FOREWORD PREFACE		ix xi
1	FUNDAMENTALS OF NUMERICAL ANALYSIS 1.1 Physical problem, mathematical model and its numerical solution 1.2 Laplace equation for out-of-plane displacement of shear plate 1.3 Method of weighted residuals 1.4 Finite element method 1.5 Boundary element method 1.6 Glimpse at scaled boundary finite element method	1 3 6 11 25 39
2	NOVEL COMPUTATIONAL PROCEDURE	51
PÆ	ART I: MODEL PROBLEM: LINE ELEMENT FOR SCALAR WAVE EQUATION	55
3	CONCEPTS OF SCALED BOUNDARY TRANSFORMATION OF GEOMETRY AND SIMILARITY	57
4	WEDGE AND TRUNCATED SEMI-INFINITE WEDGE OF SHEAR PLATE	61
5	SCALED BOUNDARY TRANSFORMATION-BASED	
•	DERIVATION 5.1 Scaled boundary transformation of geometry 5.2 Governing equations in scaled boundary coordinates 5.3 Method of weighted residuals 5.4 Dynamic-stiffness matrix	65 65 69 70 76
6	MECHANICALLY-BASED DERIVATION 6.1 Dynamic-stiffness matrices at similar boundaries	79
	of a medium	81
	6.2 Coefficient matrices 6.3 Assemblage of finite element cell and medium	83 90
	6.4 Analytical limit of finite element cell width	92
7	MODELISATION WITH SINGLE LINE	
	FINITE ELEMENT	99

9 MASS OF WEDGE 10 HIGH-FREQUENCY ASYMPTOTIC EXPANSION FOR DYNAMIC STIFFNESS OF TRUNCATED SEMI-INFINITE WEDGE 119 11 NUMERICAL SOLUTION OF DYNAMIC STIFFNESS, UNIT-IMPULSE RESPONSE AND DISPLACEMENT OF TRUNCATED SEMI-INFINITE WEDGE 11.2 Unit-impulse response 11.2.1 inverse Fourier transformation 11.2.1 inverse Fourier transformation 11.2.2 Time discretisation 12.2 Dynamic stiffness of wedge 12.3 Dynamic stiffness of wedge 12.3 Dynamic stiffness of truncated semi-infinite wedge 13.4 Far-field displacement 14.2 Solution procedures 14.1 Derivations 14.2 Solution procedures 14.3 Properties and advantages 14.4 APPENDIX A: SOLID MODELLING 14.5 PAPPENDIX C: DYNAMIC UNBOUNDED MEDIUM- STRUCTURE INTERACTION 161 APPENDIX D: HISTORICAL NOTE 165 FUNDAMENTAL EQUATIONS 15 FUNDAMENTAL EQUATIONS 15 FUNDAMENTAL EQUATIONS 15 FUNDAMENTAL EQUATIONS 15 FUNDAMENTAL EQUATIONS 171	8	STATICS 8.1 Vanishing body load 8.2 Body load	111 111 113
FOR DYNAMIC STIFFNESS OF TRUNCATED SEMI-INFINITE WEDGE 11 NUMERICAL SOLUTION OF DYNAMIC STIFFNESS, UNIT-IMPULSE RESPONSE AND DISPLACEMENT OF TRUNCATED SEMI-INFINITE WEDGE 11.1 Dynamic stiffness 11.2 Unit-impulse response 11.2.1 Inverse Fourier transformation 11.2.2 Time discretisation 11.3 Displacement 11.3 Displacement 129 12 ANALYTICAL SOLUTION IN FREQUENCY DOMAIN 12.1 Displacement 131 12.2 Dynamic stiffness of wedge 139 12.3 Dynamic stiffness of truncated semi-infinite wedge 139 12.4 Far-field displacement 142 13 IMPLEMENTATION 143 14 CONCLUSIONS 14.1 Derivations 14.2 Solution procedures 14.3 Properties and advantages 147 APPENDIX A: SOLID MODELLING APPENDIX B: HARMONIC MOTION AND FOURIER TRANSFORMATION 153 APPENDIX C: DYNAMIC UNBOUNDED MEDIUM- STRUCTURE INTERACTION 161 APPENDIX D: HISTORICAL NOTE 167 PART II: TWO- AND THREE-DIMENSIONAL ELASTODYNAMICS, STATICS AND DIFFUSION 169	9	MASS OF WEDGE	117

	15.2 Governing equations of elastodynamics in scaled boundary coordinates	174
	15.3 Method of weighted residuals	181
	15.4 Dynamic-stiffness matrix	186
	15.5 Equations for two-dimensional elastodynamics 15.6 Equations for diffusion	189 194
	15.7 Alternative virtual-work derivation	201
16	STATICS 16.1 Vanishing body load 16.2 Unbounded two-dimensional medium	207 209 212
	16.3 Body load 16.4 Certain distributions of body load 16.4.1 Concentrated load	223 226 227
	16.4.2 Load varying as power function of radial coordinate 16.5 Initial stress	229 232
17	MASS MATRIX OF BOUNDED MEDIUM	235
	17.1 Elastodynamics 17.2 Diffusion	235 240
		240
18	HIGH-FREQUENCY ASYMPTOTIC EXPANSION	0.40
	FOR DYNAMIC STIFFNESS OF UNBOUNDED MEDIUM	243
19	NUMERICAL SOLUTION OF DYNAMIC STIFFNESS,	
	UNIT-IMPULSE RESPONSE AND DISPLACEMENT	
	OF UNBOUNDED MEDIUM	251
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness	251
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response 19.2.1 Inverse Fourier transformation 19.2.2 Time discretisation	251 253 253 256
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response 19.2.1 Inverse Fourier transformation	251 253 253
20	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259
20	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260
20	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259
20	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266
20	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268 269 271
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268 269 271 271 277
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268 269 271
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268 269 271 271 277 278 280
	OF UNBOUNDED MEDIUM 19.1 Dynamic stiffness 19.2 Unit-impulse response	251 253 253 256 257 259 260 266 268 269 271 271 277 278

23	EXAMPLES FOR BOUNDED MEDIA 23.1 Edge-cracked orthotropic plate with rotated	289
	material axes under shear	290
	23.2 Edge-cracked bimaterial plate under tension	291
	23.3 Orthotropic bimaterial plate with crack normal to and	
	terminating at interface	293
	23.4 Rotating circular orthotropic plate with central crack	294
	23.5 Central-cracked orthotropic bimaterial plate under tension	296
	23.6 Dynamic stress-intensity factor	297
	23.7 Bimaterial plate with singularity of flux in diffusion	299
	23.8 Surface foundation on half-plane with discontinuous loading	302
24	EXAMPLES FOR UNBOUNDED MEDIA	305
	24.1 Prism foundation embedded in half-space	305
	24.2 Spherical cavity embedded in full space	310
	24.3 In-plane motion of semi-infinite wedge	315
25	ERROR ESTIMATION AND ADAPTIVITY	317
	25.1 Error estimation in numerical analysis	318
	25.2 Stress recovery in finite element method	320
	25.3 Stress recovery in scaled boundary finite element method	323
	25.4 Error estimation in scaled boundary finite element method	325
	25.5 Example for stress recovery and error estimation	328
	25.5.1 Infinite plate with central circular hole under uniaxial tensile stress	328
	25.5.2 Bounded model	329
	25.5.3 Unbounded model	332
	25.6 h-hierarchical adaptivity	335
	25.7 Examples for adaptivity	338
	25.7.1 Plate with two square holes under uniaxial tensile stress	338
	25.7.2 Cylindrical foundation embedded in half-space	340
26	CONCLUDING REMARKS	345
