Engineering Mathematics

B V RAMANA

- ★ As per the New JNTU Syllabus effective August 2002
- ★ Fully covers courses on Mathematics – I, Mathematics – II, Mathematics – III, and Probability and Statistics
- ★ Solutions to the latest (Years 2002, 2001 and 2000) JNTU Question Papers provided
- ★ Includes over 1000 solved examples and 3000 exercises with answers

Contents

Foreword	vii
Preface	viii
Acknowledgements	x
Course Syllabus	xi

PART I

1. SEQUENCES AND SERIES 1-1

- 1.1. Sequences 1-1
- 1.2. Limit of a Sequence 1-2
- 1.3. Convergence, Divergence and Oscillation of a Sequence 1-2

Worked Out Examples 1-2

Exercise 1-3

- 1.4. Infinite Series 1-3
- 1.5. Necessary Condition for Convergence 1-4
- 1.6. Standard Infinite Series: Geometric Series and Harmonic Series 1-5
- 1.7. Tests for Convergence and Divergence 1-6
- 1.8. Comparison Test: Only for Series with Positive Terms 1-6

Worked Out Examples 1-7

Exercise 1-8

- 1.9. Cauchy's Integral Test 1-9
- Worked Out Examples 1-10*
- Exercise 1-10*
- 1.10. D'Alembert's Ratio Test 1-11
- Worked Out Examples 1-12*
- Exercise 1-13*

- 1.11. Cauchy's n th Root Test 1-14
- Worked Out Examples 1-14*
- Exercise 1-15*

- 1.12. Raabe's Test (Higher Ratio Test) 1-15

Worked Out Examples 1-15

Exercise 1-16

- 1.13. Logarithmic Test 1-17

Worked Out Examples 1-17

Exercise 1-18

- 1.14. DeMorgan's and Bertrand's Test 1-18

Worked Out Examples 1-18

Exercise 1-19

- 1.15. Alternating Series, Leibnitz's Theorem 1-19

Worked Out Examples 1-20

Exercise 1-21

- 1.16. Absolute Convergence and Conditional Convergence 1-22

Worked Out Examples 1-22

Exercise 1-23

- 1.17. Power Series 1-24

Worked Out Examples 1-24

Exercise 1-25

- 1.18. Summary 1-26

2. MEAN VALUE THEOREMS, CURVATURE, EVOLUTES AND ENVELOPES 1-27

- 2.1. Rolle's Theorem 1-27

Worked Out Examples 1-28

Exercise 1-29

- 2.2. Lagrange's Mean Value Theorem 1-30

Worked Out Examples 1-31

Exercise 1-33

- 2.3. Cauchy's Mean Value Theorem 1-34

Worked Out Examples 1-34

Exercise 1-35

2.4. Generalized Mean Value Theorem 1-36

Worked Out Examples 1-37

Exercise 1-38

2.5. Curvature 1-39

Radius of curvature: Cartesian form

Worked Out Examples 1-41

Exercise 1-41

Radius of curvature: Parametric curve

Worked Out Examples 1-43

Exercise 1-43

Radius of curvature: Polar curve

Worked Out Examples 1-44

Exercise 1-46

Pedal equation: Radius of curvature for pedal curve

Worked Out Examples 1-47

Exercise 1-49

Newton's Method: To find radius of curvature at origin

Worked Out Examples 1-50

Exercise 1-51

Centre of curvature

Worked Out Examples 1-52

Exercise 1-53

Circle of curvature

Worked Out Examples 1-54

Exercise 1-56

2.6. Evolute 1-56

Worked Out Examples 1-56

Exercise 1-59

2.7. Envelopes 1-60

Worked Out Examples 1-61

Exercise 1-66

2.8. Summary 1-70

3. PARTIAL DIFFERENTIATION 1-71

3.1. Functions of Several Variables:

Limit and Continuity 1-71

Worked Out Examples 1-72

Exercise 1-74

3.2. Partial Differentiation 1-75

Worked Out Examples 1-76

Exercise 1-78

3.3. Variable Treated as Constant 1-79

Worked Out Examples 1-79

Exercise 1-80

3.4. Total Derivative 1-81

Worked Out Examples 1-81

Exercise 1-82

3.5. Partial Differentiation of Composite Functions: Change of Variables 1-83

Worked Out Examples 1-83

Exercise 1-85

3.6. Differentiation of an Implicit Function 1-85

Worked Out Examples 1-86

Exercise 1-87

3.7. Euler's Theorem 1-88

Worked Out Examples 1-89

Exercise 1-91

3.8. Jacobian 1-92

Two important properties 1-92

Worked Out Examples 1-94

Exercise 1-96

3.9. Functional Dependence 1-97

Worked Out Examples 1-97

Exercise 1-98

3.10. Summary 1-98

4. MAXIMA AND MINIMA 1-100

4.1. Taylor's Theorem for Function of Two Variables 1-100

Worked Out Examples 1-101

Exercise 1-103

4.2. Maxima and Minima of Functions of Two Variables: with and without Constraints 1-104

Necessary and sufficient conditions for extrema 1-105

Worked Out Examples 1-106

Exercise 1-108

4.3. Lagrange's Method of Undetermined Multipliers 1-109

Worked Out Examples I-110

Exercise I-112

4.4. Summary *I-113*

5. CURVE TRACING I-114

5.1. Curve Tracing: Curves in Cartesian Form *I-114*

Worked Out Examples I-117

Exercise I-119

5.2. Curve Tracing: Standard Curves in Cartesian Form *I-121*

Worked Out Examples I-121

5.3. Curve Tracing: Polar Curves *I-128*

Worked Out Examples I-130

Exercise I-132

5.4. Curve Tracing: Standard Polar Curves *I-133*

5.5. Curve Tracing: Parametric Curves *I-137*

Worked Out Examples I-137

Exercise I-138

5.6. Curve Tracing: Standard Parametric Curves *I-139*

5.7. Summary *I-140*

6. APPLICATION OF INTEGRATION I-141

6.1. Length of Plane Curve:

Rectification *I-141*

Cartesian, Parametric, Polar form *I-141*

Worked Out Examples I-142

Exercise I-144

6.2. Volume of Solid of Revolution *I-147*

Cartesian form (cylindrical disc and shell method) *I-147*

Parametric form *I-148*

Polar form *I-149*

Worked Out Examples I-149

Cartesian form *I-149*

Parametric form *I-153*

Polar form *I-154*

Exercise I-155

6.3. Area of the Surface of a Solid of Revolution *I-159*

Cartesian form *I-159*

Parametric form *I-160*

Polar form *I-160*

Worked Out Examples I-160

Exercise I-163

6.4. Summary *I-165*

7. MULTIPLE INTEGRALS I-167

7.1. Introduction *I-167*

7.2. Double Integral *I-167*

7.3. Evaluation of a Double Integral *I-168*

Worked Out Examples I-169

Exercise I-170

7.4. Application of Double Integral *I-170*

Area of plane region: Cartesian *I-170*

Worked Out Examples I-171

Exercise I-172

Mass, centroid and moment of inertia *I-173*

Worked Out Examples I-173

Exercise I-174

Volume of solid by double integral *I-175*

Worked Out Examples I-175

Exercise I-177

7.5. Change of Order of Integration: Double Integral *I-177*

Worked Out Examples I-178

Exercise I-179

7.6. General Change of Variables in Double Integral *I-179*

Worked Out Examples I-180

Exercise I-182

7.7. Change of Variables: Cartesian to Polar Coordinates *I-183*

Area, mass, centroid and MI *I-183*

Worked Out Examples I-183

Exercise I-185

7.8. Triple Integrals *I-186*

Worked Out Examples I-187

Exercise I-189

7.9. General Change of Variables in a Triple Integral *I-190*

Worked Out Examples 1-191

Exercise 1-194

7.10. Summary 1-196

ORDINARY DIFFERENTIAL EQUATIONS:

FIRST ORDER AND FIRST DEGREE 1-197

8.1. Introduction 1-197

8.2. Basic Definitions 1-197

Exercise 1-198

8.3. First Order First Degree Differential Equations 1-198

8.4. Variables Separable or Separable Equation 1-199

Worked Out Examples 1-199

Exercise 1-200

8.5. Homogeneous Equation—Reduction to Separable Form 1-200

Worked Out Examples 1-201

Exercise 1-202

8.6. Non-homogeneous Equations Reducible to Homogeneous Form 1-202

Worked Out Examples 1-203

Exercise 1-204

8.7. Exact Differential Equations 1-205

Worked Out Examples 1-205

Exercise 1-206

8.8. Reduction of Non-exact Differential Equations: Using Integrating Factors 1-207

Worked Out Examples 1-208

Exercise 1-209

8.9. Linear Differential Equation: First Order 1-214

Worked Out Examples 1-214

Exercise 1-216

8.10. Bernoulli Equation 1-217

Worked Out Examples 1-218

Exercise 1-219

8.11. Formation of Ordinary Differential Equations by Elimination of Arbitrary Constants 1-220

Worked Out Examples 1-220

Exercise 1-222

8.12. Geometrical Applications 1-222

Worked Out Examples 1-223

Exercise 1-225

8.13. Orthogonal Trajectories of Curves 1-226

Worked Out Examples 1-227

Exercise 1-229

8.14. Law of Natural Growth 1-231

Worked Out Examples 1-231

Exercise 1-231

8.15. Law of Natural Decay 1-232

Worked Out Examples 1-232

Exercise 1-232

8.16. Newton's Law of Cooling 1-233

Worked Out Examples 1-233

Exercise 1-234

8.17. Summary 1-234

9. LINEAR DIFFERENTIAL EQUATIONS OF SECOND ORDER AND HIGHER ORDER 1-237

9.1. Linear Independence and Dependence 1-237

Worked Out Examples 1-237

Exercise 1-237

9.2. Linear Differential Equations of Second Order with Variable Coefficients 1-238

9.3. Second Order Differential Equations with Constant Coefficients; Homogeneous 1-238

Worked Out Examples 1-239

Exercise 1-239

9.4. Higher Order Linear Homogeneous Differential Equations 1-241

Worked Out Examples 1-242

Exercise 1-243

9.5. Non-homogeneous Equations 1-245

Particular integral (P.I.) when R.H.S. $F(x)$ is of the form e^{ax+b} 1-246

Worked Out Examples 1-247

Exercise 1-248

$\sin(ax+b)$ or $\cos(ax+b)$ 1-249

Worked Out Examples 1-249

Exercise 1-252

X^m 1-252

Worked Out Examples 1-253

Exercise 1-254

$e^{ax}V(x)$ 1-255

Worked Out Examples 1-255

Exercise 1-257

$xV(x)$ 1-257

Worked Out Examples 1-258

Exercise 1-260

Table of P.I.'s 1-260

9.6. Differential Equations with Variable

Coefficients: Reducible to Equations with

Constant Coefficients:

Euler-Cauchy 1-261

Worked Out Examples 1-262

Exercise 1-263

Legendre linear equation 1-264

Worked Out Examples 1-264

Exercise 1-265

9.7. Method of Variation of Parameters 1-265

Worked Out Examples 1-266

Exercise 1-267

9.8. System of Simultaneous Linear D.E. with

Constant Coefficients: 1-268

Worked Out Examples 1-268

Exercise 1-269

9.9. Summary 1-270

10. LAPLACE TRANSFORM 1-272

10.1. Introduction 1-272

10.2. Laplace Transform 1-272

Worked Out Examples 1-273

Exercise 1-273

10.3. Applications, Advantages and Sufficient

Conditions for Existence, of Laplace

Transform 1-274

10.4. General Properties of Laplace

Transform 1-274

Linearity property 1-275

Worked Out Examples 1-275

Exercise 1-276

Change of scale property 1-276

Worked Out Examples 1-276

Exercise 1-277

First shifting 1-277

Worked Out Examples 1-277

Exercise 1-278

L.T. of derivatives (multiplication
by s) 1-278

Worked Out Examples 1-279

Exercise 1-279

LT of integral 1-280

Worked Out Examples 1-280

Exercise 1-281

Differentiation of transforms
(multiplication by t) 1-281

Worked Out Examples 1-282

Exercise 1-282

Integration of transform
(division by t) 1-282

Worked Out Examples 1-283

Exercise 1-284

Unit step function 1-284

Second shift 1-285

Worked Out Examples 1-285

Exercise 1-286

Dirac's delta function 1-287

Worked Out Examples 1-288

Exercise 1-288

10.5. Laplace Transform of Periodic
Function 1-289

Worked Out Examples 1-290

Exercise 1-291

10.6. Inverse Laplace Transform 1-291

10.7. General Properties of Inverse Laplace
Transform 1-292

- Linearity property *I-292*
Worked Out Examples I-292
Exercise I-293
- Change of scale property *I-293*
Worked Out Examples I-293
Exercise I-294
Worked Out Examples I-294
- First shift theorem *I-294*
Exercise I-295
- Inverse L.T. of derivatives *I-295*
Worked Out Examples I-295
Exercise I-296
- I.L.T. of integrals *I-296*
Worked Out Examples I-296
Exercise I-297
- Multiplication by s^n *I-297*
Worked Out Examples I-297
Exercise I-297
- Division by powers of s *I-298*
Worked Out Examples I-298
Exercise I-299
- Second shifting theorem *I-299*
Worked Out Examples I-299
Exercise I-300
- 10.8. Use of Partial Fractions to Find Inverse L.T. *I-301*
Worked Out Examples I-301
Exercise I-303
- 10.9. Convolution *I-304*
Worked Out Examples I-305
Exercise I-306
- 10.10 Application of Laplace Transform to Differential Equations with Constant Coefficients *I-306*
- 10.11. Application of Laplace Transform to System of Simultaneous Differential Equations *I-309*
Worked Out Examples I-310
Exercise I-311
- 10.12. Table of General Properties of Laplace Transforms *I-312*

- 10.13. Table of Some Laplace Transforms *I-312*
- 10.14. Summary *I-313*

11. VECTOR DIFFERENTIAL CALCULUS: GRADIENT, DIVERGENCE AND CURL *I-315*

- 11.1. Introduction *I-315*
- 11.2. Vector Differentiation *I-315*
Worked Out Examples I-316
Exercise I-317
- 11.3. Directional Derivative, Gradient of a Scalar Function and Conservative Field *I-319*
Worked Out Examples I-320
Exercise I-322
- 11.4. Divergence *I-323*
Worked Out Examples I-324
Exercise I-325
- 11.5. Curl *I-325*
Worked Out Examples I-326
Exercise I-327
- 11.6. Related Properties of Gradient, Divergence and Curl of Sums *I-328*
- 11.7. Second-order Differential Operator *I-330*
Worked Out Examples I-330
 Laplacian ∇^2 *I-332*
Worked Out Examples I-332
Exercise I-334
- 11.8. Curvilinear Coordinates: Cylindrical and Spherical Coordinates *I-334*
Worked Out Examples I-337
Exercise I-346
 Table of coordinates *I-348*
- 11.9. Summary *I-349*

12. VECTOR INTEGRAL CALCULUS: INTEGRAL THEOREMS *I-350*

- 12.1 Vector Integration: Integration of a Vector Function of a Scalar Argument *I-350*

Worked Out Examples 1-350
Exercise 1-352

12.2 Line Integrals: Work Done, Potential
Conservative Field and Area 1-353

Worked Out Examples 1-354
Exercise 1-359

12.3 Surface Integrals: Surface Area
and Flux 1-360

Worked Out Examples 1-362
Exercise 1-364

12.4 Volume Integrals 1-365

Worked Out Examples 1-365
Exercise 1-367

12.5 Green's Theorem in Plane:
Transformation Between Line Integral
and Double Integral Area in Cartesian
and Polar Coordinates 1-368

Worked Out Examples 1-369
Exercise 1-371

12.6 Stoke's Theorem 1-373

Worked Out Examples 1-374
Exercise 1-377

12.7 Gauss Divergence Theorem 1-378

Worked Out Examples 1-379
Exercise 1-381

Verification of Gauss divergence
theorem 1-383

Worked Out Examples 1-383
Exercise 1-384

12.8 Summary 1-385

Solution to JNTU Question Paper:

June 2002 1-386

Solution to JNTU Question Paper:

August 2001 1-391

Solution to JNTU Question Paper:

September 2000 1-396

PART II

13. MATRICES II-403

13.1 Introduction II-403

13.2 Inverse of a Matrix II-404

Worked Out Examples II-404
Exercise II-405

13.3 Rank of a Matrix II-405

Elementary row transformations II-406

Inverse by Gauss-Jordan II-406

Worked Out Examples II-406
Exercise II-406

*Worked Out Examples (Rank of
matrix) II-407*

Exercise II-409

13.4 Normal Form II-410

Worked Out Examples II-410
Exercise II-411

13.5 System of Linear Non-homogeneous
Equations II-412

Consistency of system of linear
equations II-413

Worked Out Examples II-414
Exercise II-417

13.6 System of Homogeneous
Equations II-418

Worked Out Examples II-418
Exercise II-419

13.7 Summary II-420

14. EIGEN VALUES AND EIGEN VECTORS II-422

14.1 Linear Transformation II-422

14.2 Eigen Values and Eigen Vectors II-422

14.3 Properties of Eigen values and Eigen
Vectors II-423

Worked Out Examples II-424
Exercise II-429

14.4 Cayley-Hamilton Theorem II-430

Inverse by Cayley-Hamilton
theorem II-431

Worked Out Examples II-431
Exercise II-433

14.5 Diagonalization. Powers of a
Matrix II-434

Worked Out Examples II-435
Exercise II-437

14.6 Real Matrices: Symmetric, Skew-Symmetric, Orthogonal and Quadratic Form II-438

Worked Out Examples II-439

Exercise II-440

14.7 Canonical Form: or Sum of the Squares Form II-441

Definite and Indefinite quadratic forms II-442

Worked Out Examples II-442

Exercise II-443

14.8 Transformation (Reduction) of Quadratic Form to Canonical Form II-443

Worked Out Examples II-444

"Lagrange's" reduction II-445

Exercise II-446

14.9 Complex Matrices: Hermitian, Skew-Hermitian, Unitary Matrices II-447

Theorems II-448

Properties of unitary, Hermitian and Skew-Hermitian matrices II-449

Worked Out Examples II-450

Exercise II-452

14.10 Summary II-453

15. FOURIER SERIES II-454

15.1 Introduction II-454

15.2 Euler's (Fourier-Euler) Formulae II-455

Worked Out Examples II-456

Exercise II-458

15.3 Fourier Series for Even and Odd Functions II-460

Worked Out Examples II-461

Exercise II-462

15.4 Fourier Series for Functions Having Period $2L$ II-463

Worked Out Examples II-464

Exercise II-466

15.5 Half Range Expansions: Fourier Cosine and Sine Series II-467

Worked Out Examples II-468

Exercise II-472

15.6 Summary II-473

16. PARTIAL DIFFERENTIAL EQUATIONS II-475

16.1 Introduction II-475

16.2 Formation of Partial Differential Equation II-475

Worked Out Examples II-476

Exercise II-479

16.3 Partial Differential Equations of First Order II-480

16.4 Linear Equations of First Order II-481

Worked Out Examples II-482

Exercise II-484

16.5 Non-Linear Partial Differential Equations of First Order II-485

Worked Out Examples II-486

Exercise II-488

16.6 Method of Separation of Variables II-490

Worked Out Examples II-490

Exercise II-491

16.7 Classification of Partial Differential Equations of Second Order II-491

16.8 Solution of One-Dimensional Heat Equation II-491

Non-homogeneous (Non-zero) boundary conditions II-493

Both ends insulated II-494

Worked Out Examples II-495

Exercise II-498

16.9 One-Dimensional Wave Equation II-500

Worked Out Examples II-501

Exercise II-503

16.10 Laplace's Equation or Potential Equation or Two-Dimensional Steady-State Heat Flow II-504

17. FOURIER INTEGRAL, FOURIER TRANSFORMS AND Z-TRANSFORMS II-513

17.1 Introduction II-513

17.2 Fourier Integral Theorem II-513

Fourier cosine and sine integral II-514

17.3 Fourier Transform II-515

Fourier cosine and sine transform II-515

Transform of derivatives II-516

Convolution II-516

Worked Out Examples II-517

Exercise II-522

17.4 Finite Fourier Sine and Cosine Transforms II-524

Worked Out Examples II-525

Exercise II-528

17.5 Z-Transforms II-528

Inverse Z-transform II-529

Z-transform of some standard sequences II-529

Linearity, damping rule, shifting property II-530

Initial and final value theorems II-531

Convolution II-532

Worked Out Examples II-532

Exercise II-535

17.6 Standard Z-Transforms II-536

17.7 Summary II-537

Solution to JNTU Question Paper:

Year 2002 II-538

Solution to JNTU Question Paper:

Year 2001 II-544

18. SPECIAL FUNCTIONS—GAMMA FUNCTION, BETA FUNCTION, BESSEL FUNCTION AND LEGENDRE FUNCTION III-551

18.1 Special Functions III-551

18.2 Gamma Function III-551

Standard results III-552

18.3 Beta Function III-552

Standard results III-552

Worked Out Examples III-555

Exercise III-559

18.4 Bessel's Functions III-559

Linear dependence of Bessel's functions III-561

Generating function III-561

Orthogonality of Bessel's functions III-562

Recurrence relations (identities) for Bessel's functions III-563

Elementary Bessel's functions III-564

Integrals of Bessel's functions III-565

Bessel's function of second kind III-565

Worked Out Examples III-565

Exercise III-568

18.5 Legendre Functions III-569

Derivation of Legendre polynomial III-570

Rodrigue's formula III-571

Generating function for Legendre polynomials III-572

Recurrence relations for $P_n(x)$ III-573

Orthogonality of Legendre polynomials III-574

Worked Out Examples III-575

Exercise III-577

18.6 Summary III-578

19. COMPLEX FUNCTION III-580

19.1 Complex Function III-580

19.2 Continuity III-581

- 19.3 Differentiability *III-581*
 19.4 Analyticity *III-581*
 19.5 Cauchy-Riemann (C-R) Equations:
 in Cartesian Coordinates *III-582*
 19.6 Harmonic and Conjugate Harmonic
 Functions *III-583*
 19.7 Cauchy-Riemann Equations:
 in Polar Coordinates *III-583*

Milne-Thompson method *III-584*
Worked Out Examples III-584
Exercise III-590

- 19.8 Elementary Functions *III-593*
 Exponential function: e^z *III-593*
 Properties *III-593*

Worked Out Examples III-594
Exercise III-594

Trigonometric functions *III-595*
 Properties *III-595*

Hyperbolic functions *III-596*
 Properties *III-596*

Worked Out Examples III-596
Exercise III-598

Logarithm *III-599*

Worked Out Examples III-600
Exercise III-601

General powers: $w = z^c$ *III-601*

Worked Out Examples III-601
Exercise III-602

- 19.9 Summary *III-603*

20. COMPLEX INTEGRATION *III-604*

- 20.1 Line Integral in Complex Plane *III-604*

Worked Out Examples III-605
Exercise III-608

- 20.2 Cauchy's Integral Theorem *III-609*

Independence of path *III-609*

Cauchy's theorem for multiply connected
 domains *III-610*

Integral of integer powers *III-610*

Worked Out Examples III-612

Exercise III-614

- 20.3 Cauchy's Integral Formula *III-614*

Worked Out Examples III-615
Exercise III-616

- 20.4 Derivative of Analytic Functions *III-617*

Worked Out Examples III-617
Exercise III-618

- 20.5 Sequence, Series and Power
 Series *III-619*

- 20.6 Taylor's Series (Theorem) *III-620*
 Standard Maclaurin's series *III-621*

Worked Out Examples III-621
Exercise III-623

- 20.7 Laurent Series *III-624*

Worked Out Examples III-625
Exercise III-629

- 20.8 Zeros and Poles *III-630*

Worked Out Examples III-630
Exercise III-631

- 20.9 Summary *III-632*

21. THEORY OF RESIDUES *III-634*

- 21.1 Residue *III-634*

- 21.2 Residue Theorem *III-635*

Worked Out Examples III-635
Exercise III-638

- 21.3 Evaluation of Real Integrals *III-640*

Type I: $\int_0^{2\pi} F(\sin \theta, \cos \theta) d\theta$ *III-640*

Type II: $\int_{-\infty}^{\infty} f(x) dx$ *III-640*

Type III: Fourier Integral *III-641*

Type IV: By indentation *III-641*

Theorems on limiting contours *III-642*

Type V: $\int_0^{\infty} x^{a-1} f(x) dx$ *III-642*

Worked Out Examples III-642
Exercise III-648

- 21.4 Argument Principle *III-650*

Argument theorem *III-650*

Generalization of argument
 theorem *III-650*

21.5 Rouché's Theorem III-651

Worked Out Examples III-652*Exercise* III-653

21.6 Fundamental Theorem of Algebra III-653

21.7 Liouville Theorem III-654

21.8 Summary III-654

22. CONFORMAL MAPPING III-65622.1 Introduction to Mapping
(or Transformation or Operator) III-656

22.2 Definition of Conformal Mapping III-656

22.3 Conformal Mapping by Elementary Functions III-657

Worked Out Examples III-658*Exercise* III-65922.4 Transformation: $w = z^n$ III-66022.5 Mapping $w = z^2$ III-661*Worked Out Examples* III-661*Exercise* III-66322.6 Transformation: $w = e^z$ III-663
Mapping of logarithmic function III-665*Worked Out Examples* III-665*Exercise* III-66522.7 Transformation $w = \sin z$ III-666

Successive transformations III-668

Worked Out Examples III-668*Exercise* III-669

22.8 Joukowski's (Zhukousky's) Transformation III-669

22.9 Bilinear Transformation III-670

Theorem on transformation of circles III-671

Theorem on invariance of cross ratio III-672

Determination of bilinear transformation III-672

Worked Out Examples III-672*Exercise* III-674

22.10 Summary III-675

Solution to JNTU Question Paper:

June 2002 III-676

Solution to JNTU Question Paper:

Year 2001 III-679

Solution to JNTU Question Paper:

Year 2000 III-683
