Contents

Series Preface	v	
Preface	vii	
Acknowledgments	xi	
Chapter 1	Two Paradigms of Stability	1
1.1	Stability and Instability	1
1.2	The Leaky Bucket	4
Problems		10
Further Reading		10
Chapter 2	Models of the Global Climate	11
2.1	No-Atmosphere Climate Model	11
2.2	One-Layer Atmosphere Model	14
2.3	One-Layer Atmosphere Model with Feedbacks	17
2.4	Radiative-Convective Model	22
2.5	Advective Transport	28
2.6	Diffusive Transport	30
2.7	Global Climate in a Shoebox	31
2.8	Energy-Balance Climate Model	38
2.9	Simple Periodic System	43
2.10	Energy-Balance Climate Model with Seasons	45
Problems		49
Further Reading		50
Chapter 3	Thermodynamics and Dynamics in the Vertical	52
3.1	Hydrostatic Balance	52
3.2	Dry Thermodynamics	54
3.3	Moist Thermodynamics	56
3.4	Dry Parcel Dynamics	59
3.5	Moist Parcel Dynamics	61
3.6	Mixing Clouds	62

	Problems	66
	Further Reading	67
Chapter 4	Dynamics of Horizontal Motion	68
	4.1 Coriolis Deflections	68
	4.2 Motion in Response to an External Force	71
	4.3 Motions with Drag	73
	4.4 Motion Around Highs and Lows	75
	4.5 Motion on the Beta-Plane	79
	4.6 Inertial Instability	82
	4.7 The Ekman Layer	84
	4.8 The Ekman Layer in the Atmosphere	88
	Problems	88
	Further Reading	90
Chapter 5	Dynamics of Circulation and Vorticity	91
	5.1 Simple Convection	91
	5.2 Convection with Conduction	94
	5.3 Vorticity Dynamics: The Vortex Pair	97
	5.4 Multiple Vortices	101
	5.5 The Rossby Wave	106
	5.6 The Gulf Stream	114
	Problems	118
	Further Reading	120
Chapter 6	Dynamical Models of the Climate	121
	6.1 The Hadley Circulation	121
	6.2 The Midlatitude Cyclone	129
	6.3 Lorenz's General Circulation Model	135
	6.4 Chaotic Advection	142
	Problems	152
	Further Reading	153
Chapter 7	Climate Variations	154
	7.1 El Niño	154
	7.2 The Quasi-Biennial Oscillation	163
	7.3 Stommel's Model of the Thermohaline Circulation	167
	7.4 A More Realistic Thermohaline Model	172
	7.5 Icesheet Model	176
	7.6 Upwelling-Diffusion Climate Model	182
	Problems	188
	Further Reading	190
Appendix		193
	A.1 System Requirements	193
	A.2 Quick Help Guide	194
Index		203
