THIRD EDITION

Contents

Preface vii
A User's Guide to Features xiii
Graphing Calculator Terminology xvi

1 Functions 1

1.1 Real Numbers, Inequalities, and Lines 2
1.2 Exponents 18
1.3 Functions 31
1.4 Functions, Continued 49

Chapter Summary with Hints and Suggestions 69
Review Exercises for Chapter 1 70

2 Derivatives and Their Uses 76

2.1 Limits and Continuity 78
2.2 Rates of Change, Slopes, and Derivatives 95
2.3 Some Differentiation Formulas 111
2.4 The Product and Quotient Rules 127
2.5 Higher-Order Derivatives 144
2.6 The Chain Rule and the Generalized Power Rule 158
2.7 Nondifferentiable Functions 171

Chapter Summary with Hints and Suggestions 177
Review Exercises for Chapter 2 179

3 Further Applications of Derivatives 184

3.1 Graphing Using the First Derivative 186
3.2 Graphing Using the First and Second Derivatives 199

3.3 Optimization 214
3.4 Further Applications of Optimization 229
3.5 Optimizing Lot Size and Harvest Size 239
3.6 Implicit Differentiation and Related Rates 248

Chapter Summary with Hints and Suggestions 261
Review Exercises for Chapter 3 262

Cumulative Review for Chapters 1–3 266

4 Exponential and Logarithmic Functions 268

4.1 Exponential Functions 270
4.2 Logarithmic Functions 287
4.3 Differentiation of Logarithmic and Exponential Functions 304
4.4 Two Applications to Economics: Relative Rates and Elasticity of Demand 321

Chapter Summary with Hints and Suggestions 334
Review Exercises for Chapter 4 336

5 Integration and Its Applications 340

5.1 Antiderivatives and Indefinite Integrals 342
5.2 Integration Using Logarithmic and Exponential Functions 356
5.3 Definite Integrals and Areas 368
5.4 Further Applications of Definite Integrals: Average Value and Area Between Curves 389
5.5 Two Applications to Economics: Consumers' Surplus and Income Distribution 404
5.6 Integration by Substitution 413

Chapter Summary with Hints and Suggestions 427
Review Exercises for Chapter 5 429

6 Integration Techniques 434

6.1 Integration by Parts 436
6.2 Integration Using Tables 449
6.3 Improper Integrals 459
6.4 Numerical Integration 473

Chapter Summary with Hints and Suggestions 487
Review Exercises for Chapter 6 489

7 Calculus of Several Variables 492

7.1 Functions of Several Variables 494
7.2 Partial Derivatives 506
7.3 Optimizing Functions of Several Variables 521
7.4 Least Squares 533
7.5 Lagrange Multipliers and Constrained Optimization 547
7.6 Total Differentials and Approximate Changes 561
7.7 Multiple Integrals 573

Chapter Summary with Hints and Suggestions 588
Review Exercises for Chapter 7 590

Cumulative Review for Chapters 1–7 593

8 Trigonometric Functions 596

8.1 Triangles, Angles, and Radian Measure 598
8.2 Sine and Cosine Functions 611
8.3 Derivatives of Sine and Cosine Functions 626
8.4 Integrals of Sine and Cosine Functions 640
8.5 Other Trigonometric Functions 651

Chapter Summary with Hints and Suggestions 667
Review Exercises for Chapter 8 669

9 Differential Equations 674

9.1 Separation of Variables 676
9.2 Further Applications of Differential Equations: Three Models of Growth 694
9.3 First-Order Linear Differential Equations 710
9.4 Approximate Solutions of Differential Equations: Euler's Method 723

Chapter Summary with Hints and Suggestions 732
Review Exercises for Chapter 9 734

10 Sequences and Series 738

10.1 Geometric Series 740
10.2 Taylor Polynomials 754
10.3 Taylor Series 767
10.4 Newton's Method 784

Chapter Summary with Hints and Suggestions 796
Review Exercises for Chapter 10 798

11 Probability 802

11.1 Discrete Probability 804
11.2 Continuous Probability 820
11.3 Uniform and Exponential Random Variables 833
11.4 Normal Random Variables 845

Chapter Summary with Hints and Suggestions 855
Review Exercises for Chapter 11 857

Cumulative Review for Chapters 1–11 861

Appendix: Normal Probabilities from Tables A1
Answers to Selected Exercises B1
Index I1
