List of case studies and boxes xv
Preface xvii
Publishers acknowledgements xxi

1 MACROECONOMIC ESSENTIALS 1
1.1 The issues of macroeconomics 1
1.2 Essentials of macroeconomic accounting 6
1.3 Beyond accounting 20
Chapter summary 25
Exercises 26
Recommended reading 28
Appendix: Logarithms, growth rates and logarithmic scales 29

2 BOOMS AND RECESSIONS (I): the Keynesian cross 33
2.1 The circular flow model revisited: terminology and overview 38
2.2 Income determination: a first look 43
2.3 Income determination: a second look 47
2.4 An intertemporal view of consumption and investment 50
Chapter summary 55
Exercises 56
Recommended reading 58
Applied problems 58

3 MONEY, INTEREST RATES AND THE GLOBAL ECONOMY 61
3.1 The money market, the interest rate and the *LM* curve 62
3.2 Aggregate expenditure, the interest rate and the exchange rate: the *IS* curve 68
3.3 The *IS-LM* or the global economy model 73
Chapter summary 83
Exercises 83
Recommended reading 85
Applied problems 85

4 EXCHANGE RATES AND THE BALANCE OF PAYMENTS 88
4.1 Globalization 89
4.2 The exchange rate and the balance of payments 91

4.3 Back to *IS-LM*: enter the *FE* curve 95
4.4 Equilibrium in all three markets 102
Chapter summary 106
Exercises 107
Recommended reading 108
Applied problems 109

5 BOOMS AND RECESSIONS (II): the national economy 111
5.1 Fiscal policy in the Mundell–Fleming model 112
5.2 Monetary policy in the Mundell–Fleming model 115
5.3 The algebra of monetary and fiscal policy in the Mundell–Fleming model 121
5.4 Comparative statics versus adjustment dynamics 122
5.5 Adjustment dynamics with expected depreciation 124
5.6 When prices move 127
5.7 Today's exchange rate and the future 130
Chapter summary 132
Exercises 133
Recommended reading 134
Applied problems 134

6 ENTER AGGREGATE SUPPLY 137
6.1 Potential income and the labour market 138
6.2 Why is there unemployment in equilibrium? 144
6.3 Why may actual output deviate from potential output? 158
Chapter summary 161
Exercises 162
Recommended reading 163
Applied problems 164

7 BOOMS AND RECESSIONS (III): aggregate supply and demand 166
7.1 The short-run aggregate supply curve 167
7.2 The aggregate demand curve 168
7.3 The *AD-AS* model: basics 176
7.4 Policy and shocks in the *AD-AS* model 180
Chapter summary 188
Exercises 189
Recommended reading 190
Appendix: The algebra of the *AD* curve 190

8 BOOMS AND RECESSIONS (IV): dynamic aggregate supply and demand 192
8.1 The aggregate-supply curve in an inflation–income diagram 193

8.2 Equilibrium income and inflation: the *DAD* curve 194
8.3 The *DAD-SAS* model 195
8.4 Inflation expectations 198
8.5 The *DAD-SAS* model at work 201
Chapter summary 214
Exercises 215
Recommended reading 216
Appendix: The algebra of the *DAD* curve 216
Appendix: The genesis of the *DAD-SAS* model 216
Applied problems 218

9 ECONOMIC GROWTH (I): basics 221
9.1 Stylized facts of income and growth 221
9.2 The production function and growth accounting 224
9.3 Growth theory: the Solow model 230
9.4 Why incomes may differ 232
9.5 What about consumption? 234
9.6 Population growth and technological progress 238
9.7 Empirical merits and deficiencies of the Solow model 243
Chapter summary 247
Exercises 248
Recommended reading 249
Applied problems 249

10 ECONOMIC GROWTH (II): advanced issues 251
10.1 The government in the Solow model 252
10.2 Economic growth and capital markets 255
10.3 Extending the Solow model and moving beyond 264
10.4 Poverty traps in the Solow model 267
10.5 Human capital 271
10.6 Endogenous growth 275
Chapter summary 280
Exercises 281
Recommended reading 283
Appendix: A synthesis of the *DAD-SAS* and the Solow model 283
Applied problems 285

11 ENDOGENOUS ECONOMIC POLICY 287
11.1 What do politicians want? 288
11.2 Political business cycles 290
11.3 Rational expectations 293
11.4 Policy games 295
11.5 Ways out of the time inconsistency trap 299
Chapter summary 303

Exercises 304
Recommended reading 305
Applied problems 306

12 THE EUROPEAN MONETARY SYSTEM AND EUROLAND AT WORK 308
12.1 Preliminaries 309
12.2 The 1992 EMS crisis 312
12.3 Exchange rate target zones 319
12.4 Speculative attacks 324
12.5 Monetary and fiscal policy in Euroland 328
Chapter summary 333
Exercises 334
Recommended reading 335
Appendix: The two-country Mundell–Fleming model 336
Applied problems 338

13 INFLATION AND CENTRAL BANK INDEPENDENCE 340
13.1 Inflation, central bank independence and the EMS 341
13.2 Supply shocks and central bank independence 350
13.3 Disinflations and the sacrifice ratio 357
13.4 Lessons for European monetary union 365
Chapter summary 367
Exercises 368
Recommended reading 369
Applied problems 370

14 BUDGET DEFICITS AND PUBLIC DEBT 372
14.1 The government budget 373
14.2 The dynamics of budget deficits and the public debt 374
14.3 Maastricht, the fisc and the central bank 388
14.4 What is wrong with having deficits and debt? 392
14.5 Does monetary union need budget rules? 393
Chapter summary 397
Exercises 398
Recommended reading 399
Applied problems 399

15 UNEMPLOYMENT AND GROWTH 401
15.1 Linking unemployment and growth 401
15.2 European unemployment 404
15.3 Persistence in the *DAD-SAS* model 420
15.4 Lessons, remedies and prospects 423
Chapter summary 429

Exercises 429
Recommended reading 431
Applied problems 431

APPENDIX: A PRIMER IN ECONOMETRICS 434
A.1 First task: estimating unknown parameters 435
A.2 Second task: testing hypotheses 437
A.3 A closer look at OLS estimation 439
Appendix summary 449
Exercises 450
Recommended reading 450

Index 451
