

BIOTECHNOLOGY and BIOPHARMACEUTICALS

Transforming Proteins and Genes into Drugs

RODNEY J. Y. HO

MILO GIBALDI

CONTENTS

Foreword	xi
Preface	xiii
Organization of the Book	xv
Contributors	xvii
■ PART I	
TRANSFORMING PROTEINS AND GENES INTO THERAPEUTICS	1
1 Introduction to Biopharmaceuticals	3
1.1. Biotechnology versus Pharmaceutical Biotechnology	5
1.2. Historical Perspective of Pharmaceutical Biotechnology	6
1.3. Not All Protein Drugs and Vaccines of the Same Name Are Identical	7
2 Comparative Drug Development of Proteins and Genes versus Small Molecules	11
2.1. Transforming New Molecular Entities into Drugs	12
2.2. Differences between Development of Biotechnology Products of Macromolecules and Chemical Products	15
2.3. Current Trends in Drug Development	18
3 Biotechnology Industry Perspective on Drug Development	21
3.1. Introduction	21
3.2. Role of the Orphan Drug Act	25
3.3. Clinical Leverage Strategy in Accelerating Drug Development	28
3.4. Therapeutic Target Considerations	28
4 Biopharmaceutical Technologies and Processes in Drug Development	35
4.1. Application of Biotechnologies in Drug Discovery and Development	35
4.2. Large-Scale Production of Recombinant Proteins	63
4.3. Biologic Drug Development and Approval	80

5	Pharmacology, Toxicology, Therapeutic Dosage Formulations, and Clinical Response	97
	5.1. Clinical Pharmacology	98
	5.2. Dose and Therapeutic Response	116
	5.3. Dosage Form and Routes of Administration	118
■ PART II		
	THERAPEUTICS BASED ON BIOTECHNOLOGY	125
6	Hematopoietic Growth Factors and Coagulation Factors	127
	6.1. Overview	128
	6.2. Monographs	136
7	Interferons and Cytokines for Anti-infective and Cancer Therapy	161
	7.1. Interferons in Cancer Therapy <i>Mamta Chawla-Sarkar, Paul Masci, and Ernest Borden</i>	161
	7.2. Interferons in Viral Hepatitis <i>Gary L. Davis</i>	179
	7.3. Interferon- β in the Treatment of Multiple Sclerosis	185
	7.4. Monographs	188
8	Hormones	209
	8.1. Protein Hormones as Therapeutics: Yesterday, Today, and Tomorrow <i>Sandra Blethen</i>	209
	8.2. Monographs	215
9	Enzymes	245
	9.1. Overview of Enzyme Therapies	245
	9.2. Monographs	256
10	Antibodies and Derivatives	271
	10.1. Overview	271
	10.2. Monographs	289
11	Vaccines	313
	<i>Shiu-Lok Hu and Rodney J.Y. Ho</i>	
	11.1. Why Vaccines?	313
	11.2. How Do Vaccines Work?	314
	11.3. Traditional Vaccine Approaches	315
	11.4. Subcellular and Recombinant Subunit Vaccines	318
	11.5. Future Directions	321
	11.6. Summary	323
12	Other Products: Monographs	331

■ PART III

FUTURE DIRECTIONS	337
13 Advanced Drug Delivery	339
13.1. Rationale and Basic Principles	339
13.2. Physiologic and Mechanistic Approaches	345
13.3. Approaches Using Devices	367
13.4. Molecular Approaches	369
13.5. Summary	374
14 Individualization of Drug Regimens: Integration of Pharmacokinetic and Pharmacogenetic Principles in Drug Therapy	381
14.1. Overview of Factors Governing Interindividual Variations	381
14.2. Historical Perspective on Pharmacogenetics	382
14.3. Pharmacogenetics: Drug Metabolism and Transport	386
14.4. Pharmacogenetics: Therapeutic Response	391
14.5. Individualized Gene-Based Medicine: A Mixed Blessing	395
14.6. Current and Potential Application of Pharmacogenetics	396
14.7. Summary	398
15 Gene and Cell Therapy	401
15.1. Overview of Gene and Cell Therapeutics	401
15.2. Delivery and Expression of Genes Encoded for Functional Proteins <i>Sean M. Sullivan</i>	412
16 Integration of Discovery and Development: The Role of Genomics and Proteomics	427
16.1. Overview	427
16.2. Integration of Discovery and Development of Therapeutic Candidates	429
16.3. Genomics: The First Link between Sequences and Drug Targets	430
16.4. Proteomics: From Sequences to Functions	433
16.5. Integrating Proteomic and Genomic Tools to Accelerate Drug Development	437
16.6. Summary	443
Appendix I Dosage Form, Pharmacokinetics, and Disposition Data	445
Appendix II Molecular Characteristic and Therapeutic Use	467
Appendix III Nomenclature of Biotechnology Products	495
Appendix IV Synonyms of Trade, Common, and Scientific Names	499
Appendix V Other Information Tables	527
Index	539
Monographs Index	555
