

INTERNATIONAL EDITION

McMURRY FAY

Chemistry

FOURTH EDITION

Contents

Preface xv

Supplements xviii

1 Chemistry: Matter and Measurement 1

- 1.1 Approaching Chemistry: Experimentation 2
- 1.2 Chemistry and the Elements 3
- 1.3 Elements and the Periodic Table 4
- 1.4 Some Chemical Properties of the Elements 7
- 1.5 Experimentation and Measurement 10
- 1.6 Measuring Mass 12
- 1.7 Measuring Length 13
- 1.8 Measuring Temperature 13
- 1.9 Derived Units: Measuring Volume 15
- 1.10 Derived Units: Measuring Density 16
- 1.11 Accuracy, Precision, and Significant Figures in Measurement 19
- 1.12 Rounding Numbers 20
- 1.13 Calculations: Converting from One Unit to Another 22

INTERLUDE Chemicals, Toxicity, and Risk 26

Summary • Key Words • Key Concept
Summary • Understanding Key Concepts •
Additional Problems • General Problems •
eMedia Problems

2 Atoms, Molecules, and Ions 37

- 2.1 Conservation of Mass and the Law of Definite Proportions 38

- 2.2 Dalton's Atomic Theory and the Law of Multiple Proportions 39
- 2.3 The Structure of Atoms: Electrons 41
- 2.4 The Structure of Atoms: Protons and Neutrons 43
- 2.5 Atomic Number 45
- 2.6 Atomic Mass 48
- 2.7 Compounds and Mixtures 49
- 2.8 Molecules, Ions, and Chemical Bonds 51
- 2.9 Acids and Bases 55
- 2.10 Naming Chemical Compounds 56

INTERLUDE Are Atoms Real? 64

Summary • Key Words • Key Concept
Summary • Understanding Key Concepts •
Additional Problems • General Problems •
eMedia Problems

3 Formulas, Equations, and Moles 75

- 3.1 Balancing Chemical Equations 76
- 3.2 Chemical Symbols on Different Levels 79
- 3.3 Avogadro's Number and the Mole 80
- 3.4 Stoichiometry: Chemical Arithmetic 83
- 3.5 Yields of Chemical Reactions 86
- 3.6 Reactions with Limiting Amounts of Reactants 88
- 3.7 Concentrations of Reactants in Solution: Molarity 91
- 3.8 Diluting Concentrated Solutions 93
- 3.9 Solution Stoichiometry 94
- 3.10 Titration 95
- 3.11 Percent Composition and Empirical Formulas 97

- 3.12 Determining Empirical Formulas: Elemental Analysis 100
- 3.13 Determining Molecular Masses: Mass Spectrometry 102

INTERLUDE Did Ben Franklin Have Avogadro's Number? A Ballpark Calculation 104

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 eMedia Problems

4 Reactions in Aqueous Solution 115

- 4.1 Some Ways that Chemical Reactions Occur 116
- 4.2 Electrolytes in Aqueous Solution 117
- 4.3 Aqueous Reactions and Net Ionic Equations 119
- 4.4 Precipitation Reactions and Solubility Rules 120
- 4.5 Acids, Bases, and Neutralization Reactions 123
- 4.6 Oxidation–Reduction (Redox) Reactions 125
- 4.7 Identifying Redox Reactions 129
- 4.8 The Activity Series of the Elements 131
- 4.9 Balancing Redox Reactions: The Oxidation-Number Method 134
- 4.10 Balancing Redox Reactions: The Half-Reaction Method 138
- 4.11 Redox Titrations 142
- 4.12 Some Applications of Redox Reactions 144

INTERLUDE Photography: A Series of Redox Reactions 146

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

5 Periodicity and Atomic Structure 159

- 5.1 Development of the Periodic Table 160
- 5.2 Light and the Electromagnetic Spectrum 162
- 5.3 Electromagnetic Radiation and Atomic Spectra 164
- 5.4 Particlelike Properties of Electromagnetic Radiation: The Planck Equation 167
- 5.5 Wavelike Properties of Matter: The de Broglie Equation 169
- 5.6 Quantum Mechanics and the Heisenberg Uncertainty Principle 171
- 5.7 Wave Functions and Quantum Numbers 172
- 5.8 The Shapes of Orbitals 175
- 5.9 Quantum Mechanics and Atomic Spectra 178
- 5.10 Electron Spin and the Pauli Exclusion Principle 180
- 5.11 Orbital Energy Levels in Multielectron Atoms 181
- 5.12 Electron Configurations of Multielectron Atoms 182
- 5.13 Electron Configurations and the Periodic Table 184
- 5.14 Some Anomalous Electron Configurations 187

5.15 Electron Configurations and Periodic Properties: Atomic Radii 188

INTERLUDE The Aurora Borealis: Atomic Spectra on a Grand Scale 190

Summary • Key Words • Key Concept
Summary • Understanding Key Concepts •
Additional Problems • General Problems •
Multi-Concept Problems • eMedia Problems

6 Ionic Bonds and Some Main-Group Chemistry 201

- 6.1 Ions and Their Electron Configurations 202
- 6.2 Ionic Radii 203
- 6.3 Ionization Energy 204
- 6.4 Higher Ionization Energies 207
- 6.5 Electron Affinity 209
- 6.6 Ionic Bonds and the Formation of Ionic Solids 211
- 6.7 The Alkali Metals (Group 1A) 215
- 6.8 The Alkaline Earth Metals (Group 2A) 220
- 6.9 The Group 3A Elements: Aluminum 223
- 6.10 The Halogens (Group 7A) 225
- 6.11 The Noble Gases (Group 8A) 228
- 6.12 The Octet Rule 230

INTERLUDE Salt 232

Summary • Key Words • Key Concept
Summary • Understanding Key Concepts •
Additional Problems • General Problems •
Multi-Concept Problems • eMedia Problems

7 Covalent Bonds and Molecular Structure 243

- 7.1 The Covalent Bond 244
- 7.2 Strengths of Covalent Bonds 245
- 7.3 A Comparison of Ionic and Covalent Compounds 246

- 7.4 Polar Covalent Bonds: Electronegativity 247
- 7.5 Electron-Dot Structures 249
- 7.6 Electron-Dot Structures of Polyatomic Molecules 253
- 7.7 Electron-Dot Structures and Resonance 259
- 7.8 Formal Charges 261
- 7.9 Molecular Shapes: The VSEPR Model 263
- 7.10 Valence Bond Theory 271
- 7.11 Hybridization and sp^3 Hybrid Orbitals 272
- 7.12 Other Kinds of Hybrid Orbitals 274
- 7.13 Molecular Orbital Theory: The Hydrogen Molecule 278
- 7.14 Molecular Orbital Theory: Other Diatomic Molecules 281
- 7.15 Combining Valence Bond Theory and Molecular Orbital Theory 283

INTERLUDE Molecular Shape, Handedness, and Drugs 285

Summary • Key Words • Key Concept
Summary • Understanding Key Concepts •
Additional Problems • General Problems •
Multi-Concept Problems • eMedia Problems

8 Thermochemistry: Chemical Energy 297

- 8.1 Energy 298
- 8.2 Energy Changes and Energy Conservation 299
- 8.3 Internal Energy and State Functions 300
- 8.4 Expansion Work 302
- 8.5 Energy and Enthalpy 305

- 8.6 The Thermodynamic Standard State 306
- 8.7 Enthalpies of Physical and Chemical Change 308
- 8.8 Calorimetry and Heat Capacity 310
- 8.9 Hess's Law 314
- 8.10 Standard Heats of Formation 317
- 8.11 Bond Dissociation Energies 320
- 8.12 Fossil Fuels, Fuel Efficiency, and Heats of Combustion 321
- 8.13 An Introduction to Entropy 323
- 8.14 An Introduction to Free Energy 326

INTERLUDE Energy from Food 330

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

9 Gases: Their Properties and Behavior 341

- 9.1 Gases and Gas Pressure 342
- 9.2 The Gas Laws 346
- 9.3 The Ideal Gas Law 350
- 9.4 Stoichiometric Relationships with Gases 352
- 9.5 Partial Pressure and Dalton's Law 355
- 9.6 The Kinetic-Molecular Theory of Gases 357
- 9.7 Graham's Law: Diffusion and Effusion of Gases 360
- 9.8 The Behavior of Real Gases 362
- 9.9 The Earth's Atmosphere 363

INTERLUDE Inhaled Anesthetics 368

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

10 Liquids, Solids, and Phase Changes 381

- 10.1 Polar Covalent Bonds and Dipole Moments 382
- 10.2 Intermolecular Forces 385
- 10.3 Some Properties of Liquids 391
- 10.4 Phase Changes 392
- 10.5 Evaporation, Vapor Pressure, and Boiling Point 396
- 10.6 Kinds of Solids 400
- 10.7 Probing the Structure of Solids: X-Ray Crystallography 401
- 10.8 Unit Cells and the Packing of Spheres in Crystalline Solids 404
- 10.9 Structures of Some Ionic Solids 409
- 10.10 Structures of Some Covalent Network Solids 411
- 10.11 Phase Diagrams 413

INTERLUDE Liquid Crystals 417

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

11 Solutions and Their Properties 429

- 11.1 Solutions 430
- 11.2 Energy Changes and the Solution Process 430
- 11.3 Units of Concentration 434
- 11.4 Some Factors Affecting Solubility 440
- 11.5 Physical Behavior of Solutions: Colligative Properties 443
- 11.6 Vapor-Pressure Lowering of Solutions: Raoult's Law 444
- 11.7 Boiling-Point Elevation and Freezing-Point Depression of Solutions 450
- 11.8 Osmosis and Osmotic Pressure 453

- 11.9 Some Uses of Colligative Properties 456
 11.10 Fractional Distillation of Liquid Mixtures 457

INTERLUDE Dialysis 461

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

12 Chemical Kinetics 471

- 12.1 Reaction Rates 472
 12.2 Rate Laws and Reaction Order 476
 12.3 Experimental Determination of a Rate Law 478
 12.4 Integrated Rate Law for a First-Order Reaction 482
 12.5 Half-Life of a First-Order Reaction 485
 12.6 Second-Order Reactions 488
 12.7 Zeroth-Order Reactions 491
 12.8 Reaction Mechanisms 492
 12.9 Rate Laws and Reaction Mechanisms 495
 12.10 Reaction Rates and Temperature: The Arrhenius Equation 499
 12.11 Using the Arrhenius Equation 503
 12.12 Catalysis 505
 12.13 Homogeneous and Heterogeneous Catalysts 508

INTERLUDE Explosives 512

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

13 Chemical Equilibrium 527

- 13.1 The Equilibrium State 528
 13.2 The Equilibrium Constant K_c 530
 13.3 The Equilibrium Constant K_p 534
 13.4 Heterogeneous Equilibria 537
 13.5 Using the Equilibrium Constant 539
 13.6 Factors That Alter the Composition of an Equilibrium Mixture 547
 13.7 Altering an Equilibrium Mixture: Changes in Concentration 549
 13.8 Altering an Equilibrium Mixture: Changes in Pressure and Volume 552
 13.9 Altering an Equilibrium Mixture: Changes in Temperature 554
 13.10 The Effect of a Catalyst on Equilibrium 556
 13.11 The Link Between Chemical Equilibrium and Chemical Kinetics 557

INTERLUDE Breathing and Oxygen Transport 560

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

14 Hydrogen, Oxygen, and Water 575

- 14.1 Hydrogen 576
 14.2 Isotopes of Hydrogen 576
 14.3 Preparation and Uses of Hydrogen 578
 14.4 Reactivity of Hydrogen 579
 14.5 Binary Hydrides 580
 14.6 Oxygen 585
 14.7 Preparation and Uses of Oxygen 586

- 14.8 Reactivity of Oxygen 587
- 14.9 Oxides 588
- 14.10 Peroxides and Superoxides 591
- 14.11 Hydrogen Peroxide 593
- 14.12 Ozone 595
- 14.13 Water 596
- 14.14 Reactivity of Water 597
- 14.15 Hydrates 598

INTERLUDE A "Hydrogen Economy" 600

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

15 Aqueous Equilibria: Acids and Bases 611

- 15.1 Acid–Base Concepts: The Brønsted–Lowry Theory 612
- 15.2 Acid Strength and Base Strength 615
- 15.3 Hydrated Protons and Hydronium Ions 618
- 15.4 Dissociation of Water 618
- 15.5 The pH Scale 620
- 15.6 Measuring pH 622
- 15.7 The pH in Solutions of Strong Acids and Strong Bases 623
- 15.8 Equilibria in Solutions of Weak Acids 625
- 15.9 Calculating Equilibrium Concentrations in Solutions of Weak Acids 628
- 15.10 Percent Dissociation in Solutions of Weak Acids 632
- 15.11 Polyprotic Acids 633
- 15.12 Equilibria in Solutions of Weak Bases 635
- 15.13 Relation Between K_a and K_b 637
- 15.14 Acid–Base Properties of Salts 639
- 15.15 Factors That Affect Acid Strength 643
- 15.16 Lewis Acids and Bases 646

INTERLUDE Acid Rain 650

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

16 Applications of Aqueous Equilibria 663

- 16.1 Neutralization Reactions 664
- 16.2 The Common-Ion Effect 667
- 16.3 Buffer Solutions 671
- 16.4 The Henderson–Hasselbalch Equation 675
- 16.5 pH Titration Curves 678
- 16.6 Strong Acid–Strong Base Titrations 679
- 16.7 Weak Acid–Strong Base Titrations 681
- 16.8 Weak Base–Strong Acid Titrations 684
- 16.9 Polyprotic Acid–Strong Base Titrations 685
- 16.10 Solubility Equilibria 688
- 16.11 Measuring K_{sp} and Calculating Solubility from K_{sp} 689
- 16.12 Factors That Affect Solubility 693
- 16.13 Precipitation of Ionic Compounds 700
- 16.14 Separation of Ions by Selective Precipitation 702
- 16.15 Qualitative Analysis 703

INTERLUDE Analyzing Proteins by Electrophoresis 706

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

17 Thermodynamics: Entropy, Free Energy, and Equilibrium 721

- 17.1 Spontaneous Processes 722
- 17.2 Enthalpy, Entropy, and Spontaneous Processes: A Brief Review 723
- 17.3 Entropy and Probability 727
- 17.4 Entropy and Temperature 729
- 17.5 Standard Molar Entropies and Standard Entropies of Reaction 731
- 17.6 Entropy and the Second Law of Thermodynamics 732
- 17.7 Free Energy 735
- 17.8 Standard Free-Energy Changes for Reactions 738
- 17.9 Standard Free Energies of Formation 741
- 17.10 Free-Energy Changes and Composition of the Reaction Mixture 743
- 17.11 Free Energy and Chemical Equilibrium 746

INTERLUDE Some Random Thoughts About Entropy 750

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

18 Electrochemistry 763

- 18.1 Galvanic Cells 764
- 18.2 Shorthand Notation for Galvanic Cells 768
- 18.3 Cell Potentials and Free-Energy Changes for Cell Reactions 770

- 18.4 Standard Reduction Potentials 772
- 18.5 Using Standard Reduction Potentials 775
- 18.6 Cell Potentials and Composition of the Reaction Mixture: The Nernst Equation 778
- 18.7 Electrochemical Determination of pH 781
- 18.8 Standard Cell Potentials and Equilibrium Constants 784
- 18.9 Batteries 786
- 18.10 Corrosion 790
- 18.11 Electrolysis and Electrolytic Cells 792
- 18.12 Commercial Applications of Electrolysis 796
- 18.13 Quantitative Aspects of Electrolysis 799

INTERLUDE Electrochemical Art 802

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

19 The Main-Group Elements 815

- 19.1 A Review of General Properties and Periodic Trends 816
- 19.2 Distinctive Properties of the Second-Row Elements 818
- 19.3 The Group 3A Elements 820
- 19.4 Boron 821
- 19.5 The Group 4A Elements 823
- 19.6 Carbon 824
- 19.7 Silicon 827
- 19.8 Germanium, Tin, and Lead 832
- 19.9 The Group 5A Elements 833
- 19.10 Nitrogen 834
- 19.11 Phosphorus 838
- 19.12 The Group 6A Elements 843
- 19.13 Sulfur 844
- 19.14 The Halogens: Oxoacids and Oxoacid Salts 848

INTERLUDE Photocopiers 851

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

20 Transition Elements and Coordination Chemistry 863

- 20.1 Electron Configurations 864
- 20.2 Properties of Transition Elements 867
- 20.3 Oxidation States of Transition Elements 870
- 20.4 Chemistry of Selected Transition Elements 871
- 20.5 Coordination Compounds 876
- 20.6 Ligands 878
- 20.7 Naming Coordination Compounds 881
- 20.8 Isomers 884
- 20.9 Enantiomers and Molecular Handedness 890
- 20.10 Color of Transition Metal Complexes 893
- 20.11 Bonding in Complexes: Valence Bond
Theory 894
- 20.12 Crystal Field Theory 897

INTERLUDE Titanium: A High-Tech Metal 903

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

21 Metals and Solid-State Materials 915

- 21.1 Sources of the Metallic Elements 916
- 21.2 Metallurgy 918
- 21.3 Iron and Steel 921
- 21.4 Bonding in Metals 923
- 21.5 Semiconductors 927
- 21.6 Superconductors 930
- 21.7 Ceramics 933
- 21.8 Composites 936

INTERLUDE Diamonds and Diamond Films 938

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

22 Nuclear Chemistry 949

- 22.1 Nuclear Reactions and Their
Characteristics 950
- 22.2 Nuclear Reactions and Radioactivity 951
- 22.3 Radioactive Decay Rates 954
- 22.4 Nuclear Stability 958
- 22.5 Energy Changes During Nuclear Reactions 961
- 22.6 Nuclear Fission and Fusion 965
- 22.7 Nuclear Transmutation 968

- 22.8 Detecting and Measuring Radioactivity 970
- 22.9 Biological Effects of Radiation 972
- 22.10 Applications of Nuclear Chemistry 973

INTERLUDE The Origin of Chemical Elements 977

Summary • Key Words • Key Concept
 Summary • Understanding Key Concepts •
 Additional Problems • General Problems •
 Multi-Concept Problems • eMedia Problems

23 Organic Chemistry 985

- 23.1 The Nature of Organic Molecules 986
- 23.2 Alkanes and Their Isomers 988
- 23.3 Drawing Organic Structures 990
- 23.4 The Shapes of Organic Molecules 991
- 23.5 Naming Alkanes 992
- 23.6 Cycloalkanes 996
- 23.7 Reactions of Alkanes 998
- 23.8 Families of Organic Molecules: Functional Groups 999
- 23.9 Alkenes and Alkynes 1001
- 23.10 Reactions of Alkenes and Alkynes 1003
- 23.11 Aromatic Compounds and Their Reactions 1005
- 23.12 Alcohols, Ethers, and Amines 1007
- 23.13 Aldehydes and Ketones 1010
- 23.14 Carboxylic Acids, Esters, and Amides 1012
- 23.15 Synthetic Polymers 1016

INTERLUDE Natural or Synthetic? 1019

In-text Applications

- | | |
|---|---|
| Applications of redox reactions 144–145 | Corrosion 790–792 |
| Uses of alkali metals 216–217 | Applications of electrolysis 796–799 |
| Uses of alkaline earth metals 221–222 | Toxicity of carbon monoxide 825–826 |
| Uses of halogens 225–226 | Uses of carbon dioxide 826 |
| Energy from fossil fuels 321–322 | Synthetic detergents and eutrophication 842 |
| Automobile air bags 353 | Uses of sulfuric acid 847–848 |
| Uranium-235 enrichment 361–362 | Applications of transition metals 864, 915 |
| Air pollution 364–365 | Applications of chelating agents 880 |
| Acid rain 365 | Metallurgy 918–922 |
| Greenhouse effect 365–366 | Steelmaking 921–923 |
| Ozone depletion 366–367 | Semiconductors 927–929 |
| Glass 413 | Superconductors 930–933 |
| Deep-sea diving 442 | Ceramics 933–935 |
| Desalination of seawater 456 | Composites 936–937 |
| Petroleum distillation 457–459 | Medically useful radioisotopes 955 |
| Catalytic converters 510–511 | Nuclear power 966–968 |
| Production and use of ammonia 547–548 | Biological effects of radiation 972–973 |
| Uses of oxides 590 | Archaeological dating 973–974 |
| Uses of hydrogen peroxide 593 | Medical uses of radioactivity 975–976 |
| Purification of drinking water 596–597 | Magnetic resonance imaging (MRI) 976 |
| Lime and its uses 624 | Margarine from vegetable oils 1004 |
| Limestone caves 695 | Uses of simple alcohols 1008–1009 |
| Fluoride and tooth decay 695 | Amine-containing drugs 1010 |
| Batteries 786–789 | Soap 1014 |
| Fuel cells 789–790 | Polymers 1016–1018 |
