Foreword vi

Preface vii

Chapter 1 Towards student-centred learning 1

Teaching-learning situations and processes: Different teaching-learning situations 2; Exploring learning processes 3; Helping students to learn how they learn 4; Designing a new programme 6; Developing students' key skills 8

Making the most of learning outcomes: Why use learning outcomes? 10; Where can learning outcomes be useful to students? 10; Designing and using learning outcomes 11

Communications and information technologies: Using communications and information technologies 14

Chapter 2 Lectures 17

Giving lectures: Preparing your first lectures 18; Giving lectures 20; Handouts for lectures 23

Technology in lectures: Working with overhead projectors 25; Why use computer-aided presentations? 27; Some *don'ts* for presentation managers! 28; Helping students to learn from computer-aided presentations 32

Observing others: Observing other lecturers, and being observed yourself 33; Some qualities to observe in lectures 35

Chapter 3 Small-group teaching and learning 37

Working with students: Mature students 38; Part-time students 40; International students 42; Students with special needs 44

Student group work: Preparing students for group work 46; Some dos and don'ts 47; Keeping momentum 49; Gender issues in group work 50; Establishing ground rules for groups 52; Addressing conflict in group work 53; 'Followership' skills development 54; Using post-its and flipcharts in group work 56; Ringing the changes 57; Helping students to write reflections on group learning 59; Virtual group work 61

Chapter 4 Designing and using learning resources 63

Flexible learning resources: What are the characteristics of resource-based learning? 65; What sorts of flexibility are there? 66; What lends itself to flexible learning? 67; Which students are particularly helped? 69

Selecting flexible learning materials: How will they work? 70; Is the content right? 72; Adopt, adapt, or start from scratch? 73; Planning how to adopt 75; Planning how to adapt 77

Writing your own material: Writing new flexible learning materials 78; Writing self-assessment questions 80; Writing feedback responses to structured questions 82; Writing multiple-choice questions 84; Writing feedback responses to multiple-choice questions 86; Writing study guides 87

Using videos and audiotapes: Using video recordings in your teaching 89; Using audiotapes in your teaching 90

Computer-based learning resources: Choosing and using computer-based learning resources 92; Designing computer-marked assignments 95; Designing computer-generated feedback to students 96

Making the most of the Internet: Making effective use of e-mail 98; Helping students to get started with e-mail 101; Getting a computer-conference going 103; Putting the Internet to work for learning 106; Retrieving information from the Internet 107; Helping students to learn from the Internet 109

Chapter 5 Assessment 111

Putting assessment into context: What should assessment be? 113; Why should we assess? 115; When should we assess? 116; Plagiarism, cheating and assessment 117; Monitoring the quality of your assessment processes 118

Setting and marking exams: Designing questions for traditional exams 120; Setting open-book exam questions 122; Designing exam marking schemes 123; Marking examination scripts 124; Using exam questions as class exercises 125; Conducting vivas 127; Designing multiple-choice exams 129; Helping students to cope with exam failure 131

Making the most of your external examiners: External examiners: before they start 132; External examiners: when they arrive 133; Becoming an external examiner yourself 134

Diversifying assessment: Assessing essays 136; Assessing reports 137; Assessing practical skills 139; Assessing presentations 140; Assessing student projects 142; Assessing dissertations and theses 144; Assessing reviews and annotated bibliographies 145; Assessing performances 147; Assessing poster-displays and exhibitions 148; Assessing seminars 151; Assessing work-based learning 152; Assessing action research 154; Assessing portfolios 155; Assessing reflective logs 157; Assessing groups 158; Assessing flexible learning 159; Learning contracts and assessment 162

Feedback and assessment: Quality of feedback 163; Using computer-generated feedback 165; Using e-mail and computer-conferencing to give students feedback 167

Reducing your load: short cuts to good feedback: Keep records carefully 169; Reduce your burden 170; And when you still find yourself overloaded ... 171

Involving students in assessment: What lends itself to peer-assessment? 172; Getting started with peer-assessment 173; Using student self-assessment to enhance their learning 174; Self- and peer-marking 176

Chapter 6 Feedback, evaluation and external scrutiny 178

Questionnaires: Some problems with questionnaires 179; Some kinds of structured questions 180; Some ideas for open questions 181; Some ways of using questionnaires 182; Designing open feedback questionnaires 184

Other ways of getting feedback: Feedback from interviews with students 186; Feedback from groups of students 187; Using the nominal group technique to elicit feedback 188; Establishing a culture of student feedback 190; Feedback from student representatives 191

Preparing for external scrutiny: Preparing for quality visits 193; Writing a Self-Assessment Document 196; Preparing for the week of the visit 199

Chapter 7 Looking after yourself 201

Time management 201; Workload management 203; Stress management 204; Working well with academic colleagues 208; Working well with administrative and support colleagues 209; Managing your meetings 210; Managing your paperwork 212; Working as a part-time lecturer 214; Preparing for appraisal 216; Building your teaching portfolio 218

Chapter 8 Getting published 221

Getting started: Why do you want to publish? 222; Deciding what to write 224; Collecting your source material 225; Improve your word processing 227; Ordering and structuring material 230; Tackling the blank page 231; Conference proceedings 232; Journal articles 234

Selling your idea: Proposals to publishers 235; How editors select papers for publication 236; Targeting the right journal 238; Making your research publishable 239; Manuscript appeal 240; Improving your 'hit rate' 242; Responding to referees' feedback 243; Dealing with rejections 245

Writing and rewriting: Using the literature search effectively 247; Finding the right voice 248; Style points 249; Diagrams, drawings and tables 251; Making a good finish 252; Get your references right! 254; Getting feedback on your drafts 255; Checking your proofs 257

Electronic publishing: Electronic publishing: why and how? 259; Using electronic means to support traditional publishing 261
