

Introduction to

SPECTROSCOPY

third edition

Pavia · Lampman · Kriz

CONTENTS

CHAPTER 1

MOLECULAR FORMULAS AND WHAT CAN BE LEARNED FROM THEM 1

- 1.1 Elemental Analysis and Calculations 1
- 1.2 Determination of Molecular Mass 3
- 1.3 Molecular Formulas 4
- 1.4 Index of Hydrogen Deficiency 4
- 1.5 The Rule of Thirteen 7
- 1.6 A Quick Look Ahead to Simple Uses of Mass Spectra 10
 - Problems 11
 - References 12

CHAPTER 2

INFRARED SPECTROSCOPY 13

- 2.1 The Infrared Absorption Process 14
- 2.2 Uses of the Infrared Spectrum 15
- 2.3 The Modes of Stretching and Bending 16
- 2.4 Bond Properties and Absorption Trends 18
- 2.5 The Infrared Spectrometer 20
 - A. Dispersive Infrared Spectrometers 20
 - B. Fourier Transform Spectrometers 23
- 2.6 Preparation of Samples for Infrared Spectroscopy 23
- 2.7 What To Look for When Examining Infrared Spectra 24
- 2.8 Correlation Charts and Tables 27
- 2.9 How to Approach the Analysis of a Spectrum (Or What You Can Tell at a Glance) 28

2.10	Hydrocarbons: Alkanes, Alkenes, and Alkynes	29
	A. Alkanes	29
	B. Alkenes	31
	C. Alkynes	33
2.11	Aromatic Rings	41
2.12	Alcohols and Phenols	45
2.13	Ethers	48
2.14	Carbonyl Compounds	50
	A. Factors That Influence the C=O Stretching Vibration	52
	B. Aldehydes	54
	C. Ketones	56
	D. Carboxylic Acids	60
	E. Esters	62
	F. Amides	68
	G. Acid Chlorides	70
	H. Anhydrides	71
2.15	Amines	72
2.16	Nitriles, Isocyanates, Isothiocyanates, and Imines	75
2.17	Nitro Compounds	77
2.18	Carboxylate Salts, Amine Salts, and Amino Acids	78
2.19	Sulfur Compounds	79
2.20	Phosphorus Compounds	82
2.21	Alkyl and Aryl Halides	82
	Problems	84
	References	101

CHAPTER 3

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

PART ONE: BASIC CONCEPTS 102

3.1	Nuclear Spin States	102
3.2	Nuclear Magnetic Moments	103
3.3	Absorption of Energy	104
3.4	The Mechanism of Absorption (Resonance)	106
3.5	Population Densities of Nuclear Spin States	108
3.6	The Chemical Shift and Shielding	109
3.7	The Nuclear Magnetic Resonance Spectrometer	111
	A. The Continuous-Wave (CW) Instrument	111
	B. The Pulsed Fourier Transform (FT) Instrument	113
3.8	Chemical Equivalence—A Brief Overview	117
3.9	Integrals and Integration	118
3.10	Chemical Environment and Chemical Shift	120

3.11	Local Diamagnetic Shielding	121
	A. Electronegativity Effects	121
	B. Hybridization Effects	123
	C. Acidic and Exchangeable Protons: Hydrogen Bonding	124
3.12	Magnetic Anisotropy	125
3.13	Spin-Spin Splitting ($n + 1$) Rule	128
3.14	The Origin of Spin-Spin Splitting	131
3.15	The Ethyl Group (CH_3CH_2-)	133
3.16	Pascal's Triangle	134
3.17	The Coupling Constant	134
3.18	A Comparison of NMR Spectra at Low and High Field Strengths	137
3.19	Survey of Typical ^1H NMR Absorptions by Type of Compound	138
	A. Alkanes	139
	B. Alkenes	140
	C. Aromatic Compounds	140
	D. Alkynes	142
	E. Alkyl Halides	143
	F. Alcohols	144
	G. Ethers	145
	H. Amines	146
	I. Nitriles	147
	J. Aldehydes	148
	K. Ketones	149
	L. Esters	150
	M. Carboxylic Acids	150
	N. Amides	152
	O. Nitroalkanes	153
	Problems	154
	References	166

CHAPTER 4

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

PART TWO: CARBON-13 SPECTRA, INCLUDING HETERONUCLEAR COUPLING WITH OTHER NUCLEI 167

4.1	The Carbon-13 Nucleus	167
4.2	Carbon-13 Chemical Shifts	168
	A. Correlation Charts	168
	B. Calculation of ^{13}C Chemical Shifts	170
4.3	Proton-Coupled ^{13}C Spectra—Spin-Spin Splitting of Carbon-13 Signals	171
4.4	Proton-Decoupled ^{13}C Spectra	173
4.5	Nuclear Overhauser Enhancement (NOE)	174

4.6	Cross-Polarization: Origin of the Nuclear Overhauser Effect	176
4.7	Problems with Integration in ^{13}C Spectra	179
4.8	Molecular Relaxation Processes	180
4.9	Off-Resonance Decoupling	182
4.10	A Quick Dip into DEPT	182
4.11	Some Sample Spectra—Equivalent Carbons	185
4.12	Compounds with Aromatic Rings	187
4.13	Carbon-13 NMR Solvents—Heteronuclear Coupling of Carbon to Deuterium	189
4.14	Heteronuclear Coupling of Carbon to Fluorine-19	193
4.15	Heteronuclear Coupling of Carbon to Phosphorus-31	194
	Problems	195
	References	216

CHAPTER 5

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

PART THREE: SPIN-SPIN COUPLING 217

5.1	Coupling Constants: Symbols	217
5.2	Coupling Constants: The Mechanism of Coupling	218
	A. One-Bond Couplings (1J)	219
	B. Two-Bond Couplings (2J)	220
	C. Three-Bond Couplings (3J)	223
	D. Long-Range Couplings (4J – nJ)	227
5.3	Magnetic Equivalence	228
5.4	Nonequivalence Within a Group—The Use of Tree Diagrams when the $n + 1$ Rule Fails	231
5.5	Measuring Coupling Constants from First Order Spectra	234
	A. Simple Multiplets—One Value of J (One Coupling)	234
	B. More Complex Multiplets—More Than One Value of J	235
5.6	Alkenes	237
5.7	Mechanisms of Coupling in Alkenes; Allylic Coupling	238
5.8	Measuring Coupling Constants—Analysis of an Allylic System	241
5.9	Is the $n + 1$ Rule Ever Really Obeyed?	246
5.10	Second-Order Spectra—Strong Coupling	247
	A. First-Order and Second-Order Spectra	247
	B. Spin System Notation	248
	C. The A_2 , AB , and AX Spin Systems	248
	D. The $AB_2 \dots AX_2$ and $A_2B_2 \dots A_2X_2$ Spin Systems	251
	E. Simulation of Spectra	254
	F. The Absence of Second-Order Effects at Higher Field	254
	G. Deceptively Simple Spectra	255
	H. Some Other Patterns	255

5.11	Aromatic Compounds—Substituted Benzene Rings	255
	A. Monosubstituted Rings	256
	B. <i>para</i> -Disubstituted Rings	259
	C. Other Substitution	261
5.12	Coupling in Heteroaromatic Systems	264
5.13	Long-Range Coupling	265
5.14	Homotopic, Enantiotopic, and Diastereotopic Systems	268
5.15	Spectra of Diastereotopic Systems	270
	A. Diastereotopic Methyl Groups: (<i>S</i>)-(+)-3-Methyl-2-butanol	270
	B. Diastereotopic Hydrogens: 1,2-Dichloropropane	273
	C. Diastereotopic Fluorines: 1-Bromo-2-chloro-1,1,2-trifluoroethane	273
	Problems	275
	References	304

CHAPTER 6

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

PART FOUR: OTHER TOPICS IN ONE-DIMENSIONAL NMR 306

6.1	Protons on Oxygen: Alcohols	306
6.2	Exchange in Water and D ₂ O	309
	A. Acid/Water and Alcohol/Water Mixtures	309
	B. Deuterium Exchange	310
	C. Peak Broadening Due to Exchange	311
6.3	Other Types of Exchange: Tautomerism	312
6.4	Protons on Nitrogen: Amines	314
6.5	Protons on Nitrogen: Quadrupole Broadening and Decoupling	318
6.6	Amides	319
6.7	The Effect of Solvent on Chemical Shift	322
6.8	Chemical Shift Reagents; High-Field Spectra	323
6.9	Chiral Resolving Agents	326
6.10	Spin Decoupling Methods; Double Resonance	326
6.11	NOE Difference Spectra	329
	Problems	332
	References	352

CHAPTER 7

ULTRAVIOLET SPECTROSCOPY 353

7.1	The Nature of Electronic Excitations	353
7.2	The Origin of UV Band Structure	355
7.3	Principles of Absorption Spectroscopy	355
7.4	Instrumentation	356

7.5	Presentation of Spectra	357
7.6	Solvents	358
7.7	What is a Chromophore?	359
7.8	The Effect of Conjugation	362
7.9	The Effect of Conjugation on Alkenes	363
7.10	The Woodward-Fieser Rules for Dienes	366
7.11	Carbonyl Compounds: Enones	369
7.12	Woodward's Rules for Enones	372
7.13	α,β -Unsaturated Aldehydes, Acids, and Esters	374
7.14	Aromatic Compounds	374
	A. Substituents with Unshared Electrons	376
	B. Substituents Capable of π -Conjugation	378
	C. Electron-Releasing and Electron-Withdrawing Effects	378
	D. Disubstituted Benzene Derivatives	378
	E. Polynuclear Aromatic Hydrocarbons and Heterocyclic Compounds	381
7.15	Model Compound Studies	383
7.16	Visible Spectra: Color in Compounds	384
7.17	What To Look for in an Ultraviolet Spectrum: A Practical Guide	385
	Problems	387
	References	389

CHAPTER 8

MASS SPECTROMETRY 390

8.1	The Mass Spectrometer	390
8.2	Gas Chromatography–Mass Spectrometry	393
8.3	The Mass Spectrum	394
8.4	Determination of Molecular Weight	397
8.5	Determination of Molecular Formulas	399
	A. Precise Mass Determination	399
	B. Isotope Ratio Data	400
8.6	Some Fragmentation Patterns	404
	A. Alkanes	405
	B. Cycloalkanes	408
	C. Alkenes	410
	D. Alkynes	412
	E. Aromatic Hydrocarbons	413
	F. Alcohols and Phenols	417
	G. Ethers	422
	H. Aldehydes	423
	I. Ketones	425
	J. Esters	428

	K. Carboxylic Acids	431	
	L. Amines	433	
	M. Selected Nitrogen and Sulfur Compounds	437	
	N. Alkyl Chlorides and Alkyl Bromides	441	
8.7	Additional Topics	445	
8.8	Computerized Matching of Spectra with Spectral Libraries	446	
	Problems	448	
	References	465	

CHAPTER 9

COMBINED STRUCTURE PROBLEMS 466

	Example 1	468	
	Example 2	470	
	Example 3	472	
	Example 4	476	
	Problems	478	
	Sources of Additional Problems	525	

CHAPTER 10

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

PART FIVE: ADVANCED NMR TECHNIQUES 526

10.1	Pulse Sequences	526	
10.2	Pulse Widths, Spins, and Magnetization Vectors	528	
10.3	The DEPT Experiment	532	
10.4	Determining the Number of Attached Hydrogens	536	
	A. Methine Carbons (CH)	536	
	B. Methylene Carbons (CH ₂)	537	
	C. Methyl Carbons (CH ₃)	539	
	D. Quaternary Carbons (C)	539	
	E. The Final Result	540	
10.5	Introduction to Two-Dimensional Spectroscopic Methods	540	
10.6	The COSY Technique	540	
	A. An Overview of the COSY Experiment	541	
	B. How To Read COSY Spectra	542	
10.7	The HETCOR Technique	545	
	A. An Overview of the HETCOR Experiment	546	
	B. How To Read HETCOR Spectra	546	
10.8	Magnetic Resonance Imaging	550	
	Problems	552	
	References	579	

ANSWERS TO SELECTED PROBLEMS ANS-1

APPENDICES

- Appendix 1 Infrared Absorption Frequencies of Functional Groups A-2
- Appendix 2 Approximate ^1H Chemical Shift Ranges (ppm) for Selected Types
of Protons A-8
- Appendix 3 Some Representative ^1H Chemical Shift Values for Various Types
of Protons A-9
- Appendix 4 ^1H Chemical Shifts of Selected Heterocyclic and Polycyclic Aromatic
Compounds A-12
- Appendix 5 Typical Proton Coupling Constants A-13
- Appendix 6 Calculation of Proton (^1H) Chemical Shifts A-17
- Appendix 7 Approximate ^{13}C Chemical Shift Ranges (ppm) for Selected Types
of Carbon A-21
- Appendix 8 Calculation of ^{13}C Chemical Shifts A-22
- Appendix 9 ^{13}C Coupling Constants A-31
- Appendix 10 ^1H and ^{13}C Chemical Shifts for Common NMR Solvents A-32
- Appendix 11 Tables of Precise Masses and Isotopic Abundance Ratios for Molecular
Ions Under Mass 100 Containing Carbon, Hydrogen, Nitrogen,
and Oxygen A-33
- Appendix 12 Common Fragment Ions Under Mass 105 A-39
- Appendix 13 Handy-Dandy Guide to Mass Spectral Fragmentation Patterns A-42
- Appendix 14 Index of Spectra A-45

INDEX I-1
