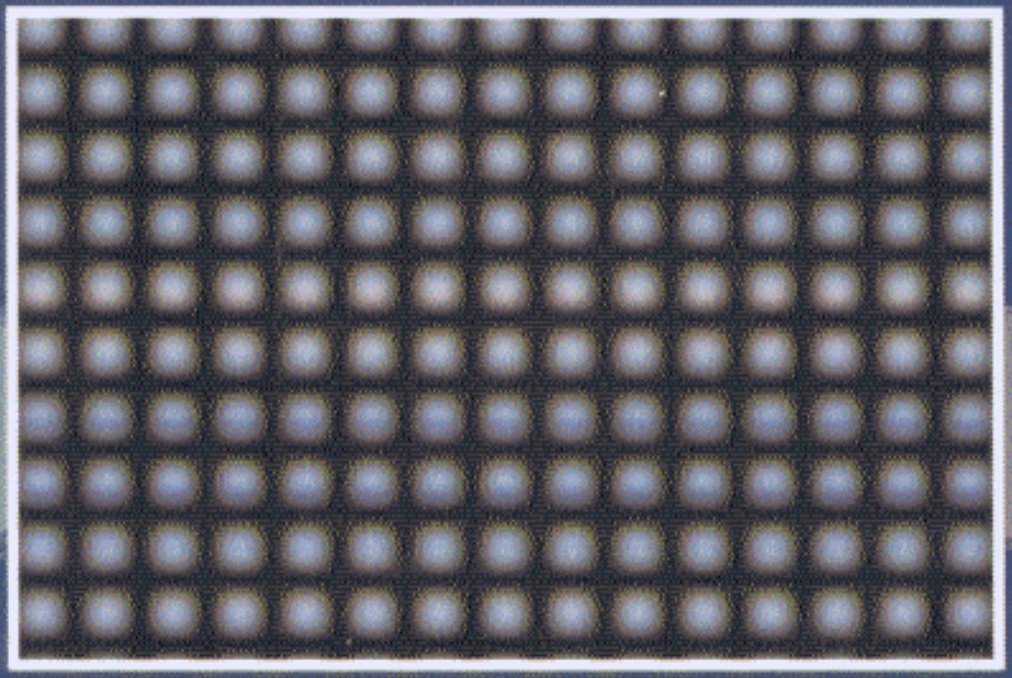
The 68000 Microprocessor

Hardware and Software Principles and Applications

Fifth Edition



James L. Antonakos

FREE CD INCLUDED

CONTENTS

PART 1 INTRODUCTION

1 MICROPROCESSOR-BASED SYSTEMS 2

Objectives 2
Key Terms 2
1.1 Introduction 3
1.2 Evolution of Microprocessors 3
1.3 System Block Diagram 5
1.4 Microprocessor Operation 8
1.5 Hardware/Software Requirements 9
1.6 Historic Perspective: The Macintosh Personal Computer 10
1.7 Developing Software for the 68000 13
1.8 The Calculator Project 16
1.9 Troubleshooting Techniques 16
Summary 17
Study Questions 17

2 AN INTRODUCTION TO THE 68000 MICROPROCESSOR 19

Objectives 19
Key Terms 19
2.1 Introduction 19
2.2 The Software Model of the 68000 20
2.3 A Functional Description of the 68000 22
2.4 68000 Data Organization 24
2.5 68000 Instruction Types 27
2.6 Advantages of the 68000 28
2.7 Beginning the Calculator Project 31

2.8 Troubleshooting Techniques 32
Summary 32
Study Questions 33

PART 2 SOFTWARE ARCHITECTURE

3 SOFTWARE DETAILS OF THE 68000 38

Objectives 38
Key Terms 38
3.1 Introduction 38
3.2 Assembly Language Programming 39
3.3 68000 Instruction Types 43
3.4 68000 Addressing Modes 47
3.5 The 68000's Instruction Set 58
3.6 How an Assembler Generates Machine Code 94
3.7 Troubleshooting Techniques 97
Summary 98
Study Questions 98

4 EXCEPTION PROCESSING 103

Objectives 103
Key Terms 103
4.1 Introduction 103
4.2 Execution States 104
4.3 Privilege States 105
4.4 Changing the Privilege State 107
4.5 Exception Processing 108
4.6 Multiple Exceptions 112
4.7 Special Exceptions 113
4.8 Exception Handlers 130
4.9 Troubleshooting Techniques 132
Summary 133
Study Questions 133

PART 3 PROGRAMMING

5 AN INTRODUCTION TO DATA STRUCTURES 138

Objectives 138
Key Terms 138
5.1 Introduction 139
5.2 Defining Constants with EQU 140

5.3 Defining Variables with DC and DS 141
5.4 Accessing One-Dimensional Arrays 143
5.5 Accessing Two-Dimensional Arrays 146
5.6 Character Strings 149
5.7 Static Versus Dynamic Storage Allocation 150
5.8 Linked-Lists 151
5.9 Binary Trees 154
5.10 Stacks and Queues 157
5.11 Troubleshooting Techniques 160
Summary 160
Study Questions 161

6 AN INTRODUCTION TO PROGRAMMING THE 68000 165

Objectives 165
Key Terms 165
6.1 Introduction 166
6.2 Tackling a Large Programming Assignment 166
6.3 Writing a Software Driver 170
6.4 Parameter Passing 172
6.5 Equivalent Instructions and Code Optimization 180
6.6 Data Gathering 181
6.7 Searching Data Tables 185
6.8 String Operations 188
6.9 Sorting 192
6.10 Computational Routines 196
6.11 Number Conversions 209
6.12 Control Applications 213
6.13 Instruction Execution Times 220
6.14 Exception Handling 223
6.15 A Working Calculator 226
6.16 Connecting to DOS 230
6.17 Troubleshooting Techniques 232
Summary 233
Study Questions 233
Additional Programming Exercises 234

PART 4 HARDWARE ARCHITECTURE

7 HARDWARE DETAILS OF THE 68000 238

Objectives 238
Key Terms 238
7.1 Introduction 238
7.2 CPU Specifications 239

7.3 CPU Pin Descriptions 239
7.4 System Timing Diagrams 250
7.5 Hardware Aspects of the Calculator Project 255
7.6 Providing Access to the Processor Signals 255
7.7 Troubleshooting Techniques 257
Summary 257
Study Questions 258

8 MEMORY SYSTEM DESIGN 262

Objectives 262
Key Terms 262
8.1 Introduction 262
8.2 The 68000 Address and Data Buses 263
8.3 Bus Buffering 264
8.4 Accessing Memory 266
8.5 Designing a Memory Address Decoder 268
8.6 Partial-Address Decoding 275
8.7 Designing with Available Memories 278
8.8 Generating DTACK 282
8.9 Dynamic RAM Interfacing 284
8.10 Direct Memory Access 292
8.11 Troubleshooting Techniques 294
Summary 295
Study Questions 295

9 I/O SYSTEM DESIGN 300

Objectives 300
Key Terms 300
9.1 Introduction 300
9.2 Memory-Mapped I/O 301
9.3 Parallel-Data Transfer: The 6821 PIA 304
9.4 Serial Data Transfer: The 6850 ACIA 310
9.5 Memory-Mapped Video I/O: The 6845 CRT Controller 318
9.6 Troubleshooting Techniques 322
Summary 322
Study Questions 323

10 ADVANCED PROGRAMMING USING 68000 PERIPHERALS 327

Objectives 327
Key Terms 327
10.1 Introduction 327
10.2 The 68440 Dual DMA Controller 328
10.3 The 68451 Memory Management Unit 339

10.4 The 68681 Dual UART 346
10.5 The 68230 PI/T (Parallel Interface/Timer) 352
10.6 The 68901 Multifunction Peripheral 366
10.7 The 68153 Bus Interrupt Module 370
10.8 The 68881 Floating-Point Coprocessor 374
10.9 Interfacing with Non-Motorola Peripherals 380
10.10 A Summary of Other 68000-Based Peripherals 381
10.11 Troubleshooting Techniques 382
Summary 382
Study Questions 383

11 BUILDING A WORKING 68000 SYSTEM 386

Objectives 386
Key Terms 386
11.1 Introduction 386
11.2 Minimal System Requirements 387
11.3 Designing the Hardware 388
11.4 The Minimal System's Parts List 400
11.5 Construction Tips 400
11.6 Using Programmable Logic in the Minimal System 401
11.7 Writing the Software Monitor 403
11.8 Adding Commands to the Monitor 415
11.9 Example Programs 416
11.10 Troubleshooting Techniques 418
Summary 419
Study Questions 419

PART 5 ADVANCED TOPICS

12 AN INTRODUCTION TO THE ADVANCED 680x0 SERIES MICROPROCESSORS 426

Objectives 426
Key Terms 426
12.1 Introduction 427
12.2 The 68008: An 8-Bit Spinoff 427
12.3 The 68010: A Virtual Memory Microprocessor 428
12.4 The 68020: A True 32-Bit Machine 431
12.5 The 68030: An Enhanced 32-Bit Machine 436
12.6 An Overview of the 68040 439
12.7 The 68060: A Superscalar Microprocessor 441
12.8 Troubleshooting Techniques 446
Summary 447
Study Questions 447

13 MICROCONTROLLERS 448

Objectives 448
Key Terms 448
13.1 Introduction 448
13.2 Digital Control Systems 449
13.3 Microprocessor versus Microcontroller 449
13.4 Why Use a Microcontroller? 451
13.5 8-Bit Microcontrollers 452
13.6 16-Bit Microcontrollers 455
13.7 32-Bit Microcontrollers 455
13.8 Troubleshooting Techniques 459
Summary 459
Study Questions 460

GLOSSARY 462

APPENDIXES 472

A 68000 Data Sheets 472
B 68000 Instruction Set 482
C 68000 Instruction Execution Times 551
D 68000 Peripheral Data Sheets 561
E A Note About COM68K, ASM68K, and EMU68K 604
F A Review of Number Systems, Binary Arithmetic, and Logic Functions 605
G ASCII Character Set 614
H DOS/BIOS Function Calls 616
I The PowerPC 621

SOLUTIONS AND ANSWERS TO SELECTED ODD-NUMBERED STUDY QUESTIONS 631

INDEX 639
