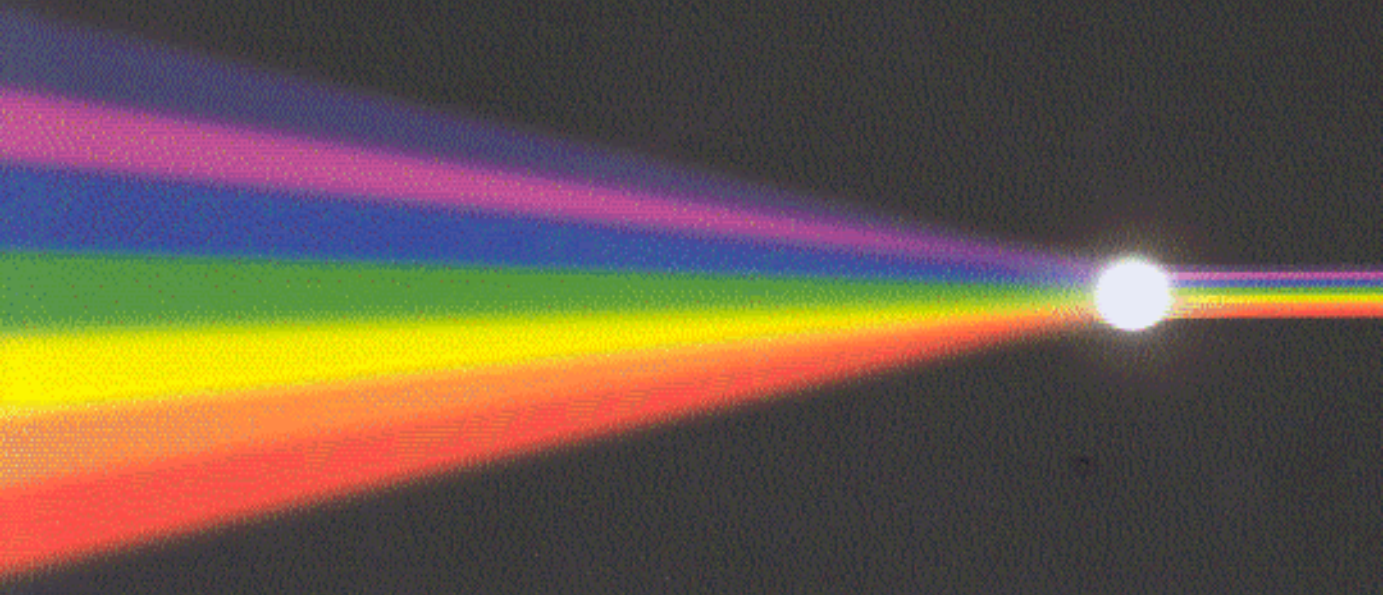
Systems Analysis

A Beginner's Guide



Kevin Bowman

Contents

Preface xi

Acknowledgements xiii

1 Introduction to systems analysis 1
1.1 What is a system? 1
1.2 Information systems 2
1.3 What is systems analysis? 2
1.4 Systems Methodologies 3
1.5 SSADM – Structured Systems Analysis and Design Method 4
1.6 The structure of SSADM 5
1.7 SSADM and the Systems Development Life Cycle 7
Summary 7
Exercises 8

2 The current system 9
2.1 The approach in this book 9
2.2 The case studies 9
2.2.1 Swillbuckets Country Club 9
2.2.2 The Medical Centre at the University of Life 11
2.3 Investigation of the current environment 14
2.3.1 Investigate and define requirements 14
2.3.2 Fact-finding techniques 16
2.3.3 Investigate current processing 17
2.3.4 Simple steps in data flow modelling 22
Summary 34
Exercises 40

3 Modelling the data structure 42
3.1 Entity modelling 42
3.1.1 Entities 42
3.1.2 Attributes 43
3.1.3 Keys 43
3.1.4 Relationships 44
3.1.5 Resolving many-to-many relationships 46
3.2 Simple steps in entity modelling 48
3.3 Entity modelling at Swillbuckets 49
3.4 Physical data store/entity cross-reference 59
Summary 61
Exercises 65

4 The logical view 66
4.1 Logicalization 66
4.2 Simple steps in logicalization 67
4.3 Logicalization at Swillbuckets 73
4.4 Problem and requirements catalogue 75
4.4.1 The Medical Centre 76
4.4.2 The problem and requirements catalogue for Swillbuckets 81
Summary 82
Exercises 83

5 Business system options 85
5.1 Business system options 85
5.2 Simple steps in creating business system options 85
5.3 BSOs at the Medical Centre 86
5.4 BSOs at Swillbuckets 89
Summary 91

6 Requirements specification 92
6.1 Requirements specification 92
6.2 Required logical models 92
6.3 Elementary process descriptions 94
6.3.1 Structured English and decision trees 97
6.3.2 Decision tables 98
6.3.3 Simple steps in decision tables 99

6.4 Input/output design 101
6.4.1 Output design 102
6.4.2 Simple steps in output design 105
6.4.3 Input design 105
6.4.4 Simple steps in input design 108
6.4.5 User interface design 108
Summary 109
Exercises 109

7 Normalization 110
7.1 Normalization 110
7.1.1 What happens if data isn't normalized 110
7.1.2 (Not so) simple tasks in normalization 115
7.2 Rationalization 133
7.3 Rebuild the entity model 135
7.4 Entity/function matrix 136
7.4.1 Simple steps in creating an entity/function matrix 137
Summary 138
Exercises 138

8 Technical and Physical Design 140
8.1 Technical design and physical design 140
8.1.1 Design detailed user interface 141
8.1.2 Prototyping 142
8.1.3 Simple steps in prototyping 143
8.1.4 Interface flow diagrams 143
8.2 Database design 144
8.2.1 Indexes 145
8.3 Access and security 145
8.4 Volumetrics 146
8.5 Documentation 147
8.6 CASE tools 149
Summary 150
Exercise 150
And finally... 151

Appendix: Teaching case study – North Sea Ferries 152
TITLE: NSF Project Information Document 152
Project Background 152
Project Team – Terms of Reference 153
NSF Project Briefing Document 153
Company Overview – Crossing Bookings 153
Transcript of Interview with Booking Office Manager 155
Transcript of Interview with Port Desk Staff 158
Examples of Documents used by North Sea Ferries 160
