

DUANE T. GARDINER RAYMOND W. MILLER

SOILS

In Our Environment

Tenth Edition

Contents

Preface *xiii*

1

Soil Composition and Importance **1**

- 1:1 Preview and Important Facts *1*
- 1:2 What Is Soil? *1*
- 1:3 Components of Soil *3*
- 1:4 Historical Perspectives *9*
- 1:5 Soil—A Precious Resource *14*
- 1:6 Soil Quality *21*
 - Questions* *24*
 - For Further Study* *24*

2

Soil Physical Properties **26**

- 2:1 Preview and Important Facts *26*
- 2:2 Soil Texture *27*
- 2:3 Rock Fragments *31*
- 2:4 Soil Structure *31*
- 2:5 Bulk Density *36*
- 2:6 Soil Porosity and Permeability *38*
- 2:7 Soil Air *42*
- 2:8 Consistence (Strength) *44*
- 2:9 Soil Color *45*
- 2:10 Soil Temperature *48*
- 2:11 Soil Physical Properties and Engineering *54*
 - Questions* *59*
 - For Further Study* *61*

3

Soil Water Properties **62**

- 3:1 Preview and Important Facts *62*
- 3:2 Water Chemistry *63*
- 3:3 Soil Water Content *64*

3:4	Soil Water Potential and Availability	66
3:5	Soils as Water Reservoirs	74
3:6	Methods of Determining Water Content or Potential	77
3:7	Water Flow into and through Soils	83
3:8	Water Uptake by Plants	87
3:9	Consumptive Use and Water Efficiency	90
3:10	Reducing Water Loss	93
	<i>Questions</i>	96
	<i>For Further Study</i>	97

4

Soil Chemical Properties 98

4:1	Preview and Important Facts	98
4:2	Soil Clays	99
4:3	Organic Colloids (Humus)	109
4:4	Cation Exchange	109
4:5	Anion Exchange and Adsorption	117
4:6	Soil pH	119
4:7	Equilibrium, Buffering, and Other Principles	123
	<i>Questions</i>	125
	<i>For Further Study</i>	125

5

Organisms and Their Residues 126

5:1	Preview and Important Facts	126
5:2	Animalia: Rodents, Worms, and Insects	128
5:3	Plantae: Plants	130
5:4	Fungi: Molds, Mushrooms, and Mycorrhizae	133
5:5	Protista	136
5:6	Monera: Bacteria	137
5:7	Soil Viruses and Viroids	144
5:8	Conditions for Microbial Activity	144
5:9	Composition of Organic Matter	148
5:10	Decomposition of Organic Matter	149
5:11	Effects of Soil Organic Matter	154
5:12	Organic Waste Materials	159
5:13	Low-Input Sustainable Agriculture and Organic Farming	162
	<i>Questions</i>	165
	<i>For Further Study</i>	165

6

Soil Formation and Morphology 166

6:1	Preview and Important Facts	166
6:2	Weathering of Soil Minerals	167
6:3	Soil Formation: Building a Matrix for Living Organisms	169
6:4	Soil-Forming Factors	170
6:5	Landforms and Soil Development	178
6:6	Morphology of Soil Horizons	189
6:7	Diagnostic Horizons	191
6:8	Degradation of Soils	196
6:9	Soil Individuals and Mapping Units	197

6:10	Geographical Information Systems	199
6:11	Global Positioning Systems	200
	<i>Questions</i>	202
	<i>For Further Study</i>	203

7

Soil Taxonomy 204

7:1	Preview and Important Facts	204
7:2	U.S. System of Soil Taxonomy	207
7:3	Constructing Taxonomic Names	210
7:4	Soil Moisture and Temperature Regimes	211
7:5	Additional Terminology for Family Groupings	215
7:6	Distribution of Soil Orders	216
7:7	Soil Order: Gelisols (Soils with Permafrost)	217
7:8	Soil Order: Histosols (Organic Soils)	217
7:9	Soil Order: Entisols (Soils with Little or no Horizon Development)	219
7:10	Soil Order: Inceptisols (Soils with Weak Horizon Development)	221
7:11	Soil Order: Andisols (Young Volcanic Soils)	222
7:12	Soil Order: Aridisols (Desert Soils)	223
7:13	Soil Order: Mollisols (Prairie Soils)	225
7:14	Soil Order: Vertisols (Shrink-Swell Clays)	226
7:15	Soil Order: Alfisols (Fertile Soils with Subsoil Clay)	229
7:16	Soil Order: Spodosols (Soils with Humus under Sand)	231
7:17	Soil Order: Ultisols (Highly Leached Soils with Subsoil Clay)	233
7:18	Soil Order: Oxisols (Highly Oxidized Soils)	234
7:19	Other Soil Classification Systems	237
	<i>Questions</i>	238
	<i>For Further Study</i>	238

8

Acidic Soils 239

8:1	Preview and Important Facts	239
8:2	Why Some Soils Are Acidic	240
8:3	Ecological Relation of Soil Acidity	242
8:4	Composition of Lime	242
8:5	Reactions of Lime Added to Acidic Soils	246
8:6	Crops, Lime, and Soil	247
8:7	Acidifying Soils	252
	<i>Questions</i>	253
	<i>For Further Study</i>	253

9

Salt-Affected Soils 254

9:1	Preview and Important Facts	254
9:2	Soluble Salts and Plant Growth	255
9:3	Saline and Sodic Soils	261
9:4	The Salt Problem and Salt Balance	265
9:5	Reclaiming Salty Soils	266
9:6	Managing Salty Soils	271
9:7	What Makes Plants Salt Tolerant?	274
9:8	Monitoring Salts in the Field	275
	<i>Questions</i>	276
	<i>For Further Study</i>	277

Plant Nutrients: Nitrogen, Phosphorus, and Potassium 278

- 10:1 Preview and Important Facts 278
- 10:2 Essential Elements 279
- 10:3 Mechanisms of Nutrient Uptake 280
- 10:4 Soil Nitrogen Gains and Transformations 281
- 10:5 Nitrogen Losses from the System 288
- 10:6 Nitrogen Balance 291
- 10:7 Materials Supplying Nitrogen 292
- 10:8 Soil Phosphorus 296
- 10:9 The Phosphorus Problem 297
- 10:10 Managing Soil Phosphorus 302
- 10:11 Materials Supplying Phosphorus 304
- 10:12 Soil Potassium 305
- Questions* 309
- For Further Study* 310

Calcium, Magnesium, Sulfur, and Micronutrients 311

- 11:1 Preview and Important Facts 311
- 11:2 Soil Calcium 312
- 11:3 Soil Magnesium 313
- 11:4 Soil Sulfur 314
- 11:5 Soil Micronutrients 318
- 11:6 Soil Boron 318
- 11:7 Soil Iron 320
- 11:8 Soil Zinc 324
- 11:9 Soil Manganese 326
- 11:10 Soil Copper 327
- 11:11 Soil Molybdenum 328
- 11:12 Soil Chloride 329
- 11:13 Beneficial Elements 330
- Questions* 330
- For Further Study* 331

Soil Fertility Management 332

- 12:1 Preview and Important Facts 332
- 12:2 Goals and Concerns in Fertility Management 333
- 12:3 Soil Sampling 334
- 12:4 Soil Tests and Recommendations 338
- 12:5 Analysis of Plants 344
- 12:6 Fertilizer Recommendations 349
- 12:7 Fertilizer Guarantee (Grade) 353
- 12:8 Fertilizer Calculations 356
- 12:9 Techniques of Fertilizer Application 358
- 12:10 Fertilizer Efficiency 367
- 12:11 Livestock Manure as Fertilizer 371
- 12:12 Precision Agriculture 374
- Questions* 381
- For Further Study* 381

13

***Tillage Systems and Alternatives* 382**

- 13:1 Preview and Important Facts 382
- 13:2 Purposes for Tillage 383
- 13:3 Tillage Terminology 388
- 13:4 Understanding Tillage Alternatives 392
- 13:5 Tillage and Environmental Sustainability 399
- 13:6 Which Tillage System Is Best? 402
 - Questions* 404
 - For Further Study* 405

14

***Soil Erosion* 406**

- 14:1 Preview and Important Facts 406
- 14:2 The Soil Erosion Problem 408
- 14:3 Nature of Water Erosion 411
- 14:4 Factors Affecting Erosion by Water 415
- 14:5 Erosion Tolerance 419
- 14:6 Water Erosion Control 420
- 14:7 Nature of Wind Erosion 428
- 14:8 Factors Affecting Erosion by Wind 429
- 14:9 Wind-Erosion Control 431
 - Questions* 434
 - For Further Study* 435

15

***Water Resources and Irrigation* 437**

- 15:1 Preview and Important Facts 437
- 15:2 Water Resources for Irrigation 439
- 15:3 Irrigation Water Quality 444
- 15:4 Meeting Water Needs of Plants 449
- 15:5 Methods of Applying Water 454
- 15:6 Special Irrigation Techniques 466
- 15:7 Irrigating Efficiently 468
- 15:8 Increasing Water Supplies 469
 - Questions* 471
 - For Further Study* 471

16

***Wetlands and Land Drainage* 473**

- 16:1 Preview and Important Facts 473
- 16:2 Wetlands Trends and Laws 474
- 16:3 Wetlands Characteristics 476
- 16:4 Functions of Wetlands 479
- 16:5 Drainage to Improve Soil Conditions 481
- 16:6 Drainage Pros and Cons 482
- 16:7 Drainage System Selection 484
- 16:8 Surface Drainage Systems 485
- 16:9 Subsurface Drainage Systems 489
 - Questions* 493
 - For Further Study* 494

17

***Pollution of Soil, Water, and Air* 495**

- 17:1** Preview and Important Facts 495
- 17:2** Threats to the Environment 496
- 17:3** Pollution Terminology 498
- 17:4** Plant Nutrients 499
- 17:5** Organic Wastes 503
- 17:6** Pesticides 509
- 17:7** Heavy Metals 512
- 17:8** Natural Toxins 514
- 17:9** Particulates and Gases 515
- 17:10** Radionuclides 520
- 17:11** Soluble Salts 521
- 17:12** Soil Sediments as Pollutants 522
- Questions* 525
- For Further Study* 525

18

***Toward Environmental Integrity* 527**

- 18:1** Preview and Important Facts 527
- 18:2** Environmental Laws 529
- 18:3** Best Management Practices 530
- 18:4** Managing Organic Wastes 532
- 18:5** Reducing Pesticide Contamination 534
- 18:6** Improving Air and Water Quality 541
- 18:7** Improving Soil Quality 546
- 18:8** Remediation of Contaminated Soil 550
- Questions* 553
- For Further Study* 554

19

***Soil Surveys and Land-Use Planning* 555**

- 19:1** Preview and Important Facts 555
- 19:2** Conducting a Soil Survey 556
- 19:3** Soil Survey Reports 557
- 19:4** Electronic Databases for Soils 561
- 19:5** Special Soil Designations 561
- 19:6** Land Evaluation 562
- 19:7** Data Interpretations for Soil Uses 568
- 19:8** Controls in Land-Use Planning 574
- Questions* 577
- For Further Study* 578

20

***Greenhouse Soils and Soilless Culture* 579**

- 20:1** Preview and Important Facts 579
- 20:2** Root Media 580
- 20:3** Root Media Mixes 583
- 20:4** Pasteurization of Media 585
- 20:5** Watering 586
- 20:6** Fertilization 587

20:7	Soil and Tissue Testing	589
20:8	Hydroponics: Solution Culture	591
	<i>Questions</i>	596
	<i>For Further Study</i>	596
