

An Introduction To Ceramic Engineering Design

**David E. Clark,
Diane C. Folz, and
Thomas D. McGee,
Editors**

Contents

Preface	vi
Acknowledgments	ii
Chapter 1 Concepts and Principles of Engineering Design	1
<i>D.E. Clark, D.C. Folz, and T.D. McGee</i>	
Chapter 2 Ethical Issues in Design	33
<i>M.L. Cummings</i>	
Chapter 3 Materials Selection Methodology	57
<i>W.J. Lackey</i>	
Chapter 4 Statistical Design	85
<i>H. El-Shall and K.G. Christmas</i>	
Chapter 5 Use of Computers in Design of Ceramic Bodies and Processes	111
<i>D.R. Dinger</i>	
Chapter 6 Developing a Design Protocol for Load-Bearing Applications	135
<i>J.J. Mecholsky Jr.</i>	
Chapter 7 Role of Thermal Expansion and Conductivity in Design	157
<i>D.P.H. Hasselman and K.Y. Donaldson</i>	
Chapter 8 Designing for Severe Thermal Stresses	177
<i>D.P.H. Hasselman and K.Y. Donaldson</i>	
Chapter 9 Thermal Protection Design Considerations for Human-Rated Reusable Space Vehicles	199
<i>B.J. Dunbar and L. Korb</i>	
Chapter 10 Designing Glass Fibers	233
<i>W.W. Wolf</i>	

Chapter 11	Designing for Nuclear Waste Containment	257
	<i>G.G. Wicks</i>	
Chapter 12	Designing Whitewares	283
	<i>D.A. Earl</i>	
Chapter 13	Design of an Orthopedic Joint	295
	<i>T.D. McGee</i>	
Chapter 14	Design Optimization of Ceramic-to-Metal Joints	315
	<i>J.H. Selverian</i>	
Chapter 15	Designing for Thermochemical Applications	329
	<i>E.D. Wachsman</i>	
Chapter 16	Designing with Piezoelectric Devices	347
	<i>K. Uchino</i>	
Chapter 17	Designing a Bionic Cat	373
	<i>L.L. Hench</i>	
Chapter 18	Integrated Process Design at the University of Florida	393
	<i>E.D. Whitney</i>	
Chapter 19	Protecting Property Rights: Patents, Trademarks, and Copyrights	403
	<i>J.A. Calderwood</i>	
Appendix A	Author Biosketches	413
Appendix B	National Academy of Engineering's Top 20 Engineering Achievements List	427
Appendix C	Code of Ethics of Engineers	431
Appendix D	Model Guide for Professional Conduct	433
Appendix E	Obligation of an Engineer	437
	Index	439
