Update Edition
with Integrated Lab Exercises

Fundamentals of Geographic Information Systems

Second Edition

Michael N. DeMers

CONTENTS

UNIT 1 INTRODUCTION 1

Chapter 1 Introduction to Automated Geography 3

Learning Objectives 4
Why Geographic Information Systems? 4
What Are Geographic Information Systems? 7
Where Do I Begin? 14
Terms 16
Review Questions 16
References 16

UNIT 2 GEOGRAPHIC DATA, MAPS, AND AUTOMATION 19

Chapter 2 Spatial Analysis: The Foundation of Modern Geography 21

Learning Objectives 22
Developing Spatial Awareness 23
Spatial Elements 25
Spatial Measurement Levels 28
Spatial Location and Reference 31
Spatial Patterns 34
Geographic Data Collection 37
Populations and Sampling Schemes 43
Making Inferences From Samples 46
Terms 48
Review Questions 48
References 49
Laboratory Exercise 1: GIS Resources and Applications 50
Introduction 51
Learning Objectives 51
Methods 51
Products 53

Chapter 3 The Map as a Model of Geographic Data: The Language of Spatial Thinking 54

Learning Objectives 55
Map as Model: The Abstraction of Reality 56
A Paradigm Shift in Cartography 57
Map Scale 59

More Map Characteristics 61
Map Projections 61
Grid Systems for Mapping 65
The Cartographic Process 72
Map Symbolism 73
Map Abstraction and Cartographic Databases 77
Some Problems Related to Specific Thematic Maps 78
Soil Maps 78
Zoological Maps 80
Digital Remote Sensing Imagery 80
Vegetation Maps 83
Historical Maps 84
Terms 85
Review Questions 85
References 86
Laboratory Exercise 2: Getting Started With ArcView® 88
Introduction 89
Learning Objectives 89
Methods 89
Review and Discussion Questions 97
Shutting Down 97

Chapter 4 GIS Data Models **98**

Learning Objectives 98
A Quick Review of the Map as an Abstraction of Space 99
Some Basic Computer File Structures 101
Simple Lists 101
Ordered Sequential Files 102
Indexed Files 103
Computer Database Structures for Managing Data 105
Hierarchical Data Structures 106
Network Systems 107
Relational Database Management Systems 109
Graphic Representation of Entitites and Attributes 111
GIS Data Models for Multiple Maps 116
Raster Models 116
Compact Storing of Raster Data 121
Commercial Raster Compaction Products 123
Vector Models 124
Compacting Vector Data Models 129
A Vector Model to Represent Surfaces 130
Hybrid and Integrated Systems 131
Terms 135
Review Questions 136
References 137
Laboratory Exercise 3: ArcView® Object, File, Database and Directory Structures 139
Introduction 140
Learning Objectives 140

Methods 140
Review and Discussion Questions 146

UNIT 3 INPUT, STORAGE, AND EDITING 149

Chapter 5 The Input Subsystem 151

Learning Objectives 152
Primary Data 152
Input Devices 153
Raster, Vector, or Both 157
Reference Frameworks and Transformations 158
Map Preparation and the Digitizing Process 160
What to Input 163
How Much to Input 165
Methods of Vector Input 167
Methods of Raster Input 168
Remote Sensing as a Special Case of Raster Data Input 171
Secondary Data 176
Metadata and Metadata Standards 178
Terms 180
Review Questions 181
References 182
Laboratory Exercise 4: Getting Data Into ArcView® 184
Introduction 185
Learning Objectives 185
Methods 186
Products 191

Chapter 6 Data Storage and Editing 193

Learning Objectives 194
Storage of GIS Databases 194
The Importance of Editing the GIS Database 196
Detecting and Editing Errors of Different Types 198
Entity Errors: Vector 198
Attribute Errors: Raster and Vector 205
Dealing with Projection Changes 209
Joining Adjacent Coverages: Edge Matching 210
Conflation 211
Templating 212
Terms 213
Review Questions 213
References 214
Laboratory Exercise 5: Adding Attributes and Editing Your Data 215
Introduction 216
Learning Objectives 216
Methods 217
Products 223
Review Questions 223

UNIT 4 ANALYSIS: THE HEART OF THE GIS 225

Chapter 7 Elementary Spatial Analysis 227

Introduction to GIS Spatial Analysis 227
Learning Objectives 228
Preliminary Notes About Flowcharting 229
GIS Data Query 230
Navigating the GIS 230
Locating and Identifying Spatial Objects 232
Defining Spatial Characteristics 234
Point Attributes 234
Line Attributes 236
Area Attributes 238
Working with Higher-Level Objects 241
Higher-Level Point Objects 241
Higher-Level Line Objects 245
Higher-Level Area Objects 247
Terms 249
Review Questions 249
References 250
Laboratory Exercise 6: Finding and Locating Objects 251
Introduction 252
Learning Objectives 253
Methods 253
Review Questions 258
Products 259

Chapter 8 Measurement 260

Learning Objectives 261
Measuring Length of Linear Objects 261
Measuring Polygons 264
Calculating Polygon Lengths 264
Calculating Perimeter 266
Calculating Areas of Polygonal Features 266
Measuring Shape 268
Measuring Sinuosity 269
Measuring Polygon Shape 270
Measuring Distance 274
Simple Distance 274
Functional Distance 276
Terms 284
Review Questions 285
References 286
Laboratory Exercise 7: Simple Measurement 287
Introduction 288
Learning Objectives 288
Methods 289
Review Questions 294
Products 295

Chapter 9 Classification 296

Learning Objectives 297
Classification Principles 297
Elements of Reclassification 299
Neighborhood Functions 302
Roving Windows: Filters 302
Polygonal Neighborhoods 305
  Immediate Neighborhoods 305
  Extended Neighborhoods 309
Buffers 309
Terms 314
Review Questions 314
References 315
Laboratory Exercise 8: Classification 317
Introduction 318
Learning Objectives 318
Methods 319
Products 326
Review and Discussion Questions 327
Appendix A: Southeastern Mount Desert Island, Maine Abbreviated Data Dictionary 328
Appendix B: Southeastern Mount Desert Island, Maine Abbreviated Data Dictionary: Detailed Species Codes 331

Chapter 10 Statistical Surfaces 338

Learning Objectives 340
What Are Surfaces? 340
  Surface Mapping 341
Sampling the Statistical Surface 343
The DEM 345
Raster Surfaces 346
Interpolation 347
  Linear Interpolation 348
  Methods of Nonlinear Interpolation 349
Uses of Interpolation 354
Problems in Interpolation 355
Terrain Reclassification 360
  Steepness of Slope 360
  Azimuth or Orientation (Aspect) 362
  Shape or Form 363
  Visibility and Intervisibility 365
Slicing the Statistical Surface 367
Cut and Fill 369
Other Surface Analyses 370
Discrete Surfaces 371
  Dot Distribution Maps 371
  Choropleth Maps 373
  Dasymetric Mapping 374
Terms 375

UNIT 5 GIS OUTPUT 527

Chapter 14 The Output from Analysis 529

Learning Objectives 530
Output: The Display of Analysis 530
Cartographic Output 531
The Design Process 534
Map Design Controls 535
Nontraditional Cartographic Output 538
GIS on the Internet 541
Noncartographic Output 544
Interactive Output 544
Table and Charts 545
Technology and GIS Output 549
Terms 553
Review Questions 554
References 554
Laboratory Exercise 13: Output From Analysis 556
Introduction 557
Learning Objectives 557
Methods 557
Products 565
Review and Discussion Questions 565

UNIT 6 GIS DESIGN 567

Chapter 15 GIS Design and Implementation 569

Learning Objectives 570
What is GIS Design? 570
The Need for GIS Design 571
Internal and External GIS Design Questions 573
The Software Engineering Approach 575
System Design Principles 575
System Development Waterfall Model 576
The Mythical Man-Month 578
Some General Systems Characteristics 578
The Institutional Setting for GIS Operations 579
The Relation Between the System and the Outside World 579
A Structured Design Model 582
Technical Design 582
The Reasons for Conceptual Design 583
Conceptual Design Shortcomings 583
People Problems of GIS 584
Cost-Benefit Issues 585
Data and Applications Requirements Models 585

Formal GIS Design Methodology 586
The Spiral Model: Rapid Prototyping 586
Overview of the Initial GIS Design Model (Level 1) 587
GIS Information Products 590
How Information Products Drive the GIS 590
Organizing the Local Views 591
Avoiding Design Creep 592
View Integration 593
Database Design: General Considerations 593
Study Area 593
Scale, Resolution, and Level of Detail 594
Classification 595
Coordinate System and Projection 595
Selecting a System 596
Verification and Validation 596
Terms 597
Review Questions 597
References 598

Appendix A Software and Data Sources **601**

Appendix B Using the Wiley World Wide Web to Find Data and GIS Examples **607**

Glossary **609**
