*Enhanced Edition*

# *Java*™ software solutions

foundations of program design | 3rd edition

LEWIS & LOFTUS

<b>preface</b>	<b>v</b>
<b>chapter 1 computer systems</b>	<b>1</b>
<b>1.0 introduction</b>	<b>2</b>
basic computer processing	2
software categories	3
digital computers	5
binary numbers	8
<b>1.1 hardware components</b>	<b>10</b>
computer architecture	11
input/output devices	13
main memory and secondary memory	13
the central processing unit	18
<b>1.2 networks</b>	<b>19</b>
network connections	20
local-area networks and wide-area networks	21
the Internet	23
the World Wide Web	24
Uniform Resource Locators	25
the Internet vs.	
the World Wide Web	27
<b>1.3 programming</b>	<b>27</b>
problem solving	27
the Java programming language	29
a Java program	30
comments	32
identifiers and reserved words	34
white space	36
<b>1.4 programming languages</b>	<b>38</b>
programming language levels	39
compilers and interpreters	41
syntax and semantics	44
errors	45
language evolution	46

1.5	<b>graphics</b>	47
	coordinate systems	48
	representing color	49
<b>chapter 2</b>	<b>objects and primitive data</b>	<b>61</b>
2.0	<b>an introduction to objects</b>	62
2.1	<b>using objects</b>	64
	the <code>print</code> and <code>println</code> methods	64
	abstraction	66
2.2	<b>string literals</b>	67
	string concatenation	67
	escape sequences	69
2.3	<b>variables and assignment</b>	72
	variables	72
	the assignment statement	73
	constants	75
2.4	<b>primitive data types and expressions</b>	76
	integers and floating points	76
	characters	78
	booleans	80
2.5	<b>arithmetic expressions</b>	80
	operator precedence	81
	data conversion	84
2.6	<b>creating objects</b>	87
	the <code>String</code> class	88
2.7	<b>class libraries and packages</b>	91
	the <code>import</code> declaration	92
	the <code>Random</code> class	95
2.8	<b>invoking class methods</b>	98
	the <code>Math</code> class	98
	the <code>Keyboard</code> class	98

<b>2.9</b>	<b>formatting output</b>	<b>103</b>
	the NumberFormat class	103
	the DecimalFormat class	105
<b>2.10</b>	<b>an introduction to applets</b>	<b>106</b>
	executing applets using the Web	110
<b>2.11</b>	<b>drawing shapes</b>	<b>111</b>
	the Graphics class	111
	the Color class	114
<b>chapter 3</b>	<b>program statements</b>	<b>129</b>
<b>3.0</b>	<b>program development</b>	<b>130</b>
<b>3.1</b>	<b>control flow</b>	<b>132</b>
<b>3.2</b>	<b>the if statement</b>	<b>133</b>
	equality and relational operators	136
	the if-else statement	137
	using block statements	140
	nested if statements	142
<b>3.3</b>	<b>the switch statement</b>	<b>144</b>
<b>3.4</b>	<b>boolean expressions revisited</b>	<b>148</b>
	logical operators	148
	comparing characters and strings	151
	comparing floats	153
<b>3.5</b>	<b>more operators</b>	<b>153</b>
	increment and decrement operators	153
	assignment operators	155
	the conditional operator	156
<b>3.6</b>	<b>the while statement</b>	<b>157</b>
	infinite loops	162
	nested loops	166
	the StringTokenizer class	169
	other loop controls	171

3.7	<b>the do statement</b>	173
3.8	<b>the for statement</b>	177
	comparing loops	181
3.9	<b>program development revisited</b>	183
3.10	<b>drawing using conditionals and loops</b>	188
 <b>chapter 4 writing classes</b>		209
4.0	<b>objects revisited</b>	210
	classes	211
4.1	<b>anatomy of a class</b>	212
	instance data	216
	UML diagrams	218
	encapsulation and visibility	
	modifiers	220
4.2	<b>anatomy of a method</b>	223
	the return statement	225
	parameters	231
	constructors	232
	local data	233
4.3	<b>method overloading</b>	233
4.4	<b>method decomposition</b>	235
4.5	<b>object relationships</b>	243
	association	243
	association between objects	
	of the same class	244
	aggregation	250
4.6	<b>applet methods</b>	255
4.7	<b>graphical objects</b>	256

<b>chapter 5</b>	<b>enhancing classes</b>	<b>269</b>
<b>5.0</b>	<b>references revisited</b>	<b>270</b>
the null reference		270
the this reference		271
aliases		272
garbage collection		275
passing objects as parameters		276
<b>5.1</b>	<b>the static modifier</b>	<b>282</b>
static variables		282
static methods		282
<b>5.2</b>	<b>wrapper classes</b>	<b>283</b>
<b>5.3</b>	<b>keyboard input revisited</b>	<b>287</b>
<b>5.4</b>	<b>nested classes</b>	<b>290</b>
inner classes		290
<b>5.5</b>	<b>interfaces</b>	<b>294</b>
the Comparable interface		300
the Iterator interface		300
<b>5.6</b>	<b>dialog boxes</b>	<b>301</b>
<b>5.7</b>	<b>graphical user interfaces</b>	<b>304</b>
essential GUI elements		304
creating GUIs		305
GUI applications		308
<b>chapter 6</b>	<b>arrays</b>	<b>319</b>
<b>6.0</b>	<b>arrays</b>	<b>320</b>
array indexing		320
declaring and using arrays		321
alternate array syntax		328
initializer lists		329
arrays as parameters		330
<b>6.1</b>	<b>arrays of objects</b>	<b>331</b>
arrays of string objects		331
command-line arguments		333
filing arrays of objects		333

<b>6.2</b>	<b>sorting</b>	<b>339</b>
	selection sort	341
	insertion sort	345
	sorting an array of objects	346
	comparing sorts	349
<b>6.3</b>	<b>two-dimensional arrays</b>	<b>350</b>
	multidimensional arrays	354
<b>6.4</b>	<b>the ArrayList class</b>	<b>355</b>
	ArrayList efficiency	358
<b>6.5</b>	<b>polygons and polylines</b>	<b>359</b>
	the Polygon class	361
<b>6.6</b>	<b>other button components</b>	<b>363</b>
	check boxes	363
	radio buttons	367
<b>chapter 7</b>	<b>inheritance</b>	<b>381</b>
<b>7.0</b>	<b>creating subclasses</b>	<b>382</b>
	derived classes	382
	the protected modifier	385
	the super reference	387
	multiple inheritance	389
<b>7.1</b>	<b>overriding methods</b>	<b>391</b>
	shadowing variables	393
<b>7.2</b>	<b>class hierarchies</b>	<b>394</b>
	the Object class	396
	abstract classes	401
<b>7.3</b>	<b>indirect use of class members</b>	<b>402</b>
<b>7.4</b>	<b>polymorphism</b>	<b>406</b>
	references and class hierarchies	407
	polymorphism via inheritance	408
<b>7.5</b>	<b>interfaces revisited</b>	<b>420</b>
	interface hierarchies	420
	polymorphism via inheritance	420

<b>7.6</b>	<b>inheritance and GUIs</b>	<b>422</b>
	applets revisited	423
	the component class hierarchy	423
<b>7.7</b>	<b>mouse events</b>	<b>425</b>
	extending event adapter classes	434
<b>chapter 8</b>	<b>exceptions and i/o streams</b>	<b>447</b>
<b>8.0</b>	<b>exceptions</b>	<b>448</b>
	exception messages	448
	the <code>try</code> statement	450
	the <code>finally</code> clause	453
	exception propagation	453
	the exception class hierarchy	454
	checked and unchecked exceptions	460
<b>8.1</b>	<b>input/output streams</b>	<b>461</b>
	character streams versus	
	byte streams	462
	data streams versus	
	processing streams	462
	the <code>IOException</code> class	464
<b>8.2</b>	<b>standard I/O</b>	<b>464</b>
	the <code>Keyboard</code> class revisited	465
<b>8.3</b>	<b>text files</b>	<b>467</b>
	reading text files	467
	writing text files	471
<b>8.4</b>	<b>object serialization</b>	<b>474</b>
	the <code>transient</code> modifier	478
<b>8.5</b>	<b>files and GUIs</b>	<b>480</b>
	file choosers	481
	color choosers	483
	image icons	486
	key events	489
<b>8.6</b>	<b>animations</b>	<b>494</b>
	the <code>Timer</code> class	494

<b>chapter 9 graphical user interfaces</b>	<b>507</b>
<b>9.0 preliminaries</b>	<b>508</b>
GUI review	508
GUI design	509
<b>9.1 layout managers</b>	<b>510</b>
flow layout	513
border layout	517
grid layout	520
box layout	523
<b>9.2 containment hierarchies</b>	<b>526</b>
<b>9.3 special features</b>	<b>528</b>
borders	535
<b>9.4 additional components</b>	<b>539</b>
scroll pane	539
split panes	542
lists	543
combo boxes	548
sliders	554
<b>9.5 events revisited</b>	<b>559</b>
<b>9.6 more about GUIs</b>	<b>561</b>
<b>chapter 10 software engineering</b>	<b>569</b>
<b>10.0 software development models</b>	<b>570</b>
software life cycle	570
software development models	573
iterative development	575
<b>10.1 testing</b>	<b>576</b>
walkthroughs	576
defect testing	577
<b>10.2 prototypes</b>	<b>579</b>
throw-aways vs. evolutionary prototypes	580

<b>10.3 evolutionary development</b>	<b>580</b>
establish refinement scope	582
identifying classes and objects	583
identifying relationships	584
detailed design	585
implementation	585
unit and integration testing	586
<b>10.4 the PaintBox project</b>	<b>586</b>
PaintBox requirements	587
PaintBox architectural design	589
PaintBox refinements	590
PaintBox refinement #1	590
PaintBox refinement #2	593
remaining PaintBox refinements	595
<b>chapter 11 recursion</b>	<b>603</b>
<b>11.0 recursive thinking</b>	<b>604</b>
infinite recursion	605
recursion in math	605
<b>11.1 recursive programming</b>	<b>606</b>
recursion vs. iteration	609
direct vs. indirect recursion	609
<b>11.2 using recursion</b>	<b>610</b>
traversing a maze	610
the Towers of Hanoi	616
<b>11.3 recursion in graphics</b>	<b>621</b>
tiled pictures	621
fractals	624
<b>chapter 12 data structures</b>	<b>637</b>
<b>12.0 collections</b>	<b>638</b>
separating interface from implementation	638

<b>12.1 representing data structures</b>	<b>639</b>
dynamic structures	639
a dynamically linked list	640
other dynamic list	
representations	645
<b>12.2 classic data structures</b>	<b>647</b>
queues	647
stacks	648
trees and binary trees	650
graphs and digraphs	651
<b>12.3 java API collection classes</b>	<b>653</b>
<b>appendix A glossary</b>	<b>661</b>
<b>appendix B number systems</b>	<b>681</b>
<b>appendix C the unicode character set</b>	<b>689</b>
<b>appendix D java operators</b>	<b>693</b>
<b>appendix E java bitwise operators</b>	<b>697</b>
<b>appendix F java modifiers</b>	<b>701</b>
<b>appendix G java coding guidelines</b>	<b>705</b>
<b>appendix H review checklist</b>	<b>711</b>

<b>appendix I comparing java to C++</b>	<b>715</b>
<b>appendix J an HTML tutorial</b>	<b>721</b>
<b>appendix K java exceptions and errors</b>	<b>741</b>
<b>appendix L java syntax</b>	<b>747</b>
<b>appendix M the java class library</b>	<b>761</b>
<b>index</b>	<b>907</b>
