

Networking

Jeffrey S. Beasley

Contents

CHAPTER 1	Introduction to Computer Networks	2
Chapter Outline		3
Objectives		3
Key Terms		3
1-1	Introduction	4
1-2	Network Topologies	4
1-3	The Ethernet LAN	9
	IP (Internet Protocol Addressing)	13
1-4	Assembling an Office LAN	15
1-5	Testing and Troubleshooting a LAN	20
1-6	Legacy Computer Networks	23
	Troubleshooting a ThinNet Network	23
	Performance Issues of ThinNet	24
	Conclusion	25
1-7	Analyzing Computer Networks	26
SUMMARY		31
QUESTIONS AND PROBLEMS		31
CHAPTER 2	Physical Layer Cabling	36
Chapter Outline		37
Objectives		37
Key Terms		37
2-1	Introduction	38
2-2	Structured Cabling	38
	Horizontal Cabling	39
2-3	Unshielded Twisted-Pair Cable	41
	Shielded Twisted-Pair Cable	43

2-4	Terminating CAT5/5e/6 UTP Cables	44
	Computer Communication	45
	Straight-through and Crossover Patch Cables	47
2-5	Cable Testing and Certification	49
	Testing the CAT5e Link	52
2-6	Troubleshooting Computer Networks	57
	SUMMARY	62
	QUESTIONS AND PROBLEMS	62

CHAPTER 3 Computer Fundamentals **66**

	Chapter Outline	67
	Objectives	67
	Key Terms	67
3-1	Introduction	68
3-2	The Computer Bus Connection	68
	Motherboard Bus Connections	69
3-3	Device Drivers	72
	Verifying Device Drivers on Windows XP	73
3-4	Computer Memory	76
	Types of Memory	77
3-5	An Overview of FAT and NTFS	78
	FAT	78
	FAT 32	78
	NTFS	79
3-6	Configuring the BIOS Boot Sequence	79
	SUMMARY	80
	QUESTIONS AND PROBLEMS	81

CHAPTER 4 Interconnecting the LANs **84**

	Chapter Outline	85
	Objectives	85
	Key Terms	85
4-1	Introduction	86
4-2	The OSI Model	86
4-3	The Network Bridge	88
4-4	The Network Switch	92
	Hub-Switch Comparison	93
	Managed Switches	96
	Layer 3 and Layer 4 Switches	99
4-5	The Router	100
	The Router Interface	101

4-6	Interconnecting LANs with the Router	102
	Gateway Address	105
	Network Segments	105
4-7	Configuring the Network Interface—Auto-negotiation	106
	Auto-negotiation Steps	106
	Full Duplex/Half Duplex	107
	SUMMARY	108
	QUESTIONS AND PROBLEMS	109
CHAPTER 5	TCP/IP	112
	Chapter Outline	113
	Objectives	113
	Key Terms	113
5-1	Introduction	114
5-2	The TCP/IP Layers	114
	The Application Layer	114
	The Transport Layer	115
	The Internet Layer	120
	The Network Interface Layer	122
5-3	Number Conversion	123
	Binary-Decimal Conversion	123
	Decimal-Binary Conversion	124
	Hexadecimal Numbers	126
5-4	IPv4 Addressing	128
	Private IP Addresses	131
	IP Address Assignment	131
5-5	Subnet Masks	132
5-6	CIDR Blocks	138
5-7	IPv6 Addressing	141
5-8	Analyzing Computer Networks—FTP Data Packets	143
	SUMMARY	145
	QUESTIONS AND PROBLEMS	145
CHAPTER 6	Introduction to Router Configuration	150
	Chapter Outline	151
	Objectives	151
	Key Terms	151
6-1	Introduction	152
6-2	Router Fundamentals	152
	Layer 3 Networks	153
6-3	The Console Port Connection	159
	Configuring the HyperTerminal Software	161

6-4	The Router's User EXEC Mode (Router>)	162
	The User EXEC Mode	163
	Router Configuration Challenge—The User EXEC Mode	166
6-5	The Router's Privileged EXEC Mode (Router#)	168
	Hostname	169
	Enable Secret	169
	Setting the Line Console Passwords	170
	Ethernet Interface Configuration	170
	Serial Interface Configuration	171
	Router Configuration Challenge—The Privileged EXEC Mode	173
6-6	Troubleshooting the Router Interface	174
	SUMMARY	177
	QUESTIONS AND PROBLEMS	178

CHAPTER 7	Routing Protocols	180
	Chapter Outline	181
	Objectives	181
	Key Terms	181
7-1	Introduction	182
7-2	Static Routing	182
	Configuring Static Routes	188
	Networking Challenge—Static Routes	191
7-3	Dynamic Routing Protocols	193
	Distance Vector Protocols	194
	Link State Protocols	195
7-4	RIP—Routing Information Protocol	195
	Configuring Routes with RIP	197
	Networking Challenge—RIP	201
7-5	IGRP—Interior Gateway Routing Protocol	202
	Configuring Routes with IGRP	203
	Networking Challenge—IGRP	207
7-6	OSPF—Open Shortest Path First Routing Protocol	208
	Configuring Routes with OSPF	209
	Networking Challenge—OSPF	214
7-7	EIGRP—Enhanced Interior Gateway Routing Protocol	215
	Configuring Routes with EIGRP	216
7-8	Analyzing OSPF "Hello" Packets	221
	SUMMARY	224
	QUESTIONS AND PROBLEMS	224

CHAPTER 8	Wide Area Networking	232
Chapter Outline		233
Objectives		233
Key Terms		233
8-1	Introduction	234
8-2	The Line Connection	235
	Data Channels	235
	Point of Presence	237
	T1 Framing	237
	Line Coding Formats	238
8-3	Frame Relay	242
	Establishing a Frame Relay Connection	245
	Configuring Frame Relay Point to Point on the Router	245
8-4	ATM	249
	Establishing the ATM Connection	251
8-5	Dial-in Access	252
	Analog Modem Techniques	252
	Cable Modems	252
	ISDN	253
	xDSL Modems	254
	The Remote Access Server	257
8-6	VPN	269
	Configuring a VPN Virtual Interface (Router to Router)	271
	Troubleshooting the VPN Tunnel Link	276
	Configuring a Remote Client's VPN Connection	277
8-7	Wide Area Network Routing	280
8-8	Internet Routing	281
	Configuring BGP	283
	Networking Challenge—BGP	288
8-9	Analyzing Internet Data Traffic	289
	Utilization/Error Strip Chart	290
	Network Layer Matrix	290
	Network Layer Host Table	291
	Frame Size Distribution	291
SUMMARY		292
QUESTIONS AND PROBLEMS		292

CHAPTER 9	Configuring and Managing the Campus Network	296
Chapter Outline		297
Objectives		297
Key Terms		297
9-1	Introduction	298
9-2	Designing the Campus Network	298
	Core Layer	298
	Distribution Layer	299
	Access Layer	300
	Data Flow	300
	Selecting the Media	300
9-3	IP Assignment and DHCP	301
	The DHCP Data Packets	303
9-4	Network Services—DNS	304
	Campus DNS	305
9-5	Network Management	307
	Configuring SNMP	308
9-6	Analyzing Campus Network Data Traffic	310
SUMMARY		312
QUESTIONS AND PROBLEMS		313
CHAPTER 10	Network Security	316
Chapter Outline		317
Objectives		317
Key Terms		317
10-1	Introduction	318
10-2	Intrusion (How an Attacker Gains Control of a Network)	318
	Social Engineering	319
	Password Cracking	319
	Packet Sniffing	320
	Vulnerable Software	321
	Viruses	322
	Wireless Vulnerabilities	323
10-3	Denial of Service	325
	Distributed Denial of Service Attacks	326
10-4	Firewalls	326
	Attack Prevention	332
10-5	Intrusion Detection	333
10-6	Analyzing Unsecured Data Packets	334
SUMMARY		338
QUESTIONS AND PROBLEMS		338

CHAPTER 11	Wireless Networking	340
Chapter Outline		341
Objectives		341
Key Terms		341
11-1	Introduction	342
11-2	The IEEE 802.11 Wireless LAN Standard	342
11-3	Wireless Networking	347
11-4	Securing Wireless LANs	357
11-5	Configuring a Point-to-Multipoint Wireless LAN—A Case Study	358
	Antenna Site Survey	360
	Establishing a Point-to-Point Wireless Link to the Home Network	360
	Configuring the Multipoint Distribution/Conducting an RF Site Survey	361
	Configuring the Remote Installations	363
SUMMARY		363
QUESTIONS AND PROBLEMS		364

CHAPTER 12	Optical Networking	366
Chapter Outline		367
Objectives		367
Key Terms		367
12-1	Introduction	368
12-2	The Nature of Light	369
	Graded-Index Fiber	373
	Single-Mode Fibers	374
12-3	Fiber Attenuation and Dispersion	376
	Attenuation	376
	Dispersion	377
	Dispersion Compensation	379
12-4	Optical Components	380
	Intermediate Components	382
	Fiber Connectorization	386
12-5	Optical Networking	387
	Defining Optical Networking	388
	Building Distribution	390
	Campus Distribution	393
	FDDI	395
12-6	System Design and Operational Issues	396
12-7	Safety	399
12-8	Troubleshooting Computer Networks (the OTDR)	401

SUMMARY	403
QUESTIONS AND PROBLEMS	403
CHAPTER 13 Voice over IP	406
Chapter Outline	407
Objectives	407
Key Terms	407
13-1 Introduction	408
13-2 The Basics of Voice over IP	408
13-3 Voice over IP Networks	411
Replacing an Existing PBX Tie Line	411
Upgrading Existing PBXs to Support IP Telephony	413
Switching to a Complete IP Telephony Solution	415
13-4 Quality of Service	415
Jitter	416
Network Latency	416
Queuing	417
13-5 Analyzing VoIP Ethernet Data Packets	418
SUMMARY	422
QUESTIONS AND PROBLEMS	423

CHAPTER 14 The Network Server	426
Chapter Outline	427
Objectives	427
Key Terms	427
14-1 Introduction	428
Network Definitions	428
Network Types	428
Server Types	430
Adding the Network Server	431
14-2 Installing and Configuring the Network Server	432
Creating a Server Domain (Windows 2000 Server)	433
Configuring Windows 2003 Server	439
Configuring the IP Address	440
14-3 Adding Computers, Users, and Groups	441
Adding Computers to the Windows 2003/2000 Server Domain	442
Adding Users to the Windows 2003/2000 Server Domain	444
Adding Organizational Units and Groups to the Windows 2003/2000 Server Domain	447

14-4	Setting Group Permissions and Policies	451
14-5	Verifying “My Network Places” on Windows-based PCs	459
	“My Network Places,” Windows XP	459
	“My Network Places,” Windows 2003	462
	“My Network Places,” Windows Me	464
14-6	Configuring the Network Server’s Account Lockout Policy	465
	SUMMARY	468
	QUESTIONS AND PROBLEMS	468

CHAPTER 15	Linux Networking	470
	Chapter Outline	471
	Objectives	471
	Key Terms	471
15-1	Introduction	472
15-2	Logging on to Linux	472
	Adding a User Account	473
15-3	Linux File Structure and File Commands	476
	Listing Files	477
	Displaying File Contents	479
	Directory Operations	481
	File Operations	484
	Permissions and Ownership	486
15-4	Linux Administration Commands	490
	The <i>man</i> (manual) Command	490
	The <i>ps</i> (processes) Command	492
	The <i>su</i> (substitute user) Command	493
	The <i>mount</i> Command	494
	The <i>shutdown</i> Command	495
	Linux Tips	495
15-5	Adding Applications to Linux	497
15-6	Linux Networking	503
	Installing SSH	506
	The ftp Client	508
	The ftp Server	508
	DNS Service on Linux	509
	Changing the Hostname	510
15-7	Troubleshooting System and Network Problems with Linux	510
	Troubleshooting Boot Processes	511
	Listing Users on the System	512

Network Security	514
Enabling and Disabling Boot Services	514
SUMMARY	517
QUESTIONS AND PROBLEMS	517
CHAPTER 16 Industrial Networks	522
Chapter Outline	523
Objectives	523
Key Terms	523
16-1 Introduction	524
16-2 Overview of Industrial Networks	524
Characteristics of Industrial Networks	525
16-3 Industrial Ethernet	532
Achieving Determinism	532
Topology	532
Switching	533
Cabling and Components	534
16-4 Industrial Ethernet Protocols	536
Ethernet/IP	536
Foundation Fieldbus High-Speed Ethernet (HSE)	537
Profinet	537
IDA—Interface for Distributed Automation	537
MMS—Manufacturing Message Specification	538
Modbus® TCP	538
16-5 Legacy Device and Controller Level Buses	538
Open Buses	538
Proprietary Buses	539
SUMMARY	539
QUESTIONS AND PROBLEMS	540
Glossary	543
Index	555
