**Elements of  
the p Block**

edited by Charlie Harding,  
Rob Janes and David Johnson

# CONTENTS

## ELEMENTS OF THE p BLOCK

*Charlie Harding, Rob Janes and David Johnson*

<b>1</b>	<b>INTRODUCTION</b>	<b>15</b>
1.1	Group numbers and the Periodic Table	15
<b>2</b>	<b>OXIDATION AND REDUCTION</b>	<b>17</b>
2.1	Oxidation numbers or oxidation states	17
2.2	Balancing redox equations	19
2.3	Summary of Section 2	21
<b>3</b>	<b>DEFINING ACIDS AND BASES</b>	<b>22</b>
3.1	Strengths of acid and bases	22
3.2	The Brønsted–Lowry theory	22
3.3	The pH scale and acid strength	25
3.4	Summary of Section 3	27
<b>4</b>	<b>SOME ASPECTS OF CHEMICAL BONDING</b>	<b>29</b>
4.1	Lewis acids and bases	29
4.2	The strengths of chemical bonds	30
4.3	Bond enthalpy terms and electronegativities	32
4.4	Dipole moments	33
4.5	Intermolecular forces	36
4.6	Summary of Section 4	39
<b>5</b>	<b>THE CHEMISTRY OF HYDROGEN</b>	<b>42</b>
5.1	Preparation and properties of hydrogen	42
5.2	Industrial uses of hydrogen	43
5.3	Hydrogen as a fuel	44
5.4	Atomic and ionic properties of hydrogen	46
5.5	The aqueous hydrogen ion	49
5.6	Summary of Sections 5.1–5.5	50

<b>5.7</b>	<b>The hydrides of the typical elements</b>	<b>50</b>
5.7.1	Salt-like hydrides	51
5.7.2	Macromolecular hydrides	51
5.7.3	Molecular hydrides	52
5.7.4	Trends in structure	52
<b>5.8</b>	<b>Hydrogen-bonding</b>	<b>52</b>
<b>5.9</b>	<b>Summary of Sections 5.7 and 5.8</b>	<b>59</b>
<b>6</b>	<b>GROUP VII/17: HALOGENS AND HALIDES</b>	<b>61</b>
<b>6.1</b>	<b>Industrial uses of the halogens</b>	<b>63</b>
<b>6.2</b>	<b>Properties of halogen atoms</b>	<b>64</b>
<b>6.3</b>	<b>Oxidation number -1: halides</b>	<b>65</b>
6.3.1	The hydrogen halides	66
<b>6.4</b>	<b>Thermodynamics of the halogen-halide relationship</b>	<b>68</b>
6.4.1	Halides and oxidation numbers	70
6.4.2	Oxidizing strength of the halogens in aqueous solution	71
<b>6.5</b>	<b>Summary of Sections 6.1-6.4</b>	<b>72</b>
<b>6.6</b>	<b>Higher oxidation states of the halogens</b>	<b>74</b>
6.6.1	Halogen oxides and oxoacids	77
6.6.2	Interhalogen compounds	80
6.6.3	Polyhalogen ions	81
6.6.4	Summary of Section 6.6	83
<b>7</b>	<b>GROUP VIII/18: THE NOBLE GASES</b>	<b>85</b>
<b>7.1</b>	<b>The discovery of the noble gases</b>	<b>85</b>
<b>7.2</b>	<b>The manufacture and properties of the noble gases</b>	<b>87</b>
<b>7.3</b>	<b>Uses of the noble gases</b>	<b>89</b>
<b>7.4</b>	<b>Summary of Sections 7.1-7.3</b>	<b>90</b>
<b>7.5</b>	<b>Noble gas compounds</b>	<b>91</b>
7.5.1	The fluorides and oxides of xenon and krypton	91
7.5.2	Other xenon compounds	94
7.5.3	Helium, neon and argon chemistry	94
7.5.4	The structure of noble gas compounds	95
7.5.5	The bonding in noble gas compounds	96
7.5.6	Summary of Section 7.5	98

<b>8</b>	<b>GENERAL OBSERVATIONS ON SECOND- AND THIRD-ROW ELEMENTS AND PERIODIC TRENDS</b>	<b>100</b>
8.1	Single and multiple bonds	101
8.2	Third-row elements: a case for expansion of the octet?	102
8.3	Trends in the Periodic Table	104
8.3.1	Trends across the Periods	104
8.3.2	Trends down the Groups	105
8.4	Summary of Section 8	107
<b>9</b>	<b>THE GROUP III/13 ELEMENTS</b>	<b>108</b>
9.1	Boron: occurrence and extraction	109
9.1.1	The boron atom	109
9.1.2	Lewis acidity in the boron halides	109
9.1.3	Boron and the borides	111
9.1.4	The boron hydrides	113
9.1.5	Boron–oxygen compounds	114
9.1.6	Summary of Section 9.1	116
9.2	Aluminium	117
9.2.1	Aqueous chemistry	118
9.2.2	Aluminium sulfate and water treatment	118
9.2.3	Aluminium toxicity	120
9.2.4	Aluminium halides	122
9.2.5	Two observations about aluminium chemistry	123
9.3	Gallium, indium and thallium	123
9.3.1	The inert pair effect	126
9.3.2	Summary of Sections 9.2 and 9.3	127
<b>10</b>	<b>THE GROUP IV/14 ELEMENTS</b>	<b>129</b>
10.1	Structures and properties of the elements	129
10.2	Carbon	132
10.2.1	Carbides — molecular, salt-like and interstitial	137
10.2.2	Oxides of carbon	138
10.2.3	Summary of Section 10.2	141
10.3	Silicon	142
10.3.1	Bonding in silicon compounds	143
10.3.2	Silicon–oxygen compounds	145
10.3.3	Halosilanes	149
10.3.4	Compounds of silicon with hydrogen and alkyl groups	150
10.4	Germanium, tin and lead	153
10.5	Summary of Sections 10.3 and 10.4	154

<b>11 THE GROUP V/15 ELEMENTS</b>	<b>156</b>
<b>11.1 Structures and properties of the elements</b>	<b>156</b>
<b>11.2 Nitrogen</b>	<b>158</b>
11.2.1 Nitrogen hydrides	161
11.2.2 Nitrogen halides	162
11.2.3 Azides	163
11.2.4 Nitrogen–oxygen compounds	163
11.2.5 Summary of Sections 11.1 and 11.2	169
<b>11.3 Phosphorus</b>	<b>170</b>
11.3.1 The chemistry of phosphorus	171
11.3.2 Phosphorus halides	172
11.3.3 Phosphorus hydrides	172
11.3.4 The oxides and sulfides of phosphorus	173
11.3.5 Phosphoric acid	174
11.3.6 Compounds with multiple bonds between phosphorus atoms and from phosphorus to carbon	174
11.3.7 Phosphorus–nitrogen compounds: the polyphosphazenes	175
11.3.8 Summary of Section 11.3	176
<b>11.4 Oxoacids</b>	<b>177</b>
11.4.1 Oxoacid formulae	179
11.4.2 Nomenclature of oxoacids	180
11.4.3 Prediction of formulae	180
11.4.4 Strengths of oxoacids	181
11.4.5 Condensation of oxoacids	183
<b>11.5 Arsenic, antimony and bismuth</b>	<b>188</b>
<b>11.6 Summary of Sections 11.4 and 11.5</b>	<b>189</b>
<b>12 THE GROUP VI/16 ELEMENTS</b>	<b>190</b>
<b>12.1 Structures and properties of the elements</b>	<b>190</b>
<b>12.2 Oxygen</b>	<b>195</b>
12.2.1 Peroxides	196
12.2.2 Oxides and the Periodic Table	197
12.2.3 Summary of Section 12.2	197
<b>12.3 Sulfur</b>	<b>198</b>
12.3.1 Sulfur hydrides (sulfanes)	198
12.3.2 Sulfides	199
12.3.3 Sulfur halides	199
12.3.4 Oxides of sulfur	201
12.3.5 Oxoacids of sulfur	202
12.3.6 Sulfur–carbon and sulfur–nitrogen compounds	204

<b>12.4 Selenium, tellurium and polonium</b>	<b>206</b>
<b>12.5 Summary of Sections 12.3 and 12.4</b>	<b>209</b>

<b>13 THE TYPICAL ELEMENTS: A SUMMARY OF TRENDS IN THE PERIODIC TABLE</b>	<b>210</b>
---	------------

<b>13.1 Trends across the Periods</b>	<b>210</b>
13.1.1 Metals, semi-metals and non-metals	210
13.1.2 The structures of halides, hydrides and oxides	211
13.1.3 Trends in the formulae of oxides and hydrides	212
13.1.4 Acid–base properties of oxides and hydrides	213
<b>13.2 Trends down the Groups</b>	<b>213</b>
13.2.1 Metals, semi-metals and non-metals	213
13.2.2 Structure and bonding in halides and oxides	214
13.2.3 Acid–base properties of oxides	216
13.2.4 Special differences between the second and subsequent Periods	216
13.2.5 The inert pair effect	217

<b>LEARNING OUTCOMES</b>	<b>219</b>

# **CASE STUDY: ACID RAIN: SULFUR AND POWER GENERATION**

*Andrew Galwey*

<b>1</b>	<b>POLLUTION AND THE ENVIRONMENT</b>	<b>245</b>
<b>2</b>	<b>ACID RAIN AND SULFUR RELEASE INTO THE ATMOSPHERE</b>	<b>246</b>
2.1	Coal: the most abundant fossil fuel	248
2.2	Sulfur in oil can be extracted before use	248
2.3	Other energy sources	249
2.4	Acid rain	250
<b>3</b>	<b>CHEMICAL CHARACTERISTICS OF COAL</b>	<b>251</b>
<b>4</b>	<b>SULFUR IN COAL</b>	<b>253</b>
4.1	Sulfur content of coals	253
4.2	Sulfur removal before combustion	253
4.3	Sulfur removal after combustion	254
<b>5</b>	<b>REACTIONS OF SULFUR DIOXIDE IN THE ATMOSPHERE</b>	<b>255</b>
5.1	Homogeneous oxidation in the gas phase	255
5.2	Homogeneous oxidation in liquid water	256
5.3	Heterogeneous oxidation catalysed by dust particles	256
5.4	Sulfate present in the atmosphere	256
<b>6</b>	<b>EFFECTS OF ACID RAIN IN SOILS AND GROUNDWATER</b>	<b>257</b>
6.1	Soils: structure and composition	258
6.2	Groundwater	259
<b>7</b>	<b>EFFECTS OF ACID RAIN ON NATURAL ENVIRONMENTAL SYSTEMS</b>	<b>261</b>
7.1	History of pH changes in lakes in Scotland	261
7.2	Acid rain and forest damage	263
7.3	Lake acidification and freshwater fish	264
7.4	Acid rain in the human environment	265

<b>8</b>	<b>CLEANING PROCESSES IN POWER STATIONS</b>	<b>266</b>
8.1	Electrostatic precipitation (ESP)	267
8.2	Flue gas desulfurization (FGD)	268
8.3	Other methods of sulfur removal	268
<b>9</b>	<b>ACID RAIN IN CONTEXT</b>	<b>270</b>
	<b>ACKNOWLEDGEMENTS</b>	<b>272</b>

# CASE STUDY: INDUSTRIAL INORGANIC CHEMISTRY

*Alan Heaton and Rob Janes*

<b>1</b>	<b>INTRODUCTION</b>	<b>275</b>
<b>2</b>	<b>HEAVY INORGANIC CHEMICALS</b>	<b>276</b>
<b>2.1</b>	<b>Sources of industrial inorganic chemicals</b>	<b>276</b>
2.1.1	Ores	276
2.1.2	Air	276
2.1.3	Water	277
2.1.4	Elements	278
<b>2.2</b>	<b>The production of selected heavy inorganic chemicals</b>	<b>279</b>
2.2.1	Sulfuric acid	282
2.2.2	Phosphoric acid	282
2.2.3	Ammonia, nitric acid and nitrates	283
2.2.4	The chlor-alkali industry	285
2.2.5	The inorganic fluorine industry	287
<b>3</b>	<b>SPECIALITY INORGANIC CHEMICALS</b>	<b>290</b>
<b>3.1</b>	<b>Inorganic chemicals in electronics</b>	<b>290</b>
<b>3.2</b>	<b>Inorganic chemicals in medicine</b>	<b>291</b>
<b>3.3</b>	<b>Inorganic chemicals as colours</b>	<b>292</b>
<b>4</b>	<b>SUMMARY</b>	<b>293</b>
<b>5</b>	<b>FURTHER READING</b>	<b>293</b>
	<b>ACKNOWLEDGEMENTS</b>	<b>294</b>
	<b>INDEX</b>	<b>295</b>
	<b>CD-ROM INFORMATION</b>	<b>306</b>
