## PART I

### Oracle8i New Features Exam Guide

|                                                       |    |
|-------------------------------------------------------|----|
| 1 Performance and Java Enhancements .....             | 3  |
| Java in the Database .....                            | 4  |
| Describing Oracle Java Components .....               | 4  |
| Describing JServer Installation .....                 | 13 |
| Tuning JServer .....                                  | 20 |
| Optimizer and Query Improvements .....                | 26 |
| Controlling Plan Stability with Stored Outlines ..... | 27 |
| Managing Statistics with DBMS_STATS .....             | 30 |
| Optimizing Top-N Queries .....                        | 34 |
| Using Keywords for Computing Subtotals .....          | 37 |
| Explaining Sort Processing Options .....              | 40 |
| Using the trim( ) Function .....                      | 43 |
| Explaining Automatic Parallel Execution .....         | 45 |

|                                                              |            |
|--------------------------------------------------------------|------------|
| Summary Management .....                                     | 47         |
| Building and Managing Materialized Views for Summaries ..... | 48         |
| Building Dimensions .....                                    | 58         |
| Chapter Summary .....                                        | 62         |
| Two-Minute Drill .....                                       | 63         |
| Fill-in-the-Blanks .....                                     | 68         |
| Chapter Questions .....                                      | 68         |
| Fill-in-the-Blank Answers .....                              | 71         |
| Answers to Chapter Questions .....                           | 71         |
| <b>2 Partitioning and Object Management .....</b>            | <b>75</b>  |
| Index Enhancements .....                                     | 76         |
| Bitmap Index Improvements .....                              | 77         |
| Implementing Function-Based Indexes .....                    | 81         |
| Building or Rebuilding Indexes Online .....                  | 85         |
| Combining Index Creation and Statistics Generation .....     | 89         |
| Describing Index-Organized Tables .....                      | 91         |
| Logical ROWIDs and Secondary Indexes on IOTs .....           | 95         |
| Partitioning Improvements .....                              | 97         |
| Partitioning Concepts, Revisited .....                       | 98         |
| Implementing Types of Partitioning .....                     | 106        |
| Handling Row Movement .....                                  | 113        |
| New Partition Pruning Abilities .....                        | 116        |
| Partition-Wise Join Operations .....                         | 119        |
| Partition Maintenance Operations .....                       | 120        |
| Partitioning IOTs .....                                      | 131        |
| Managing Large Objects .....                                 | 135        |
| Defining LOBs from a DBA Perspective .....                   | 136        |
| Chapter Summary .....                                        | 142        |
| Two-Minute Drill .....                                       | 142        |
| Fill-in-the-Blanks .....                                     | 147        |
| Chapter Questions .....                                      | 148        |
| Fill-in-the-Blank Answers .....                              | 151        |
| Answers to Chapter Questions .....                           | 151        |
| <b>3 Database Administration in Oracle®i .....</b>           | <b>155</b> |
| Oracle Universal Installer: Migration and Upgrade .....      | 156        |
| Oracle Universal Installer New Features .....                | 157        |
| Migrating from Oracle7 to Oracle8i .....                     | 162        |
| Upgrading from Oracle8 to Oracle8i .....                     | 181        |
| Tablespace Management .....                                  | 184        |
| Managing Locally Managed Tablespaces .....                   | 185        |
| Managing Transportable Tablespaces .....                     | 192        |
| Using Read-Only Tablespace Enhancements .....                | 199        |

|                                                             |            |
|-------------------------------------------------------------|------------|

| Chapter Questions .....                                     | 268        |
| Fill-in-the-Blank Answers .....                             | 272        |
| Answers to Chapter Questions .....                          | 272        |
| <b>5 Availability and Recoverability Enhancements .....</b> | <b>275</b> |
| Availability and Recoverability Enhancements .....          | 276        |
| RMAN New Features .....                                     | 277        |
| Implementing Archive Duplexing and Multiplexing .....       | 280        |
| Using the Standby Database Feature .....                    | 287        |
| Opening Databases for Read-Only Access .....                | 298        |
| Suspending Database I/O Operations .....                    | 301        |
| Using LogMiner to Fix Problems .....                        | 307        |
| Implementing Fast-Start Fault Recovery .....                | 311        |
| Detecting Corruption with DBMS_REPAIR .....                 | 315        |
| Adjusting Freelists in Oracle8i .....                       | 321        |
| Chapter Summary .....                                       | 323        |
| Two Minute Drill .....                                      | 324        |
| Fill-in-the-Blanks .....                                    | 329        |
| Chapter Questions .....                                     | 329        |
| Fill-in-the-Blank Answers .....                             | 332        |
| Answers to Chapter Questions .....                          | 333        |

|                                                           |            |
|-----------------------------------------------------------|------------|
| <b>6 Other Enhancements in Oracle8i</b>                   | <b>337</b> |
| Features of Net8                                          | 338        |
| Describing the New Service-Naming Scheme                  | 339        |
| Explaining Automatic Registration                         | 346        |
| Describing Load Balancing                                 | 348        |
| Configuring the Network for JServer                       | 353        |
| SQL*Plus and PL/SQL Enhancements                          | 358        |
| Using SQL*Plus for Database Management                    | 359        |
| New Features for PL/SQL                                   | 363        |
| Database Security                                         | 372        |
| Describing N-Tier Authentication                          | 373        |
| Describing Invoker's Rights Security Management           | 381        |
| Application Context Areas and Fine Grained Access Control | 387        |
| Chapter Summary                                           | 400        |
| Two-Minute Drill                                          | 400        |
| Fill-in-the-Blank Questions                               | 402        |
| Chapter Questions                                         | 403        |
| Fill-in-the-Blank Answers                                 | 405        |
| Answers to Chapter Questions                              | 406        |

## PART II

### Oracle8i Certified Professional New Features Practice Exams

|                                                                     |            |
