

# ENVIRONMENTAL HYDROLOGY

SECOND EDITION

Andy D. Ward  
Stanley W. Trimble

FOREWORD BY M.G. WOLMAN

 LEWIS PUBLISHERS

# Contents

<b>Chapter 1</b>	<b>The Hydrologic Cycle, Water Resources, and Society</b>	<b>1</b>
1.1	Introduction	1
1.2	The Hydrologic Cycle	4
1.2.1	Precipitation	5
1.2.2	Evaporation	5
1.2.3	Transpiration	5
1.2.4	Evapotranspiration	5
1.2.5	Infiltration	5
1.2.6	Percolation and Groundwater Recharge	6
1.2.7	Runoff and Overland Flow	6
1.2.8	Interflow	6
1.2.9	Groundwater Flow	6
1.3	Water Supply	6
1.4	The Importance of Hydrology to Society	10
1.5	Data Analysis and Statistics	11
1.5.1	Plotting Data	12
1.5.2	Descriptive Statistics	13
1.5.3	Experimental Error	15
1.5.4	Standard Error	15
1.5.5	Confidence Intervals	16
1.5.6	Probabilities and Distributions	16
1.5.7	Normal Distribution	17
1.5.8	$t$ Distribution	17
1.5.9	Properties of Statistical Procedures	17
1.5.10	Inferential Statistics and Hypothesis Testing	18
1.5.11	Probability Values	18
1.5.12	Statistical Errors	18
1.5.13	Linear Regression	18
1.5.14	The Use and Misuse of Regression Equations	21
1.5.15	Data Transformations	22
1.5.16	Multiple Regression Analysis	22
1.6	Modeling the Hydrologic Cycle	23
1.6.1	Types of Models	24
1.6.2	Advantages and Disadvantages	24
1.6.3	Typical Model Architecture	25
	Problems	26
<b>Chapter 2</b>	<b>Precipitation</b>	<b>29</b>
2.1	Introduction	29
2.1.1	Precipitation Data	32
2.2	Causes of Precipitation	32
2.2.1	Frontal Precipitation	33
2.2.2	Convection	33
2.2.3	Orographic	33
2.3	Precipitation Events	33
2.3.1	Geographical and Seasonal Variations	33
2.3.2	Historic Time Trends	34
2.3.3	Storm Area Patterns	36

2.4	Measurement of Precipitation.....	36
2.4.1	Measurement of Snowfall.....	39
2.4.2	Rain Gages.....	39
2.5	Storm Time Trends.....	41
2.5.1	Time Sequence Patterns.....	42
2.6	Average Precipitation over an Area.....	43
2.6.1	Rainfall Distributions for Short Time Periods.....	44
2.7	Rainfall Frequency Distributions.....	45
2.7.1	St. Louis Frequency Relationship Transferred to the Contiguous U.S.....	47
2.7.2	Regional Frequency–Magnitude Relationships: Seattle, Santa Fe, Chicago, and New Orleans.....	48
2.8	Probability of an Event Occurring.....	50
2.8.1	Seasonality of Storm Probability.....	50
2.8.2	Probable Maximum Precipitation.....	50
2.9	Rainfall Erosivity.....	50
	Problems.....	51
<b>Chapter 3 Infiltration and Soil Water Processes.....</b>		<b>55</b>
3.1	Introduction.....	55
3.2	Soil Water Relationships.....	55
3.3	Infiltration and Soil Water Retention.....	58
3.4	Factors Affecting Water Movement into and through Soils.....	62
3.4.1	Soil Properties.....	65
3.4.2	Soil Condition.....	66
3.5	Soil Water Balance.....	70
3.6	Estimating Infiltration Rates.....	71
3.6.1	Horton Equation.....	71
3.6.2	Green–Ampt Equation.....	71
3.6.3	Physically Based Methods.....	72
3.7	A Perspective on Infiltration Methods.....	73
3.8	Measurement of Soil Properties.....	73
3.8.1	Particle Size Analysis.....	73
3.8.2	Particle Density.....	74
3.8.3	Bulk Density.....	74
3.8.4	Soil Hydraulic Properties.....	75
3.8.5	Soil Water Content.....	75
3.8.6	Soil Suction and Soil Water Release/Retention Characteristics.....	77
3.8.7	Infiltration.....	78
3.8.8	Unsaturated Hydraulic Conductivity.....	79
3.8.9	Saturated Hydraulic Conductivity.....	79
	Problems.....	80
<b>Chapter 4 Evapotranspiration.....</b>		<b>83</b>
4.1	Introduction.....	83
4.2	Evaporation Process.....	83
4.2.1	Fick’s First Law of Diffusion.....	84
4.2.2	Potential Evapotranspiration vs. Actual Evapotranspiration.....	84
4.2.3	Evaporation from Open Water.....	85
4.2.4	Evaporation from Bare Soil.....	85
4.3	Evapotranspiration from Soil and Plants.....	86
4.3.1	Interception.....	86
4.3.2	Transpiration.....	86
4.3.3	Factors that Affect Transpiration Rates.....	87
4.3.4	Transpiration Ratio and Consumptive Use.....	90

4.3.5	Potential Evapotranspiration and Actual Evapotranspiration Concepts and Practices in Agriculture .....	90
4.3.6	Reference Crop Evapotranspiration .....	91
4.4	Measuring Evaporation or Evapotranspiration .....	91
4.4.1	Evaporation Pan .....	92
4.4.2	$E_{tp}$ Gages .....	93
4.4.3	Soil Water Depletion .....	93
4.4.4	Water Balance .....	94
4.4.5	Lysimeters .....	94
4.4.6	Energy Balance and Mass Transfer .....	94
4.5	Weather Data Sources and Preparation .....	95
4.5.1	Saturation Vapor Pressure .....	95
4.5.2	Actual Vapor Pressure .....	96
4.5.3	Vapor Pressure Deficit .....	96
4.5.4	Mean Temperature .....	98
4.5.5	Solar Radiation .....	98
4.5.6	Extrapolating Wind Speed .....	99
4.6	Estimating Evaporation and Evapotranspiration .....	100
4.6.1	Evaporation from Open Water .....	100
4.6.2	Estimating Evapotranspiration .....	101
4.6.3	SCS Blaney-Criddle Method .....	103
4.6.4	Jensen-Haise Alfalfa-Reference Radiation Method .....	106
4.6.5	Thornthwaite Method .....	107
4.6.6	Penman's Method .....	108
4.6.7	Penman-Monteith Combination Method .....	109
4.7	Converting Potential or Reference Crop Evapotranspiration Using Crop Coefficients .....	109
4.7.1	Evapotranspiration and Soil Water Budgets in Space and Time .....	111
4.7.2	Evapotranspiration Management .....	114
	Problems .....	117
<b>Chapter 5</b> Runoff and Subsurface Drainage .....		119
5.1	Introduction .....	119
5.2	Factors Affecting Runoff Processes .....	121
5.2.1	The Horton Overland Flow Model .....	122
5.2.2	The Variable Source Area Concept or Hewlett Model .....	122
5.2.3	Precipitation .....	123
5.3	Watershed Factors that Affect Runoff .....	125
5.3.1	Size .....	125
5.3.2	Topography .....	125
5.3.3	Shape .....	126
5.3.4	Orientation or Aspect .....	127
5.3.5	Geology .....	127
5.3.6	Soil .....	128
5.3.7	Interflow and Baseflow .....	128
5.4	Runoff Characteristics — the Hydrograph .....	129
5.5	Predicting Volume of Stormflow and Total Runoff .....	132
5.6	Prediction of Peak Runoff Rate .....	135
5.6.1	Graphical Peak Discharge Method .....	135
5.6.2	The Rational Equation .....	140
5.6.3	USGS Empirical Regression Models .....	142
5.7	Stormwater Hydrographs .....	147
5.7.1	Unit Hydrograph Methods .....	147
5.7.2	Time-Area Method .....	150
5.7.3	The Kinematic Approach .....	151

5.8	Assessment of Flood Estimation Techniques .....	152
5.9	Agricultural Land Drainage Modifications.....	152
5.9.1	Surface Improvements .....	153
5.9.2	Subsurface Improvements.....	154
5.9.3	Perceptions.....	155
5.10	Determining Subsurface Drainage Flows .....	156
5.11	Flow Duration and Water Yield.....	157
	Problems .....	159
<b>Chapter 6 Stream Processes.....</b>		<b>161</b>
6.1	Introduction .....	161
6.2	Interaction of Streams with the Landscape.....	162
6.2.1	The Influence of Temporal and Spatial Scales on Geomorphology.....	162
6.2.2	Basic Terms and Geomorphic Work .....	163
6.3	Stream Orders .....	165
6.4	Stream Biota.....	167
6.5	Stream Characteristics.....	170
6.5.1	Channel Profile .....	170
6.5.2	Stream Channel Patterns.....	170
6.5.3	Stream Dimensions.....	172
6.5.4	Regional and Stream-Type Curves.....	174
6.6	Stream Stability and Sediment Transport.....	177
6.6.1	The Source of Sediment .....	177
6.6.2	Shear Stresses and Tractive Force.....	177
6.6.3	Sediment Transport.....	178
6.6.4	Bank Stability .....	178
6.7	Meander Migration, Floodplains, and Streamways.....	180
6.8	Stream Classification.....	182
6.8.1	Mountain Stream Morphology Classes.....	183
6.8.2	An Alternative Mountain Stream Classification System .....	187
6.8.3	Rosgen Stream Classification Method .....	187
6.8.4	Using Stream Classification Methods .....	191
6.9	Channel Evolution.....	194
6.9.1	Disturbance .....	194
6.9.2	Evolution Models.....	196
6.10	What to Measure and Why the Measurement Should Be Made.....	197
6.10.1	Site Selection and Reconnaissance at a Watershed Scale .....	198
6.10.2	Drainage Area Determination.....	199
6.10.3	Discharge and Sediment Data.....	199
6.10.4	Channel Properties.....	199
6.10.5	The Elusive Nature of Bankfull (Effective Discharge) Dimensions .....	201
6.10.6	Bed Material Characterization.....	203
	Problems .....	205
<b>Chapter 7 Uniform Open Channel Flow .....</b>		<b>207</b>
7.1	Introduction .....	207
7.2	Flow Velocity and Discharge .....	207
7.2.1	Continuity and Manning's Equation .....	207
7.2.2	Approximation and Estimation Errors .....	211
7.2.3	The Darcy–Weisbach Equation .....	212
7.3	Compound Channels .....	214
7.4	Channel Modifications .....	216
7.4.1	Grassed Waterways.....	218

7.5	Two-Stage Channel Design.....	218
7.5.1	Benefits and Costs of a Two-Stage Ditch .....	221
7.5.2	Sizing a Two-Stage Ditch.....	222
7.5.3	Other Applications.....	222
	Problems.....	224
<b>Chapter 8 Hydraulic Control Structures.....</b>		<b>227</b>
8.1	Introduction.....	227
8.2	Specific Energy and Critical Discharge.....	227
8.3	Weirs, Flumes, and Culverts.....	229
8.4	Bendway Weirs, Vanes, and Barbs .....	235
8.5	Routing Flows through Channels and Rivers.....	236
8.6	Routing Flow through Reservoirs.....	240
8.6.1	Determination of Stage–Storage Relationships .....	242
8.6.2	Detention or Residence Time .....	242
8.6.3	Sediment Storage in Large Reservoirs.....	245
8.6.4	Estimating Sediment Storage in Management Ponds.....	246
8.6.5	Spillways.....	250
	Problems.....	253
<b>Chapter 9 Soil Conservation and Sediment Budgets.....</b>		<b>255</b>
9.1	Introduction.....	255
9.2	Factors Affecting Erosion by Water .....	255
9.2.1	Climate.....	255
9.2.2	Soil.....	256
9.2.3	Vegetation .....	256
9.2.4	Topography .....	256
9.3	Types of Erosion.....	256
9.3.1	Interrill Erosion.....	256
9.3.2	Rill Erosion.....	257
9.3.3	Gully Erosion.....	257
9.3.4	Stream Channel Erosion.....	258
9.4	Estimating Soil Losses.....	259
9.5	The Universal Soil Loss Equation.....	259
9.5.1	Rainfall Erosivity $R$ .....	260
9.5.2	Soil Erodibility $K$ .....	261
9.5.3	Topographic Factor $LS$ .....	262
9.5.4	Cover Management Factor $C$ .....	263
9.5.5	Erosion Control Practice $P$ .....	266
9.6	Soil Loss Tolerance $T$ .....	268
9.7	Applications of the Universal Soil Loss Equation.....	268
9.8	Downstream Sediment Yields .....	269
9.9	Single-Event Sediment Yields.....	270
9.10	Estimating Seasonal $C$ Factors for Agricultural Crops.....	270
9.11	Sediment Budget Concepts.....	272
9.11.1	Introduction.....	272
9.11.2	Sediment Delivery from Slopes .....	273
9.11.3	Sediment in Streams.....	273
9.11.4	The Southern Piedmont.....	273
9.11.5	Hydraulic Mining in California.....	276
9.11.6	The Driftless Area of the Upper Midwest .....	278
9.11.7	Urban Streams .....	285
	Problems.....	289

<b>Chapter 10</b>	<b>Hydrology of Forests, Wetlands, and Cold Climates</b> .....	291
10.1	Introduction .....	291
10.2	How Are Forests Different?.....	292
10.3	Forest Climates — Rain and Snow .....	293
10.3.1	Characteristics of Snow.....	294
10.4	Interception — Rain, Snow, and Fog.....	295
10.4.1	Rain Interception .....	295
10.4.2	Snow Interception.....	296
10.4.3	Fog Drip.....	297
10.5	Energy Balance in Forests.....	297
10.6	Evapotranspiration.....	298
10.7	Snowmelt.....	299
10.7.1	Snowmelt Modeling over a Watershed .....	300
10.7.2	Snow Cover Distribution.....	300
10.7.3	Critical Temperature for Rain–Snow Transition.....	300
10.8	Infiltration.....	301
10.9	Subsurface Flow (Interflow) .....	301
10.10	Surface Runoff .....	303
10.11	Streamflow and Watershed Hydrology.....	304
10.12	Erosion — Sediment Budget.....	308
10.12.1	Sheet-and-Rill Erosion .....	308
10.12.2	Gully Erosion.....	309
10.12.3	Channel Erosion .....	309
10.12.4	Mass Wasting.....	310
10.13	Deforestation, Fires, and Silviculture.....	311
10.13.1	Deforestation Associated with Agriculture .....	311
10.13.2	Deforestation Associated with Silviculture.....	312
10.13.3	Impacts of Deforestation .....	312
10.13.4	Wildfires.....	313
10.14	Rangelands and Grazing .....	313
10.14.1	Introduction.....	313
10.14.2	Upland Slopes.....	313
10.14.3	Stream Channels.....	313
10.15	Wetlands .....	314
10.15.1	Definitions and Importance .....	314
10.15.2	Identification of Wetlands.....	315
	Problems .....	317
<b>Chapter 11</b>	<b>Hydrogeology</b> .....	321
11.1	Introduction .....	321
11.2	Characterization of Groundwater Flow .....	321
11.3	Groundwater Flow Patterns and Stream Interaction .....	327
11.4	Flow to Wells .....	331
11.5	Capture Zones of Wells .....	334
11.6	Fracture Flow .....	336
11.6.1	Fracture Flow in Rock.....	336
11.6.2	Fracture Flow in Unconsolidated Materials.....	337
11.7	Groundwater Vulnerability.....	337
	Problems .....	337
<b>Chapter 12</b>	<b>Human Impacts on the Hydrologic Cycle: Prevention and Treatment Strategies</b> .....	339
12.1	Introduction .....	339

12.2	Human Impacts on Stream Health .....	340
12.2.1	Biological Assessment Methods.....	340
12.3	Urban Impacts.....	342
12.4	Frequency Analysis .....	345
12.5	Flood Forecasting and Management.....	349
12.5.1	Flood Forecasts.....	349
12.5.2	Flood Zones .....	350
12.5.3	Flood Management .....	350
12.5.4	Channel Modification for Flood Mitigation.....	351
12.6	Reducing Runoff from Urban Areas .....	354
12.7	Detention and Retention Ponds .....	358
12.7.1	Using Detention/Retention Ponds to Improve Water Quality .....	359
12.7.2	Sizing Detention Ponds to Improve Water Quality .....	360
12.7.3	Detention Ponds for Channel Stability .....	363
12.8	Wetlands as Water Treatment Systems.....	364
12.8.1	Hydraulics and Treatment Characteristics .....	366
12.8.2	Using Constructed Wetlands to Treat Livestock Wastewater .....	367
12.9	Landfills.....	368
12.9.1	Introduction.....	368
12.9.2	Landfill Processes .....	369
12.9.3	Surface Water Management in Landfills.....	369
12.9.4	Leachate Management in Landfills .....	370
12.9.5	Landfill Water Balance .....	371
12.9.6	Hydrology and Landfills.....	372
<b>Chapter 13</b>	<b>Fundamentals of Remote Sensing and Geographic Information Systems</b> <b>for Hydrologic Applications .....</b>	<b>373</b>
13.1	Introduction .....	373
13.1.1	What Are Remote Sensing and Geographic Information Systems?.....	373
13.1.2	Mapping Science and Engineering Technologies .....	373
13.1.3	Geographic Information Systems.....	373
13.1.4	Remote Sensing .....	374
13.1.5	Photointerpretation.....	374
13.1.6	Photogrammetry.....	375
13.1.7	Surveying .....	376
13.2	Products.....	376
13.2.1	Photographs and Images.....	376
13.2.2	Maps.....	377
13.2.3	Digital Images.....	377
13.3	Parts of the Spectrum and Radiation Characteristics.....	377
13.3.1	Visible, Infrared, and Thermal Infrared .....	378
13.3.2	Radar .....	378
13.3.3	Radiation .....	378
13.3.4	Lambert's Law .....	379
13.3.5	Projected Source Area .....	380
13.3.6	Isotropic Source .....	381
13.3.7	Solid Angle .....	381
13.3.8	Radiance.....	382
13.3.9	Spectral Relative Units .....	382
13.4	Data Types and Databases .....	383
13.4.1	Data Types .....	383
13.4.2	Raster .....	384
13.4.3	Vector .....	384

13.4.4	Attributes.....	384
13.4.5	Databases .....	384
13.4.6	Aerial Photo Databases .....	384
13.4.7	Digital Elevation Model .....	384
13.4.8	Digital Terrain Model, Digital Line Graph, and Other Data.....	384
13.4.9	North American Landscape Characterization .....	385
13.5	Remote Sensing Characteristics of Water .....	385
13.6	Applications .....	385
13.6.1	General Characteristics of Applications.....	385
13.6.2	Planning .....	385
13.6.3	Site Determination.....	386
13.6.4	Management.....	386
13.6.5	Best Management Practices.....	386
13.6.6	Water Resource Applications .....	386
13.6.7	Quantity.....	386
13.6.8	Quality and Nonpoint Sources .....	387
13.6.9	Erosion Studies and Wetlands .....	387
13.6.10	Hazardous Waste.....	387
<b>Chapter 14</b>	<b>Practical Exercises on Conducting and Reporting Hydrologic Studies .....</b>	<b>389</b>
14.1	Introduction .....	389
14.2	Conducting a Hydrologic Study .....	389
14.2.1	Define the Question .....	389
14.2.2	Conduct a Preliminary Investigation .....	389
14.2.3	Undertaking Detailed Planning .....	390
14.2.4	Conducting the Detailed Study .....	390
14.3	Reporting a Hydrologic Study.....	390
14.4	Report Contents.....	391
14.5	General Guidelines for Preparing Exercise Reports .....	393
14.6	Exercise 14.1: Precipitation (see theory in Chapter 2).....	394
14.6.1	Introduction.....	394
14.6.2	Part I. Time Trends.....	394
14.6.3	Part II. Frequency and Magnitude.....	394
14.6.4	Part III. Spatial Distribution.....	395
14.7	Exercise 14.2: Evaporation (see theory in Chapter 4).....	396
14.7.1	Part I. Annual Lake Evaporation (Surrogate for Potential Evapotranspiration) .....	396
14.7.2	Part II. Daily and Monthly Lake Evaporation .....	396
14.7.3	Part III. Estimating Actual Evapotranspiration Rates.....	397
14.8	Exercise 14.3: Runoff (see theory in Chapter 5).....	397
14.8.1	Introduction.....	397
14.9	Exercise 14.4: Flow Duration (see theory in Chapter 5).....	400
14.9.1	Introduction.....	400
14.10	Exercise 14.5: Storm Runoff, Totals, and Peaks (see theory in Chapter 5).....	402
14.11	Exercise 14.6: Erosion and Elementary Sediment Routing (see theory in Chapter 6).....	405
14.12	Exercise 14.7: Streamflow Measurement in the Field (see theory in Chapter 7).....	407
14.12.1	Part I. Gaging Streamflow by Instrument .....	407
14.12.2	Part II. Gaging Streamflow by the Float Method .....	407
14.12.3	Part III. Stream Gaging Exercise .....	407
14.13	Exercise 14.8: Watershed or Drainage Basin Morphology (see theory in Chapter 7).....	407
14.13.1	Introduction.....	407
14.14	Exercise 14.9: The Practical Use of Soil Surveys for Environmental Management.....	411
14.14.1	Introduction.....	411
14.14.2	The Practical Use of Soils Maps for Management.....	411

<b>References</b> .....	413
<b>Appendix A</b> Unit Conversion Factors .....	429
<b>Appendix B</b> Glossary .....	431
<b>Appendix C</b> Precipitation Frequency–Magnitude Information for the United States .....	445
<b>Appendix D</b> Hydrologic Soil Group and Erodibility Factors for the Most Common Soils in Each State.....	453
<b>Appendix E</b> Sources of Data and Images.....	461
