

Spray Drift Management

Principles, Strategies and Supporting Information

PRIMARY INDUSTRIES STANDING COMMITTEE

Contents

| | |
|---|-------------|
| Preface | viii |
| 1. Principles and strategies | 1 |
| Introduction | 1 |
| 1.1. Property management planning | 1 |
| Preparation of a property management plan | 2 |
| Development of awareness zones | 2 |
| 1.2. Establishment of buffer zones | 4 |
| In-crop buffer strips | 4 |
| Vegetative barriers | 5 |
| Fallow buffer strips | 5 |
| 1.3. Communication | 6 |
| Who, when and how? | 6 |
| 1.4. Safe practices and personal protective equipment | 6 |
| Safe practices | 7 |
| Personal protective equipment (PPE) | 7 |
| Chemical risk reduction | 8 |
| Establishing chemical details | 8 |
| Maintaining equipment | 9 |
| 1.5. Weather | 9 |
| Wind speed and direction | 10 |
| Temperature and humidity | 11 |
| Atmospheric stability | 12 |
| 1.6. Spray application technology | 13 |
| Droplet size | 13 |
| Release height | 14 |
| Spray pressure | 14 |
| Hand-held application | 15 |
| Orchard spraying | 15 |
| Aerial application | 16 |
| 1.7. Training | 17 |
| Training and licensing | 17 |
| 1.8. Record-keeping | 17 |
| Record-keeping | 18 |
| 2. Supporting information | 19 |
| 2.1. Property management planning | 19 |
| 2.1.1. Crop planning | 19 |
| 2.1.2. Integrated pest management | 19 |

| | |
|--|-----------|
| 2.1.3. Chemical selection | 19 |
| 2.1.4. Preparation of property plans | 19 |
| 2.1.5. Awareness zones | 20 |
| 2.2. Establishment of buffer zones | 20 |
| 2.2.1. Fallow and in-crop buffer strips | 20 |
| 2.2.2. Field splitting | 21 |
| 2.2.3. Vegetative buffers | 22 |
| 2.2.4. Regional protection (wide vegetative buffer strips) | 22 |
| 2.2.5. Local protection (narrow vegetative filter barriers) | 23 |
| 2.2.6. Vegetative buffer design | 24 |
| 2.2.7. Case study, QDNR guidelines | 27 |
| 2.3. Communication | 28 |
| 2.3.1. Neighbours | 28 |
| 2.3.2. Community groups | 28 |
| 2.3.3. Methods | 28 |
| 2.4. Safe practices and personal protective equipment | 28 |
| 2.4.1. Safe practices | 28 |
| 2.4.2. Personal protective equipment (PPE) | 29 |
| 2.4.3. Material Safety Data Sheets (MSDS) | 29 |
| 2.4.4. Product labels | 29 |
| 2.4.5. Maintenance | 30 |
| 2.4.6. Calibration | 30 |
| 2.5. Weather | 31 |
| 2.5.1. Wind direction | 31 |
| 2.5.2. Wind speed | 31 |
| 2.5.3. Temperature | 32 |
| 2.5.4. Humidity | 32 |
| 2.5.5. Evaporation | 33 |
| 2.5.6. Stability | 33 |
| 2.5.7. Stable conditions | 34 |
| 2.5.8. Unstable conditions | 34 |
| 2.5.9. Neutral conditions | 35 |
| 2.5.10. Temperature inversion | 35 |
| 2.6. Spray application technology | 35 |
| 2.6.1. Droplet generation | 35 |
| 2.6.2. Droplet size | 36 |
| 2.6.3. Droplet transport | 40 |
| 2.6.4. Turbulence | 41 |
| 2.6.5. Droplet impaction | 43 |
| 2.6.6. Ground (boom sprayer) application | 44 |
| 2.6.7. Orchard spraying | 47 |
| 2.6.8. Aerial spraying | 48 |
| 2.6.9. Wingtip vortices and boom length | 49 |
| 2.6.10. Droplet size | 50 |

| | |
|--|-----------|
| 2.6.11. Effect of airspeed | 51 |
| 2.6.12. Field studies | 52 |
| 2.6.13. Spray drift management | 53 |
| 2.6.14. Ultra low volume (ULV) spraying | 53 |
| 2.6.15. Large droplet placement (LDP) spraying | 54 |
| 2.6.16. Helicopters | 55 |
| 2.6.17. Computer spray drift predictions | 55 |
| 2.6.18. Summary of drift mitigation studies – key points | 57 |
| 2.7. Training | 58 |
| 2.8. Record-keeping | 59 |
| 3. Operational planning | 60 |
| 3.1. Developing an operational plan | 60 |
| 4. List of references | 64 |
| Acronyms and abbreviations | 70 |
