

Elementary Number Theory, Group Theory, and Ramanujan Graphs

Giuliana Davidoff
Peter Sarnak
Alain Valette

London Mathematical Society
Student Texts **55**

Contents

<i>Preface</i>	<i>page ix</i>
An Overview	1
Chapter 1. Graph Theory	8
1.1. The Adjacency Matrix and Its Spectrum	8
1.2. Inequalities on the Spectral Gap	12
1.3. Asymptotic Behavior of Eigenvalues in Families of Expanders	18
1.4. Proof of the Asymptotic Behavior	20
1.5. Independence Number and Chromatic Number	30
1.6. Large Girth and Large Chromatic Number	32
1.7. Notes on Chapter 1	36
Chapter 2. Number Theory	38
2.1. Introduction	38
2.2. Sums of Two Squares	39
2.3. Quadratic Reciprocity	48
2.4. Sums of Four Squares	52
2.5. Quaternions	57
2.6. The Arithmetic of Integer Quaternions	59
2.7. Notes on Chapter 2	70
Chapter 3. $\text{PSL}_2(q)$	72
3.1. Some Finite Groups	72
3.2. Simplicity	73
3.3. Structure of Subgroups	76
3.4. Representation Theory of Finite Groups	85
3.5. Degrees of Representations of $\text{PSL}_2(q)$	102
3.6. Notes on Chapter 3	107

Chapter 4. The Graphs $X^{p,q}$	108
4.1. Cayley Graphs	108
4.2. Construction of $X^{p,q}$	112
4.3. Girth and Connectedness	115
4.4. Spectral Estimates	122
4.5. Notes on Chapter 4	130
Appendix 4. Regular Graphs with Large Girth	132
<i>Bibliography</i>	138
<i>Index</i>	143
