

ArcView GIS

DEVELOPER'S GUIDE

Programming with Avenue™

4TH EDITION

Amir H. Razavi

Extend the Power of ArcView!

CONTENTS

| | |
|--|-------------|
| INTRODUCTION | xiii |
| CHAPTER 1: STRUCTURED APPLICATION DEVELOPMENT | 1 |
| Requirement Study | 2 |
| First Faire Bank's Requirements | 3 |
| The First Faire Bank Proposal | 4 |
| Prototyping | 4 |
| Prototyping the First Faire Bank Requirements | 5 |
| The Prototype Design | 6 |
| Construction | 6 |
| Construction and ArcView GIS | 7 |
| Construction of the First Faire Bank Application | 8 |
| Structured Testing | 9 |
| Levels of Structured Software Testing | 9 |
| Structured Testing of the First Faire Bank Application .. | 9 |
| Further Reading | 10 |
| CHAPTER 2: AVENUE FUNDAMENTALS | 11 |
| Avenue Building Blocks | 11 |
| Objects | 11 |
| Classes | 12 |
| Requests | 12 |
| Avenue Characteristics | 13 |
| Encapsulation | 13 |
| Polymorphism | 14 |
| Inheritance | 14 |

| | |
|---|----|
| Interaction Between Building Blocks | 15 |
| Creating and Accessing | 15 |
| Making a Request. | 17 |
| Avenue Statements. | 21 |
| ArcView GIS's Object Model | 21 |
| Multiplicity | 23 |
| Aggregation | 24 |
| Generalization | 25 |
| Creating a Script. | 26 |
| Using the ArcView GIS Script Editor | 26 |
| Using a System Editor | 27 |
| Where To Start. | 28 |
| Accessing System Scripts | 29 |
| Script Testing | 29 |
| Script Compiling | 29 |
| Running Your Script | 31 |
| Fixing Run-time Errors | 32 |
| Walking through the Code | 33 |

CHAPTER 3: AVENUE PROGRAMMING LANGUAGE 35

| | |
|---|----|
| Programming Elements | 35 |
| Referencing Objects with Variables | 35 |
| Using Object Tags | 37 |
| Variable Data Types | 38 |
| Statements. | 45 |
| Controlling Program Flow | 45 |
| Documenting with Comment Lines | 50 |
| Using Collections | 50 |
| Using Lists. | 51 |
| Using Dictionaries | 51 |
| Object Model for Collections | 52 |
| Using Stacks | 53 |
| Using Name Dictionaries. | 53 |
| Using Intervals and Durations. | 54 |
| Using Bitmaps | 55 |
| Interaction between Programs | 58 |
| Calling Other Programs | 59 |
| Passing Objects between Programs. | 60 |
| Accessing Files | 62 |
| The FileName Object | 63 |
| Creating, Opening, and Closing a File | 64 |
| Reading and Writing a File | 66 |

| | |
|--|-----------|
| User Dialog | 67 |
| Displaying Information, Warnings, and Errors | 68 |
| Getting an Input | 68 |
| Getting a File Name | 70 |
| Application Framework | 71 |
| Finding a Document | 73 |
| Arranging Document Windows and Icons | 74 |
| Displaying a Help Message | 74 |
| Displaying the Status Bar | 76 |
| CHAPTER 4: CUSTOMIZING THE INTERFACE | 79 |
| What Can Be Customized | 80 |
| Menu Bar | 81 |
| Button Bar | 82 |
| Tool Bar | 82 |
| Pop-up Set | 82 |
| Project Window | 83 |
| Control Properties | 83 |
| Event Programming | 85 |
| Checking for a Condition | 86 |
| Checking for Active Objects | 87 |
| Object Model for Control Bar | 88 |
| Creating a Menu System | 89 |
| Object Model for the Menu System | 90 |
| Adding and Organizing Menu Options and Items | 92 |
| Executing a Task Through a Menu | 94 |
| Disabling and Hiding a Menu Item | 95 |
| Assigning Access and Shortcut Keys | 96 |
| Creating Buttons | 98 |
| Object Model for Buttons | 99 |
| Adding and Organizing Buttons | 100 |
| Loading a New Icon | 101 |
| Executing a Task Through a Button | 102 |
| Disabling and Hiding Buttons | 103 |
| Adding a Help Line to Buttons | 104 |
| Creating Tool Buttons | 106 |
| Adding and Organizing Tool Buttons | 107 |
| Executing a Task Sequence Through a Tool | 109 |
| Associating a Cursor Shape to a Tool | 110 |
| Disabling and Hiding a Tool | 111 |
| Adding a Help Line to Tools | 112 |

| | |
|---|------------|
| Creating Pop-up Menus | 113 |
| Customizing the Project Window | 114 |
| Start-up and Shutdown Scripts | 116 |
| Saving the Customized Interface | 117 |
| CHAPTER 5: TUTORIAL | 119 |
| Development Overview | 119 |
| The Menu Items | 120 |
| Development Stages | 120 |
| Guide.Select-State Script | 127 |
| Guide.Update-Chart Script | 128 |
| Guide.View-Chart Script | 129 |
| Guide.Print Script | 129 |
| Guide.New-Layout Script | 131 |
| Testing the Application | 132 |
| CHAPTER 6: PROGRAMMING VIEW DOCUMENTS | 133 |
| Application Overview | 133 |
| View Document | 134 |
| Creating a New View | 136 |
| Displaying a View Document | 136 |
| Setting View Properties | 137 |
| Setting the Display Extent | 137 |
| Graphical Elements | 138 |
| Graphics List | 141 |
| Drawing Graphical Elements | 142 |
| CHAPTER 7: PROGRAMMING THEMES | 145 |
| Adding and Displaying Themes | 145 |
| Data Source | 147 |
| Legends | 150 |
| Copying | 151 |
| Using Queries | 151 |
| Selecting Features | 152 |
| Point Selection | 152 |
| Line Selection | 154 |
| Box Selection | 154 |
| Polygon Selection | 154 |
| CHAPTER 8: PROGRAMMING TABLE DOCUMENTS | 155 |
| Assigning Polygons to Territories | 155 |
| Table Document | 160 |

| | |
|---|------------|
| Creating a Table | 160 |
| Displaying a Table | 161 |
| Setting Table Properties | 162 |
| Joining Tables | 163 |
| Sorting and Summarizing Records | 164 |
| Printing Tables | 166 |
| | |
| CHAPTER 9: ACCESSING AND EDITING DATABASES | 169 |
| Creating File-based Database Objects | 169 |
| Reading Records and Fields | 174 |
| Editing Records | 176 |
| Accessing an SQL Database | 177 |
| Using ArcStorm | 179 |
| | |
| CHAPTER 10: PROGRAMMING CHART DOCUMENTS | 183 |
| Scripts for Creating Charts | 183 |
| Chart Document | 186 |
| Creating a Chart | 186 |
| Setting Chart Type and Style | 188 |
| Setting Chart Properties | 191 |
| Working with Data Elements | 193 |
| Accessing Records | 194 |
| Accessing Fields | 195 |
| Identifying Records | 195 |
| Finding Records by Matching Strings | 195 |
| Printing Charts | 196 |
| | |
| CHAPTER 11: PROGRAMMING LAYOUT DOCUMENTS | 197 |
| Layout Document Script | 198 |
| Layout Documents | 204 |
| Creating a Layout | 204 |
| Layout Window | 205 |
| Setting Layout Properties | 206 |
| Using the Graphic List | 208 |
| Framing a View Document | 210 |
| Adding a Scale Bar | 212 |
| Adding Legends | 213 |
| Adding a North Arrow | 214 |
| Framing a Table or Chart Document | 214 |
| Framing a Picture | 215 |
| Using Templates | 217 |
| Printing the Layout | 218 |

| | |
|--|------------|
| CHAPTER 12: USING DIALOG DESIGNER | 221 |
| Search-and-Replace Application | 221 |
| Creating a Dialog Window | 227 |
| Programming Controls | 228 |
| | |
| CHAPTER 13: APPLICATION INSTALLATION | 231 |
| Protecting Your Scripts | 231 |
| Distributing Objects | 234 |
| Single-user Installation | 235 |
| Network Installation | 237 |
| Creating Extensions | 238 |
| Locator Application | 239 |
| Install and Uninstall Scripts | 242 |
| Build Script | 243 |
| Other Scripts | 245 |
| | |
| CHAPTER 14: ADDRESS MATCHING | 247 |
| Geocoding with ArcView GIS | 247 |
| Making a Theme Matchable | 248 |
| Adding Address Events | 250 |
| Creating a Geocoded Theme | 250 |
| Processing Unmatched Events | 250 |
| Geocoding with Avenue | 251 |
| Event Tables and Theme Matching | 251 |
| Object Model for Address Matching | 256 |
| Making a Theme Matchable | 257 |
| Selecting a Theme | 257 |
| Selecting an Address Style | 258 |
| Associating Attribute Fields | 259 |
| Creating a MatchSource Object | 262 |
| Creating a Geocoded Theme | 263 |
| Retrieving the Match Source | 263 |
| Selecting the Event Table | 264 |
| Initializing a GeoName | 265 |
| Matching Addresses | 265 |
| Creating the Geocoded Theme | 268 |
| | |
| CHAPTER 15: PROGRAMMING SPATIAL ANALYST | 269 |
| Spatial Analyst Classes | 269 |
| Grid | 269 |
| GTheme | 270 |
| GLegExt | 270 |

| | |
|------------------------------------|-----|
| Loading Spatial Analyst | 270 |
| Displaying a Grid Theme | 271 |
| Giving the Display Depth | 272 |
| Displaying a Histogram | 274 |
| Calculating Slopes | 275 |

CHAPTER 16: INTEGRATION 277

| | |
|--|-----|
| Accessing the Clipboard | 278 |
| Accessing the Operating System | 280 |
| Accessing Environment Variables. | 280 |
| Issuing Operating System Commands | 281 |
| Executing AMLs. | 281 |
| Implementing Dynamic Data Exchange | 281 |
| ArcView GIS as DDE Client. | 282 |
| ArcView GIS as DDE Server | 283 |
| Implementing Remote Procedure Call | 284 |
| ArcView GIS as RPC Client | 285 |
| ArcView GIS as RPC Server | 286 |
| Using Dynamic Link Libraries | 287 |
| Using Apple Scripts | 288 |

CHAPTER 17: SAMPLE APPLICATION. 291

| | |
|---------------------------------|-----|
| Data Query Application. | 291 |
| DQ.SelectMapSheet | 292 |
| DQ.EstablishView | 294 |
| DQ.LoadMapSheet | 297 |
| DQ.UpdateGridIndex | 299 |
| DQ.RemoveMapSheet. | 301 |
| DQ.GridTurnOff | 303 |
| DQ.GridTurnOn | 304 |
| DQ.DeleteDoc | 305 |

CHAPTER 18: PROGRAMMING NETWORK ANALYST. 307

| | |
|--|-----|
| Network Analyst Classes. | 307 |
| NetDef | 307 |
| Network | 308 |
| Writing Network Applications. | 308 |
| Specifying a Line Theme | 309 |
| Specifying a Cost Field | 309 |
| Specifying Network Locations | 309 |
| Solving a Network Problem | 310 |
| Displaying Results | 310 |

| | |
|--|------------|
| Routing Application | 310 |
| Closest Facility Application | 315 |
| Service Area Application | 319 |
| APPENDIX A: AVENUE CLASS HIERARCHY | 325 |
| APPENDIX B: AVENUE RESERVED WORDS | 341 |
| APPENDIX C: CHANGES FROM VERSION 2.1 | 345 |
| APPENDIX D: AVENUE PROGRAMMING GUIDELINES | 349 |
| Script Name | 349 |
| Header | 350 |
| Comment Line | 350 |
| Variable Name | 351 |
| Alignment | 352 |
| File Name | 352 |
| Reserved Words | 353 |
| APPENDIX E: AN OVERVIEW OF ARCVIEW 8.1 | 355 |
| Should You Migrate to ArcView 8.1? | 355 |
| What Is ArcView 8.1? | 356 |
| What Is Different in ArcView 8.1? | 356 |
| What Are ArcObjects? | 357 |
| INDEX | 361 |
