

Texts in Statistical Science

# Computer-Aided Multivariate Analysis

FOURTH EDITION

**Abdelmonem Afifi**  
**Virginia A. Clark and Susanne May**

CHAPMAN & HALL/CRC

# Contents

Preface	xiii
<b>One Preparation for Analysis</b>	<b>1</b>
<b>1 What is multivariate analysis?</b>	<b>3</b>
1.1 Defining multivariate analysis . . . . .	3
1.2 Examples of multivariate analyses . . . . .	3
1.3 Multivariate analyses discussed in this book . . . . .	6
1.4 Organization and content of the book . . . . .	10
1.5 References . . . . .	11
<b>2 Characterizing data for analysis</b>	<b>13</b>
2.1 Variables: their definition, classification, and use . . . . .	13
2.2 Defining statistical variables . . . . .	13
2.3 Stevens's classification of variables . . . . .	14
2.4 How variables are used in data analysis . . . . .	17
2.5 Examples of classifying variables . . . . .	18
2.6 Other characteristics of data . . . . .	19
2.7 Summary . . . . .	19
2.8 References . . . . .	20
2.9 Problems . . . . .	20
<b>3 Preparing for data analysis</b>	<b>23</b>
3.1 Processing data so they can be analyzed . . . . .	23
3.2 Choice of a statistical package . . . . .	24
3.3 Techniques for data entry . . . . .	26
3.4 Organizing the data . . . . .	33
3.5 Example: depression study . . . . .	39
3.6 Summary . . . . .	43
3.7 References . . . . .	43
3.8 Problems . . . . .	46

<b>4 Data screening and transformations</b>	<b>49</b>
4.1 Transformations, assessing normality and independence . . . . .	49
4.2 Common transformations . . . . .	49
4.3 Selecting appropriate transformations . . . . .	53
4.4 Assessing independence . . . . .	63
4.5 Summary . . . . .	64
4.6 References . . . . .	66
4.7 Problems . . . . .	67
<b>5 Selecting appropriate analyses</b>	<b>71</b>
5.1 Which analyses to perform? . . . . .	71
5.2 Why selection is often difficult . . . . .	71
5.3 Appropriate statistical measures . . . . .	72
5.4 Selecting appropriate multivariate analyses . . . . .	76
5.5 Summary . . . . .	79
5.6 References . . . . .	79
5.7 Problems . . . . .	80
<b>Two Applied Regression Analysis</b>	<b>83</b>
<b>6 Simple regression and correlation</b>	<b>85</b>
6.1 Chapter outline . . . . .	85
6.2 When are regression and correlation used? . . . . .	86
6.3 Data example . . . . .	86
6.4 Regression methods: fixed- $X$ case . . . . .	88
6.5 Regression and correlation: variable- $X$ case . . . . .	93
6.6 Interpretation: fixed- $X$ case . . . . .	94
6.7 Interpretation: variable- $X$ case . . . . .	95
6.8 Other available computer output . . . . .	99
6.9 Robustness and transformations for regression . . . . .	107
6.10 Other types of regression . . . . .	109
6.11 Special applications of regression . . . . .	113
6.12 Discussion of computer programs . . . . .	116
6.13 What to watch out for . . . . .	117
6.14 Summary . . . . .	118
6.15 References . . . . .	119
6.16 Problems . . . . .	122
<b>7 Multiple regression and correlation</b>	<b>125</b>
7.1 Chapter outline . . . . .	125
7.2 When are regression and correlation used? . . . . .	126
7.3 Data example . . . . .	126
7.4 Regression methods: fixed- $X$ case . . . . .	129
7.5 Regression and correlation: variable- $X$ case . . . . .	131

7.6	Interpretation: fixed- <i>X</i> case . . . . .	137
7.7	Interpretation: variable- <i>X</i> case . . . . .	140
7.8	Regression diagnostics and transformations . . . . .	143
7.9	Other options in computer programs . . . . .	148
7.10	Discussion of computer programs . . . . .	153
7.11	What to watch out for . . . . .	158
7.12	Summary . . . . .	159
7.13	References . . . . .	159
7.14	Problems . . . . .	160
<b>8</b>	<b>Variable selection in regression</b>	<b>165</b>
8.1	Chapter outline . . . . .	165
8.2	When are variable selection methods used? . . . . .	165
8.3	Data example . . . . .	166
8.4	Criteria for variable selection . . . . .	170
8.5	A general <i>F</i> test . . . . .	172
8.6	Stepwise regression . . . . .	174
8.7	Subset regression . . . . .	180
8.8	Discussion of computer programs . . . . .	183
8.9	Discussion of strategies . . . . .	186
8.10	What to watch out for . . . . .	189
8.11	Summary . . . . .	191
8.12	References . . . . .	192
8.13	Problems . . . . .	193
<b>9</b>	<b>Special regression topics</b>	<b>197</b>
9.1	Chapter outline . . . . .	197
9.2	Missing values in regression analysis . . . . .	197
9.3	Dummy variables . . . . .	205
9.4	Constraints on parameters . . . . .	214
9.5	Regression analysis with multicollinearity . . . . .	217
9.6	Ridge regression . . . . .	218
9.7	Summary . . . . .	222
9.8	References . . . . .	223
9.9	Problems . . . . .	225
<b>Three</b>	<b>Multivariate Analysis</b>	<b>231</b>
<b>10</b>	<b>Canonical correlation analysis</b>	<b>233</b>
10.1	Chapter outline . . . . .	233
10.2	When is canonical correlation analysis used? . . . . .	233
10.3	Data example . . . . .	234
10.4	Basic concepts of canonical correlation . . . . .	235
10.5	Other topics in canonical correlation . . . . .	240

10.6	Discussion of computer programs . . . . .	243
10.7	What to watch out for . . . . .	245
10.8	Summary . . . . .	246
10.9	References . . . . .	246
10.10	Problems . . . . .	247
<b>11</b>	<b>Discriminant analysis</b>	<b>249</b>
11.1	Chapter outline . . . . .	249
11.2	When is discriminant analysis used? . . . . .	250
11.3	Data example . . . . .	251
11.4	Basic concepts of classification . . . . .	252
11.5	Theoretical background . . . . .	259
11.6	Interpretation . . . . .	261
11.7	Adjusting the dividing point . . . . .	265
11.8	How good is the discrimination? . . . . .	267
11.9	Testing variable contributions . . . . .	270
11.10	Variable selection . . . . .	271
11.11	Discussion of computer programs . . . . .	272
11.12	What to watch out for . . . . .	274
11.13	Summary . . . . .	275
11.14	References . . . . .	276
11.15	Problems . . . . .	276
<b>12</b>	<b>Logistic regression</b>	<b>281</b>
12.1	Chapter outline . . . . .	281
12.2	When is logistic regression used? . . . . .	282
12.3	Data example . . . . .	282
12.4	Basic concepts of logistic regression . . . . .	284
12.5	Interpretation: Categorical variables . . . . .	285
12.6	Interpretation: Continuous variables . . . . .	287
12.7	Interpretation: Interactions . . . . .	289
12.8	Refining and evaluating logistic regression . . . . .	296
12.9	Nominal and ordinal logistic regression . . . . .	308
12.10	Applications of logistic regression . . . . .	315
12.11	Poisson Regression . . . . .	319
12.12	Discussion of computer programs . . . . .	323
12.13	What to watch out for . . . . .	324
12.14	Summary . . . . .	327
12.15	References . . . . .	327
12.16	Problems . . . . .	329

<b>13 Regression analysis with survival data</b>	<b>333</b>
13.1 Chapter outline . . . . .	333
13.2 When is survival analysis used? . . . . .	334
13.3 Data examples . . . . .	334
13.4 Survival functions . . . . .	337
13.5 Common survival distributions . . . . .	343
13.6 Comparing survival among groups . . . . .	344
13.7 The log-linear regression model . . . . .	346
13.8 The Cox regression model . . . . .	348
13.9 Comparing regression models . . . . .	359
13.10 Discussion of computer programs . . . . .	362
13.11 What to watch out for . . . . .	364
13.12 Summary . . . . .	365
13.13 References . . . . .	365
13.14 Problems . . . . .	367
<b>14 Principal components analysis</b>	<b>369</b>
14.1 Chapter outline . . . . .	369
14.2 When is principal components analysis used? . . . . .	369
14.3 Data example . . . . .	370
14.4 Basic concepts . . . . .	371
14.5 Interpretation . . . . .	375
14.6 Other uses . . . . .	383
14.7 Discussion of computer programs . . . . .	386
14.8 What to watch out for . . . . .	386
14.9 Summary . . . . .	388
14.10 References . . . . .	388
14.11 Problems . . . . .	389
<b>15 Factor analysis</b>	<b>391</b>
15.1 Chapter outline . . . . .	391
15.2 When is factor analysis used? . . . . .	391
15.3 Data example . . . . .	392
15.4 Basic concepts . . . . .	393
15.5 Initial extraction: principal components . . . . .	395
15.6 Initial extraction: iterated components . . . . .	398
15.7 Factor rotations . . . . .	402
15.8 Assigning factor scores . . . . .	406
15.9 Application of factor analysis . . . . .	408
15.10 Discussion of computer programs . . . . .	409
15.11 What to watch out for . . . . .	412
15.12 Summary . . . . .	413
15.13 References . . . . .	414
15.14 Problems . . . . .	415

<b>16 Cluster analysis</b>	<b>417</b>
16.1 Chapter outline . . . . .	417
16.2 When is cluster analysis used? . . . . .	417
16.3 Data example . . . . .	419
16.4 Basic concepts: initial analysis . . . . .	419
16.5 Analytical clustering techniques . . . . .	426
16.6 Cluster analysis for financial data set . . . . .	432
16.7 Discussion of computer programs . . . . .	437
16.8 What to watch out for . . . . .	440
16.9 Summary . . . . .	440
16.10 References . . . . .	441
16.11 Problems . . . . .	442
<b>17 Log-linear analysis</b>	<b>445</b>
17.1 Chapter outline . . . . .	445
17.2 When is log-linear analysis used? . . . . .	445
17.3 Data example . . . . .	446
17.4 Notation and sample considerations . . . . .	448
17.5 Tests and models for two-way tables . . . . .	450
17.6 Example of a two-way table . . . . .	454
17.7 Models for multiway tables . . . . .	456
17.8 Exploratory model building . . . . .	459
17.9 Assessing specific models . . . . .	465
17.10 Sample size issues . . . . .	466
17.11 The logit model . . . . .	468
17.12 Discussion of computer programs . . . . .	470
17.13 What to watch out for . . . . .	471
17.14 Summary . . . . .	473
17.15 References . . . . .	474
17.16 Problems . . . . .	475
<b>Appendix A</b>	<b>477</b>
A.1 Data sets and how to obtain them . . . . .	477
A.2 Chemical companies financial data . . . . .	477
A.3 Depression study data . . . . .	477
A.4 Financial performance cluster analysis data . . . . .	478
A.5 Lung cancer survival data . . . . .	478
A.6 Lung function data . . . . .	478
A.7 Parental HIV data . . . . .	479
<b>Index</b>	<b>481</b>
