Intelligent Transportation Primer

Institute of Transportation Engineers

U.S. Department of Transportation
Federal Highway Administration

ITS America

Contents

Acknowledgments xiii

Chapter 1: Introduction 1–1

- *Transportation challenges and solutions* 1–1
- *Definition and concepts of ITS* 1–9
- *Issues associated with ITS* 1–12

Chapter 2: History of ITS and Highway Operations 2–1

- *Precedents to intelligent transportation systems* 2–1
- *How ITS started* 2–5
- *Lessons learned—comparison with earlier efforts* 2–11

Chapter 3: ITS Systems, Applications and Programs 3–1

- *Introduction* 3–1
- *Describing ITS applications* 3–1
- *ITS programs and initiatives* 3–3

Chapter 4: Transportation Management 4–1

- *Objectives of transportation management* 4–1
- *Core functions of transportation management* 4–2
- *Traffic signal systems* 4–3
- *FMSs* 4–9
- *Conclusion* 4–17
- *For more information* 4–17

Chapter 5: Advanced Traveler Information Systems 5–1

- *What are advanced traveler information systems?* 5–1
- *What are the objectives of ATIS?* 5–1
- *Technology platforms for delivering traveler information* 5–3
- *The business of ATIS* 5–8
- *ATIS in Europe and Japan* 5–9
- *User response to ATIS* 5–12
- *Conclusion* 5–13

Chapter 6: The Role of ITS in the Emergency Management and Emergency Services Community 6–1

- *Introduction* 6–1
- *Emergency management and emergency services* 6–1
- *Conclusion* 6–3

Chapter 7: Public Transit and ITS 7–1

- *Background* 7–1
- *Architecture and functionality* 7–2
- *In-vehicle system components* 7–3
- *Geographic information systems* 7–8
- *Passenger information systems* 7–8
- *Electronic fare payment systems* 7–9
- *Standards and interoperability* 7–10
- *Other system opportunities* 7–11
- *Implementation* 7–12
- *Benefits* 7–15

Chapter 8: Electronic Toll and Traffic Management 8–1

- *Introduction* 8–1
- *Toll basics* 8–3
- *AVI* 8–3
- *Other applications* 8–6
- *Toll and vehicle classification* 8–7
- *Enforcement* 8–9
- *Nonreal-time processing* 8–10
- *Interoperability* 8–11

Chapter 9: Commercial Vehicle Operations and Freight Movement 9–1

- *Introduction* 9–1
- *Freight movement—the shipper's and consignee's perspective* 9–5
- *Carrier operations* 9–8
- *Vehicle operation* 9–13
- *Safety assurance* 9–20
- *Credentials administration* 9–24
- *Electronic screening* 9–28

- *CVISN* 9–32
- *Discussion questions* 9–37

Chapter 10: The Role of ITS Technologies in Travel Demand Management 10–1

- *What is TDM?* 10–1
- *A brief history of TDM* 10–1
- *TDM effectiveness— conclusions from U.S. experience* 10–2
- *Factors influencing solo commuting* 10–3
- *Applying ITS technologies to TDM* 10–4

Chapter 11: Advanced Vehicle Control Systems 11–1

- *Background* 11–1
- *Lessons learned from the AHS program* 11–5
- *The future* 11–15

Chapter 12: Weather Information for Effective Transportation Decision-Making 12–1

- *Weather information for effective decisions* 12–1
- *Effective weather information—targeted on the decision-maker* 12–2
- *Characteristics of weather information* 12–3
- *The institutional framework* 12–6
- *Conclusion* 12–7

Chapter 13: Advanced Rural Transportation Systems 13–1

- *Background* 13–1
- *Vision for rural ITS* 13–1
- *CPAs* 13–3
- *Rural transportation needs and issues* 13–4
- *Examples of existing ARTS programs* 13–10
- *Regional planning* 13–12
- *Considerations and recommendations* 13–14
- *Summary* 13–15

Chapter 14: ITS Subsystems and Technologies

Managing Traffic, Vehicles and Systems 14–1

- *Advanced traffic sensors and surveillance systems* 14–1
- *Traffic sensors and detectors* 14–2
- *Weigh-in-motion sensors and systems* 14–8
- *CCTV and VIP* 14–10
- *Advanced vehicle location and navigation technologies* 14–12
- *Positioning systems* 14–13
- *Maps* 14–14
- *Map-matching* 14–15
- *Path-finding (or route-finding) and route guidance* 14–15
- *Information dissemination and display technologies* 14–15
- *DMS* 14–16
- *Technologies for delivering pretrip and en-route traveler information* 14–17
- *Electronic payment technologies: smart cards* 14–18
- *Electronic toll collection systems* 14–19

Chapter 15: Vehicle-Based Technologies 15–1

- *Sensing other vehicles* 15–1
- *Sensing obstacles* 15–7
- *Sensing lane position* 15–10
- *Absolute position and motion measurement* 15–14
- *Predicting braking performance* 15–17
- *Reliability* 15–19
- *Emerging technologies* 15–20
- *Comments* 15–23

Chapter 16: Transit Technologies 16–1

- *Purpose of intelligent transportation systems* 16–1
- *How ITS can improve transit* 16–1
- *Transit management basics* 16–1
- *Problems addressed by transit ITS* 16–2
- *Electronic fare payment* 16–3
- *Technologies and applications* 16–4
- *Fleet operation and management* 16–4
- *Architecture and standards* 16–11

- *Transit vehicle subsystems* 16–18
- *Summary of benefits* 16–26

Chapter 17: Telecommunications Technologies 17–1
- *The role of telecommunications in intelligent transportation systems* 17–1
- *Multimedia networking* 17–2
- *The telecommunications industry in the United States* 17–2
- *Underlying telecommunications carrier infrastructure* 17–4
- *An overview of telecommunications technologies for ITS* 17–8
- *Telecommunications: A total life cycle methodology* 17–20
- *ITS telecommunications and resource sharing* 17–23

Chapter 18: Information Technologies 18–1
- *Information systems and our changing world* 18–1
- *Information system concepts* 18–3
- *Overview of the system development cycle* 18–4
- *Traditional system development life cycle methodology* 18–8
- *Organizational readiness and experience* 18–10
- *Quality software development* 18–12
- *Technology future* 18–17

Chapter 19: Issues in Developing and Implementing the National ITS Architecture 19–1
- *Background* 19–1
- *The system architecture concept* 19–1
- *The traditional approach to surface transportation* 19–2
- *The national architecture program* 19–4
- *The national ITS architecture program* 19–5
- *The national architecture* 19–7
- *Major policy concerns or issues* 19–12
- *Applying the architecture* 19–13
- *Post-architecture actions* 19–15
- *Architecture documentation* 19–16

Chapter 20: An Introduction to Standards for ITS 20–1
- *Background—an introduction to standards* 20–1
- *ITS standards-making* 20–8

- *International ITS standards* 20–14
- *Challenges for the future* 20–17
- *Conclusion* 20–20

Chapter 21: Deploying ITS 21–1
- *Introduction* 21–1
- *The development life cycle* 21–2
- *The real world—comments and lessons learned* 21–10
- *Summary comments on ITS deployment* 21–12

Chapter 22: Evaluation of ITS Services 22–1
- *Introduction* 22–1
- *Available literature in ITS evaluation* 22–2
- *Evaluation framework* 22–3
- *Potential issues in performing the ITS evaluation* 22–8
- *A case study: evaluation of CHART incident response program* 22–9
- *Closure* 22–13

Chapter 23: ITS and Legal Issues—A Primer 23–1
- *Introduction* 23–1
- *Tort liability* 23–1
- *Antitrust* 23–3
- *Procurement* 23–4
- *Intellectual property* 23–5
- *Privacy and data protection* 23–6
- *Shared resource projects for telecommunications* 23–8
- *Innovative finance* 23–9

Chapter 24: The Institutional Challenge: An Aggressive View 24–1
- *Introduction: institutions as an issue* 24–1
- *Institutional challenges in mainstreaming ITS* 24–5

Chapter 25: Societal Issues in ITS 25–1
- *Introduction* 25–1
- *Defining societal issues* 25–2

- *Society—transportation interactions and the role of ITS* 25–4
- *Opportunities and challenges* 25–10

Chapter 26: ITS and the Planning Process 26–1
- *Introduction* 26–1
- *Transportation planning and decision-making: expanding the boundaries* 26–2
- *The challenge: ITS and O&M versus traditional transportation improvements* 26–3
- *The changing context of planning and decision-making towards mainstreaming ITS and O&M* 26–5
- *Evolving framework for the planning and decision-making process, and ITS and O&M* 26–10
- *Developing a regional structure for integrated decision-making: institutional and organizational issues* 26–16
- *Technical functions in integrating ITS and transportation planning* 26–20
- *Connections to traditional planning requirements for analysis and documentation* 26–46
- *Remaining challenges and initial actions toward integrated planning* 26–50

Chapter 27: Environmental Issues 27–1
- *Introduction: transportation and environmental sustainability* 27–1
- *ITS and sustainable communities* 27–5
- *Toward sustainable ITS deployment* 27–12
- *Summary and conclusions* 27–16

Appendix A: User Services A–1

Appendix B: Glossary B–1

Appendix C: Acronyms C–1
