Preface xi

Chapter 1. Quality Concepts	1
1.1 What Is Quality?	1
1.2 Quality Assurance and Product/Service Life Cycle	3
1.3 Development of Quality Methods	8
1.4 Business Excellence, Whole Quality, and Other Metrics In Business Operations	17
1.5 Summary	20
Chapter 2. Six Sigma Fundamentals	21
2.1 What Is Six Sigma?	21
2.2 Process : The Basic Unit for the Six Sigma Improvement Project	22
2.3 Process Mapping, Value Stream Mapping, and Process Management	27
2.4 Process Capability and Six Sigma	35
2.5 Overview of Six Sigma Process Improvement	41
2.6 Six Sigma Goes Upstream: Design for Six Sigma (DFSS)	46
2.7 Summary	47
Chapter 3. Design for Six Sigma	49
3.1 Introduction	49
3.2 What Is Design for Six Sigma Theory?	50
3.3 Why “Design for Six Sigma?”	52
3.4 Design for Six Sigma (DFSS) Phases	54
3.5 More on Design Process and Design Vulnerabilities	58
3.6 Differences between Six Sigma and DFSS	60
3.7 What Kinds of Problems Can Be Solved by DFSS?	62
3.8 Design for a Six Sigma (DFSS) Company	63
3.9 Features of a Sound DFSS Strategy	64
Appendix: Historical Development in Design	65

Chapter 4. Design for Six Sigma Deployment	69
4.1 Introduction	69
4.2 Black Belt–DFSS Team: Cultural Change	69
4.3 DFSS Deployment Prerequisites	72
4.4 DFSS Deployment Strategy	74
4.5 DFSS Deployment Strategy Goals	77
4.6 Six Sigma Project Financial Management	84
4.7 DFSS Training	85
4.8 Elements Critical to Sustain DFSS Deployment	85
4.9 DFSS Sustainability Factors	86
Chapter 5. Design for Six Sigma Project Algorithm	91
5.1 Introduction	91
5.2 Form a Synergistic Design Team (DFSS Algorithm Step 1)	94
5.3 Determine Customer Expectations (DFSS Algorithm Step 2)	95
5.4 Understand Functional Requirements Evolution (DFSS Algorithm Step 3)	109
5.5 Generate Concepts (DFSS Algorithm Step 4)	110
5.6 Select the Best Concept (DFSS Algorithm Step 5)	114
5.7 Finalize the Physical Structure of the Selected Concept (DFSS Algorithm Step 6)	115
5.8 Initiate Design Scorecards and Transfer Function Development (DFSS Algorithm Step 7)	119
5.9 Assess Risk Using DFMEA/PFMEA (DFSS Algorithm Step 8)	121
5.10 Transfer Function Optimization (DFSS Algorithm Step 9)	129
5.11 Design for X (DFSS Algorithm Step 10)	136
5.12 Tolerance Design and Tolerancing (DFSS Algorithm Step 11)	138
5.13 Pilot and Prototyping Design (DFSS Algorithm Step 12)	
5.14 Validate Design (DFSS Algorithm Step 13)	141
5.15 Launch Mass Production (DFSS Algorithm Step 14)	142
5.16 Project Risk Management	143
Chapter 6. DFSS Transfer Function and Scorecards	145
6.1 Introduction	145
6.2 Design Analysis	146
6.3 DFSS Design Synthesis	146
6.4 Design Scorecards and Transfer Function Development	155
Chapter 7. Quality Function Deployment (QFD)	173
7.1 Introduction	173
7.2 History of QFD	175
7.3 QFD Benefits, Assumptions and Realities	175
7.4 QFD Methodology Overview	176
7.5 Kano Model of Quality	184
7.6 The Four Phases of QFD	185

7.7	QFD Analysis	186
7.8	QFD Example	186
7.9	Summary	196
Chapter 8. Axiomatic Design		199
8.1	Introduction	199
8.2	Why Axiomatic Design Is Needed	200
8.3	Design Axioms	201
8.4	The Independence Axiom (Axiom 1)	202
8.5	Coupling Measures	213
8.6	The Implication of Axiom 2	224
8.7	Summary	231
Appendix: Historical Development of Axiomatic Design		232
Chapter 9. Theory of Inventive Problem Solving (TRIZ)		235
9.1	Introduction	235
9.2	TRIZ Foundations	239
9.3	TRIZ Problem-Solving Process	252
9.4	Physical Contradiction Resolution/Separation Principles	255
9.5	Technical Contradiction Elimination/Inventive Principles	264
9.6	Functional Improvement Methods/TRIZ Standard Solutions	271
9.7	Complexity Reduction/Trimming	287
9.8	Evolution of Technological Systems	288
9.9	Physical, Chemical, and Geometric Effects Database	293
9.10	Comparisons of Axiomatic Design and TRIZ	293
Appendix: Contradiction Table of Inventive Principles		301
Chapter 10. Design for X		307
10.1	Introduction	307
10.2	Design for Manufacture and Assembly (DFMA)	310
10.3	Design for Reliability (DFR)	319
10.4	Design for Maintainability	321
10.5	Design for Serviceability	322
10.6	Design for Environmentalality	331
10.7	Design for Life-Cycle Cost (LCC): Activity-Based Costing with Uncertainty	334
10.8	Summary	339
Chapter 11. Failure Mode–Effect Analysis		341
11.1	Introduction	341
11.2	FMEA Fundamentals	344
11.3	Design FMEA (DFMEA)	350
11.4	Process FMEA (PFMEA)	360
11.5	Quality Systems and Control Plans	364

Chapter 12. Fundamentals of Experimental Design	367
12.1 Introduction to Design of Experiments (DOE)	367
12.2 Factorial Experiment	372
12.3 Two-Level Full Factorial Designs	379
12.4 Fractional Two-Level Factorial Design	391
12.5 Three-Level Full Factorial Design	400
12.6 Summary	402
Chapter 13. Taguchi's Orthogonal Array Experiment	407
13.1 Taguchi's Orthogonal Arrays	407
13.2 Taguchi Experimental Design	410
13.3 Special Techniques	414
13.4 Taguchi Experiment Data Analysis	421
13.5 Summary	429
Appendix: Selected Orthogonal Arrays	429
Chapter 14. Design Optimization: Taguchi's Robust Parameter Design	437
14.1 Introduction	437
14.2 Loss Function and Parameter Design	438
14.3 Loss Function and Signal-to-Noise Ratio	446
14.4 Noise Factors and Inner-Outer Arrays	454
14.5 Parameter Design for Smaller-the-Better Characteristics	459
14.6 Parameter Design for Nominal-the-Best Characteristics	463
14.7 Parameter Design for Larger-the-Better Characteristics	466
Chapter 15. Design Optimization: Advanced Taguchi Robust Parameter Design	471
15.1 Introduction	471
15.2 Design Synthesis and Technical Systems	473
15.3. Parameter Design for Dynamic Characteristics	484
15.4 Functional Quality and Dynamic S/N Ratio	503
15.5 Robust Technology Development	506
Chapter 16. Tolerance Design	509
16.1 Introduction	509
16.2 Worst-Case Tolerance	514
16.3 Statistical Tolerance	518
16.4 Cost-Based Optimal Tolerance	525
16.5 Taguchi's Loss Function and Safety Tolerance Design	530
16.6 Taguchi's Tolerance Design Experiment	537
Chapter 17. Response Surface Methodology	541
17.1 Introduction	541
17.2 Searching and Identifying the Region that Contains the Optimal Solution	545

17.3	Response Surface Experimental Designs	552
17.4	Response Surface Experimental Data Analysis for Single Response	558
17.5	Response Surface Experimental Data Analysis for Multiple Responses	562

Chapter 18. Design Validation	573
--------------------------------------	------------

18.1	Introduction	573
18.2	Design Analysis and Testing	578
18.3	Prototypes	590
18.4	Process and Production Validation	597

Acronyms	607
