

INDUSTRIAL VENTILATION

A Manual of Recommended Practice

24th Edition

ACGIH[®]
WORLDWIDE

CONTENTS

DEDICATION	vii
FOREWORD	ix
ACKNOWLEDGMENTS	xi
DEFINITIONS	xiii
ABBREVIATIONS	xv
CHAPTER 1 GENERAL PRINCIPLES OF VENTILATION	1-1
1.1 Introduction	1-2
1.2 Supply Systems	1-2
1.3 Exhaust Systems	1-2
1.4 Basic Definitions	1-3
1.5 Principles of Airflow	1-4
1.6 Accelerations of Air Hood Entry Losses	1-6
1.7 Duct Losses	1-7
1.8 Multiple-Hood Exhaust Systems	1-9
1.9 Airflow Characteristics of Blowing and Exhausting	1-9
References	1-10
CHAPTER 2 GENERAL INDUSTRIAL VENTILATION	2-1
2.1 Introduction	2-2
2.2 Dilution Ventilation Principles	2-2
2.3 Dilution Ventilation for Health	2-2
2.4 Mixtures—Dilution Ventilation for Health	2-6
2.5 Dilution Ventilation for Fire and Explosion	2-7
2.6 Fire-Dilution Ventilation for Mixtures	2-8
2.7 Ventilation for Heat Control	2-8
2.8 Heat Balance and Exchange	2-8
2.9 Adaptive Mechanism of the Body	2-9
2.10 Acclimatization	2-10
2.11 Acute Heat Disorders	2-10
2.12 Assessment of Heat Stress and Heat Strain	2-10
2.13 Worker Protection	2-12
2.14 Ventilation Control	2-12
2.15 Ventilation Systems	2-13
2.16 Velocity Cooling	2-14
2.17 Radiant Heat Control	2-15
2.18 Protective Suits for Short Exposures	2-15
2.19 Respiratory Heat Exchangers	2-15
2.20 Refrigerated Suits	2-16
2.21 Enclosures	2-16
2.22 Insulation	2-16
References	2-16

CHAPTER 3	LOCAL EXHAUST HOODS	3-1
3.1	Introduction	3-2
3.2	Contaminant Characteristics	3-2
3.3	Hood Types	3-2
3.4	Hood Design Factors	3-2
3.5	Hood Losses	3-15
3.6	Minimum Duct Velocity	3-18
3.7	Special Hood Requirements	3-18
3.8	Push-Pull Ventilation	3-19
3.9	Hot Processes	3-20
	References	3-22
CHAPTER 4	AIR CLEANING DEVICES	4-1
4.1	Introduction	4-2
4.2	Selection of Dust Collection Equipment	4-2
4.3	Dust Collector Types	4-3
4.4	Additional Aids in Dust Collector Selection	4-22
4.5	Control of Mist, Gas and Vapor Contaminants	4-22
4.6	Gaseous Contaminant Collectors	4-22
4.7	Unit Collectors	4-29
4.8	Dust Collecting Equipment Cost	4-29
4.9	Selection of Air Filtration Equipment	4-33
4.10	Radioactive and High Toxicity Operations	4-34
4.11	Explosion Venting	4-35
	References	4-36
CHAPTER 5	EXHAUST SYSTEM DESIGN PROCEDURE	5-1
5.1	Introduction	5-2
5.2	Preliminary Steps	5-2
5.3	Design Procedure	5-2
5.4	Duct Segment Calculations	5-4
5.5	Distribution of Airflow	5-10
5.6	Aids to Calculation	5-12
5.7	Plenum Exhaust Systems	5-12
5.8	Fan Pressure Calculations	5-13
5.9	Corrections for Velocity Changes	5-13
5.10	Sample System Design	5-16
5.11	Different Duct Material Friction Losses	5-16
5.12	Friction Loss for Non-Circular Ducts	5-16
5.13	Corrections for Non-Standard Density	5-24
5.14	Air Cleaning Equipment	5-34
5.15	Evasé	5-34
5.16	Exhaust Stack Outlets	5-34
5.17	Air Bleed Design	5-37
5.18	Optimum Economic Velocity	5-38
5.19	Construction Guidelines for Local Exhaust Systems	5-38
	References	5-40

CHAPTER 6	FANS	6-1
6.1	Introduction	6-2
6.2	Basic Definitions	6-2
6.3	Fan Selection	6-6
6.4	Fan Motors	6-21
6.5	Fan Installation and Maintenance	6-24
	References	6-27
CHAPTER 7	SUPPLY AIR SYSTEMS	7-1
7.1	Introduction	7-2
7.2	Purpose of Supply Air Systems	7-2
7.3	Supply Air Equipment	7-6
7.4	Supply Air Distribution	7-13
7.5	Airflow Rate	7-16
7.6	Heating, Cooling, and Other Operating Costs	7-16
7.7	Energy Conservation	7-20
7.8	System Control	7-25
7.9	System Noise	7-25
	References	7-25
CHAPTER 8	VENTILATION ASPECTS OF INDOOR AIR QUALITY	8-1
8.1	Introduction	8-2
8.2	Dilution Ventilation for Indoor Air Quality	8-2
8.3	HVAC Components and System Types	8-2
8.4	HVAC Components, Functions and Malfunctions	8-4
8.5	HVAC Component Survey Outline	8-8
	References	8-9
CHAPTER 9	MONITORING AND TESTING OF VENTILATION SYSTEMS	9-1
9.1	Introduction	9-2
9.2	Computing Air Velocity and Airflow Rate	9-3
9.3	Representative Sampling for Velocities	9-9
9.4	Pressure Measurement	9-15
9.5	Using Pitot Tube Probes with Pressure Sensors	9-16
9.6	Selection and Use of Instruments	9-19
9.7	Calibration	9-30
9.8	Practical Issues in Ventilation System Management	9-34
9.9	Monitoring a System	9-35
9.10	Using Pressure and Flow Data to Detect and Locate Obstructions, Leaks, and Alterations	9-37
9.11	Testing for Acceptance	9-45
	References	9-48
CHAPTER 10	SPECIFIC OPERATIONS	10-1
BIBLIOGRAPHY		11-1
APPENDICES		12-1
	A Threshold Limit Values for Chemical Substances in the Work Environment with Intended Changes for 2000	12-3
	B Physical Constants/Conversion Factors	12-21
INDEX		13-1
