

THIRD EDITION

INTRODUCTION TO

ENVIRONMENTAL TOXICOLOGY

Impacts of
Chemicals
Upon
Ecological
Systems

WAYNE G. LANDIS • MING-HO YU

LEWIS PUBLISHERS

Table of Contents

1		
	Introduction to Environmental Toxicology and Its Role in Environmental Decision Making	1
1.1	Environmental Toxicology as an Interdisciplinary Science	1
1.2	A Brief History of and Organizations in Environmental Toxicology	2
1.3	Interactions and Connections of Environmental Toxicology to the Management of Ecological Systems	3
1.3.1	Research Programs	5
1.3.2	Scientific Community	5
1.3.3	Ecological Risk Assessment	6
1.3.4	Governmental and Regulatory Agencies	6
1.3.5	Industry	7
1.3.6	General Public	8
1.4	Legislation	8
1.5	Use of Models in Environmental Science	10
1.6	Introduction to the Textbook	11
	References	14
	Study Questions	14
2		
	A Framework for Environmental Toxicology	15
2.1	Classical Viewpoint for Classifying Toxicological Effects	15
2.1.1	Chemical/Physical–Chemical Characteristics	16
2.1.2	Bioaccumulation/Biotransformation/Biodegradation	17
2.1.3	Receptor and the Mode of Action	18
2.1.4	Biochemical and Molecular Effects	18
2.1.5	Physiological and Behavioral Effects	19
2.1.6	Population Parameters	20
2.1.7	Community Effects	20
2.1.8	Ecosystem Effects	21
2.2	Alternative Framework Incorporating Complexity Theory	22
2.3	Spatial and Temporal Scales	23
2.4	Combining Scale and Ecological Dynamics: The Hierarchical Patch Dynamic Paradigm	25
	References and Suggested Readings	28
	Study Questions	28

3

An Introduction to Toxicity Testing	31
3.1 The Dose-Response Curve	32
3.1.1 Thresholds and Hormesis	40
3.2 Standard Methods	41
3.2.1 Advantages of Standard Methods	41
3.2.2 Disadvantages of Standard Methods	42
3.3 Classification of Toxicity Tests	42
3.4 Design Parameters for Single-Species Toxicity Tests	44
3.4.1 Exposure Scenarios	45
3.4.2 Test Organisms	47
3.4.3 Comparison of Test Species	49
3.4.4 Statistical Design Parameters	49
3.5 Overview of Available Statistical Methods for the Evaluation of Single-Species Toxicity Tests	50
3.5.1 Commonly Used Methods for the Calculation of Endpoints	50
3.5.2 Comparison of Calculations of Several Programs for Calculating Probit Analysis	52
3.5.3 Hypothesis Testing	53
3.5.4 Curve Fitting and Regression Modeling vs. Hypothesis Testing	55
3.6 The Design of Multispecies Toxicity Tests	60
3.6.1 The Nature of Multispecies Toxicity Tests	60
3.6.2 Data Analysis and Interpretation of Multispecies Toxicity Tests	62
3.6.3 Univariate Methods	62
3.6.4 Multivariate Methods	63
3.6.5 Visualization	65
3.7 Summary of Design Guidelines for Multispecies Toxicity Tests	66
3.7.1 Basic Principles	66
3.7.2 Experimental Design	66
3.7.3 Data Analysis	67
References and Suggested Readings	67
Study Questions	70

4

Survey and Review of Typical Toxicity Test Methods	73
4.1 Single-Species Toxicity Tests	74
4.1.1 Daphnia 48-h Acute Toxicity Test	74
4.1.2 Algal 96-h Growth Toxicity Test	77
4.1.3 Acute Toxicity Tests with Aquatic Vertebrates and Macroinvertebrates	79

4.1.4	Terrestrial Vertebrate Toxicity Tests	83
4.1.5	Frog Embryo Teratogenesis Assay: FETAX	89
4.2	Animal Care and Use Considerations	91
4.3	Multispecies Toxicity Tests	92
4.3.1	Standardized Aquatic Microcosm	94
4.3.2	Mixed Flask Culture	97
4.3.3	FIFRA Microcosm	97
4.3.4	Soil Core Microcosm	101
	Summary	102
	References and Suggested Readings	102
	Study Questions	105
	Appendix: The Natural History and Utilization of Selected Test Species	106
	Aquatic Vertebrates	106
	Coho salmon (<i>Oncorhynchus kisutch</i>).....	106
	Rainbow trout (<i>Oncorhynchus mykiss</i>)	106
	Brook trout (<i>Salvelinus fontinalis</i>)	107
	Goldfish (<i>Carassius auratus</i>)	107
	Fathead Minnow (<i>Pimephales promelas</i>)	107
	Channel catfish (<i>Ictalurus punctatus</i>)	108
	Bluegill (<i>Lepomis macrochirus</i>)	108
	Green Sunfish (<i>Lepomis cyanellus</i>)	108
	Invertebrates — Freshwater	109
	Daphnids (<i>Daphnia magna</i> , <i>D. pulex</i> , <i>D. pulicaria</i> , <i>Ceriodaphnia dubia</i>)	109
	Amphipods (<i>Gammarus lacustris</i> , <i>G. fasciatus</i> , <i>G. pseudolimnaeus</i> , <i>Hyaella azteca</i>)	109
	Crayfish (<i>Orconectes sp.</i> , <i>Combarus sp.</i> , <i>Procambarus sp.</i> , <i>Pacifastacus leniusculus</i>)	110
	Stoneflies (<i>Pteronarcys sp.</i>)	110
	Mayflies (<i>Baetis sp.</i> , <i>Ephemera sp.</i> , <i>Hexagenia limbata</i> , <i>H. bilineata</i>)	111
	Midges (<i>Chironomus sp.</i>)	111
	Snails (<i>Physa integra</i> , <i>P. heterostropha</i> , <i>Amnicola limosa</i>): (Mollusca, Gastropoda)	112
	Planaria (<i>Dugesia tigrina</i>): (Platyhelminthes, <i>Turbellaria</i>)	112
	Invertebrates — Saltwater	112
	Copepods (<i>Acartia clausi</i> , <i>Acartia tonsa</i>)	112
	Algae	113
	<i>Chlamydomonas reinhardi</i>	113
	<i>Ulothrix sp.</i>	113
	<i>Microcystis aeruginosa</i>	113
	<i>Anabaena flos-aquae</i>	113

Avian species	113
Mallard (<i>Anas platyrhynchos</i>)	113
Northern bobwhite (<i>Colinus virginianus</i>)	114
Ring-necked pheasant (<i>Phasianus colchicus</i>)	114

5

Routes of Exposure and Modes of Action	115
5.1 The Damage Process	115
5.2 Atmospheric Pollutants and Plants	115
5.2.1 Plant Injury	116
5.2.2 Vertebrates	117
5.2.2.1 Exposure	117
5.2.2.2 Uptake	117
5.2.2.3 Transport	118
5.2.2.4 Storage	119
5.2.2.5 Metabolism	119
5.2.2.6 Excretion	119
5.3 Mechanisms of Action	119
5.3.1 Disruption or Destruction of Cellular Structure	120
5.3.2 Direct Chemical Combination With a Cellular Constituent	120
5.3.3 Effect on Enzymes	121
5.3.4 Secondary Action as a Result of the Presence of a Pollutant	122
5.3.5 Metal Shift	126
5.4 Common Modes of Action in Detail	126
5.4.1 Narcosis	126
5.4.2 Organophosphates	127
5.4.3 Monohaloacetic Acids	130
5.5 Introduction to QSAR	134
5.5.1 Construction of QSAR Models	135
5.5.2 Typical QSAR Model Development	137
5.5.3 Estimation of Toxicity Using QSAR	140
5.6 Receptor-Mediated Toxicity, Endocrine Disruption, and a Mechanistic SAR Analysis of PCB Toxicity	142
5.6.1 Specificity of the Hormone-Receptor Interaction	145
5.6.2 Range of Chemicals That Cause Endocrine Disruption	150
References and Suggested Readings	155
Study Questions	157

6

Factors Modifying the Activity of Toxicants	159
6.1 Introduction	159
6.2 Physicochemical Properties of Pollutants	159
6.2.1 Time and Mode of Exposure	160

6.3	Environmental Factors	160
6.3.1	Temperature	160
6.3.2	Humidity	161
6.3.3	Light Intensity	161
6.4	Interaction of Pollutants	161
6.4.1	Synergism and Potentiation	161
6.4.2	Antagonism	162
6.5	Toxicity of Mixtures	163
6.6	Mixture Estimation System	166
6.7	Estimating the Toxicity of Polynuclear Aromatic Hydrocarbons.....	167
6.8	Biological Factors Affecting Toxicity	169
6.8.1	Plants	169
6.8.2	Animals	170
6.8.2.1	Genetic Factors	170
6.8.2.2	Developmental Factors	170
6.8.2.3	Diseases	171
6.8.2.4	Behavioral Factors	171
6.8.2.5	Sex Variation	171
6.8.2.6	Nutritional Factors	172
6.8.2.7	Fasting/Starvation	172
6.8.2.8	Proteins	172
6.8.2.9	Carbohydrates	173
6.8.2.10	Lipids	174
6.8.2.11	Vitamin A	175
6.8.2.12	Vitamin D	175
6.8.2.13	Vitamin E	176
6.8.2.14	Vitamin C	176
6.8.2.15	Minerals	178
	References and Suggested Readings	179
	Study Questions	180

7

	Inorganic Gaseous Pollutants	183
7.1	Sulfur Oxides	183
7.1.1	Sources of SO ₂	183
7.1.2	Characteristics of SO ₂	184
7.1.3	Effects on Plants	184
7.1.4	Effect on Animals	186
7.1.5	Effect on Humans	187
7.2	Nitrogen Oxides (NO _x)	188
7.2.1	Forms and Formation of Nitrogen Oxides	188
7.2.2	Major Reactive N Species in the Troposphere	188
7.2.3	Effects on Plants	189

7.2.4	Effects on Humans and Animals	190
7.2.4.1	Physiological Effects	190
7.2.4.2	Biochemical Effects	191
7.3	Ozone	191
7.3.1	Sources	191
7.3.2	Photochemical Smog	192
7.3.3	Effects on Plants	193
7.3.4	Effects on Humans and Animals	194
7.3.5	Biochemical Effects	195
7.3.6	NADPH	196
7.4	Carbon Monoxide	197
7.4.1	Formation of CO	197
7.4.2	Toxicological Effects	198
7.4.3	Mechanism of Action	199
7.4.4	Human Exposure to CO	199
	References and Suggested Readings	200
	Study Questions	202

8

	Fluoride as a Contaminant of Developing Economies	203
8.1	Environmental Sources and Forms of Fluoride	203
8.1.1	Minerals and Soils	203
8.1.2	Natural Waters	203
8.1.3	Foods	203
8.1.4	Air	204
8.2	Industrial Sources of Fluoride Pollution	204
8.3	Effects on Plants	207
8.3.1	Injuries to Leaf Tissues	207
8.3.2	Effect on Germination	208
8.3.3	Biochemical Effect	209
8.4	Effect on Animals	209
8.4.1	Acute Effects	209
8.4.2	Chronic Effects	210
8.5	Effects on Human Health	212
8.5.1	Daily Intake	212
8.5.2	Absorption	212
8.5.3	Acute Toxicity	213
8.5.4	Chronic Toxicity	213
8.6	Biochemical Effect	213
	References and Suggested Readings	215
	Study Questions	217

9

	Heavy Metals	219
9.1	Lead	219
9.1.1	Properties and Uses	220

9.1.2	Exposure	220
9.1.2.1	Atmospheric Lead	220
9.1.2.2	Water-Borne Lead	220
9.1.2.3	Lead in Food	220
9.1.2.4	Lead in Soils	221
9.1.3	Lead Toxicity	221
9.1.3.1	Effect on Plants	221
9.1.3.2	Effect on Animals	222
9.1.3.3	Effect on Humans	222
9.1.4	Biochemical Effect	223
9.2	Cadmium	224
9.2.1	Properties and Uses	224
9.2.2	Exposure	225
9.2.3	Cadmium Toxicity	225
9.2.3.1	Effect on Plant	225
9.2.3.2	Effects on Animals/Humans	226
9.2.4	Biochemical Effect	226
9.3	Mercury	227
9.3.1	Properties and Uses	227
9.3.2	Sources of Mercury Pollution	228
9.3.3	Toxicity	228
9.4.3.1	Effect on Plants	228
9.4.3.2	Effect on Animals	228
9.4.3.3	Terrestrial Animals	229
9.4.3.4	Effect on Human Health	229
9.3.4	Biochemical Effect	230
	References and Suggested Readings	231
	Study Questions	232

10

	Biotransformation, Detoxification, and Biodegradation	235
10.1	Introduction	235
10.2	Metabolism of Environmental Chemicals: Biotransformation	235
10.2.1	Types of Biotransformation	236
10.2.2	Mechanisms of Biotransformation	236
10.2.3	Consequence of Biotransformation.....	241
10.3	Microbial Degradation	242
10.4	Bioremediation.....	249
10.5	Isolation and Engineering of Degradative Organisms	252
10.6	The Genetics of Degradative Elements.....	255
10.7	Example of a Detoxification Enzyme — the OPA Anhydrolases	256
10.7.1	Characteristics of the opd Gene Product and Other Bacterial OPA Anhydrolases.....	258
10.7.2	Eukaryotic OPA Anhydrolases	261
10.7.3	Characteristics of Other Invertebrate Metazoan Activities	262

10.7.4	Characteristics of Fish Activities	263
10.7.5	Comparison of the OPA Anhydases	264
10.7.6	Natural Role of the OPA Anhydases	265
	References and Suggested Readings	268
	Study Questions	272

11

Measuring and Predicting the Responses of

	Ecological Systems to Toxicants	275
11.1	Introduction	275
11.2	Measurement of Ecological Effects at Various Levels of Biological Organization	275
11.2.1	Bioaccumulation/Biotransformation/Biodegradation	278
11.3	Molecular and Physiological Indicators of Chemical Stress Biomarkers	278
11.3.1	Enzymatic and Biochemical Processes	279
11.3.2	Physiological and Histological Indicators	280
11.3.3	Toxicity Tests and Population Level Indicators	282
11.3.4	Sentinel Organisms and <i>In Situ</i> Biomonitoring	284
11.4	Population Parameters	286
11.5	Assemblage and Community Parameters	287
11.6	Interpretation of Effects at the Population, Community, and Ecosystem Levels of Organization	291
11.6.1	Resource Competition as a Model of the Direct and Indirect Effects of Pollutants	291
11.6.2	Case 1	295
11.6.3	Case 2	296
11.6.4	Population Biology, Nonlinear Systems, and Chaos	302
11.6.5	Age-Structured Population Models	309
11.6.6	Effects of Toxicants upon Spatially Structured Populations	313
11.6.6.1	The Spatial Structure of Populations	313
11.6.6.2	The Use of Metapopulation Models to Investigate Toxicant Effects	315
11.7	Community and Ecosystem Effects	323
11.7.1	Similarity Measures	324
11.7.2	Classification	325
11.7.3	Clustering	326
11.8	Application of Multivariate Techniques	327
11.8.1	Normalized Ecosystem Strain	327
11.8.2	State Space of Ecosystems	328
11.8.3	Nonmetric Clustering and Association Analysis	330
11.8.4	Projections for Visualizing Ecosystem Dynamics	331
11.8.5	Examples of the Use of Multivariate Methods in Multispecies Toxicity Tests and Field Studies	335

11.9	Pollution-Induced Community Tolerance	339
11.10	Interpretation of Ecosystem Level Impacts	340
11.11	An Alternative Model: the Community Conditioning Hypothesis	344
11.12	The Problem of the Reference Site	347
11.12.1	Eulogy for the Reference Site	347
11.12.2	Gradients	348
11.12.3	Reference Conditions	349
11.12.4	Conclusions	350
	References and Suggested Readings	350
	Study Questions	356
	Appendix A Multivariate Techniques — Nonmetric Clustering	357

12

	Ecological Risk Assessment	359
12.1	Introduction	359
12.2	Basics of Risk Assessment	360
12.3	Ecological Risk Assessment	361
12.4	Ecological Risk Assessment Framework	362
12.4.1	Problem Formulation	362
12.4.2	Analysis	368
12.4.3	Exposure Analysis	368
12.4.4	Characterization of Ecological Effects	370
12.4.4.1	Ecological Response Analyses	370
12.4.4.2	Stressor-Response Profile	372
12.4.5	Data Acquisition, Verification, and Monitoring	372
12.5	Risk Characterization	373
12.5.1	Integration	373
12.5.2	Risk Description	374
12.5.3	Interpretation of Ecological Significance	375
12.5.4	Discussion between the Risk Assessor and Risk Manager	376
12.5.5	Data Acquisition, Verification, and Monitoring	376
12.6	Developments in Ecological Risk Assessment	376
12.6.1	New Methods for Calculating Ecological Risk	377
12.6.2	The Curve Model	377
12.6.3	Spatially Distinct Risk Quotients	379
12.7	A Ranking Approach to Multiple Stressor, Wide-Area Ecological Risk Assessment	380
12.7.1	A Simple Example	382
12.7.2	Advantages and Dangers of the Ranking Approach	386
12.7.3	Establishing Causation and the Weight of Evidence Approach	387
12.7.3.1	Criteria for Causation	388
12.7.3.2	Weight of Evidence	389

12.8	A General Model for Regional Risk Assessment — The Ten Steps	391
12.9	Life-Cycle Assessment as a Decision-Making Tool	396
	References and Suggested Readings	398
	Study Questions	400
Appendix A	References for Toxicity Testing and Interpretation	403
Appendix B	Framework for Ecological Risk Assessment	419
Index	469
