoplasm • Myofibrils and Sar-
coplasmic Reticulum • Filaments and the Sarcomere*

Muscle Proteins 281

Contraction and Relaxation of Skeletal Muscle Fibers 282

The Sliding Filament Mechanism 282

*The Contraction Cycle • Excitation-Contraction Coupling •
Length-Tension Relationship*

The Neuromuscular Junction 285

Muscle Metabolism 289

- Production of ATP in Muscle Fibers 289
 - Creatine Phosphate • Anaerobic Cellular Respiration*
 - Aerobic Cellular Respiration*
- Muscle Fatigue 290 Oxygen Consumption After Exercise 291

Control of Muscle Tension 291

- Motor Units 291 Twitch Contraction 292
- Frequency of Stimulation 292
- Motor Unit Recruitment 292 Muscle Tone 293
- Isotonic and Isometric Contractions 294

Types of Skeletal Muscle Fibers 294

- Slow Oxidative Fibers 295
- Fast Oxidative-Glycolytic Fibers 295
- Fast Glycolytic Fibers 295
- Distribution and Recruitment of Different Types of Fibers 295

Exercise and Skeletal Muscle Tissue 296

Cardiac Muscle Tissue 297

Smooth Muscle Tissue 297

- Microscopic Anatomy of Smooth Muscle 298
- Physiology of Smooth Muscle 298

Regeneration of Muscle Tissue 299

Development of the Muscular System 299

Aging and the Muscle Tissue 301

Clinical Applications

- Muscular Atrophy and Hypertrophy 279*
- Exercise-Induced Muscle Damage 279*
- Rigor Mortis 285 Pharmacology of the NMJ 286*
- Creatine Supplementation 290*
- Aerobic Training Versus Strength Training 293*
- Anabolic Steroids 297*

Disorders: Homeostatic Imbalances 302 Medical Terminology 302

- Study Outline 303 Self-Quiz Questions 305*
- Critical Thinking Questions 307 Answers to Figure Questions 307*

Chapter 11 The Muscular System 308

How Skeletal Muscles Produce Movement 309

- Muscle Attachment Sites: Origin and Insertion 309
- Lever Systems and Leverage 309
- Effects of Fascicle Arrangement 312
- Coordination Within Muscle Groups 312

How Skeletal Muscles are Named 313

Principal Skeletal Muscles 315

Clinical Applications

- Tenosynovitis 309 Benefits of Stretching 313*
- Bell's Palsy 318 Strabismus 322*
- Intubation During Anesthesia 326 Inguinal Hernia 332*
- Injury of Levator Ani and Stress Incontinence 338*
- Impingement Syndrome 344 Carpal Tunnel Syndrome 356*
- Back Injuries and Heavy Lifting 359 Pulled Groin 364*
- Pulled Hamstrings 369 Shinsplint Syndrome 372*
- Plantar Fasciitis 376*

FOCUS ON HOMEOSTASIS: THE MUSCULAR SYSTEM 379

- Disorders: Homeostatic Imbalances 380**
- Study Outline 381 Self-Quiz Questions 382*
- Critical Thinking Questions 383 Answers to Figure Questions 384*

UNIT 3 CONTROL SYSTEMS OF THE HUMAN BODY

Chapter 12 Nervous Tissue 385

Overview of the Nervous System 386

- Structure of the Nervous System 386
- Functions of the Nervous System 386
- Organization of the Nervous System 387

Histology of Nervous Tissue 388

- Neurons 388
 - Parts of a Neuron • Structural Diversity in Neurons*
- Neuroglia 391 Myelination 392
- Gray and White Matter 393

Electrical Signals in Neurons 395

- Ion Channels 395 Resting Membrane Potential 396
- Graded Potentials 398 Generation of Action Potentials 398
 - Depolarizing Phase • Repolarizing Phase • Refractory Period*
- Propagation of Nerve Impulses 400
 - Continuous and Saltatory Conduction • Speed of Nerve Impulse Propagation*
- Encoding of Stimulus Intensity 402
- Comparison of Electrical Signals Produced by Excitable Cells 403

Signal Transmission at Synapses 404

- Electrical Synapses 404
- Chemical Synapses 404
 - Excitatory and Inhibitory Postsynaptic Potentials • Removal of Neurotransmitter*
- Spatial and Temporal Summation of Postsynaptic Potentials 406

Neurotransmitters 407

- Small-Molecule Neurotransmitters 408
 - Acetylcholine • Amino Acids • Biogenic Amines • ATP and Other Purines • Nitric Oxide*
- Neuropeptides 409

Neural Circuits 410

Regeneration and Repair of Nervous Tissue 412

- Neurogenesis in the CNS 412
- Damage and Repair in the PNS 412

Clinical Applications

- Tetanus 390 Neurotoxins and Local Anesthetics 400*
- Strychnine Poisoning 407 Excitotoxicity 409*
- Mimicking and Blocking the Effects of Neurotransmitters 410*

Disorders: Homeostatic Imbalances 413 Medical Terminology 414

- Study Outline 414 Self-Quiz Questions 415*
- Critical Thinking Questions 417 Answers to Figure Questions 418*

Chapter 13 The Spinal Cord and Spinal Nerves 419

Spinal Cord Anatomy 420

- Protective Structures 420
 - Vertebral Column • Meninges*
- External Anatomy of the Spinal Cord 420
- Internal Anatomy of the Spinal Cord 423

Spinal Cord Physiology 425

- Sensory and Motor Tracts 425
- Reflexes and Reflex Arcs 426
 - The Stretch Reflex • The Tendon Reflex • The Flexor and Crossed Extensor Reflexes*

Spinal Nerves 433

- Connective Tissue Coverings of Spinal Nerves 433

Distribution of Spinal Nerves 434
Branches • Plexuses • Intercostal Nerves
Dermatomes 446

Clinical Applications

Spinal Tap 423

Plantar Flexion Reflex and the Babinski Sign 433

Injuries to the Phrenic Nerves 436

Injuries to Nerves Emerging from the Brachial Plexus 438

Lumbar Plexus Injuries 442 Sciatic Nerve Injury 444

Spinal Cord Transection and Muscle Function 446

Disorders: Homeostatic Imbalances 447 Medical Terminology 447

Study Outline 447 Self-Quiz Questions 448

Critical Thinking Questions 450 Answers to Figure Questions 450

Chapter 14 The Brain and Cranial Nerves 451

Brain Organization, Protection, and Nourishment 452

Major Parts of the Brain 452

Brain Blood Flow and the Blood–Brain Barrier 452

Protective Coverings of the Brain 453

Cerebrospinal Fluid 453

Formation of CSF in the Ventricles • Circulation of CSF

The Brain Stem 458

Medulla Oblongata 458 Pons 459

Midbrain 460 Reticular Formation 462

The Cerebellum 462

The Diencephalon 464

Thalamus 464 Hypothalamus 466 Epithalamus 467

Subthalamus 467 Circumventricular Organs 467

The Cerebrum 467

Lobes of the Cerebrum 469 Cerebral White Matter 469

Basal Ganglia 469 The Limbic System 471

Cerebral Cortex Areas and Functions 473

Sensory Areas 473 Motor Areas 474 Association Areas 475

Hemispheric Lateralization 475 Brain Waves 476

Cranial Nerves 477

Cranial Nerve I: Olfactory Nerve 477

Cranial Nerve II: Optic Nerve 478

Cranial Nerve III: Oculomotor Nerve 478

Cranial Nerve IV: Trochlear Nerve 478

Cranial Nerve V: Trigeminal Nerve 478

Cranial Nerve VI: Abducens Nerve 481

Cranial Nerve VII: Facial Nerve 481

Cranial Nerve VIII: Vestibulocochlear Nerve 482

Cranial Nerve IX: Glossopharyngeal Nerve 482

Cranial Nerve X: Vagus Nerve 483

Cranial Nerve XI: Accessory Nerve 484

Cranial Nerve XII: Hypoglossal Nerve 484

Development of the Nervous System 490

Aging and the Nervous System 491

Clinical Applications

Breaching the Blood–Brain Barrier 452 Hydrocephalus 457

Injury of the Medulla 458 Brain Injuries 472 Aphasia 475

Dental Anesthesia 480

Disorders: Homeostatic Imbalances 492 Medical Terminology 493

Study Outline 493 Self-Quiz Questions 495

Critical Thinking Questions 497 Answers to Figure Questions 497

Chapter 15 Sensory, Motor, and Integrative Systems 498

Sensation 499

Sensory Modalities 499 The Process of Sensation 499

Sensory Receptors 500

Types of Sensory Receptors • Adaptation in Sensory Receptors

Somatic Sensations 502

Tactile Sensations 502 Thermal Sensations 503

Pain Sensations 504

Types of Pain • Localization of Pain

Proprioceptive Sensations 504

Muscle Spindles • Tendon Organs • Joint Kinesthetic Receptors

Somatic Sensory and Motor Maps in the Cerebral Cortex 508

Somatic Sensory Pathways 509

Posterior Column–Medical Lemniscus Pathway to the Cortex 509

Anterolateral Pathways to the Cortex 510

Somatic Sensory Pathways to the Cerebellum 511

Somatic Motor Pathways 512

Organization of Upper Motor Neuron Pathways 512

Direct Motor Pathways • Indirect Motor Pathways

Modulation of Movement by the Basal Ganglia 514

Modulation of Movement by the Cerebellum 516

Integrative Functions of the Cerebrum 517

Wakefulness and Sleep 517

The Role of the Reticular Activating System in Awakening

• Sleep

Learning and Memory 519

Clinical Applications

Phantom Limb Sensation 503 Analgesia: Relief from Pain 504

Syphilis 512 Paralysis 512

Amyotrophic Lateral Sclerosis 514

Damage to the Basal Ganglia 515

Damage to the Cerebellum 517

Disorders: Homeostatic Imbalances 520 Medical Terminology 521

Study Outline 521 Self-Quiz Questions 523

Critical Thinking Questions 524 Answers to Figure Questions 525

Chapter 16 The Special Senses 526

Olfaction: Sense of Smell 527

Anatomy of Olfactory Receptors 527

Physiology of Olfaction 527

Odor Thresholds and Adaptation 527

The Olfactory Pathway 528

Gustation: Sense of Taste 529

Anatomy of Taste Buds and Papillae 529

Physiology of Gustation 529

Taste Thresholds and Adaptation 530

The Gustatory Pathway 531

Vision 531

Accessory Structures of the Eye 532

Eyelids • Eyelashes and Eyebrows • The Lacrimal Apparatus

• Extrinsic Eye Muscles

Anatomy of the Eyeball 534

Fibrous Tunic • Vascular Tunic • Retina • Lens • Interior of the Eyeball

Image Formation 538

Refraction of Light Rays • Accommodation and the Near Point of Vision • Refraction Abnormalities • Constriction of the Pupil

Convergence 540 Physiology of Vision 541
Photoreceptors and Photopigments • Light and Dark Adaptation • Release of Neurotransmitter by Photoreceptors
The Visual Pathway 544
Processing of Visual Input in the Retina • Brain Pathway and Visual Fields

Hearing and Equilibrium 546

Anatomy of the Ear 546
External (Outer) Ear • Middle Ear • Internal (Inner) Ear
The Nature of Sound Waves 551 Physiology of Hearing 552
The Auditory Pathway 553 Physiology of Equilibrium 553
Otolithic Organs: Sacculle and Utricule • Semicircular Ducts
Equilibrium Pathways 555

Development of the Eyes and Ears 557

Eyes 557 Ears 559

Clinical Applications

Hyposmia 529 Taste Aversion 531
Corneal Transplants 534 Age-related Macular Disease 538
Presbyopia 540 Color Blindness and Night Blindness 544
Loud Sounds and Hair Cell Damage 551
Cochlear Implants 553

Disorders: Homeostatic Imbalances 560 Medical Terminology 560

Study Outline 561 Self-Quiz Questions 562
Critical Thinking Questions 564 Answers to Figure Questions 564

Chapter 17 The Autonomic Nervous System 565

Comparison of Somatic and Autonomic Nervous Systems 566

Anatomy of Autonomic Motor Pathways 568

Anatomical Components 568
Preganglionic Neurons • Autonomic Ganglia • Autonomic Plexuses • Postganglionic Neurons
Structure of the Sympathetic Division 572
Structure of the Parasympathetic Division 574

ANS Neurotransmitters and Receptors 575

Cholinergic Neurons and Receptors 575
Adrenergic Neurons and Receptors 576
Receptor Agonists and Antagonists 576

Physiological Effects of the ANS 576

Sympathetic Responses 576
Parasympathetic Responses 578

Integration and Control of Autonomic Functions 578

Autonomic Reflexes 578
Autonomic Control by Higher Centers 579

Clinical Applications

Horner's Syndrome 574 Raynaud Disease 578
Autonomic Dysreflexia 580

FOCUS ON HOMEOSTASIS: THE NERVOUS SYSTEM 582

Study Outline 583 Self-Quiz Questions 584
Critical Thinking Questions 585 Answers to Figure Questions 585

Chapter 18 The Endocrine System 586

Comparison of Control by the Nervous and Endocrine Systems 587

Endocrine Glands 587

Hormone Activity 588

The Role of Human Receptors 588
Circulating and Local Hormones 589
Chemical Classes of Hormones 589

Lipid-Soluble Hormones • Water-Soluble Hormones

Hormone Transport in the Blood 590

Mechanisms of Hormone Action 590

Action of Lipid-Soluble Hormones 592
Action of Water-Soluble Hormones 592
Hormone Interactions 593

Control of Hormone Secretion 594

Hypothalamus and Pituitary Gland 594

Anterior Pituitary 594

Hypophyseal Portal System • Types of Anterior Pituitary Cells • Control of Secretion by the Anterior Pituitary • Human Growth Hormone and Insulinlike Growth Factors • Thyroid-stimulating Hormone • Follicle-stimulating Hormone • Luteinizing Hormone • Prolactin • Adrenocorticotropic Hormone • Melanocyte-stimulating Hormone

Posterior Pituitary 599

Oxytocin • Antidiuretic Hormone

Thyroid Gland 603

Formation, Storage, and Release of Thyroid Hormones 604
Control of Thyroid Hormone Secretion 605
Actions of Thyroid Hormones 605 Calcitonin 606

Parathyroid Glands 606

Adrenal Glands 608

Adrenal Cortex 610
Mineralocorticoids • Glucocorticoids • Androgens
Adrenal Medulla 613

Pancreatic Islets 614

Cell Types in the Pancreatic Islets 614
Regulation of Glucagon and Insulin Secretion 614

Ovaries and Testes 616

Pineal Gland 618

Thymus 618

Other Hormones and Growth Factors 618

Hormones from Other Endocrine Cells 618
Eicosanoids 618 Growth Factors 619

The Stress Response 620

The Fight-or-Flight Response 620
The Resistance Reaction 620 Exhaustion 620
Stress and Disease 620

Development of the Endocrine System 622

Aging and the Endocrine System 622

Clinical Applications

Blocking Hormone Receptors 589
Administering Hormones 590
Cholera Toxin and G Proteins 593
Diabetogenic Effect of hGH 598
Oxytocin and Childbirth 600
Seasonal Affective Disorder and Jet Lag 618
Nonsteroidal Anti-inflammatory Drugs 618
Posttraumatic Stress Disorder 622

FOCUS ON HOMEOSTASIS: THE ENDOCRINE SYSTEM 624

Disorders: Homeostatic Imbalances 625 Medical Terminology 627
Study Outline 628 Self-Quiz Questions 630
Critical Thinking Questions 631 Answers to Figure Questions 632

UNIT 4 MAINTENANCE OF THE HUMAN BODY

Chapter 19 The Cardiovascular System: The Blood 633

Functions and Properties of Blood 634

Functions of Blood 634 Physical Characteristics of Blood 634
Components of Blood 634
Blood Plasma • Formed Elements

Formation of Blood Cells 637

Red Blood Cells 639

RBC Anatomy 639 RBC Physiology 640
RBC Life Cycle • Erythropoiesis: Production of RBCs

White Blood Cells 643

Types of WBCs 643
Granular Leukocytes • Agranular Leukocytes
Functions of WBCs 644

Platelets 645

Hemostasis 647

Vascular Spasm 647 Platelet Plug Formation 647
Blood Clotting 648
The Extrinsic Pathway • The Intrinsic Pathway • The Common Pathway • Clot Retraction
Role of Vitamin K in Clotting 649
Hemostatic Control Mechanisms 650
Intravascular Clotting 651

Blood Groups and Blood Types 651

ABO Blood Group 651 Rh Blood Group 652
Transfusions 653
Typing and Cross-Matching Blood for Transfusion 653

Clinical Applications

Withdrawing Blood 634
Induced Polycythemia in Athletes 637
Medical Uses of Hemopoietic Growth Factors 639
Iron Overload and Tissue Damage 641
Reticulocyte Count 642 Bone Marrow Transplant 645
Complete Blood Count 646 Anticoagulants 650
Aspirin and Thrombolytic Agents 651
Hemolytic Disease of the Newborn 652

Disorders: Homeostatic Imbalances 654

Medical Terminology 655

Study Outline 656 Self-Quiz Questions 657

Critical Thinking Questions 658 Answers to Figure Questions 658

Chapter 20 The Cardiovascular System: The Heart 659

Anatomy of the Heart 660

Location of the Heart 660 Pericardium 660
Layers of the Heart Wall 661 Chambers of the Heart 662
Right Atrium • Right Ventricle • Left Atrium • Left Ventricle • Myocardial Thickness and Function
Fibrous Skeleton of the Heart 666

Heart Valves and Circulation of Blood 667

Operation of the Atrioventricular Valves 667

Operation of the Semilunar Valves 668
Systemic and Pulmonary Circulations 669
Coronary Circulation 670

Coronary Arteries • Coronary Veins

Cardiac Muscle Tissue and the Cardiac Conduction System 672

Histology of Cardiac Muscle Tissue 672
Autorhythmic Fibers: The Conduction System 674
Action Potential and Contraction of Contractile Fibers 675
ATP Production in Cardiac Muscle 677 Electrocardiogram 677
Correlation of ECG Waves with Atrial and Ventricular Systole 678

The Cardiac Cycle 678

Pressure and Volume Changes During the Cardiac Cycle 678
Atrial Systole • Ventricular Systole • Relaxation Period
Heart Sounds 680

Cardiac Output 683

Regulation of Stroke Volume 683
Preload: Effect of Stretching • Contractility • Afterload
Regulation of Heart Rate 684
Autonomic Regulation of Heart Rate • Chemical Regulation of Heart Rate • Other Factors in Heart Rate Regulation

Exercise and the Heart 687

Clinical Applications

Cardiopulmonary Resuscitation 660
Pericarditis and Cardiac Tamponade 660
Heart Valve Disorders 668 Reperfusion Damage 671
Regeneration of Heart Cells 672 Ectopic Pacemaker 674
Heart Murmurs 682 Congestive Heart Failure 684
Help for Failing Hearts 687

Disorders: Homeostatic Imbalances 689 Medical Terminology 692

Study Outline 392 Self-Quiz Questions 693

Critical Thinking Questions 695 Answers to Figure Questions 695

Chapter 21 The Cardiovascular System: Blood Vessels and Hemodynamics 696

Structure and Function of Blood Vessels 697

Arteries 697
Elastic Arteries • Muscular Arteries
Arterioles 699 Capillaries 699 Venules 701 Veins 701
Anastomoses 702 Blood Distribution 702

Capillary Exchange 703

Diffusion 703 Transcytosis 703
Bulk Flow: Filtration and Reabsorption 703

Hemodynamics: Factors Affecting Blood Flow 705

Blood Pressure 706 Resistance 706
Venous Return 707 Velocity of Blood Flow 708

Control of Blood Pressure and Blood Flow 709

Role of the Cardiovascular Center 709
Neural Regulation of Blood Pressure 710
Baroreceptor Reflexes • Chemoreceptor Reflexes
Hormonal Regulation of Blood Pressure 712
Autoregulation of Blood Pressure 712

Checking Circulation 713

Pulse 713
Measuring Blood Pressure 714

Shock and Homeostasis 715

Types of Shock 715
Homeostatic Responses to Shock 715
Signs and Symptoms of Shock 717

Circulatory Routes 717

The Systemic Circulation 717
The Hepatic Portal Circulation 751
The Pulmonary Circulation 752 The Fetal Circulation 752

Development of Blood Vessels and Blood 756

Aging and the Cardiovascular System 756

Clinical Applications

Varicose Veins 702 Edema 705 Syncope 708
Carotid Sinus Massage and Carotid Sinus Syncope 711

FOCUS ON HOMEOSTASIS: THE CARDIOVASCULAR SYSTEM 757

Disorders: Homeostatic Imbalance 758 Medical Terminology 759
Study Outline 759 Self-Quiz Questions 761
Critical Thinking Questions 762 Answers to Figure Questions 762

Chapter 22 The Lymphatic and Immune System and Resistance to Disease 764

Lymphatic and Immune System 765

Functions of the Lymphatic and Immune System 765
Lymphatic Vessels and Lymph Circulation 765
*Lymphatic Capillaries • Lymph Trunks and Ducts • Formation
and Flow of Lymph*
Lymphatic Organs and Tissues 770
Thymus • Lymph Nodes • Spleen • Lymphatic Nodules

Development of Lymphatic Tissues 774

Nonspecific Resistance: Innate Defenses 775

First Line of Defense: Skin and Mucous Membranes 775
Second Line of Defense: Internal Defenses 776
*Antimicrobial Proteins • Natural Killer Cells and
Phagocytes • Inflammation • Fever*

Specific Resistance: Immunity 780

Maturation of T Cells and B Cells 780
Types of Immune Responses 780
Antigens and Antigen Receptors 780
*Chemical Nature of Antigens • Diversity of Antigen
Receptors*
Major Histocompatibility Complex Antigens 782
Pathways of Antigen Processing 782
*Processing of Exogenous Antigens • Processing of
Endogenous Antigens*
Cytokines 784

Cell-Mediated Immunity 785

Activation, Proliferation, and Differentiation of T Cells 785
Types of T Cells 785
Helper T Cells • Cytotoxic T Cells • Memory T Cells
Elimination of Invaders 787 Immunological Surveillance 787

Antibody-Mediated Immunity 780

Activation, Proliferation, and Differentiation of B Cells 788
Antibodies 788
*Antibody Structure • Antibody Actions • Role of the
Complement System in Immunity*
Immunological Memory 792

Self-Recognition and Self-Tolerance 793

Stress and Immunity 795

Aging and the Immune System 795

Clinical Applications

Edema and Lymph Flow 769
Metastasis Through Lymphatic Vessels 773
Ruptured Spleen 774 Microbial Evasion of Phagocytosis 777
Abscesses and Ulcers 779 Histocompatibility Testing 782
Cytokine Therapy 784 Graft Rejection 787
Monoclonal Antibodies 790 Cancer Immunology 794

FOCUS ON HOMEOSTASIS: THE LYMPHATIC AND IMMUNE SYSTEM 796

Disorders: Homeostatic Imbalances 797 Medical Terminology 800
Study Outline 801 Self-Quiz Questions 802
Critical Thinking Questions 804 Answers to Figure Questions 804

Chapter 23 The Respiratory System 805

Respiratory System Anatomy 806

Nose 806 Pharynx 809 Larynx 810
The Structures of Voice Production 812 Trachea 812
Bronchi 814 Lungs 816
*Lobes, Fissures, and Lobules • Alveoli • Blood Supply to the
Lungs*

Pulmonary Ventilation 821

Pressure Changes During Pulmonary Ventilation 821
Inhalation • Exhalation
Other Factors Affecting Pulmonary Ventilation 824
*Surface Tension of Alveolar Fluid • Compliance of the Lungs
• Airway Resistance*
Breathing Patterns and Modified Respiratory Movements 825

Lung Volumes and Capacities 826

Exchange of Oxygen and Carbon Dioxide 827

Gas Laws: Dalton's Law and Henry's Law 827
External and Internal Respiration 828

Transport of Oxygen and Carbon Dioxide 831

Oxygen Transport 831
*The Relation Between Hemoglobin and Oxygen
Partial Pressure • Other Factors Affecting Hemoglobin's
Affinity for Oxygen • Oxygen Affinity of Fetal and Adult
Hemoglobin*
Carbon Dioxide Transport 834
Summary of Gas Exchange and Transport in Lungs and
Tissues 835

Control of Respiration 835

Respiratory Center 835
*Medullary Rhythmicity Area • Pneumotaxic Area • Apneustic
Area*
Regulation of the Respiratory Center 838
*Cortical Influences on Respiration • Chemoreceptor
Regulation of Respiration • Proprioceptor Stimulation of
Respiration • The Inflation Reflex • Other Influences on
Respiration*

Exercise and the Respiratory System 840

Development of the Respiratory System 841

Aging and the Respiratory System 842

Clinical Applications

Rhinoplasty 809 Laryngitis and Cancer of the Larynx 812
Tracheostomy and Intubation 813 Nebulization 819
Pneumothorax 825 Hyperbaric Oxygenation 828
Carbon Monoxide Poisoning 834 Hypoxia 840
Smoking Lowers Respiratory Efficiency 841

FOCUS ON HOMEOSTASIS: THE RESPIRATORY SYSTEM 843

Disorders: Homeostatic Imbalances 844 Medical Terminology 846
Study Outline 847 Self-Quiz Questions 848
Critical Thinking Questions 850 Answers to Figure Questions 850

Chapter 24 The Digestive System 851

Overview of the Digestive System 852

Layers of the GI Tract 853

Mucosa 853 Submucosa 855 Muscularis 855 Serosa 855

Peritoneum 855

Mouth 857

Salivary Glands 858

Composition and Functions of Saliva • Salivation

Tongue 860 Teeth 861

Mechanical and Chemical Digestion in the Mouth 862

Pharynx 863

Esophagus 864

Histology of the Esophagus 864

Physiology of the Esophagus 864

Stomach 866

Anatomy of the Stomach 866 Histology of the Stomach 866

Mechanical and Chemical Digestion in the Stomach 868

Regulation of Gastric Secretion and Motility 870

Cephalic Phase • Gastric Phase • Intestinal Phase

Regulation of Gastric Emptying 873

Pancreas 874

Anatomy of the Pancreas 874 Histology of the Pancreas 874

Composition and Functions of Pancreatic Juice 874

Regulation of Pancreatic Secretions 876

Liver and Gallbladder 876

Anatomy of the Liver and Gallbladder 876

Histology of the Liver and Gallbladder 877

Blood Supply of the Liver 877

Role and Composition of Bile 877

Regulation of Bile Secretion 879 Functions of the Liver 880

Summary: Digestive Hormones 880

Small Intestine 881

Anatomy of the Small Intestine 881

Histology of the Small Intestine 882

Role of Intestinal Juice and Brush-border Enzymes 884

Mechanical Digestion in the Small Intestine 884

Chemical Digestion in the Small Intestine 886

Digestion of Carbohydrates • Digestion of Proteins

• Digestion of Lipids • Digestion of Nucleic Acids

Regulation of Intestinal Secretion and Motility 887

Absorption in the Small Intestine 888

*Absorption of Monosaccharides • Absorption of Amino Acids,
Dipeptides, and Tripeptides • Absorption of Lipids*

*• Absorption of Electrolytes • Absorption of Vitamins •
Absorption of Water*

Large Intestine 891

Anatomy of the Large Intestine 891

Histology of the Large Intestine 893

Mechanical Digestion in the Large Intestine 895

Chemical Digestion in the Large Intestine 895

Absorption and Feces Formation in the Large Intestine 895

The Defecation Reflex 895

Development of the Digestive System 897

Aging and the Digestive System 897

Clinical Applications

Peritonitis 857 Mumps 860 Root Canal Therapy 862

Gastroesophageal Reflux Disease 865

Pylorospasm and Pyloric Stenosis 866

Vomiting 873 Pancreatitis 874

Jaundice 877 Gallstones 880 Lactose Intolerance 886

Absorption of Alcohol 891 Appendicitis 893

Occult Blood 895 Dietary Fiber 896

FOCUS ON HOMEOSTASIS: THE DIGESTIVE SYSTEM 898

Disorders: Homeostatic Imbalances 899 Medical Terminology 900

Study Outline 901 Self-Quiz Questions 903

Critical Thinking Questions 905 Answers to Figure Questions 905

Chapter 25 Metabolism 906

Metabolic Reactions 907

Catabolism and Anabolism Defined 907

Coupling of Catabolism and Anabolism by ATP 907

Energy Transfer 908

Oxidation–Reduction Reactions 908

Mechanisms of ATP Generation 909

Carbohydrate Metabolism 909

The Fate of Glucose 909 Glucose Movement into Cells 910

Glucose Catabolism 910

Glycolysis • The Fate of Pyruvic Acid • Formation of Acetyl

Coenzyme A • Krebs Cycle • The Electron Transport Chain

• Summary of Cellular Respiration

Glucose Anabolism 918

Glucose Storage: Glycogenesis • Glucose Release:

Glycogenolysis • Formation of Glucose from Protein and

Fats: Gluconeogenesis

Lipid Metabolism 920

Transport of Lipids by Lipoproteins 920

Sources and Significance of Blood Cholesterol 921

The Fate of Lipids 921 Triglyceride Storage 921

Lipid Catabolism: Lipolysis 922

Lipid Anabolism: Lipogenesis 923

Protein Metabolism 923

The Fate of Proteins 923 Protein Catabolism 923

Protein Anabolism 925

Key Molecules at Metabolic Crossroads 925

The Role of Glucose 6-Phosphate 925

The Role of Pyruvic Acid 925

The Role of Acetyl Coenzyme A 926

Metabolic Adaptions 927

- Metabolism During the Absorptive State 928
 - Absorptive State Reactions • Regulation of Metabolism During the Absorptive State*
- Metabolism During the Postabsorptive State 929
 - Postabsorptive State Reactions • Regulation of Metabolism During the Postabsorptive State*
- Metabolism During Fasting and Starvation 931

Heat and Energy Balance 932

- Metabolic Rate 932 Body Temperature Homeostasis 932
 - Heat Production • Mechanisms of Heat Transfer • Hypothalamic Thermostat • Thermoregulation*
- Energy Homeostasis and Regulation of Food Intake 935

Nutrition 936

- Guidelines for Healthy Eating 936 Minerals 938 Vitamins 938

Clinical Applications

- Carbohydrate Loading 919 Ketosis 923 Phenylketonuria 925 Hypothermia 935 Emotional Eating 936 Vitamin and Mineral Supplements 938*

Disorders: Homeostatic Imbalances 942 Medical Terminology 942

- Study Outline 943 Self-Quiz Questions 945 Critical Thinking Questions 946 Answers to Figure Questions 947*

Chapter 26 The Urinary System 948

Overview of Kidney Functions 949

Anatomy and Histology of the Kidneys 950

- External Anatomy of the Kidneys 950
- Internal Anatomy of the Kidneys 952
- Blood and Nerve Supply of the Kidneys 952
- The Nephron 953
 - Parts of a Nephron • Histology of the Nephron and Collecting Duct*

Overview of Renal Physiology 959

Glomerular Filtration 960

- The Filtration Membrane 960 Net Filtration Pressure 960
- Glomerular Filtration Rate 963
 - Renal autoregulation of GFR • Neural Regulation of GFR • Hormonal Regulation of GFR*

Tubular Reabsorption and Secretion 965

- Principles of Tubular Reabsorption and Secretion 965
 - Reabsorption Routes • Transport Mechanisms*
- Reabsorption and Secretion in the Proximal Convoluted Tubule 967
- Reabsorption in the Loop of Henle 968
- Reabsorption in the Distal Convoluted Tubule 969
- Reabsorption and Secretion in the Collecting Duct 970
- Hormonal Regulation of Tubular Reabsorption and Tubular Secretion 970
 - Renin–Angiotensin–Aldosterone System • Antidiuretic Hormone • Atrial Natriuretic Peptide*

Production of Dilute and Concentrated Urine 972

- Formation of Dilute Urine 972
- Formation of Concentrated Urine 973

Evaluation of Kidney Function 977

- Urinalysis 977 Blood Tests 977 Renal Plasma Clearance 977

Urine Transportation, Storage, and Elimination 979

- Ureters 979 Urinary Bladder 980
 - Anatomy and Histology of the Urinary Bladder • The Micturition Reflex*
- Urethra 980

Waste Management in Other Body Systems 981

Development of the Urinary System 982

Aging and the Urinary System 982

Clinical Applications

- Nephroptosis (Floating Kidney) 950 Number of Nephrons 959 Loss of Plasma Proteins in Urine Causes Edema 962 Glucosuria 966 Diuretics 975 Dialysis 978 Urinary Incontinence 981*

FOCUS ON HOMEOSTASIS: THE URINARY SYSTEM 984

Disorders: Homeostatic Imbalances 985 Medical Terminology 985

- Study Outline 986 Self-Quiz Questions 988 Critical Thinking Questions 989 Answers to Figure Questions 990*

Chapter 27 Fluid, Electrolyte, and Acid-Base Homeostasis 991

Fluid Compartments and Fluid Balance 992

- Sources of Body Water Gain and Loss 993
- Regulation of Body Water Gain 994
- Regulation of Water and Solute Loss 994
- Movement of Water Between Fluid Compartments 996

Electrolytes in Body Fluid 997

- Concentrations of Electrolytes in Body Fluids 997 Sodium 998 Chloride 998 Potassium 998 Bicarbonate 998 Calcium 999 Phosphate 999 Magnesium 999

Acid-Base Balance 1001

- The Actions of Buffer Systems 1001
 - Protein Buffer System • Carbonic Acid-Bicarbonate Buffer System • Phosphate Buffer System*
- Exhalation of Carbon Dioxide 1002
- Kidney Excretion of H⁺ 1003 Acid-Base Imbalances 1003
 - Respiratory Acidosis • Respiratory Alkalosis • Metabolic Acidosis • Metabolic Alkalosis*

Aging and Fluid, Electrolyte, and Acid-Base Balance 1006

Clinical Applications

- Enemas and Fluid Balance 996 Edema and Hypovolemia Indicate Na⁺ Imbalance 998 Those at Risk for Fluid and Electrolyte Imbalances 999 Diagnosis of Acid-Base Imbalances 1006*

- Study Outline 1007 Self-Quiz Questions 1008 Critical Thinking Questions 1009 Answers to Figure Questions 1010*

UNIT 5 CONTINUITY

Chapter 28 The Reproductive Systems 1011

The Cell Cycle in the Gonads 1012

- Number of Chromosomes in Somatic Cells and Gametes 1012
- Meiosis 1012
 - Meiosis I • Meiosis II*

Male Reproductive System 1014

Scrotum 1014 Testes 1014

Spermatogenesis • Sperm • Hormonal Control of the Testes

Reproductive System Ducts in Males 1023

Ducts of the Testis • Epididymis • Ductus Deferens •

Spermatic Cord • Ejaculatory Ducts • Urethra

Accessory Sex Glands 1024

Seminal Vesicles • Prostate • Bulbourethral Glands

Semen 1026 Penis 1026

Female Reproductive System 1028

Ovaries 1028

Histology of the Ovary • Oogenesis and Follicular Development

Uterine Tubes 1032 Uterus 1034

Anatomy of the Uterus • Histology of the Uterus • Cervical Mucus

Vagina 1036 Vulva 1037 Perineum 1039

Mammary Glands 1040

The Female Reproductive Cycle 1041

Hormonal Regulation of the Female Reproductive Cycle 1041

Phases of the Female Reproductive Cycle 1042

Menstrual Phase • Preovulatory Phase • Ovulation • Postovulatory Phase

The Human Sexual Response 1046

Stages of the Human Sexual Response 1046

Changes in Males 1047 Changes in Females 1047

Birth Control Methods and Abortion 1048

Surgical Sterilization 1048 Hormonal Methods 1048

Intrauterine Devices 1049 Spermicides 1049

Barrier Methods 1049 Periodic Abstinence 1049

Coitus Interruptus 1050 Abortion 1050

Development of the Reproductive Systems 1050

Aging and the Reproductive Systems 1052

Clinical Applications

Cryptorchidism 1017 Inguinal Hernias 1024

Circumcision 1027 Uterine Prolapse 1035

Hysterectomy 1036 Episiotomy 1040

Fibrocystic Disease of the Breasts 1041

Female Athlete Triad: Disordered Eating, Amenorrhea, and Premature Osteoporosis 1045

Erectile Dysfunction 1048

Deficiency of 5 Alpha-Reductase 1052

Disorders: Homeostatic Imbalances 1053

Medical Terminology 1055

Study Outline 1056 Self-Quiz Questions 1058

Critical Thinking Questions 1060 Answers to Figure Questions 1061

Chapter 29 Development and Inheritance 1062

Embryonic Period 1063

First Week of Development 1063

Fertilization • Cleavage of the Zygote • Blastocyst Formation • Implantation

Second Week of Development 1068

Development of the Trophoblast • Development of the Bilaminar Embryonic Disc • Development of the Amnion •

Development of the Yolk Sac • Development of Sinusoids • Development of the Extraembryonic Coelom • Development of the Chorion

Third Week of Development 1070

Gastrulation • Neurulation • Development of Somites •

Development of the Intraembryonic Coelom • Development of the Cardiovascular System • Development of the Chorionic Villi and Placenta

Fourth Week of Development 1076

Fifth Through Eighth Week of Development 1080

Fetal Period 1081

Prenatal Diagnostic Tests 1084

Fetal Ultrasonography 1084 Amniocentesis 1084

Chorionic Villi Sampling 1085

Noninvasive Prenatal Tests 1085

Maternal Changes During Pregnancy 1085

Hormones of Pregnancy 1085

Anatomical and Physiological Changes During Pregnancy 1087

Exercise and Pregnancy 1088

Labor 1088

Adjustments of the Infant at Birth 1090

Respiratory Adjustments 1090

Cardiovascular Adjustments 1091

The Physiology of Lactation 1091

Inheritance 1093

Genotype and Phenotype 1093

Variations on Dominant–Recessive Inheritance 1094

Incomplete Dominance • Multiple-Allele Inheritance • Complex Inheritance

Autosomes, Sex Chromosomes, and Sex Determination 1096

Sex-Linked Inheritance 1097

Red–Green Color Blindness • X-Chromosome Inactivation

Teratogens 1098

Chemicals and Drugs • Cigarette Smoking • Irradiation

Clinical Applications

Stem Cell Research and Therapeutic Cloning 1065

Ectopic Pregnancy 1066 Anencephaly 1073

Placenta Previa 1076 Early Pregnancy Tests 1086

Pregnancy-induced Hypertension 1088

Dystocia and Cesarean Section 1090

Premature Infants 1091 Nursing and Childbirth 1093

Disorders: Homeostatic Imbalances 1099

Medical Terminology 1100

Study Outline 1100 Self-Quiz Questions 1102

Critical Thinking Questions 1104 Answers to Figure Questions 1104

Appendix A Measurements A-1

Appendix B Periodic Table B-1

Appendix C Normal Values for Selected Blood Tests C-0

Appendix D Normal Values for Selected Urine Tests D-1

Appendix E Answers E-1
