

Animal Sciences

Fourth Edition

The Biology, Care, and Production of Domestic Animals

One-week-old embryo (~80 cells) magnified ~300X

Campbell • Kenealy • Campbell

CHAPTER 1

Animal Agriculture 1

- 1.1 History and Development of Animal Agriculture 1
- 1.2 Domestication of Animals 2
- 1.3 History of Agricultural Education and Research 3
- 1.4 Animal Agriculture and the World Economy 4
- 1.5 Animal Agriculture and the United States Economy 14
- 1.6 Summary 17

CHAPTER 2

Breeds and Life Cycles of Livestock and Poultry 20

- 2.1 Introduction 20
- 2.2 Development of Breeds 20
- 2.3 Breeds of Livestock and Poultry 24
- 2.4 Beef Life Cycle 31
- 2.5 Dairy Life Cycle 34
- 2.6 Goat Life Cycle 36
- 2.7 Sheep Life Cycle 38
- 2.8 Swine Life Cycle 41
- 2.9 Poultry Life Cycle 43
- 2.10 Summary 46

CHAPTER 3

Animal Products 48

- 3.1 History of Availability and Consumption of Animal Products 48
- 3.2 Composition and Comparative Nutritional Contributions of Selected Animal Products 50
- 3.3 Purchasing Food Nutrients via Animal Products 57
- 3.4 Trends in Per Capita Consumption of Animal Products 57
- 3.5 Atherosclerosis 60
- 3.6 Fortification of Animal Products 61
- 3.7 Preservation of Animal Products 63
- 3.8 Antibiotics and Antibiotic Resistance in the Production of Foods from Animals 70

- 3.9 Grading Animal Products 72
- 3.10 The Future of Animal Products 74
- 3.11 Summary 77

CHAPTER 4

Companion Animals 80

- 4.1 Introduction 80
- 4.2 History and Domestication of Dogs and Cats 82
- 4.3 Breeds and Characteristics of Companion Animals 83
- 4.4 Contributions of Companion Animals to Humans 85
- 4.5 Therapeutic Uses of Companion Animals 86
- 4.6 Human-Companion Animal Bonding 88
- 4.7 Companion Animal Behavior 89
- 4.8 Care and Training of Companion Animals 89
- 4.9 Feeding and Managing Companion Animals 90
- 4.10 Health and Disease Aspects of Companion Animals 92
- 4.11 Career Opportunities Associated with Companion Animals 93
- 4.12 Summary 94

CHAPTER 5

Horses 96

- 5.1 Introduction 96
- 5.2 Characteristics and Types of Horses 97
- 5.3 Selection of Horses 101
- 5.4 Care and Management of Breeding Horses 101
- 5.5 Nutrition of Horses 106
- 5.6 Training and Grooming Horses 108
- 5.7 Common Defects and Unsoundness in Horses 109
- 5.8 Determining the Age of Horses 112
- 5.9 Disease and Parasite Control Aspects of Horses 112
- 5.10 Summary 118

CHAPTER 6

Aquaculture 120

- 6.1 Introduction 120
- 6.2 Aquaculture Defined 121
- 6.3 History of Aquaculture 121

| | |
|---|-----|
| 6.4 Current Trends in Global Fish Consumption | 123 |
| 6.5 Characteristics of Fish | 123 |
| 6.6 Water Quality | 126 |
| 6.7 Production Methods | 126 |
| 6.8 Aquaculture Production Cycles | 128 |
| 6.9 Aquaculture, the Environment, and Animal Well-Being | 129 |
| 6.10 Marketing | 129 |
| 6.11 Processing of Aquaculture Products | 129 |
| 6.12 Summary | 129 |

CHAPTER 7

State of Being of Domestic Animals 131

| | |
|--|-----|
| 7.1 Introduction | 131 |
| 7.2 Origins of the Debate | 132 |
| 7.3 Scientific Assessment of the State of Being of Agricultural Animals | 134 |
| 7.4 Scientific Assessment of the Current Status of Animal State of Being | 137 |
| 7.5 Summary | 139 |

CHAPTER 8

Fundamental Principles of Genetics 141

| | |
|---|-----|
| 8.1 Introduction | 141 |
| 8.2 The Cell Theory of Inheritance | 141 |
| 8.3 Chromosomal Abnormalities | 143 |
| 8.4 Cell Division | 143 |
| 8.5 The Gene and How It Functions | 146 |
| 8.6 Genes and Embryological Development | 151 |
| 8.7 Biotechnology | 152 |
| 8.8 Segregation and Recombination of Genes | 154 |
| 8.9 Laws of Probability and Animal Breeding | 154 |
| 8.10 Mutations | 155 |
| 8.11 Phenotypic Expression of Genes (Nonadditive) | 155 |
| 8.12 Phenotypic Expression of Genes (Additive) | 157 |
| 8.13 Sex-Linked Inheritance | 157 |
| 8.14 Sex-Influenced Inheritance | 157 |
| 8.15 Sex-Limited Traits | 158 |
| 8.16 Genome Project | 158 |
| 8.17 Summary | 158 |

CHAPTER 9

Principles of Selecting and Mating Farm Animals 162

| | |
|--|-----|
| 9.1 Introduction | 162 |
| 9.2 Phenotypic Variations in Quantitative Traits | 162 |
| 9.3 Statistical Evaluation of Quantitative Traits | 162 |
| 9.4 Frequency of Genes in a Population | 163 |
| 9.5 Causes of Phenotypic Variation | 165 |
| 9.6 Selection | 166 |
| 9.7 Selection for Different Kinds of Gene Action | 166 |
| 9.8 Selection of Superior Breeding Stock | 169 |
| 9.9 Predicting the Amount of Progress Possible through Selection | 171 |
| 9.10 Genetic Correlations | 172 |

| | |
|---|-----|
| 9.11 National Performance Programs | 172 |
| 9.12 National Genetic Evaluation | 173 |
| 9.13 Mating Systems for Livestock Improvement | 173 |
| 9.14 Summary | 177 |

CHAPTER 10

Anatomy and Physiology of Farm Animals 179

| | |
|-----------------------------|-----|
| 10.1 Introduction | 179 |
| 10.2 External Body Parts | 179 |
| 10.3 The Skeletal System | 182 |
| 10.4 The Muscular System | 184 |
| 10.5 The Circulatory System | 186 |
| 10.6 The Digestive System | 190 |
| 10.7 The Respiratory System | 191 |
| 10.8 The Nervous System | 192 |
| 10.9 The Urinary System | 193 |
| 10.10 Summary | 194 |

CHAPTER 11

The Application of Endocrinology to Selected Animals and Humans 196

| | |
|---|-----|
| 11.1 Introduction | 196 |
| 11.2 The Science of Endocrinology | 196 |
| 11.3 Endocrine Glands and Their Secretions | 196 |
| 11.4 The Chemical Nature of Hormones | 197 |
| 11.5 Functions of Hormones | 200 |
| 11.6 Mechanism of Hormone Action | 200 |
| 11.7 Regulation of Hormone Secretion | 201 |
| 11.8 Practical Uses of Natural and Synthetic Hormones | 201 |
| 11.9 Summary | 202 |

CHAPTER 12

The Physiology of Growth and Senescence 203

| | |
|--------------------------------------|-----|
| 12.1 Introduction | 203 |
| 12.2 The Phenomenon of Growth | 203 |
| 12.3 The Cell Is the Unit of Growth | 205 |
| 12.4 Periods of Growth | 206 |
| 12.5 Hormonal Control of Growth | 209 |
| 12.6 Nutrition and Growth | 212 |
| 12.7 Hereditary Mechanisms in Growth | 212 |
| 12.8 Senescence (Aging) | 214 |
| 12.9 Some Hypotheses of Aging | 216 |
| 12.10 Summary | 217 |

CHAPTER 13

Anatomy and Physiology of Reproduction and Related Technologies in Farm Mammals 219

| | |
|---|-----|
| 13.1 Introduction | 219 |
| 13.2 Anatomy of the Mammalian Male Reproductive Tract | 219 |
| 13.3 Anatomy of the Mammalian Female Reproductive Tract | 222 |
| 13.4 Physiology of Reproduction in Farm Mammals | 224 |

- 13.5 Application of Recent Research and Related Technologies in the Physiology of Reproduction 233
- 13.6 Summary 239

CHAPTER 14

Artificial Insemination 241

- 14.1 Nomenclature and Definition 241
- 14.2 History and Development of Artificial Insemination 241
- 14.3 Importance and Implications of Artificial Insemination 243
- 14.4 Semen Collection 245
- 14.5 Evaluation of Semen 247
- 14.6 Extension of Semen 250
- 14.7 Semen Storage 251
- 14.8 Regulations Governing Artificial Insemination in Cattle 253
- 14.9 Artificial Insemination in Cattle 253
- 14.10 Artificial Insemination in Swine 254
- 14.11 Artificial Insemination in Horses 254
- 14.12 Artificial Insemination in Poultry 254
- 14.13 Artificial Insemination in Bees 254
- 14.14 Artificial Insemination in Humans 255
- 14.15 The National Association of Animal Breeders, Inc. 256
- 14.16 The Future of Artificial Insemination 256
- 14.17 Summary 258

CHAPTER 15

Physiology of Lactation 259

- 15.1 Introduction 259
- 15.2 Mammary Gland Defined 259
- 15.3 Anatomy and Architecture of Mammary Glands 260
- 15.4 Growth and Development of Mammary Glands 262
- 15.5 Hormonal Regulation of Lactation 264
- 15.6 How Milk Is Made 267
- 15.7 How Milk Is Discharged (Secreted) 269
- 15.8 The Phenomenon of Milk Letdown 271
- 15.9 Regression (Involution) of the Mammary Gland 273
- 15.10 Factors Affecting Lactation 274
- 15.11 Factors Affecting the Composition of Milk 276
- 15.12 Immunological Aspects of Colostrum 278
- 15.13 Transgenic Animals and Lactation 280
- 15.14 Summary 280

CHAPTER 16

Physiology of Egg Laying 282

- 16.1 Introduction 282
- 16.2 Egg Colors and Shapes 282
- 16.3 The Structure of an Egg 283
- 16.4 Reproduction and Egg Formation 284
- 16.5 Hormonal Regulation of Egg Laying 287
- 16.6 How an Egg is Laid (Oviposition) 289
- 16.7 Factors Affecting Egg Laying 289
- 16.8 Factors Affecting the Composition and Characteristics of Eggs 292
- 16.9 Factors Affecting Egg Size 292

- 16.10 Immunological and Medical Aspects of Eggs 293
- 16.11 Summary 293

CHAPTER 17

Ecology and Environmental Physiology 295

- 17.1 Introduction 295
- 17.2 Heredity and Environment 296
- 17.3 Adaptation to Environment 298
- 17.4 Stress 299
- 17.5 Homeostasis and Homeothermy 299
- 17.6 Temperature Regulation 301
- 17.7 Nutritional Aspects of Environmental Conditions 302
- 17.8 Fever 304
- 17.9 The Thermoneutral Zone 305
- 17.10 Heat Production 305
- 17.11 Heat Dissipation 306
- 17.12 Effects of Climate on Production 311
- 17.13 Summary 311

CHAPTER 18

Principles of Nutrition: Plant and Animal Composition 313

- 18.1 Introduction 313
- 18.2 Composition of Plants and Animals 314
- 18.3 Analysis of Foodstuffs 321
- 18.4 Determination of the Digestibility of Feeds 322
- 18.5 The Energy Content of Foods 323
- 18.6 Feed Additives 324
- 18.7 Summary 326

CHAPTER 19

The Physiology of Digestion in Nutrition 327

- 19.1 Introduction 327
- 19.2 Types and Capacities of Digestive Systems 327
- 19.3 The Process of Digestion 330
- 19.4 Appetite 330
- 19.5 The Prehension of Food 331
- 19.6 The Mastication of Food 331
- 19.7 Enzymes of the Digestive Tract 331
- 19.8 Avian Digestion 332
- 19.9 Absorption of Food Nutrients 332
- 19.10 Factors Affecting the Digestibility of Feeds 333
- 19.11 Efficiency of Food Conversion 334
- 19.12 Factors Affecting the Efficiency of Food Conversion 334
- 19.13 Summary 335

CHAPTER 20

The Nutritional Application of Vitamins to Human and Animal Health 337

- 20.1 Introduction 337
- 20.2 Vitamins Defined 337
- 20.3. The Fat-Soluble Vitamins 337

| | |
|---|-----|
| 20.4 The Water-Soluble Vitamins and Related Compounds | 344 |
| 20.5 Vitamin Assays | 354 |
| 20.6 Expressing Vitamins A and D Quantitatively | 355 |
| 20.7 Supplying Vitamins to Farm Mammals and Poultry | 355 |
| 20.8 Summary | 355 |

CHAPTER 2 1

The Nutritional Contributions of Minerals to Humans and Animals 356

| | |
|---|-----|
| 21.1 Introduction | 356 |
| 21.2 The Macroelements | 356 |
| 21.3 The Microelements (Trace Elements) | 360 |
| 21.4 Summary | 368 |

CHAPTER 2 2

Animal Disease and the Health of Humans 370

| | |
|---|-----|
| 22.1 Introduction | 370 |
| 22.2 Disease and Health | 371 |
| 22.3 Selected Animal Diseases Transmissible to Humans | 375 |
| 22.4 Selected Human Diseases Transmissible to Animals | 390 |
| 22.5 Diseases Transmissible by Animals as Passive Carriers | 391 |
| 22.6 Toxic Plants | 391 |
| 22.7 Governmental Safeguards for Animal and Human Health | 393 |
| 22.8 Protecting United States Livestock from Foreign Diseases | 394 |
| 22.9 Summary | 395 |

CHAPTER 2 3

Selected Insects and Parasites of Significance to Humans and Animals 398

| | |
|---|-----|
| 23.1 Introduction | 398 |
| 23.2 Taxonomy | 399 |
| 23.3 Contributions of Insects to Humans | 400 |

| | |
|---|-----|
| 23.4 Harmful Effects of Insects | 403 |
| 23.5 Selected Arthropods Affecting Domestic Animals and/or Humans | 404 |
| 23.6 Arthropod Control—Essential for Humans | 409 |
| 23.7 Summary | 414 |

CHAPTER 2 4

Ethology and Animal Behavior 416

| | |
|--|-----|
| 24.1 Introduction | 416 |
| 24.2 Causes of Behavioral Responses in Animals | 417 |
| 24.3 Motivation | 419 |
| 24.4 Methods of Animal Communication | 419 |
| 24.5 Orientation Behavior (Navigation or Homing) | 420 |
| 24.6 Categories of Animal Behavior | 421 |
| 24.7 Social Dominance | 428 |
| 24.8 Population Density and Animal Behavior | 429 |
| 24.9 Summary | 429 |

APPENDICES

Appendix A: Common Terms or Names Applied to Selected Farm Animals 431

Appendix B: Convenient Conversion Data 432

Appendix C: Tables of Weights and Measures 433

Appendix D: Agricultural Colleges and Experiment Stations in the United States and Its Territories 434

Appendix E: Alphabetical List of Elements and Symbols 436

Glossary 439

Index 477
