GUIDELINES FOR MULTI-COMBINATION
VEHICLE ROUTE ACCESS ASSESSMENT

AUSTROADS
Delivering Best Practice

Contents

1.	INTRODUCTION.....	1
1.1	Background	1
1.2	Aim, Scope and Method.....	1
1.3	Definitions	1
1.4	Vehicle Size and Weight.....	2
2.	REVIEW OF ROUTE ACCESS ASSESSMENT.....	4
2.1	Road Train Route Selection	4
2.2	B-Double Route Selection.....	4
2.3	Lane Width Requirements.....	4
2.4	Safety-Related Performance Measures.....	5
3.	REVIEW OF CURRENT PRACTICES.....	6
3.1	Victoria	6
3.2	New South Wales	6
3.3	Queensland	6
3.4	Northern Territory.....	7
3.5	Western Australia.....	7
3.6	South Australia.....	8
3.7	Tasmania	8
4.	ROUTE ACCESS ISSUES	9
4.1	Traffic Volume.....	9
4.2	Road Alignment and Overtaking Opportunities.....	9
4.3	Road Space and Structural Requirements	10
4.3.1	Road Space	10
4.3.2	Pavements.....	10
4.3.3	Bridges.....	10
4.4	Urban Traffic Interaction.....	10
4.4.1	Unsignalised Intersections.....	11
4.4.2	Signalised Intersections and Railway Crossings	11
5.	PERFORMANCE TEMPLATE.....	13
6.	CONCLUSIONS.....	14
