Preface to the Instructor xv
Preface to the Student xxv

Part One Nutrition: A Key to Health 1

1 What You Eat and Why 1

Chapter Objectives 2
Refresh Your Memory 2
Real Life Scenario 2
Nutrition Connection 3
Nutrition and Your Health 3
 What Actually Is Nutrition? 3
 Nutrients Come from Food 3
 Why Study Nutrition? 4
Classes and Sources of Nutrients 5
 Carbohydrates 7
 Lipids 8
 Proteins 8
 Vitamins 9
 Minerals 9
 Water 9
Nutrient Composition of Diets and the Human Body 10
Energy Sources and Uses 10
Current State of the North American Diet and Overall Health 12

Nutrition Insight *Math Tools for Nutrition* 13
 Assessing the Current North American Diet 14
Health Objectives for the United States for the Year 2010
Include Numerous Nutrition Objectives 14
 Improving Overall Health 14
Why Am I So Hungry? 15
 The Hypothalamus Contributes to Satiety Regulation 17
 Meal Size and Composition Affect Satiety 17
 Hormones Affect Satiety 17
 Does Appetite Affect What We Eat? 17
 Putting Hunger and Appetite into Perspective 18
Improving Our Diets 19
Summary 21
Study Questions 21
Further Readings 21
Rate Your Plate 23
Nutrition Issue *Using Scientific Research to Determine Nutrient Needs* 24

2 Tools for Designing a Healthy Diet 31

Chapter Objectives 32
Refresh Your Memory 32
Real Life Scenario 32
Nutrition Connection 33
A Food Philosophy that Works 33
 Variety Contributes to Diet Adequacy 34
 Balance Means Not Overconsuming Any One Food 34
 Moderation Refers Mostly to Portion Size 34
 Nutrient Density Can Also Help Guide Food Choice 35
 Energy (kcal) Density Influences Energy Intake 36
States of Nutritional Health 39
 Desirable Nutrition 39
 Undernutrition 39
 Overnutrition 40

How Could Your Nutritional State Be Measured? 40
<i>Analyzing Background Factors</i> 40
<i>Evaluating the ABCDEs</i> 41
<i>Recognizing the Limitations of Nutritional Assessment</i> 41
Recommendations for Food Choices 43
<i>The Food Guide Pyramid—A Menu-Planning Tool</i> 43
<i>Dietary Guidelines—Another Tool for Menu Planning</i> 49
Nutrition Insight <i>The Alphabet Soup of Specific Nutrient Needs</i> 50
Scenario Follow-Up 54
What Do Food Labels Have to Offer Diet Planning? 55
<i>Exceptions to Food Labeling</i> 55
<i>Health Claims on Food Labels</i> 56
Epilogue 60
Summary 60
Study Questions 61
Further Readings 61
Rate Your Plate 62
Nutrition Issue <i>Ethnic Influences on the North American Diet</i> 64

3 The Human Body: A Nutrition Perspective 71

Chapter Objectives 72
Refresh Your Memory 72
Real Life Scenario 72

Nutrition Connection 73
Human Physiology 73
The Cell: Structure and Function 74
<i>Cell (Plasma) Membrane</i> 74
<i>Cytoplasm</i> 76
<i>Mitochondria</i> 76
<i>Cell Nucleus</i> 76
<i>Endoplasmic Reticulum (ER)</i> 76
<i>Golgi Complex</i> 77
<i>Lysosomes</i> 77
<i>Peroxisomes</i> 77
Organization of the Body 77
Nutrition Insight <i>Genetics and Nutrition</i> 78
<i>Circulatory System: Cardiovascular System and Lymphatic System</i> 81
<i>Nervous System</i> 84
<i>Endocrine System</i> 85
<i>Immune System</i> 86
<i>Digestive System</i> 88
<i>Urinary System</i> 99
<i>Storage Capabilities</i> 99
Summary 100
Study Questions 100
Further Readings 101
Rate Your Plate 102
Nutrition Issue <i>When the Digestive Processes Go Awry</i> 104
Scenario Follow-Up 106

Part Two The Energy-Yielding Nutrients and Alcohol 109

4 Carbohydrates 109

Chapter Objectives 110
Refresh Your Memory 110
Real Life Scenario 110
Nutrition Connection 111
Carbohydrates—An Introduction 111

Forms of Simple Carbohydrates 111
<i>Monosaccharides—Glucose, Fructose, and Galactose</i> 112
<i>Disaccharides—Sucrose, Lactose, and Maltose</i> 113
Forms of the More Complex Carbohydrates 113
Nutrition Insight <i>Dietary Fiber: An Often Underappreciated Class of Carbohydrates</i> 115
Carbohydrates in Foods 117
<i>A Closer Look at Sweeteners</i> 118
Making Carbohydrates Available for Body Use 122
<i>Digestion of Starches and Disaccharides</i> 122
<i>Absorption of Monosaccharides</i> 124
Putting Simple Carbohydrates to Work in the Body 125
<i>Yielding Energy</i> 125
<i>Sparing Protein from Use as an Energy Source and Preventing Ketosis</i> 125
<i>Flavoring and Sweetening Foods</i> 127
Recommended Carbohydrate Intakes 128
<i>How Much Dietary Fiber Do We Need?</i> 128
<i>Problems with High-Fiber Diets</i> 128

Moderating Intake of Simple Sugars Is Important for Many of Us 130

Problems with High-Sugar Diets 132

Moderation in Lactose Intake Is Important for Some People 135

Scenario Follow-Up 136

Summary 136

Study Questions 137

Nutrition Issue *When Blood Glucose Regulation Fails* 139

5 Lipids 143

Chapter Objectives 144

Refresh Your Memory 144

Real Life Scenario 144

Nutrition Connection 145

Lipids: Common Properties and Main Types 145

Fatty Acids: The Simplest Form of Lipids 147

Triglycerides 149

Phospholipids 149

Sterols 149

Fats and Oils in Foods 150

Nutrition Insight *Fat Replacement Strategies for Foods* 152

Hidden Fat 152

Wide Use of Reduced-Fat Foods 153

Making Lipids Available for Body Use 154

Digestion 154

Absorption 156

Carrying Lipids in the Bloodstream 156

Carrying Dietary Fats Utilizes Chylomicrons 156

Transporting Lipids Mostly Made by the Body Uses Other Lipoproteins 157

Functions of Lipids 159

Essential Fatty Acids 159

Effects of a Deficiency of Essential Fatty Acids 160

Broader Roles for Fatty Acids and Triglycerides 161

Providing Energy for the Body 161

Storing Energy for Later Use 161

Insulating and Protecting the Body 162

Transporting Fat-Soluble Vitamins 162

Phospholipids in the Body 162

Cholesterol in the Body 163

Exploring Another Dimension of Fat—Properties in Foods 164

Fat in Food Provides Flavor, Some Satiety, and Texture 164

Hydrogenation of Fatty Acids Aids in Food Formulation but Increases Trans Fatty Acid Content 164

Fat Rancidity Limits Shelf Life of Foods 166

Emulsifiers Improve Many Food Products 167

Recommendations for Fat Intake 168

Scenario Follow-Up 172

Summary 174

9 Water and Minerals 289

Chapter Objectives 290
 Refresh Your Memory 290
 Real Life Scenario 290
 Nutrition Connection 291

Water 291
Water in the Body—Intracellular and Extracellular Fluid 291
Water Contributes to Temperature Regulation 292
Water Helps Remove Waste Products 292
Other Functions of Water 293
How Much Water Do We Need? 293
Thirst 294
Water Safety: How Safe Is the Water We Consume? 295

Minerals—An Overview 297
Mineral Bioavailability 297
Fiber-Mineral Interactions 298
Mineral-Mineral Interactions 298
Vitamin-Mineral Interactions 298
Mineral Toxicities 298

Major Minerals 299
 Sodium (Na) 299
Sodium in Foods and Needs 299
 Potassium (K) 302

Potassium in Foods and Needs 303

Chloride (Cl) 304
Chloride in Foods and Needs 304

Nutrition Insight *Minerals and Hypertension* 305

Calcium (Ca) 308
Functions of Calcium 308
Calcium in Foods and Needs 309
Calcium Supplements 310

Scenario Follow-Up 312*

Phosphorus (P) 312
Phosphorus in Foods and Needs 312

Magnesium (Mg) 313
Magnesium in Foods and Needs 313

Sulfur (S) 314

Trace Minerals—An Overview 315

Iron (Fe) 315
Absorption and Distribution of Iron 315
Functions of Iron 317
Iron in Foods and Needs 318
Toxicity of Iron 319

Zinc (Zn) 321
Functions of Zinc 321
Zinc in Foods and Needs 321

Selenium (Se) 323
Selenium in Foods and Needs 323

Iodine (I) 324
Function of Iodide 324
Iodide in Foods and Needs 325

Copper (Cu) 325
Copper in Foods and Needs 325

Fluoride (F) 326
Functions of Fluoride 326
Fluoride in Foods and Needs 326

Chromium (Cr) 327
Chromium in Foods and Needs 327

Manganese (Mn) 328
 Molybdenum (Mo) 328
 Other Trace Minerals 328
