PART ONE – Managing Research for Development: How to Use this Book	1
Chapter 1 Introduction – Why use Research in Development Work?	7
1.1 Some effective research for development work	7
1.2 So what <i>is</i> research?	10
1.3 ‘But I’m not a researcher’ – the contribution of the development worker	12
1.4 Who should do research for development work – the broader issues	15
1.5 Research and social change	16
1.6 How to tell when research is the best approach to a problem	18
Chapter 2 How is Research Used in Development Work?	25
2.1 So what’s the right approach to research for development work?	25
2.2 Two major research approaches	26
2.3 Types of research in development work	29
2.4 Consultation with communities – is it research?	36
2.5 Using research for programme development	37
2.6 Using research to influence policy	38
Chapter 3 Participatory Research	49
3.1 Participation for ...?	50
3.2 Participation by ... ?	52
3.3 Participation is ...?	52
3.4 Peer research	55
3.5 How much participation is appropriate?	60
3.6 Issues in participatory research	64

Chapter 4	Quality in Research	69
4.1	Why does quality matter?	69
4.2	What does quality in research mean?	70
4.3	Quality standards for research in development	72
4.4	On consulting researchers	72
4.5	Some key issues in research quality	78
4.6	Quality: product or process?	82
4.7	In practice – assuring quality in research	84
Chapter 5	Planning for Effective Research – Preparing to Write the Brief	86
5.1	Getting to grips with research	86
5.2	The process of writing the brief	88
5.3	Defining the research focus	91
5.4	Setting the research questions	97
Chapter 6	Planning for Effective Research – What Should Go into the Brief?	103
6.1	Writing the brief	104
6.2	What to think about in writing a research brief	106
Chapter 7	Who Should do the Research?	120
7.1	Who can do the research?	120
7.2	Managing in-house research	132
7.3	Employing researchers	133
Chapter 8	Managing Research	146
8.1	Supervising research work	146
8.2	How to estimate costs and time-scales	150
8.3	Negotiating access – ... or how to reach the parts other research does not reach	161
8.4	Managing participatory research	164
8.5	Relating to funders	165
Chapter 9	Learning How to do Research for Development Work	169
9.1	Where to start?	170
9.2	Some ways of learning research skills	176
9.3	Supporting Southern researchers	179

Chapter 10	Managing for Impact – Promoting Research Findings	182
10.1	Promotion for implementation – influencing the programme	184
10.2	<i>Promotion for policy influence</i>	187
10.3	The Report	190
10.4	Beyond 'The Report'	191
10.5	Dealing with the media	193
Chapter 11	Evaluating Research for Development Work	200
11.1	Some approaches to evaluation	200
11.2	What, who, and when?	204
11.3	Evaluating different types of research	206
PART TWO	– Doing Research for Development	211
Chapter 12	What is Already Known? Making the Most of Existing Information	213
12.1	How to look	213
12.2	Where to look	220
Chapter 13	Research Ethics	233
13.1	Codes of ethics	233
13.2	Responsibilities towards respondents: some ethical issues to consider	234
Chapter 14	Communication with Respondents – The Key to Good Research	248
14.1	Language	248
14.2	Style	249
14.3	Working in non-literate contexts	249
14.4	Communicating with disabled people	250
14.5	Working with children	251
14.6	<i>Working with people whose first language you do not share</i>	255
Chapter 15	How to Ensure Quality in Data-Gathering	260
15.1	Consent	260
15.2	Confidentiality	261
15.3	Recording	263

15.4	Ensuring 'trustworthiness'	267
15.5	Piloting materials	268
15.6	Logistics and timing	269
15.7	Reflecting on your work	269

Chapter 16 Choosing Methods 271

16.1	First, step back	271
16.2	Choosing a research approach	272
16.3	Choosing research techniques	276
16.4	Triangulation – using more than one technique	280

Chapter 17 Seven Key Research Techniques 283

17.1	How to ask questions	283
17.2	Interviews	286
17.3	Focus groups	298
17.4	Documentary sources	301
17.5	Observation	304
17.6	Questionnaires	306
17.7	Ranking and scoring exercises	310
17.8	Visual methods: maps, diagrams, and drawings	318
17.9	Some other ideas	324

Chapter 18 Some Packages of Methods for Research for Development Work 332

18.1	Needs assessment	332
18.2	Stakeholder analysis	336
18.3	Action research	338
18.4	Consultation	340
18.5	Baseline studies	342
18.6	Case studies	344
18.7	Participatory Learning and Action	349
18.8	Frameworks for Specific Issues: Risk Mapping and the Household Food Economy Approach	350

Chapter 19 Talking to the Right People – Choosing a Sample 356

19.1	Random/probability samples	359
19.2	How Large a Sample do you Need?	364
19.3	Purposive/Non-random Sampling	365

Chapter 20 Analysis 376

20.1	Methods of analysis	376
20.2	What is analysis?	381

20.3	Interpretation	386
20.4	The process of data analysis	389
20.5	Participation in the analysis process	391
20.6	Qualitative analysis	394
20.7	Quantitative analysis	404
Chapter 21 How to Write an Effective Research Report		423
21.1	What to write	424
Appendix 1 Useful Websites		439
1.	General Information	439
2.	Information on Specific Issues	439
Glossary		452
References		462
Index		469
