

**BIOLOGICAL SYSTEMATICS**  
**PRINCIPLES AND APPLICATIONS**

---

**Randall T. Schuh**

# CONTENTS

Preface	vii
Acknowledgments	ix
<b>Section I: BACKGROUND FOR THE STUDY OF SYSTEMATICS</b>	
Chapter 1 Introduction to Systematics	3
Chapter 2 Nomenclature	29
Chapter 3 Systematics and the Philosophy of Science	44
<b>Section II: CLADISTIC METHODS</b>	
Chapter 4 Homology and Rooting	63
Chapter 5 Character Analysis and Selection of Taxa	89
Chapter 6 Quantitative Cladistic Methods	111
Chapter 7 Evaluating Results	146
<b>Section III: APPLICATION OF CLADISTIC RESULTS</b>	
Chapter 8 Formal Classifications and Systematic Databases	165
Chapter 9 Historical Biogeography and Host–Parasite Co-evolution	179
Chapter 10 Ecology, Adaptation, and Evolutionary Scenarios	199
Chapter 11 Biodiversity and Conservation	209
Glossary	217
Subject Index	227
Author Index	234
Selecting and Acquiring Software
