

DESIGN OF TRANSFORMERS

- Basic materials and their processing included
- Design specs of 100 KVA, 630 KVA, 5MVA, 33/11 KV transformers covered
- Process control based on ISO 9000, tests, nature of failures and their causes discussed

Indrajit Dasgupta

<i>Preface</i>	vii
<i>Acknowledgements</i>	viii
<i>At a Glance</i>	ix
<i>List of Abbreviations</i>	xxiii
1. Working Principle of a Transformer	1
1.1 Introduction	2
1.2 The Working Principle	2
1.3 The Formula for Induced emf	2
1.4 Alignment Chart	3
1.5 Shell and Core Type Transformer	3
1.6 Transformer Cores	3
1.7 Windings and Insulations	4
1.8 End-turn Insulation	6
1.9 Transformer Losses	7
1.10 The Power Scenario in India	8
<i>Summary</i>	8
2. Requirements of Transformer Specifications from End-Users	10
2.1 Requirement of Specification	10
2.2 Mandatory Specification	11
2.3 Supplementary Specification	12
2.4 Additional Specification	13
2.5 Requirement Fill-up Standard GTP Format	13
<i>Summary</i>	19

3. Basic Materials and their Processing

20

- 3.1 Introduction 21
- 3.2 CRGO (Stacked Core) 21
- 3.3 CRGO Slitting 22
- 3.4 Types of Slitter Lines 22
- 3.5 Layout of a Slitter Line 23
- 3.6 Requirement of Slitting Operation 24
- 3.7 Construction of Blade 25
- 3.8 Recommendations for Better Slitting 25
- 3.9 Clearance Adjustment Operations 27
- 3.10 Influence of Shear Angle at Slitting (Grain-oriented) 31
- 3.11 Hold the Strips Near the Blade Firmly with the Stabilizer 31
- 3.12 CRGO Steel Processing 38
- 3.13 Annealing 39
- 3.14 Core-Building 40
- 3.15 Step-Lap 41
- 3.16 Winding Wires and Strips 41
- 3.17 Processing Wire Drawing 41
- 3.18 Die Materials 44
- 3.19 Processing Strip Drawing 44
- 3.20 Annealing of Wires and Strips 45
- 3.21 Annealing of Copper 45
- 3.22 Annealing of Aluminium 45
- 3.23 Insulating Paper 45
- 3.24 Paper Covering on the Conductor 46
- 3.25 Tests on Paper Covered Conductor 46
- 3.26 Reference ISS for Wires and Strips 47
- 3.27 Details of Machineries for Wires and Strips 47
- 3.28 Process Chart 48
- 3.29 Choice of Using Copper or Aluminium as Winding Material 48
- 3.30 Insulating Oil 49
- 3.31 Introduction 49
- 3.32 Chemistry of Transformer Oil 52
- 3.33 Refining of TOFS 54
- 3.34 Characteristic Properties and Specification 55
- 3.35 Storage and Handling of Transformer Oil 59
- 3.36 Dedicated Handling 59
- 3.37 Transport in Tankers or Drums 59

3.38	Compatibility and Contaminants	60
3.39	Other Major Raw Materials and Components	63
	<i>Summary</i>	64
4.	The Basic Concept of Design	66
4.1	Selection of Number of Turns	67
4.2	Selection of the Core Diameter	67
4.3	Selection of Winding Wires and Strips	68
4.4	Calculation of Size of a High-voltage Conductor	69
4.5	Calculation of Size of a Low-voltage Conductor	70
4.6	Transposition	71
4.7	Process Flow Chart	73
	<i>Summary</i>	74
5.	Design of a 100 KVA Transformer	75
5.1	Proposed Specification	76
5.2	Primary Coil	76
5.3	Secondary Coil	79
5.4	Core Diameter	81
5.5	Step Width	82
5.6	Core Stack	83
5.7	Core Area	84
5.8	Flux Density	84
5.9	Coil Diameter and Core Limb Centre	85
5.10	Core Details	85
5.11	Approximate Weight of Core	86
5.12	Step-wise Weight Calculation of Core	87
5.13	Winding Details	91
5.14	Coil Assembly	93
5.15	Weight of LV and HV Aluminium	93
5.16	Winding Resistance and Load Loss	94
5.17	No-load Loss	94
5.18	No-load Current	96
5.19	Percentage Reactance, Resistance and Impedance	101
5.20	Ratio Error at Different Tap Positions	103
5.21	Efficiency	104
5.22	Maximum Efficiency	105
5.23	Regulations	106

- 5.24 Performance Figures 107
- 5.25 Design Outputs 108
- 5.26 The Design of Tank 109
- 5.27 Radiators 110
- 5.28 Weight of Tank 125
- 5.29 Core Fittings, Tie Rods and Core Studs 127
- 5.30 Volume of Oil 134
- 5.31 Overall Weights and Dimensions 137
- 5.32 Preparation of Drawings and GTP 138
- Summary* 155

6. Design of the 630 KVA Transformer

161

- 6.1 Proposed Specification 162
- 6.2 Primary Coil (Connected in Delta) 162
- 6.3 Secondary Coil (Connection Star) 165
- 6.4 Core Diameter 168
- 6.5 Step Width 169
- 6.6 Core Stack 169
- 6.7 Core Area 171
- 6.8 Flux Density 171
- 6.9 Coil Diameter and Core Limb Centre 172
- 6.10 Core Details 173
- 6.11 Approximate Weight of Core 173
- 6.12 Stepwise Weight Calculation of Core 174
- 6.13 Winding Details 178
- 6.14 Coil Assembly Specification 180
- 6.15 Weight of LV and HV Copper 180
- 6.16 Winding Resistance and Load Loss 181
- 6.17 No-load Loss 182
- 6.18 No-load Current 182
- 6.19 Percentage Reactance, Resistance and Impedance 185
- 6.20 Ratio Error at Different Tap Positions 187
- 6.21 Efficiency 187
- 6.22 Maximum Efficiency 189
- 6.23 Regulations 189
- 6.24 Performance Figures 191
- 6.25 Design Outputs 192
- 6.26 Design of Tank 193
- 6.27 Radiators 194

6.28	Weight of Tank	199	
6.29	Non-magnetic Welding	201	
6.30	Core Fittings, Tie Rods and Core Studs	201	
6.31	Volume of Oil	208	
6.32	Overall Weights and Dimensions	210	
6.33	Preparation of Drawings and GTP	211	
	<i>Summary</i>	232	
7.	Design of the 5 MVA, 33/11 KV Transformer		233
7.1	Proposed Specification	234	
7.2	Selection of Primary and Secondary Conductor	234	
7.3	Number of Turns	235	
7.4	Disc Details of Coils	236	
7.5	Core Diameter	237	
7.6	Formation of LV Coil	238	
7.7	Formation of HV Coil	239	
7.8	Amp-Turns Balancing	242	
7.9	Core Details	249	
7.10	Winding Specification	258	
7.11	Weight of Secondary and Primary Windings	260	
7.12	Winding Resistances and Load Loss	261	
7.13	No-load Loss	262	
7.14	No-load Current	263	
7.15	Percentage Reactance, Resistance and Impedance	265	
7.16	Efficiency	266	
7.17	Regulations	268	
7.18	Performance Figures	269	
7.19	Design Output	269	
7.20	Design of Tank	271	
7.21	Radiators	272	
7.22	Conclusion	275	
	<i>Summary</i>	275	
8.	The Design Concept of Distribution Transformers Under Repair Contract		277
8.1	Basic Requirement	278	
8.2	Basic Input of Design	278	
8.3	Progress of Designing a Repair Transformer	279	

8.4	Design Procedure	280
8.5	LV and HV Conductor Weight	285
8.6	Placement of HV Coil	285
8.7	Calculation of Winding Resistances and Load Loss	286
8.8	Impedance	286
8.9	No-load Loss	288
8.10	Winding Specification and Assembly Details	289
8.11	Other Aspects of Design	290
8.12	Cleaning of CRGO Laminations and Tank	290
8.13	Final Assembly and Testing	291
	Summary	291
9.	The Basic Concept of Computer-Aided Design	293
9.1	Basic Concept of Computer-Aided Design	294
9.2	Who All Can Handle Computer-Aided Design	294
9.3	Specified-Need of the Specification	295
9.4	Implied-Needs of the Specification	295
9.5	Computer Programming	295
9.6	Variable Inputs	295
9.7	Review of the Figures which are Fed as Variable Inputs	297
9.8	Operation	297
9.9	Non-converging	297
9.10	Design Output	298
9.11	Design Modification	298
9.12	Other Aspects of the Design	298
9.13	Design Validation	298
9.14	Design Package	298
9.15	Computer Design Print-out	299
	Summary	305
10.	Dry-Type Distribution Transformers with Polyesterimide VPI (A New Concept in India)	306
10.1	Introduction	306
10.2	Dry-Type Transformer	307
10.3	Insulation System	308
10.4	Impregnant	309
10.5	VPI Plant Requirements	311
10.6	Economic Impregnation	311
10.7	Application of Dry-Type Transformer	313
	Summary	314

11. Process Control

315

- 11.1 Introduction 316
- 11.2 Role of the Machine 317
- 11.3 Machine Maintenance 318
- 11.4 Role of Materials 319
- 11.5 Role of Men 325
- 11.6 The Manufacturing Process 326
- 11.7 Inprocess Inspection 328
- 11.8 Proto-type Results 332
- Summary* 336

12. A Schedule of Tests and their Procedures

337

- 12.1 A Schedule of Tests 338
- 12.2 Procedure of Tests 338
- 12.3 Test Sl. No. 1: Separate Source Power Frequency Test on HV and LV Winding (Routine Test) 340
- 12.4 Test Sl. No. 2: Induced Over Voltage Test (Routine Test) 341
- 12.5 Test Sl. No. 3: Insulation Resistance of HV and LV Windings (Routine Test) 342
- 12.6 Test Sl. No. 4: Di-electric Value of Insulating Oil (Acceptance Test) 343
- 12.7 Test Sl. No. 5: Measurement of Winding Resistance (Routine Test) 346
- 12.8 Test Sl. No. 6: Measurement of No-load Loss and No-load Current (Routine Test) 347
- 12.9 Test Sl. No. 7: Measurement of Load Loss and Impedance (Routine Test) 352
- 12.10 Test Sl. No. 8: Voltage Ratio and Phase Relationship (Routine Test) 356
- 12.11 Test Sl. No. 9: Temperature Rise Test (Type Test) 357
- 12.12 Test Sl. No. 10: Lightning Impulse Test (Type Test) 363
- 12.13 Test Sl. No. 11: Requirement and Procedure with Regard to Ability to Withstand Short-Circuit Test (Special Test) 366
- 12.14 Test Sl. No. 12: Un-balance Current on LV Neutral (Special Test) 370
- 12.15 Test Sl. No. 13: Zero Sequence Impedance (Special Test) 372
- 12.16 Test Sl. No. 14: Magnetic Balance Test (Special Test) 374
- 12.17 Test Sl. No. 15: Measurement of Noise Level (Special Test) 376
- Summary* 377

- 13. User's Installation and Instruction Manual for Transformers in Services 380**
- 13.1 Introduction 381
 - 13.2 Installation 382
 - 13.3 Oil 382
 - 13.4 Drying of Transformer at Site 383
 - 13.5 Gasket and Gasket Joints 384
 - 13.6 Cable Box 386
 - 13.7 Conservator 386
 - 13.8 Silicagel Breather 387
 - 13.9 Explosion Vent 387
 - 13.10 Buchholz Relay 387
 - 13.11 Temperature Indicator 388
 - 13.12 Off-circuit Tap Switch 388
 - 13.13 Earthing 388
 - 13.14 Minimum Acceptable Insulation Resistance 389
 - 13.15 Painting 389
 - 13.16 Completion of Erection Work 389
 - 13.17 Parallel Operation 389
 - 13.18 Testing and Commissioning 390
 - 13.19 Check List before Commissioning 390
 - 13.20 Energising 391
 - 13.21 Maintenance 391
 - Summary 397*
- 14. Draft Specification for 25, 63 and 100 KVA, 11/0.433 KV Aluminium-Wound Conventional Distribution Transformers 398**
- 14.1 Scope 399
 - 14.2 Applicable Standard 399
 - 14.3 Rating 399
 - 14.4 Rated Frequency 399
 - 14.5 Taps 400
 - 14.6 Permissible Flux Density and Over-Fluxing 400
 - 14.7 Current Density 400
 - 14.8 No-load Voltage Ratio 400
 - 14.9 Transformer Oil 400
 - 14.10 Winding Connections and Vectors 401
 - 14.11 Rating and Terminal Marking Plate 403

- 14.12 Limits of Temperature Rise 404
- 14.13 Losses and Impedance 404
- 14.14 Insulation Level 405
- 14.15 Constructional Features 405
- 14.16 Tank Construction 406
- 14.17 Silicagel Breather 407
- 14.18 Gaskets 407
- 14.19 Location of Thermometer Pocket 408
- 14.20 Surface Preparation and Painting 408
- 14.21 Core Material and its Construction 408
- 14.22 Base Mounting Arrangement 409
- 14.23 Clearances 410
- 14.24 Test and Inspection 410
- 14.25 Procedure of Inspection 413
- 14.26 Submittals 416
- 14.27 Tolerances 417
- 14.28 Deviation 417
- 14.29 Preference 417
- 14.30 Quality Assurance Plan 418
- 14.31 List of Fittings and Accessories 420
- 14.32 Schedule of Guaranteed Technical Particulars
for 25, 63 and 100 KVA, 11/0.433 KV,
Aluminium-Wound Transformers 423
Summary 431

15. Nature of Failures and their Causes

432

- 15.1 Introduction 433
- 15.2 Type of Failure 434
- 15.3 Causes of Failure 434
- 15.4 Analysis of Faults 435
- 15.5 Cause of Failure Due to Fault in the Magnetic Circuit 443
- 15.6 Cause of Failure Due to Failure in the Electric Circuit 444
- 15.7 Failure Due to External Short-circuit 447
Summary 452

16. Conclusion

453

Annexure-A: Lightning Impulse Test

455

Annexure-B: Short-Circuit Test
