

ELSEVIER
PERGAMON

Comprehensive Structural Integrity

Fracture of Materials
from Nano to Macro

◆ **VOLUME 5:**

Creep and High-Temperature Failure

Volume Editor

◆ A. Saxena

Editors-in-Chief ◆ I. Milne ◆ R. O. Ritchie ◆ B. Karihaloo

Contents

Preface	vii
Contributors to Volume 5	xi
5.01 Mechanisms and Models for Creep Deformation and Rupture H. K. D. H. BHADESHIA, <i>University of Cambridge, UK</i>	1
5.02 Creep-Fatigue Interactions (Crack Initiation) R. P. SKELTON, <i>Imperial College of Science, Technology and Medicine, London, UK</i>	25
5.03 Thermal-Mechanical Fatigue (Including Thermal Shock) L. RÉMY, <i>Centre des Matériaux, UMR CNRS 7633, Ecole des Mines de Paris, France</i>	113
5.04 Analysis of Cracks under Creep Conditions A. SAXENA, <i>Georgia Institute of Technology, Atlanta, USA</i>	201
5.05 Creep Crack Growth G. A. WEBSTER, <i>Imperial College, London, UK</i>	241
5.06 Creep-fatigue Crack Growth S. KUBO, <i>Osaka University, Japan</i> , and T. KITAMURA, <i>Kyoto University, Japan</i>	273
5.07 Remnant Creep Life Prediction in Ferritic Materials D. J. GOOCH, <i>GenExp Ltd., Swindon, UK</i>	309
5.08 Creep Resistance in Nonferritic Materials H. HARADA, <i>National Institute for Materials Science, Tsukuba, Japan</i>	361
Subject Index	375
