VOLUME 4: Fuel Cell Technology and Applications, Part 2

Contributors to Volumes 3 and 4	ix		
Foreword	xv		
Preface	xix		
Abbreviations and Acronyms	xxi		
Part 3: Polymer electrolyte membrane fuel cells and systems (PEMFC)	679	52 System design for vehicle applications: DaimlerChrysler <i>G. Konrad/M. Sommer/B. Loschko/A. Schell/A. Docter</i>	693
<i>(Continued from previous volume)</i>		53 System design for vehicle applications: GM/Opel <i>D. A. Masten/A. D. Bosco</i>	714
<i>System design and system-specific aspects</i>	681	<i>Air-supply components</i>	725
51 System design for stationary power generation <i>F. Barbir</i>	683	54 Air-supply components <i>S. Pischinger/O. Lang</i>	727

Applications based on PEM-technology

- 55 Special applications using PEM-technology
A. B. LaConti/L. Swette

743

745

Part 4: Alkaline fuel cells and systems**(AFC)**

- 56 Stack materials and design
K. Kordesch/V. Hacker
- 57 System design and applications
K. Strasser
- 58 A comparison between the alkaline fuel cell (AFC) and the polymer electrolyte membrane (PEM) fuel cell
K. Kordesch/M. Cifrain

763

765

774

789

Part 5: Phosphoric acid fuel cells and systems**(PAFC)**

- 59 Stack materials and stack design
R. D. Breault
- 60 Catalyst studies and coating technologies
D. A. Landsman/F. J. Luczak
- 61 Experience with 200 kW PC25 fuel cell power plant
J. M. King/B. McDonald

795

797

811

832

Part 6: Direct methanol fuel cells and systems**(DMFC)**

- 62 Transport/kinetic limitations and efficiency losses
J. Müller/G. Frank/K. Colbow/D. Wilkinson
- 63 New materials for DMFC MEAs
M. Neergat/K. A. Friedrich/U. Stimming
- 64 System design for transport applications
A. Lamm/J. Müller
- 65 DMFC system design for portable applications
S. R. Narayanan/T. I. Valdez/N. Rohatgi

845

847

856

878

894

Part 7: Molten carbonate fuel cells and systems**(MCFC)**

- 66 Stack material and stack design
Y. Mugikura
- 67 Electrolyte and material challenges
J. Hoffmann/C.-Y. Yuh/A. Godula Jopek
- 68 System design
M. Farooque/H. Ghezel-Ayagh
- 69 Durability
Y. Fujita

905

907

921

942

969

Part 8: Solid oxide fuel cells and systems**(SOFC)****Materials**

- 70 Current electrolytes and catalysts
T. Kawada/J. Mizusaki
- 71 Low temperature electrolytes and catalysts
O. Yamamoto

983**985**

987

1002

- 72 MEA/cell preparation methods: Europe/USA
D. Stöver/H. P. Buchkremer/J. P. P. Huijsmans
- 73 MEA/cell preparation methods: Japan/Asia
M. Suzuki
- 74 Interconnects
K. Hilpert/W. J. Quadackers/L. Singheiser

1015

1032

1037

Stack and system design

- 75 Internal reforming
K. Eguchi
- 76 System design
J. J. Hartvigsen/S. Elangovan/A. C. Khandkar

1055

1057

1070

New concepts

- 77 New microtube concepts
K. Kendall
- 78 Direct hydrocarbon SOFCs
S. A. Barnett
- 79 Novel electrolytes operating at 400–600 C
T. Ishihara

1087

1089

1098

1109

Part 9: Primary and secondary metal/air cells

- 80 Alkaline methanol/air power devices
G. A. Koscher/K. Kordesch

1123

1125

Part 10: Portable fuel cell systems

- 81 Portable direct methanol fuel cell systems
S. R. Narayanan/T. I. Valdez
- 82 Portable PEM systems
A. Heinzl/C. Hebling
- 83 Small-size PEM systems for special applications
F. N. Büchi

1131

1133

1142

1152

Part 11: Current fuel cell propulsion systems**PEM fuel cell systems for cars/buses**

- 84 DaimlerChrysler fuel cell activities
H.-P. Schmid/J. Ebner
- 85 General Motors/OPEL fuel cell activities – Driving towards a successful future
A. Rodrigues/M. Fronk/B. McCormick
- 86 Honda fuel cell activities
S. Matsuo
- 87 Hy.Power – A technology platform combining a fuel cell system and a supercapacitor
P. Dietrich/F. Büchi/A. Tsukada/M. Bärtschi/R. Kötz/
G. G. Scherer/P. Rodatz/O. Garcia/M. Ruge/M. Wollenberg/
P. Lück/A. Wiartalla/C. Schönfelder/A. Schneuwly/P. Barrade

1163**1165**

1167

1172

1180

1184

PEM fuel cell systems for submarines

- 88 H₂/O₂-PEM-fuel cell module for an air independent propulsion system in a submarine
K. Strasser

1199

1201

AFC fuel cell systems

- 89 Automotive development
V. Hacker/K. Kordesch
- 90 Space-shuttle fuel cell
H. A. Wagner

Part 12: Electric utility fuel cell systems

- 91 PEMFC fuel cell systems
J. Garche/L. Jörissen
- 92 MCFC fuel cell systems
M. Bischoff/M. Farooque/S. Satou/A. Torazza
- 93 SOFC fuel cell systems
S. E. Veyo/S. Fukuda/L. A. Shockling/W. L. Lundberg

1215

1217

1224

1231

1233

1260

1276

Part 13: Future prospects of fuel cell systems**1291**

- 94 Life-cycle analysis of fuel cell system components
M. Pehnt 1293
- 95 Market concepts, competing technologies and cost challenges for automotive and stationary applications
T. Lipman/D. Sperling 1318
- 96 Potential economic impact of fuel cell technologies
E. Jochem/E. Schirrmeister 1329

Contents for Volumes 1 and 2**1337****Subject Index****1341**
